WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, April 10, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, April 17, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

RULES

REPORTING STRUCTURAL ALTERATIONS, ADOPTED FEBRUARY 8, 1917, UNDER CAL. 352-16-S.

Resolved, That for the purpose of establishing uniform practice with regards to the reporting of structural alterations made under the requirements of the labor law, the following rule be and it is hereby adopted:

When plans have been filed with the proper superintendent of buildings and structural alterations have been made to comply with the requirements of the labor law relating to exits and fire protection, or with an order of the State

Labor Department relating to exits issued prior to October 1, 1916, or with an order of the fire commissioner issued subsequent to October 1, 1916, a report shall be made by the superintendent of buildings to the fire commissioner stating whether the work done complies with the order of the State Labor Department, with the order of the fire commissioner, or with the provisions of the State Labor Law, as the case may be.

THE RESOLUTION—

(272-28-A)

WHEREAS, Charles Brady, superintendent of buildings, filed, March 27, 1928, an appeal for revocation of Certificate of Occupancy No. 1195, affecting premises 153 West 57th street, Borough of Manhattan; and

WHEREAS, the Certificate of Occupancy No. 1195 was issued for the premises in question to Lucille B. Astergren, owner, on January 29, 1919; and

WHEREAS, the building is non-fireproof, six stories (62 ft. 10 in.) in height, 21 ft. 6 in. by 60 ft. in area; OCCUPIED: cellar, storage; 1st story, store; 2nd story, office and dwelling; 3rd to 6th stories, inclusive, dwellings; and

WHEREAS, the superintendent of buildings has petitioned the board of standards and appeals for the revocation of the certificate of occupancy now in force, upon the ground that at the time of issuing the certificate of occupancy the bureau of buildings required the stairway of the business portion of the building only to be enclosed with fire-resisting partitions, whereas, at the present time it is the policy of the bureau to require the stairway throughout such a building to be enclosed with fireproof materials; furthermore, the superintendent of buildings contends the building in question exceeding 40 ft. in height, having a mixed occupancy and containing twelve apartments is now considered to be a serious fire hazard.

Resolved, that Certificate of Occupancy No. 1195, issued to Lucille B. Astergren, owner, January 29, 1919, for premises 153 West 57th street, Borough of Manhattan, be and it hereby is *revoked*.

974-27-A.

APPELLANT—Voss Ice Machine Works, for Hygrade Provision Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—146 Broadway, Brooklyn.

THE RESOLUTION—

(974-27-A)

WHEREAS, Rudolph C. Becker, for Voss Ice Machine Works, for the Hygrade Provision Co., owner, filed, September 3, 1927, an appeal from an order of the fire commissioner, affecting premises 146 Broadway, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 13, 1927, reads:

"Order No. 12086-LC:

"1. Provide an emergency device for discharging the refrigerating agent under pressure to the sewer. The device must conform with the Fire Department Regulations, as per Section 217-1, Ch. 10, Code of Ord.;"

and

WHEREAS, the premises consist of a group of inter-connected buildings having a frontage of 90 ft. on Broadway, 68 ft. on South 8th street and a depth of 200 ft. and occupied principally as a meat packing plant; the building in question is non-fireproof, four stories and cellar in height, 22 ft. by 100 ft. in area; OCCUPIED: cellar, refrigerating room, 2 persons; 1st story, store and meat storage, 2 persons; 2nd story, vacant at present; 3rd story, manufacture of lamp wicks, 3 persons; 4th story, vacant at present; and

WHEREAS, in 1921 there was installed in the cellar of this building one 8 by 14 horizontal double-acting compressor, having a tonnage rating of approximately 13 tons; recently there has been installed another compressor identical to the original machine to be used in the event of a breakdown; and

WHEREAS, appellant contends that the original machine is provided with approved safety devices; that the new machine is connected up with these safety devices, and contends, further, that both machines will not be in operation at one

MINUTES

time and requests acceptance of the one set of safety devices; and

WHEREAS, a representative of the bureau of fire prevention reports that the order is being recommended for rescindment as not now enforceable because of amended ordinances.

Resolved, that the order of the fire commissioner be and it hereby is *dismissed*.

1183-27-A.

APPELLANT—C. A. Cochran, representing Benj. W. Morris, for Bank of New York & Trust Co., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—48-50 Wall street, Manhattan.

APPEARANCES—

For Appellant: Joel D. Marder.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE TO GRANT—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Chief
Kenlon 5

Negative 0

THE RESOLUTION—

(1183-27-A)

WHEREAS, Benjamin W. Morris, for Bank of New York and Trust Co., filed, November 7, 1927, an appeal from a decision of the superintendent of buildings, affecting premises 48-50 Wall street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated November 3, 1927 (Applic. No. 270-1927), reads:

"8. Not more than 2 elevators may be placed in one Shaft, Sec. 373."

and

WHEREAS, the proposed building is fireproof, thirty stories in height, 99 ft. 4 in. by 126 ft. 6 in. in area; OCCUPIED for banking and office purposes, not more than 190 persons on any story; and

WHEREAS, the appellant proposes to install a bank of nine elevators along the easterly side wall of the building; to provide three shafts for the first six elevators, operating two elevators in each shaft, and one shaft for the operation of the remaining three elevators; and

WHEREAS, the appellant claims that each car will have a side emergency door in addition to the top emergency exit; that a car, if operated in a single shaft will cause rapid changes in air pressure, also noise and draft due to the car acting as a plunger; furthermore, the appellant contends that the operation of three cars in a shaft would be more efficient in case of fire or accident; and

WHEREAS, the elevator equipment consists of a battery of nine elevators, separated in banks of four shaftways with two elevators to each of three shafts and three in the fourth shaft.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the northerly shaft of the elevators on the easterly wall, permitting not more than three elevators in this single shaftway, *on condition* that the remainder of the battery of elevators shall be separated into banks of not more than two elevators to each shaftway, and *on condition* that the elevators throughout shall otherwise be installed in all respects in accordance with the requirements of law now in force, and that all permits required shall be obtained within ninety days and any work involved completed before the use and operation of this one shaftway for public use.

981-27-A.

APPELLANT—C. W. Burke, for Coney Island & Brooklyn R. R. Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—North side of DeKalb avenue, 202 feet west of Onderdonk avenue, Brooklyn.

APPEARANCES—

For Appellant: Charles W. Burke.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

THE RESOLUTION—

(981-27-A)

WHEREAS, C. W. Burke, for Coney Island and Brooklyn Railroad Co., owner, filed, September 7, 1927, an appeal from an order of the fire commissioner, affecting premises north side of DeKalb avenue, 202 ft. west of Onderdonk avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 18, 1927 (Order No. 12142-LC), reads:

"You are hereby notified that an inspection of the above premises, used for the storage of fuel oil shows that the following must be done before the permit requested by you can be issued:

FORTHWITH

"1. Discontinue the storage and use of fuel oil on the above premises until such time as plans have been filed with and approved by the Fire Commissioner, and the fuel oil system installed in accordance with these plans, and the present Fuel Oil Rules.

"2. Order 2866-F, dated Nov. 5, 1926, must be complied with.

"1. File plans for standpipe system, said plans must be approved by the Fire Commissioner and conform to Section 20, Chapter 12, Code of Ordinances and the Rules of the Board of Standards and Appeals."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 366 ft. on DeKalb avenue, 363 ft. on Willoughby avenue and a depth of 700 ft., upon which are located the yard and car repair shop of the Coney Island Railroad; the car repair shop is non-fireproof, constructed of brick and concrete with unprotected steel trusses, one clear story (30 ft.) in height, 202 ft. 2 in. by 700 ft., irregular (approximately 135,000 sq. ft.) in area; OCCUPIED as a car repair shop, 525 persons in entire premises; and

WHEREAS, the car shops are equipped with a fuel oil burning installation for the heat treatment of metal; and

WHEREAS, appellant contends that the building is protected with a sprinkler system provided with a 50,000-gallon storage tank with a 1,000-gallons-per-minute electric pump; that the yard is protected with yard hydrants spaced not less than 125 ft. apart throughout the entire yard, the source of supply being from the sprinkler system supply, but same can be used independently of the sprinkler system by means of valves, and contends, further, that the shop is equipped with a standpipe system fed from a four-inch city main in DeKalb avenue, and that this standpipe system differs from the required system in that there are three one-inch hose connections in the paint shop and branch connections are made to supply three small toilets.

Resolved, that the orders of the fire commissioner be and they hereby are *affirmed*, and the appeal be and it hereby is *denied*.

1186-27-A.

APPELLANT—W. Wilcox, for Union Theological Seminary, owner.

SUBJECT—Appeal from order and decisions of the fire commissioner.

THE RESOLUTION—

(1186-27-A)

WHEREAS, W. Wilcox, for Union Theological Seminary, owner, filed, November 9, 1927, an appeal from an order and decisions of the fire commissioner, affecting premises 3041 Broadway, 601 West 120th street, 600-606 West 122nd street,, 80 Claremont avenue and 99 Claremont avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 26, 1926 (Order No. 2457-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the decisions of the fire commissioner, dated October 25, 1927, read:

"Plan No. 677-27:

"2. Disconnect the cross connection of college buildings with apartment located at 99 Claremont Avenue.";

and

"Plan No. 2652-27:

"2. Omit 5" cross connection to building on other side of street as source of supply to standpipe system.

"3. Provide a gravity tank of at least 3,500 gallon capacity elevated 20 feet above roof with all appurtenances.";

and

WHEREAS, the premises consist of eight fireproof buildings (all attached, except one), four, five, six, seven and eight stories and tower (54 ft. to 139 ft.) in height, 2,100 sq. ft. to 9,300 sq. ft. in area, with all communicating openings provided with fire doors; OCCUPIED as a theological seminary and an apartment house; and

WHEREAS, the appellant proposes to provide two pumps in the cellar of 200 gallons capacity each per minute, a separate standpipe tank of 3,750 gallons capacity on the new tower extension (at northwest corner of 120th street and Broadway) to supply standpipe lines in the tower down to the main roof of the old building, with a five-inch cross connection at foot of line extending through tunnel to the four-inch rising line in the new lecture hall building located on east side of Claremont avenue, also extending under Claremont avenue connecting with the four-inch rising line in the apartment house located on the west side of Claremont avenue, also to provide a new siamese connection on 120th street front and one on Claremont avenue front; the existing standpipe tank on roof of the apartment house on west side of Claremont avenue to be removed; and

WHEREAS, the appellant claims, as to Order No. 2457-F, that the old existing buildings are provided with three-inch standpipes, fed from the street mains, and siamese connections on each street front; that the largest floor area is less than 10,000 sq. ft.; that the entire standpipe system did conform with the regulations in force at the time of erection in 1909, also that a franchise has been obtained from the city for an underground pipe tunnel across Claremont avenue; furthermore, the appellant contends that to rip the existing three-inch standpipe lines out of the old buildings

and relace them with four-inch pipe would cause an undue hardship and a large expense to the owner.

Resolved, that the order and the decisions of the fire commissioner be and they hereby are *affirmed*, and the appeal be and it hereby is *denied*.

BUILDING ZONE CASES

1126-27-BZ.

APPLICANT—Edward Hoffmann, for Pauline Brickman, owner.

THE RESOLUTION—

(936-27-BZ)

WHEREAS, Philip J. Sinnott, for Benjamin Siegel, owner, filed, August 19, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner of Fiske avenue and Queens boulevard, Winfield, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Queens boulevard is in a business district; Fiske avenue, north of Queens boulevard, is in a business district; Fiske avenue, south of Queens boulevard, east side, from 47th avenue to a point 100 ft. south of Queens boulevard, is in an unrestricted district; Fiske avenue, south of Queens boulevard, west side, between a point 100 ft. north of 47th avenue and a point 100 ft. south of Queens boulevard, is in an unrestricted district; 47th street, east of Fiske avenue, north side, is in an unrestricted district; 47th street, east of Fiske avenue, south side, from Fiske avenue to a point 100 ft. east, is in a business district; 47th street, east of Fiske avenue, south side, east of a point 100 ft. east of Fiske avenue, is in an unrestricted district, and 47th street, west of Fiske avenue, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 3, 1927 (re App. No. 4336-1926), reads:

"1. A gasoline service station may not be permitted in a business district.";

and

WHEREAS, the premises consist of an irregular-shaped plot of ground having a frontage of 67.12 ft. on Queens boulevard and 73.25 ft. on Fiske avenue, upon which it is proposed to erect a one-story office, 15 ft. by 20 ft. in area, and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(1016-27-BZ)

WHEREAS, Arthur B. Daub, for Max Daub, owner, filed, September 16, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southeast corner of Walker boulevard and Outerbridge avenue, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Walker boulevard, Outerbridge avenue and Bridge Plaza are in business districts; and

WHEREAS, the decision of the fire commissioner, rendered August 31, 1927 (re Plan No. 2611-1927), reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals."

and

WHEREAS, it is proposed to erect a non-fireproof office, 22 ft. by 22 ft., bury two 550-gallon tanks and erect three pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deemed it against public interest to grant a variation for a gasoline service station, unsupported by local requirement in this virgin territory, and located at the contemplated public plaza, notwithstanding the consents by property all in one ownership amounting to 100 per cent. of the area deemed by the board to be affected, and that the consenting property should more properly apply to the Board of Estimate and Apportionment for a change of use district; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal under section 21 of the building zone resolution on the grounds of practical difficulty and unnecessary hardship.

Resolved, that the decision of the fire commissioner be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

1102-27-BZ.

APPLICANT—Philip J. Sinnott, for Bon Ton Holding Corp., owner.

THE RESOLUTION—

(1102-27-BZ)

WHEREAS, Philip J. Sinnott, for Bon Ton Holding Corp., owner, filed, October 11, 1927, an application, under the building zone resolution, to permit the extension, from an unrestricted district into a business district, of a proposed garage for the storage of more than five motor vehicles; premises west side of Broadway, 150 ft. south of West 240th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Corlear avenue, between a point 100 ft. north of 238th street and 240th street, is in an unrestricted district; Broadway, west side, forming a triangle east of a line parallel with and 100 ft. east of Corlear avenue, is in a business district; West 238th street is in a business district; Broadway, east side, south of 240th street, is in a business district, and Broadway, east side, north of 240th street, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 15, 1927, reads:

"1. Erection of public garage for storage of more than five motor vehicles partly in a business district and partly in unrestricted district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is to be non-fireproof, two stories and basement in height, having a frontage of 75 ft. on Broadway and 105.79 ft. on Corlear avenue; the westerly portion of the building (approximately 10,600 sq. ft.), is in the unrestricted district and the easterly portion (approximately 5,000 sq. ft.), is in the business district; the building to be occupied as a garage for more than five motor vehicles; and

WHEREAS, there exists on this street front, between intersecting streets, a public garage, the board is empowered to act under section 7, subdivision e; and

WHEREAS, this plot on the Broadway front is cut by two use districts—business and unrestricted—the board is empowered to act under section 7, subdivision c.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure shall be restricted in height to a building not exceeding two stories above grade on the Broadway front; that the building shall be constructed fireproof throughout; that the roof shall be of flat design and construction; that the exterior of the Broadway elevation shall be finished with face brick and architectural terra cotta or natural

MINUTES

stone trimming; that any advertising displayed on front of building shall be restricted to flat wall signs and not more than one projecting electric sign, indicating the name and title of the business conducted on the premises; that no portable gasoline tanks shall be operated on these premises within the business use area of the plot, and that all permits required shall be obtained within nine months and any work involved shall be completed within one year from the date of this action.

787-27-BZ.

APPLICANT—Philip J. Sinnott, substituted for Louis A. Sheinart, for Edis Realty Co., Inc.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution to permit partly in a business district and partly in a residence district, the erection and maintenance of a gasoline service station (previously denied).

PREMISES AFFECTED—Northeast corner of Bay Ridge avenue and Shore road, Brooklyn.

APPEARANCES—

For Applicant: Philip J. Sinnott.

For Opposition: None.

THE RESOLUTION—

(787-27-BZ)

WHEREAS, Louis A. Sheinart, for Edis Realty Co., Inc., owner, filed, July 7, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a gasoline service station; premises northeast corner of Bay Ridge avenue and Shore road, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bay Ridge avenue is in a business and residence district, Shore road is in a residence district and 68th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 24, 1927 (re Applic. No. 11508-1927), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3 and Sec. 4-a, 46.

"The erection of a building for a gasoline service station partly in a residential and partly in a business district."

and

WHEREAS, the premises consists of a plot of ground with a frontage of 40 ft. on Shore road and 120 ft. on Bay Ridge avenue; it is proposed to remove present frame office, erect an office and an ornamental frame shed covering the front portion of the lot, rearrange and bury four 550-gallon tanks and erect seven pumps for the purpose of enlarging and conducting a gasoline service station located partly in a business district and partly in a residence district; and

WHEREAS, there is in force a permit for the conduct and operation of a gasoline service station on these premises; and

WHEREAS, the adjoining property to the north on Shore road is in the same ownership and there exists on the rear of the Bay Ridge avenue lot of this plot an existing garage.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use dis-

trict regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it is restricted to a plot fronting 40 ft. on Shore road, *on condition* that there shall be erected along the northerly property line of this property a brick wall; that the Shore road frontage and the Bay Ridge avenue frontage shall be maintained open; the roof or cover of gasoline station to be supported by not less than four free-standing columns of attractive architectural design; that there shall be erected along the building line on the Shore road frontage and the Bay Ridge avenue frontage a concrete curbing at the building line not less than 12 inches in height above grade, other than the driveway entrances and exits to the property on the Bay Ridge avenue front; that the interior of the northerly enclosing wall shall be finished with enamel brick; that the entablature of the covering on the street front shall be of architectural terra cotta or light enamel brick; that the property shall not be enclosed on the street or avenue frontage; that there shall be no portable gasoline tanks operated or maintained on these premises; that there shall be no grease racks or crankcase service frames installed or maintained on these premises; that any advertising displayed shall be confined to the frieze of the entablature or the globes of the gasoline pumps; that the architect shall make a return of the drawings to this board for approval in accordance with resolution; that all permits required shall be obtained within six months and all work completed within one year from the date of this action.

THE RESOLUTION—

(1190-27-BZ)

WHEREAS, Charles A. Peabody, owner, filed, November 10, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles and also a gasoline service station; premises 400-414 West 155th street and 91-99 St. Nicholas place, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 155th street is in a business and residence district, St. Nicholas place is in a residence district and St. Nicholas avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 1, 1927 (re App. No. 467-1927), reads:

"1. The location of a garage in a business district

MINUTES

and extending into a residence district is unlawful. Zoning Resolution, Art. II, Sec. 3 and 4.

"2. The location of a gas service station in a business district is unlawful. Zoning Resolution, Art. II, Sec. 4."

and
WHEREAS, the proposed building is to be of non-fireproof construction, one and three stories in height, with a frontage of 154 ft. 3¾ in. on West 153th street and a depth of 144 ft. 1¼ in.; to be occupied as a garage for more than five motor vehicles and a gasoline service station; and

WHEREAS, documentary proof of an existing garage building and the occupancy of the remainder of plot by individual garage units prior to the adoption of the building zone resolution was filed in the appeal; and

WHEREAS, the board has intimate knowledge of the property involved, the surrounding streets and conditions; and

WHEREAS, under section 7, subdivision e, of the building zone resolution, the board is empowered to act.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the proposed structure erected thereon shall be restricted to a building not exceeding three stories in height above curb level on the St. Nicholas place frontage, following the grade of the street westerly and not exceeding a one-story building in height above grade at the extreme westerly line of premises; that the entire building shall be of fireproof construction throughout; that the westerly and southerly gable walls shall be unpierced throughout their entire height and length; that the elevations on street fronts shall be finished with face brick or architectural terra cotta or natural stone trimmings and shall be of attractive architectural design on perpendicular Gothic lines; that the applicant shall make a return of the drawings to this board for approval in accordance with the foregoing resolution; that there shall be no roof signs erected or maintained; any advertising signs displayed on the street front shall be restricted to flat wall signs and not more than one electric projecting sign on either street front; that all permits required shall be obtained within nine months and all work completed within eighteen months from the date of this action.

33-28-BZ.

APPLICANT—William F. Doyle, for L. Haas Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the alteration and change of occupancy from a garage for the storage of five (5) motor vehicles to a motor vehicle repair shop.

THE RESOLUTION—

(33-28-BZ)*

WHEREAS, William F. Doyle, for L. Haas Realty Corp., owner, filed, January 16, 1928, an application, under the building zone resolution, to permit in a business district the alteration and change of occupancy from a garage for the storage of five motor vehicles to a motor vehicle repair shop; premises 1367 Macombs road, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Macombs road is in a business and residence district, Jerome avenue is in a business and residence district and Inwood avenue is in an unrestricted district; and

WHEREAS, the order of the superintendent of buildings, rendered January 29, 1926 (re Viol. No. 713-1925), reads:

"You will please take notice that there exists a violation of Section 5 of the Building Code at the premises hereinafter described, in that of changing the occupancy of said building from a garage for not more than 5 cars and show room, to a motor vehicle repair shop, same being contrary to law."

and

WHEREAS, the premises under this application are entirely within a business district, occupied as a garage for five cars, comprising the easterly portion of a building extending through the block from Macombs road to Inwood avenue; the westerly portion facing Inwood avenue is entirely within an unrestricted district and occupied as a garage for more than five cars; it is proposed to construct a doorway and ramp 12 ft. in width connecting the two portions of the building and to use the premises under this application as a motor vehicle repair shop; and

WHEREAS, the existing building running from Inwood avenue to Jerome avenue embraces a plot 225 ft. in depth; and

WHEREAS, 100 ft. from Macombs road is restricted by reason of the business use designation; and

WHEREAS, it is proposed to conduct in conjunction with the entire premises, which is used and operated in single tenancy, a limited motor vehicle repair shop; and

WHEREAS, under section 4, subdivision c, this property within the business area is entitled to industrial uses under single tenancy and operation.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, connecting the Inwood avenue section with the Macombs road section by a single door in the rear dividing wall, not exceeding a width of 9 ft., for the use and accommodation of the premises in single tenancy and operation, permitting the conduct, operation and use of the Macombs road frontage for motor vehicle repairs incidental to the conduct and operation of garage, restricting the repair work to that of manual operation; that there shall be no anvils, open flames or furnaces maintained or operated in conjunction with this business other than a one-half horsepower portable electric drill; that there shall be no gasoline storage equipment installed and maintained within the business use area of the Macombs road frontage, and that all permits shall be obtained within ninety days and any work involved shall be completed within six months from the date of this action.

573-26-BZ.

APPLICANT—John J. Dunnigan, for East Fordham Road Syndicate, Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit the extension from a business district into a residence district of a proposed building to be used for business purposes. (Variation previously granted on condition.)

PREMISES AFFECTED—636 East Fordham road, southwest corner of Belmont avenue, The Bronx.

THE RESOLUTION—

(573-26-BZ)

WHEREAS, John J. Dunnigan, for East Fordham Road Syndicate, Inc., owner, filed, June 24, 1926, an application, under the building zone resolution, for amendment and modification of the previous resolution, to permit the extension, from a business district into a residence district, of a proposed building to be used for business purposes; premises 636 East Fordham road, southwest corner of Belmont avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Fordham road is in a business district, Belmont avenue is in a residence district and East 189th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 22, 1926 (re N. B. 1514-1926), reads:

"1. Erection of business building partly in business and partly in residence district is contrary to provisions of Building Zone Resolution."; and

WHEREAS, the southerly portion of the existing building extends for a distance of 47.34 ft. into the residence district, the remainder being in a business district; the original resolution in this matter was granted December 7, 1926, on condition that the rear and gable walls shall be unpierced throughout their entire height and length; that no door opening on the Belmont avenue front shall exceed a width of 3 ft. 8 in.; any openings within the residence area district on the Belmont avenue front shall be restricted to double-hung windows, the sills of which shall be not less than 4 ft. 6 in. above sidewalk grade; that the elevations on the street front, other than the show windows, shall be finished with face brick and architectural terra cotta or stone trim; that there shall be no signs or advertising of any nature or description displayed within the residence area

of the plot, and that all permits required shall be obtained within nine months and all work involved thereby to be completed within eighteen months from the date of this action; applicant now requests permission to erect a one-story building having a frontage of 47.34 ft. and a depth of 25 ft., as a separate store, upon the southerly end of the plot; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision c, and that he was entitled to relief under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the first story of the plot within the residence use area of the premises, *on condition* that the rear and gable walls shall be unpierced throughout their entire height and length; that any advertising exposed or displayed on the exterior of the building within the residence use area of the plot shall be restricted to the plate glass show windows of store front; no portion of premises within the residence use area shall be rented or used or occupied as a fish store, meat or produce market or delicatessen shop, and that all permits required shall be obtained within ninety days and any work involved shall be completed within six months from the date of this action.

AREA FIXED.

(726-27-BZ)

The chairman presented and read a communication from Samuel Rosenblum, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises north side of Queens boulevard, 24.5 ft. west of 47th street, Elmhurst, Borough of Queens.

The following area was approved by the board:

Both sides of Queens boulevard from a point 100 ft. west of 74th street (17th street) to a point 400 ft. east of the premises in question (not including the unrestricted district extending east and west of South Railroad avenue).

Adjourned 5.20 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION—

(1179-27-S)

WHEREAS, Croker National Fire Prev. Eng. Co., for Wako Co., Ltd., owner, filed November 3, 1927, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 18 East 53rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 20, 1927 (Order No. 17976-LD), reads:

"1. Remove all partitions not built of incombustible materials as per Sections 263 and 270 of the Labor Law;"

and

WHEREAS, the building is fireproof, 14 stories and pent house in height, 40 ft. by 100 ft. 5 in. in area at 1st story; OCCUPIED: cellar, storage; 1st story, milliner, 20 persons; 2nd story, office, 6 persons; 3rd story, vacant; 4th story, dressmaking, 30 persons; 5th story, tailor, 8 persons; 6th story, tailor, 27 persons; 7th story, gowns, 60 persons; 8th story, office and beauty parlor, 13 persons; 9th story, office, 9 persons; 10th story, office, 16 persons; 11th story, dressmaking, 20 persons; 12th story, dressmaking, 24 persons; 13th story, dressmaking, 25 persons; 14th story, dressmaking, 20 persons; pent house, dentist, 4 persons; EQUIPPED with a fire alarm signal system; EXITS: a fire tower; an interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims that Fire Department Order No. 17976-LD applies to parts of all stories except the 3rd and 10th stories; that the wood partitions are of an ornamental nature, 6 ft. 6 in. to 7 ft. 6 in. in height and do not interfere in any way with the required means of egress; that the partitions were erected under heavy expense and in most cases where no manufacturing is done; furthermore, the petitioner contends that the building is not used for more than 25 per cent manufacturing;

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the petition be and it hereby is denied.

THE RESOLUTION—

(1170-27-S)

WHEREAS, Sugarman & Berger, for Harley Realty Corp., owner, filed November 1, 1927, a petition for variation from the requirements of the labor law, as cited in a decision of

MINUTES

the superintendent of buildings, affecting premises Nos. 348-50 Seventh avenue and 207-09 West 29th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated October 24, 1927 (N. B. 170-27), reads:

"10. Size of windows and window panes must conform to Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, 21 stories in height, "L" shape, having a frontage of 38 ft. on West 29th street, 38 ft. on Seventh avenue and a depth of 121 ft.; OCCUPIED: 1st story, stores; upper stories, tenant factories, 70 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings, on the 1st, 2nd and 3rd stories in both street walls of the building, glazed with polished plate glass, the maximum area of the glass in the 1st story being 8 ft. 6 in. by 8 ft. 10 in.; on the 2nd story, being 3 ft. by 7 ft., and on the 3rd story, being 3 ft. by 6 ft. 6 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lowest three stories;

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the windows on the three lower stories on the street fronts *on condition* that all openings shall be equipped with approved metal frames and sash, glazed with one-quarter inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

884-27-S.

PETITIONER—Edward P. Doyle, for McFadden Publications, owner.

SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—1926-1932 Broadway, Manhattan.

APPEARANCES—

For Petitioner: Edward P. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners

THE RESOLUTION—

(884-27-S)

WHEREAS, Edward P. Doyle, for McFadden Publications, owner, filed August 4, 1927, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 1926-32 Broadway, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated April 30, 1927, read:

"Order No. 19108-LD-1. Provide egress to the street from both interior stairways, by means of a passageway enclosed in fire resisting material as per Sec. 271 of the Labor Law.

"Order No. 19109 LD-1. Remove all articles from centre stairway on 1st story (Cigar and Bootblack stand), as per rule 10, Board of Standards and Appeals, adopted Feb. 23, 1927.

"Order No. 19110 LD-1. Remove revolving door leading to street from center stairway B'way side of Building. Sec. 271 of the Labor Law.

"2. Reduce the area of wire glass in hallways of

both stairways all stories including cellar so that same does not exceed 720 square inches and no one pane exceed 360 square inches, as per rule 505 of the Industrial Code.";

and

WHEREAS, the building is fireproof, 6 stories and basement in height, 173 ft. 11½ in. by 109 ft. 10 in. in area; OCCUPIED: basement, garage, 10 persons; 1st story, stores and auto showrooms, 42 persons; 2nd story, garage and service station, 20 persons; 3rd story, newspaper offices, 97 persons; 4th story, manufacture of medical powders, auto painting and machinists, 29 persons; 5th story, newspaper office, 150 persons; 6th story, 150 persons; 446 persons above the 1st story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the basement to roof, each enclosed in fireproof partitions with wire glass paneled fireproof doors at all openings, including basement story; the maximum area of the wired glass being 900 square inches; EGRESS on the 1st story from the termination of the rear stairway being through a driveway leading to West 65th street—the partitions forming the westerly side of the driveway being constructed of wood; the egress from the termination of the center stairway to Broadway on the first story being through a corridor having wood doors and also plate glass panels in the side walls of same; there being a revolving door at the Broadway front of the main entrance to the building; a fire escape in the rear court of the building, having fireproof openings along the course thereof, extending from the top story to the rear court, with egress at 1st story through building to driveway to street; ROOFS of adjoining buildings: to north, 20 ft. lower; to east, same height; and

WHEREAS, petitioner contends that the stands in the main corridor do not interfere with the means of egress and that the number of persons in this building engaged at factory work is small and requests the acceptance of existing conditions;

Resolved, that the orders of the fire commissioner be and they hereby are *affirmed*, and that the petition be and it hereby is *denied*.

1041-27-S.

PETITIONER—Saul Goldsmith, for Weisgott Realty Corp., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—26 Allen street, Manhattan.

APPEARANCES—

For Petitioner: Saul Goldsmith.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION—

(1041-27-S)

WHEREAS, Saul Goldsmith, for Weisgott Realty Corp., owner, filed September 22, 1927, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner affecting premises No. 26 Allen street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 26, 1927 (Order No. 25687-LD), reads:

"1. Arrange the fire escape at the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method

MINUTES

of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"NOTE—Among the defects noted are the following:

"No fireproof passage from termination to street. No counterbalanced stairway from lowest balcony to ground.";

and

WHEREAS, the building is non-fireproof, 3 stories in height, 25 ft. by 60 ft. in area; OCCUPIED: 1st story, store; 2nd story, manufacture of neckties and quilts, 7 persons; 3rd story, manufacture of dresses and storage of quilts, 4 persons; EXITS: an interior wooden stairway, extending from the 1st story to roof; enclosed in metal lath and 3/4-inch P. C. plaster partitions with fireproof doors at openings; a 60 degree fire escape on the rear of the building, having fireproof openings along the course thereof, excepting from the top story balcony to the 2nd story balcony with drop ladder in guides to yard; with EGRESS from the termination of the fire escape by means of gate in fence leading to yard of premises to the south—with egress from yard to street by means of passageway at street level. ROOFS of adjoining buildings: to south, 25 feet higher; to north, 10 feet higher; and

WHEREAS, petitioner requests the acceptance of the existing means of egress in view of the light occupancy of the building;

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the two defects as noted above *on condition* that the fire escape shall comply with the labor law in all other respects other than the stairs from the termination; that a drop ladder in guides shall be provided from the lowest balcony to the grade of the yard level, with egress from the termination of the fire escape through opening in the fence to adjoining yard to the south, with egress therefrom through passageway of adjoining building direct to the street; that the occupancy shall be restricted to twelve persons above the first story; and that the building shall be not increased in height or area.

1201-27-S.

PETITIONER—Samuel Rosenblum, for Harry K. Norian, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner and decision of superintendent of buildings.

PREMISES AFFECTED—104 Lexington avenue, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION—

(1201-27-S)

WHEREAS, Samuel Rosenblum, for Harry K. Norian, owner, filed November 11, 1927, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner and in a decision of the superintendent of buildings, affecting premises No. 104 Lexington avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 26, 1927 (Order No. 26294-LD), reads:

"1. Provide an outside iron balcony fire escape on rear of building with balconies 4' in width connected by stairways no less than 22" wide, placed at an incline

of not more than 45 degrees; extending from ground to roof, constructed as per Sec. 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Sec. 271 of the Labor Law.";

and

WHEREAS, the decision of the superintendent of buildings, dated November 10, 1927, reads:

"2. Secondary means of exit remote from existing stairway must be provided on 2nd, 3rd and 4th floors, in accordance with Sec. 271, Labor Law.";

and

WHEREAS, the building is non-fireproof, 4 stories (48 ft.) in height, 19 ft. 9 in. by 80 ft. in area at 1st story, and 19 ft. 9 in. by 55 ft. in area above; OCCUPIED: 1st story, store and manufacture of umbrellas, 8 persons; 2nd and 3rd stories, vacant at present, proposed occupancy of 10 persons on each story; 4th story, manufacturing, furrier, 5 persons; EXITS: an interior wooden stairway, extending from the 1st story to roof, enclosed in fire retarding partitions with fireproof doors at openings; a proposed 45 degree fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the top story balcony (with gooseneck ladder to roof) to the 2nd story balcony; with EGRESS from the termination of the fire escape by means of a counterbalanced drop ladder to the yard of the adjoining building to the north; with egress from yard through glass paneled wooden door in building (No. 106 Lexington avenue) and thence to street; ROOFS of adjoining buildings: to north, 1 story higher; to south, 1 story lower; and

WHEREAS, petitioner proposes to provide on the first story of the building, a door in the north wall, at the rear of the building, leading to the rear yard of the premises to the north and requests the acceptance of the proposed means of egress;

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted* as to fire department order No. 26294-LD, and the decision of the superintendent of buildings, dated November 10, 1927, objection No. 2, only so far as it affects the egress from the termination of the proposed rear fire escape at the second story level, *on condition* that a counterbalanced stairs shall be provided from the balcony at second story level, terminating in the yard of adjoining premises to the north, No. 106 Lexington avenue, with egress from the yard of No. 106 Lexington avenue to the open yard of the premises directly to the rear, No. 131 East 27th street, and through building direct to the street; that a gooseneck ladder shall be provided from the top story balcony to the roof, and that the labor law be complied with in all other respects, and that the building shall not be increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

624-27-S.

PETITIONER—William L. Lange, for R. & L. Holding Co., Inc., owner.

SUBJECT—Application for reopening—reconsideration, previously denied—re variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—225-227 East 24th street, Manhattan.

APPEARANCES—

For Petitioner: Charles H. Young.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and granted on condition.

THE RESOLUTION—

(627-27-S)

WHEREAS, William L. Lange, for R. & L. Holding Co., Inc., owner, filed June 2, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 225-227 East 24th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 3, 1927 (Order No. 19329-LD), reads:

"1. Prove an additional means of exit from the cellar, said exit to be located at the rear of the building in accordance with the provisions of Sec. 271 of the Labor Law.

"2. Enclose the interior stairway, southwest side of building, and the landings, platforms and passageways connected therewith in partitions of fire resisting material from cellar to 3' above roof as per Sec. 271 of the Labor Law and the rules of the Board of Standards and Appeals adopted July 29, 1924."

and

WHEREAS, the building is non-fireproof, five stories and basement in height, 39 ft. by 100 ft. in area; OCCUPIED by one concern for the manufacture of banjos and mandolins: basement, storage and nickel plating, 5 persons; 1st story, office and stock room, 10 persons; 2nd story, bench work and assembling, 20 persons; 3rd story, machine shop and assembling, 20 persons; 4th story, wood turning, 20 persons; 5th story, wood finishing, 20 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to top story, with iron ladder leading to scuttle in roof, enclosed in plaster board partitions covered with $\frac{3}{4}$ in. plaster, with wooden doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the top story (with ladder to roof) to the yard, with EGRESS from the termination of the fire escape by means of open yards to neighboring tenement houses; ROOFS of adjoining buildings: to west, 5 ft. higher; to east, 50 ft. lower; and

WHEREAS, petitioner contends that the occupancy of the building is light; that fire drills are regularly conducted and proposes to install an iron ladder at the rear of the basement leading to an opening in the floor of the first story, opening being protected by a two-section iron door which can be raised from the basement side of floor; and

WHEREAS, this petition was denied by the board November 15, 1927, and reopened by vote of the board,

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the existing stairway enclosure shall be covered throughout on the loft side with 26 gauge metal; that all doors leading to the stairway enclosure shall be made fireproof, self-closing; and that the occupancy shall not exceed 35 persons above the second story.

92-27-S.

PETITIONER—Francisco & Jacobus, for Lehmaier, Schwartz & Co., owner.

SUBJECT—Application for reopening—modification—re variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—511-519 West 25th street, Manhattan.

APPEARANCES—

For Petitioner: R. F. Jacobus.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and granted.

THE VOTE TO REOPEN AND GRANT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Deputy Chief Martin 4

Negative 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION—

(92-27-S)

WHEREAS, Francisco & Jacobus, for Lehmaier, Schwartz & Co., owner, filed January 28, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 511-519 West 25th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 27, 1926 (Order No. 6893-LF), reads:

"1. Install an adequate interior electric fire alarm system in accordance with the rules of the Board of Standards and Appeals and the enclosed approved layout."

and

WHEREAS, the building is fireproof, 8 stories and pent house in height, 100 ft. by 99 ft. 2 in. in area at 1st story and 100 ft. by 88 ft. in area above; OCCUPIED by one concern for the manufacture of tinfoil: basement, 10 persons; 1st story, 110 persons; 2nd story, 110 persons; 3rd story, 140 persons; 4th story, 90 persons; 5th story, 6 persons; 6th story, no persons; 7th story, 1 person; 8th story, 20 persons; pent house, 1 person; a total of 488 persons in the entire premises; EQUIPPED with an automatic sprinkler system with a two-source supply, a 30,000-gallon tank 31 in. above the roof and a connection to the city main; there being, also, a siamese connection at the street front; EXITS: two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fireproof enclosed stairway (at the northwest corner), extending from the roof to the 5th story and thence by means of a connecting balcony to the roof of the 4-story building (under the same ownership) to the west, and, also, horizontal exits on the 1st to 4th stories, inclusive, leading to the building to the west; and

WHEREAS, petitioner contends that the sprinkler system was approved by the fire department in 1917 and that the building is sprinklered throughout with the exception of the stairways and over certain portions of the basement which are used for melting lead and other materials, contending that the omission of the sprinkler heads over the molten lead pots is a physical necessity and in view of the existing sprinkler system petitioner requests the omission of the required fire alarm system; and

WHEREAS, this petition was denied by the board at its meeting May 3, 1927, and reopened by vote of the board;

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the existing sprinkler system shall be maintained in good working order throughout the premises, other than in the fireproof stairhall enclosure and to within ten feet of the existing molten lead furnaces; that the building shall be not increased in height or area; and this variation is *granted* so long as conditions as to occupancy and use otherwise remain unchanged.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

RULES

RULES FOR THE TESTING OF WOOD

Pursuant to the Provision of Section 356 of Chapter 5 of the Code of Ordinances (Building Code).

(639-27-SR)

Adopted by the Board of Standards and Appeals July 22, 1927. Amended March 16, 1928.

Rule 1. Before any wood may be used for flooring or interior trim where incombustible materials are required under the provisions of section 356 of the Building Code, the superintendent of buildings must be notified promptly upon the delivery at the job of a consignment of such material. One test sample for each 2,000 feet of material will then be selected by a representative of the Bureau of Buildings, marked for identification, and forwarded to the testing laboratory, where, under the supervision of the superintendent of buildings or his representative, the samples shall be subjected to the following tests:

Before making tests of all specimens for testing shall be oven dried at a temperature of 140° F. to a point where there is no further loss of weight due to evaporation of moisture content.

A. SHAVING TEST—A mass of shavings cut fairly thick from the outside and interior of sticks of the treated wood are to be tested separately. These shavings shall be placed to a depth of two inches in a metal vessel twelve inches square, the bottom of which shall consist of a wire screen of ½ inch mesh. The shavings shall be packed down moderately to reduce the air spaces. A Bunsen yellow flame shall then be placed beneath the receptacle so that the flame is in contact with the shavings. After twenty-five seconds the flame shall be removed. The flame at no time should show higher than six inches above the top of the bed of shavings and the shavings should not be consumed in less than five minutes.

B. TIMBER TEST. Two samples ¾ inch by 1½ inches in cross section and twelve inches long shall be

laid side by side across the top of a gas crucible furnace with a pyrometer between them. The specimens shall be subjected to a flame at 1700 deg. Fahrenheit for two minutes, the test pieces shall then be removed, and the time of duration of flame and glow observed. The sticks shall then be cut through the middle at the most burned section and the area of the unburned wood measured with a planimeter. The flame must not persist longer than 15 seconds nor the glow longer than 20 seconds, and, in the case of hard woods, the unburned area should not be less than 55 per cent., nor in the case of soft woods less than 45 per cent.

C. CRIB TEST—Twenty samples are to be prepared, each ½ inch square and 6 inches long. These shall be built up on a ring support to form a crib work five tiers high, four sticks to a tier, making the crib six inches by six inches and approximately 2½ inches high. The crib shall be set six inches above a Bunsen burner to which the crib shall be exposed for a period of one minute at a temperature approximating 1200 deg. Fahrenheit. The flame must not persist more than twenty seconds after the Bunsen burner is removed, nor the glow last more than thirty seconds. The tendency of the flame to spread from stick to stick must also be noted.

Rule 2. All of the above tests shall be at the expense of the owner or contractor or other interested party.

If the tests are satisfactory the entire shipment will be permitted to be taken into the building and used. If not, the entire shipment shall be condemned and must be removed from the premises.

In general, acceptance shall be predicated upon the existence of a complete plant in full working order from which the material is shipped, and each shipment, or, where possible, each piece shall be trade marked in a conspicuous manner so that there may be no doubt as to its identity.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, April 10, 1928, 10 a. m.

Minutes of Regular Meeting, April 10, 1928, 2 p. m.

Rules of Procedure.

Reserve Calendar.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, April 17, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, April 24, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman,

REGULAR MEETING

TUESDAY MORNING, APRIL 10, 1928

Present: Commissioner Connell, Acting Chairman, and Commissioners Holland and Guilfoyle and Chief Kenlon.

The minutes of the special meeting of the board, held on Friday afternoon, March 30, 1928; the minutes of the regular meeting of the board, held on Tuesday morning, April 3, 1928, and the minutes of the regular meeting of the board, held on Tuesday afternoon, April 3, 1928, were approved as printed in the Bulletin, No. 15, Vol. XIII.

APPEALS FROM ADMINISTRATIVE ORDERS

1189-27-A.

APPELLANT—James W. O'Connor, for Manhattan College, owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—Southeast corner of 244th street and Spuyten Duyvil parkway, The Bronx.

APPEARANCES—

For Appellant: Philip J. Sinnott.

ACTION OF BOARD—Laid over to April 24, 1928, at 2 p. m., on request of appellant.

1090-27-A.

APPELLANT—Ascher Engineering & Contracting Co., Inc., for Joseph Perlman Restaurant, Inc., lessee.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—62 Rivington street, Manhattan.

APPEARANCES—

For Appellant: Benjamin Ascher.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

(1090-27-A)

WHEREAS, Benjamin Ascher, for Lizzie Cassel, owner, filed, October 7, 1927, an appeal from an order of the fire commissioner, affecting premises 62 Rivington street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 29, 1927 (Applic. No. 715), reads:

"To obtain the approval of this Department on your application for license, immediate compliance with the following requirements is necessary:

"3. Provide 1 additional exit.";

and

WHEREAS, the building is non-fireproof, three stories and basement (40 ft. 6 in. above grade) in height, 22 ft. by 55 ft., irregular, in area; OCCUPIED: 1st story, restaurant and cabaret, 50 persons; 2nd story, doctor's office, 3 persons; 2nd and 3rd stories, dwellings; and

WHEREAS, the appellant contends that the yard is surrounded on all sides by buildings and proposes to provide a gooseneck iron ladder leading from the yard to the fireproof roof of the one-story extension, and contends, further, that the present occupancy of the basement has been the same for many years; that the bureau of buildings has issued a certificate of occupancy and that the cabaret feature consists of two musicians and that there is no dancing in the premises.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that a gooseneck ladder shall be provided from the yard level in the rear of the kitchen to the window in the doctor's office, first story, and that the occupancy of the basement shall be limited to thirty persons.

1182-27-A.

APPELLANT—James Kearney, for George Viebrock, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—East side of Weirfield street, 25 feet north of Cypress avenue, Ridgewood, Borough of Queens.

APPEARANCES—

For Appellant: James Kearney.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

(1182-27-A)

WHEREAS, James Kearney, for George Viebrock, owner,

MINUTES

filed, November 5, 1927, an appeal from an order of the fire commissioner, affecting premises 1683 Weirfield street, Ridgewood, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated October 20, 1927 (Order No. 12913-LC), reads:

"1. Surrender to the bearer Permit No. 201703, issued to you on 3-26-27, to expire 1-30-28, authorizing on the above premises a storage garage, as it is revoked for the reason that you have failed to comply with Order 11427-LC served on you June 27, 1927.

"2. Permanently brick up openings in division wall, now protected by fireproof, self-closing doors, leading from showroom and dwelling to storage garage."

and

WHEREAS, the building is non-fireproof, one story in height, 100 ft. by 100 ft. in area; OCCUPIED as a storage garage for more than five motor vehicles, located within a business district and having a doorway, 12 ft. in width, communicating with the adjoining building at south; and

WHEREAS, the appellant claims that the communicating opening is provided with fire doors and leads to an adjoining one-story extension used as a garage for five cars, the front portion of this adjoining building is two stories in height, occupied on the first story as a showroom, second story as a living apartment for the watchman of the garage; furthermore, the appellant contends that the existing conditions are not hazardous and the fire department order is technical.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the opening between the one-story brick garage and the so-called five-car garage shall be equipped with self-closing, fireproof doors on each side, and granted only as long as conditions as to use and occupancy remain substantially unchanged, and that the building shall not be increased in height, area or dimension.

1145-27-A.

APPELLANT—Joseph L. Hernon, for Bank of The Manhattan Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—40-42 Wall street and 37-39 Pine street, Manhattan.

APPEARANCES—

For Appellant: Joseph L. Hernon.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief

Kenlon 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(1145-27-A)

WHEREAS, Joseph L. Hernon, for Bank of The Manhattan Co., owner, filed, October 24, 1927, an appeal from an order of the fire commissioner, affecting premises 40-42 Wall street and 37-39 Pine street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 23, 1927, reads:

"Order No. 26776-F:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east and west sides of building or other approved protection, as per Section 375, Article 18, Chapter 5 of the Code of Ordinances."

and

WHEREAS, the building is fireproof, twelve stories and pent house in height, having a frontage of 75 ft. on Wali

street, 45 ft. 10½ in. on Pine street and a depth of 194 ft. 10 in.; OCCUPIED as an office building, approximately 45 persons per story; and

WHEREAS, there are six windows in the southeast court of the building on the tenth, eleventh and twelfth stories and two windows in the northeast court of the building on the eleventh and twelfth stories of the building within 30 ft. of openings in a twenty-three-story fireproof building to the east; two windows on the eighth story, three windows on the ninth story, three windows on the tenth story and three windows on the eleventh story in the southerly portion of the west wall of the building within 50 ft. of the roof of a neighboring eight-story fireproof building to the west; two windows in the southerly wall of the westerly center court of the building on the third and fourth stories of the building within 30 ft. of openings in a neighboring building to the west; two windows on each story above the first story and one window on the second to eighth stories, inclusive, in the easterly wall, and one window on the second to eighth stories, inclusive, in the north wall of the court at the northwest portion of the building within 30 ft. of openings in or within 50 ft. of the roof of a neighboring three-story fireproof building to the west; and

WHEREAS, appellant contends that the buildings forming the exposures are fireproof, occupied as office buildings and that there is nothing of a hazardous nature stored therein.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that all the windows in the stair halls, fire towers and elevator shafts shall comply with the requirements of the labor law; that the building shall not be increased in height, area or dimension, and granted only as long as the use and occupancy of premises remain substantially unchanged.

BUILDING ZONE CASES

1074-27-BZ.

THE RESOLUTION—

(1068-27-BZ)

WHEREAS, Edward P. Doyle, for Livia M. Pepe, owner, filed, October 3, 1927, an application, under the building zone resolution, to permit in a residence district the maintenance of an existing building occupied on the basement story as a French dry cleaning, dyeing and pressing business and as dwellings above; premises 124 Waverly place, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 10, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sixth avenue is in a business district, Waverly place, east of a point 100 ft. east of Sixth avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 2, 1927 (re Viol. Order No. 79-27), reads:

"You are hereby notified that the building occupied as a dwelling and known as No. 124 Waverly Place and located in a residence district in the Borough of Manhattan, in the City of New York, does not conform to Section 3 of the Building Zone Resolution of the Board of Estimate and Apportionment adopted July 25, 1916, in the respects noted below:

"In that of occupying the basement floor as a French dry cleaning, dyeing and pressing business in a residence district which is not permitted in the said residence district in which such building is located.";

and

WHEREAS, the existing building is of non-fireproof construction, four stories and basement in height, with a frontage of 22 ft. and a depth of 50 ft.; to be occupied as a dry cleaning, dyeing and pressing business in the basement and as dwelling above, and a portion of the building extending 7 ft. into the business district; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 7c and that he did not substantiate his basis of appeal brought under section 21.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

979-27-BZ.

APPLICANT—Gardiner Conroy, for Tony Trifirio, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—949 Liberty avenue, Brooklyn.

APPEARANCES—

THE RESOLUTION—

(979-27-BZ)

WHEREAS, Gardiner Conroy, for Tony Trifirio, owner, filed, September 7, 1927, an application, under the building zone resolution, to permit in a business district the erection

MINUTES

and maintenance of a gasoline service station; premises 949 Liberty avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 10, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Liberty avenue, east of a point 100 ft. west of Crystal street, is in a business district; Liberty avenue, west of a point 100 ft. west of Crystal street, is in an unrestricted district; Conduit boulevard is in a business district; Crystal street, north of a point 100 ft. north of Liberty avenue, is in a residence district; Chestnut court, north of a point 100 ft. north of Liberty avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 9, 1927 (re Applic. No. 7749-27), reads:

"Proposed gasoline service station not permitted in a business district. Therefore application denied for prohibited use under Art. 2, Section 4, Par. 46 of Zone Resolution."

and

WHEREAS, the premises consist of an irregular shaped plot of ground having a frontage of 19 ft. 6 in., a depth of 250 ft. and a width of 50 ft. across the rear; there is installed on the plot a 550-gallon gasoline storage tank and a pump; it is proposed to erect a one-story auto accessory store, 9 ft. by 40 ft. in area, and to occupy the premises as a gasoline service station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 for the reason that permit had been issued by the fire department and tank and pump installed at the time the amendment to the zoning law was made, prohibiting gasoline stations in a business district.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that

one 550-gallon tank and one pump shall be installed, the use of which shall be confined to the tenants of the garages directly in the rear of this property; that across the front of the property, on the building line, a fence of attractive grille work shall be provided with one opening not more than 9 ft. wide, giving access to the gasoline pump and garages in the rear; that no gasoline or oil shall be sold other than to the tenants of the garages on this property, and that no automobile racks for the cleaning of or working on cars shall be allowed on this property.

AREAS FIXED.

(1215-27-BZ)

The chairman presented and read a communication from Alfred J. Boulton, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles (previously denied); premises 342-352 Coney Island avenue, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Coney Island avenue from Park Circle to Caton avenue.

(209-28-BZ)

The chairman presented and read a communication from Cohen & Siegel, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 1-19 La Salle place, 430-442 West 125th street, Borough of Manhattan.

The following area was approved by the board:

Both sides of La Salle place, also West 125th street from Amsterdam avenue to a point 400 ft. east of the premises in question.

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY AFTERNOON, APRIL 10, 1928.

Present: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon.

When the board convened, Chief Kenlon offered the following resolution:

WHEREAS, the announcement has been made of the death of Mrs. Lonnie H. Walsh, the wife of our esteemed chairman, William E. Walsh; and

WHEREAS, the board deems that out of respect for his bereavement, an expression of condolence should be extended, therefore, be it

Resolved, that all matters now before the board be laid over to Friday morning, April 20, 1928, at 10 o'clock, and that we close this meeting, as an expression of regret, extending to him, in his hour of sorrow, the profound sympathy of the board for his sad loss.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative

Absent: Chairman Walsh

PETITIONS FOR VARIATIONS.

609-27-S.

PETITIONER—Detroit Cadillac Motor Car Realty Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—243-249 West 67th street, Manhattan.

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

798-27-S.

PETITIONER—Thomas B. Leahy, for 37 West 57th Street Corp., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—37-39 West 57th street, Manhattan.

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

632-27-S.

PETITIONER—Joseph A. Cox, for Survey Investors, Inc., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—303-305 Fifth avenue, Manhattan.

MINUTES

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

856-27-S.

PETITIONER—Josam Manufacturing Co., for Ojar Holding Corp., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—215 East 37th street, Manhattan.

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

1187-27-S.

PETITIONER—James P. Whiskeman, for Vincent Astor, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—18 West 33rd street, Manhattan.

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

1194-27-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Globe Lighting Fixture Co., lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—15-25 Lafayette street (first and second floors), Brooklyn.

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

1195-27-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Belfit Brassiere Co., Inc., lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—15-25 Lafayette street (fourth floor), Brooklyn.

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

1196-27-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for Morris I. Halperin, lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—15-25 Lafayette street (5th floor), Brooklyn.

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

1197-27-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for Miller Bros., Inc., lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—15-25 Lafayette street (6th floor, east), Brooklyn.

ACTION OF BOARD—Laid over to April 20, 1928, at 10 a. m.

APPLIANCES SUBMITTED FOR APPROVAL

213-28-SA.

PETITIONER—John W. Sullivan Co., Inc., for Ford Regulator Valve Co., Inc., owner.

SUBJECT—Ford Automatic Pressure Regulating Valve, approval of.

ACTION OF BOARD—Petition placed on reserve calendar, subject to inspection, test and report by the fire department.

304-28-SA.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., owner.

SUBJECT—Croker 2½-inch Angle Hose Valve, approval of.

ACTION OF BOARD—Petition placed on reserve calendar, subject to inspection, test and report by the fire department.

Adjourned, 3.30 p. m.

WILLIAM J. O'GORMAN, Secretary.

RULES

RULES OF PROCEDURE OF BOARD OF STANDARDS AND APPEALS ADOPTED FEBRUARY 15, 1927

(89-27-SR)

ARTICLE I—PUBLIC HEARING.

1. Regular sessions designated as public hearings of the Board of Standards and Appeals shall be held on Tuesday of each week at 10 A. M. and 2 P. M.

2. Morning sessions shall be devoted to hearings on appeals from administrative orders and applications for variation of the building zone resolution. Afternoon sessions, in general, shall be given over to hearings on petitions for variation of the labor law and consideration of rules. Notice shall be published in the Bulletin of the Board of deviation from this procedure.

3. Special sessions may be called by the Chairman, or at the request of four members, provided that notice of the same has been mailed to each member at least twenty-four hours before the time set, except that the announcement of a special session at any meeting at which a quorum is present shall be sufficient notice of such meeting.

4. All hearing sessions shall be open to the public.

5. A quorum of the Board of Standards and Appeals shall consist of four members.

6. The members of the Board shall attend the meetings in person, except that during absence or disability a substitute may act, as provided by law under section 718 of the Charter as amended by Local Law No. 13. The names of such substitutes, designated by the Mayor, shall have been previously filed with the chairman.

ARTICLE II—CASES BEFORE THE BOARD.

1. Every application under the Building Zone Resolution, every appeal under section 719 of the Charter and every petition under section 718a, subdivision 4, of the Charter, shall be made to the Board on the forms provided, and shall include the data required in such forms, so as to supply all information necessary for a clear understanding by the Board and its staff. Action in each case must be based largely on the information so furnished. The statements made by the applicant, appellant or petitioner and the determination of the Board in each case will be incorporated in a resolution formally adopted and published in the Bulletin of the Board. Officials who are charged with the enforcement of the laws, ordinances and rules relating to buildings in the City of New York will be bound by such resolutions, and, before granting permit or taking any other affirmative action, should see that there are no misstatements as to facts and that the conditions of the resolution are observed. Any administrative official discovering any misstatement of essential information is requested to notify the Board, in order that it may take such action as the circumstances require. All approvals shall remain valid only as long as the information and the conditions on which the resolution was based are maintained.

2. Any communication purporting to be an application, appeal or petition shall be regarded as a mere notice of intention to seek relief and shall be of no force or effect until it is made in the form required.

3. Upon receipt of any such communication, the writer shall be supplied with the proper forms for presenting his application, appeal or petition, and he shall be required to file the proper form and furnish all necessary data within twenty days of the date of the order or decision appealed from.

4. The duplicate of each application, appeal or petition required by this article shall be forwarded promptly to the administrative official whose order is involved in such case.

5. At the public hearing of a case before the Board, the applicant shall first present the argument in support of the case and those in objection shall follow. To maintain orderly procedure, each side shall proceed without interruption by the other.

6. Every person before the rostrum shall abide by the order and direction of the Chairman. Discourtesy or disorderly or contemptuous conduct shall be regarded as a breach of the privileges of the Board and shall be dealt with as the Chairman deems proper. Orders to maintain discipline shall be carried out by the Sergeant-at-Arms.

Subject to the direction of the Chairman, the Secretary shall enforce the rules of the Board and shall direct and supervise the Sergeant-at-Arms in maintaining order and decorum in the hearing room and lobbies during all public hearings.

7. No member shall proceed to debate, discuss an issue, put a motion or offer a resolution until he shall have addressed the Chairman and have been recognized by him. While the Chairman is putting a motion or offering a resolution, or during the progress of a roll call, no member shall interrupt or leave his seat. When a motion to adjourn is carried, the members of the Board shall keep their seats until the Chairman declares the meeting adjourned.

ARTICLE III—THE CALENDAR.

1. Each case filed in the proper form, with the required data, shall be numbered serially, irrespective of whether it be an application, appeal or petition. These Calendar numbers shall begin anew on January 1st of each year, and shall be hyphenated with the number of the year and the initials indicating the character of the case. Thus the calendar number of an application under the Building Zone Resolution in 1926 shall be "210-26-BZ"; an appeal from an order, requirement, decision or determination of a Superintendent of Buildings or of the Fire Commissioner, "211-26-A," and a petition for variation of the Labor Law or any rule or standard adopted thereunder, "212-26-S."

2. As soon as a case receives a calendar number, it shall be placed on the Docket. Thereafter the appellant or petitioner shall be notified of the date his case will be set for public hearing. In building zone applications the applicant shall be notified of the date when his case will be reached in the call of the Clerk's Calendar.

3. The Clerk's Call Calendar shall be called each Tuesday at 2 P. M., in Room 1013, Municipal Building, Manhattan, by the Chairman or the Secretary, and a date, for the public hearing of each application for variation of the Building Zone Resolution, shall then be set, which shall be full and sufficient notice to all persons interested in such case.

4. Thereafter each case shall be listed, by calendar number and premises, in the Hearing Calendar printed in the Bulletin of the Board, under the title of the respective proceedings, and the date for which such case has been set.

ARTICLE IV—DISPOSITION OF CASES.

1. Every decision of the Board on any case shall be by resolution.

RULES

2. The final disposition of any application, appeal or petition before the Board shall be in the form of a resolution either reversing, varying or modifying the order, requirement, decision or determination appealed from and granting the application, appeal or petition, or affirming the order and denying the application, appeal or petition. The concurring vote of four members shall be necessary to a decision. If a resolution fail to receive four votes in favor of the applicant, appellant or petitioner, the action will be deemed equivalent to a denial, and a resolution denying such application, appeal or petition shall be formally entered on the record, unless there be a member absent at the roll call and the vote of the absentee added to the number of votes for the applicant appellant or petitioner would equal four, in which case the matter will be laid over for reconsideration, until a final determination is reached.

3. Any applicant, appellant or petitioner may withdraw his application, appeal or petition at any time prior to action thereon, with the consent of the Board, but if a motion has been made, and is pending, either to grant or to dismiss, such motion shall have precedence.

4. No application, appeal or petition dismissed or denied can be considered again except (1) on a motion to reconsider the vote, or (2) on a request for a rehearing.

5. No request to grant a rehearing can be entertained unless new evidence is submitted. If, on motion of a member of the Board, adopted by four affirmative votes, the request for a rehearing is granted, the case shall be put on the calendar for a rehearing.

In all cases, the request for a rehearing shall be in writing, reciting the reasons for the request, and shall be duly verified and accompanied by the necessary data and diagrams. Such request shall be filed with the Chairman, who shall have a report on the case prepared by the engineers. The Chairman may then set a date when the request for reopening shall be submitted to the Board, of which date the person requesting the reopening shall be notified.

If the Board votes to reopen a case affecting a building zone application, a date shall be set for the "Calendar Call" and the applicant shall be required to notify each of the property owners entitled to notice of the application, the same procedure to be followed as in an original application.

6. The Board may, on the motion of any member, review any decision that it has made and may reverse or modify such decision, but no such review shall prejudice the rights of any person who has in good faith acted thereon before it is reversed or modified.

ARTICLE V—BUILDING ZONE APPLICATIONS.

1. No application for a variation or modification of the provisions of the Building Zone Resolution shall be entertained by the Board except in a specific case, and from an order, requirement, decision or determination made by any Superintendent of Buildings, the Tenement House Commissioner, or the Fire Commissioner, on the ground that the proposed plan or use violates the Building Zone Resolution.

2. No such application shall be entertained unless the application is filed within twenty days from the date of the action of the Superintendent of Buildings, Tenement House Commissioner, or Fire Commissioner.

3. Every application shall be made in duplicate on Form 3BZ and shall be accompanied by all the data required by such form, and shall be considered subject to such rules as the Board has adopted or may adopt, under Article 5, Section 21, of the Building Zone Resolution.

4. As soon as any application is completed by the filing of the data required in Form 3BZ, the case shall receive a calendar number and shall be placed on the Clerk's Calendar, and the applicant shall be notified by the Board on Form 6CC, of the time set for the call of the calendar, which shall be at least five days after the mailing of said notice. With this notice the applicant shall be supplied with an official copy of Form 7NO, which he is required to send to every property owner entitled to notice of the application. Within three days the applicant must file a verified statement that he has so notified each of such property owners either by personal service or by registered mail. Not less than fourteen days' notice of the date fixed for calendar call in each Building Zone application shall be given by publication in the Bulletin of the Board.

5. On the call of the Clerk's Calendar the applicant shall appear in person, or by agent or attorney, and property owners affected by the application may appear either in person or by agent or attorney and present any typewritten and verified objections they may have to the granting of the application, together with a description of their property and an affidavit of ownership. Then a date shall be set for a public hearing on the application which shall be not less than fourteen days thereafter. Notice of said hearing shall be given by publication in the Bulletin of the Board.

6. On the date set for the public hearing, the applicant shall state his case, then the opposition shall be heard, and the applicant shall have an opportunity to reply.

7. No application that has been denied after a public hearing can be entertained under the same state of facts or basis of appeal, unless based upon a new decision by a superintendent of buildings on plans which materially change the aspects of the case.

ARTICLE VI—APPEALS.

1. No appeal from any order, requirement, decision or determination of the Superintendent of Buildings or the Fire Commissioner or from any rule or regulation relating to the construction, alteration, structural changes in, equipment, occupancy or use of any building or structure, under Section 719 of the Charter, shall be entertained unless such appeal is filed in duplicate on Form 1A, with all the data required in such form, within twenty days from the date of the order appealed from.

ARTICLE VII—PETITIONS.

1. No petition for variation of the Labor Law, or of any rule adopted thereunder affecting the construction or alteration of buildings, exits therefrom, the installation of fixtures or apparatus as authorized by Section 718-a, subdivision 4 of the Charter, shall be entertained unless it is made in duplicate on Form 2S, with all the data required in such form, within twenty days from the date of the administrative order to which the petition refers.

No petition for approval of a device, material or method of construction shall be entertained unless it is filed in duplicate on Form 4SA, with all the data required in such form.

No petition for the adoption or amendment of Rules shall be entertained unless it is filed in duplicate on Form 5SR, with all the data required in such form.

ARTICLE VIII—PETITIONS.

1. No resolution of the Board of Standards and Appeals adopting or amending any rule or regulation under subdivision 2 or 3 of section 718-a of the Charter shall be adopted unless such proposed rule or regulation shall

RULES

have been published in the Bulletin of the Board for at least ten days prior to a public hearing thereon. Four affirmative votes of the Board shall be necessary for the adoption of such resolution.

2. Amendments to these Rules of Procedure may be made by the Board of Standards and Appeals at any regular meeting, providing notice of such amendment has been given to each member of the Board three days prior to such meeting, either in writing or by publication in the Bulletin. The suspension of any rule of procedure may be ordered at any meeting by unanimous vote.

ARTICLE IX—OTHER RESOLUTIONS.

1. Every resolution of the Board of Standards and Appeals suggesting changes or amendments to the law under subdivision 5, section 718-a of the Charter shall require at least four affirmative votes for its adoption.

2. Every resolution not otherwise provided for, ordinary motions or decisions on rules of order shall require not more than three affirmative votes.

ARTICLE X—INSPECTIONS.

1. In any case in which the Board may deem it necessary, an inspection of the premises in question may be ordered by the Board. Such inspection shall be made by the Chairman and by two or more members designated by him, and they shall report their findings to the Board in writing.

ARTICLE XI—TESTS.

1. In any case in which the Board may order a test of any material or device, the test shall be conducted under the supervision of an assistant engineer, in the presence of the Chairman and two or more members appointed by him, and the result of such test shall be reported to the Board in writing, and the material or device shall not have the approval of the Board unless the report be favorable and adopted by four affirmative votes.

ARTICLE XII—RECORDS.

1. All applications, appeals and petitions shall be on the required forms, and all communications, reports, etc., and plans, relative to any matter appearing on the calendar, shall be on sheets approximately 8 in. by 10½ in. in size. After final disposition, they shall be bound in some suitable manner. These records shall be kept in filing cabinets in their numerical order, in such a manner that they are accessible to the public at all reasonable hours, as prescribed by the Charter of the City of New York.

2. An index indicating locations by boroughs shall be kept.

3. All reports on matters coming before the Board for action shall be duplicated in sufficient numbers to furnish a copy to each member. The original shall be filed with the records in each case.

ARTICLE XIII—THE BULLETIN.

1. The Bulletin of the Board of Standards and Appeals shall be published on Tuesday of each week. It shall contain:

- (1) Directory of the Board.
- (2) Docket.

(3) Clerk's Calendar Call.

(4) The Hearing Calendar.

(5) Notice of hearing on building zone applications and on proposed rules or the amendment of rules.

(6) An abstract of the minutes of each meeting, including a brief statement of the action in each case, with the roll call thereon and the full text of the resolutions adopted.

(7) Rules adopted.

(8) Such other information as may be of value to the public and within the scope of the work of the Board.

ARTICLE XV—OFFICERS.

1. The Chairman shall preside at meetings. The Chairman may designate any member of the Board to preside and perform the duties of the Chair at public hearings.

2. The Chairman, subject to these rules, shall decide all points of order or procedure, unless otherwise directed by a majority of the Board in session at that time.

3. The Chairman shall designate the members of the Board to make an inspection, and, unless otherwise directed by the vote of four members of the Board, shall appoint any committee that may be deemed necessary.

4. The Chairman shall report at each meeting on all pertinent official transactions that do not otherwise come to the attention of the Board.

5. Administrative authority is vested solely in the Chairman of the Board who shall, subject to these rules, transact all official business of the Board, engage the necessary employees and direct the work of the office.

6. Subject to these rules and the direction of the Chairman, the Secretary shall conduct all official correspondence, compile the required records, edit the Bulletin, maintain the necessary files and indices, and generally supervise the clerical work of the office force, maintaining discipline in accordance with the rules of the office and charter provisions.

7. Subject to these rules and the direction of the Chairman, the Assistant Engineers shall examine and report on all applications, appeals and petitions; prepare all proposed rules or revised rules suggested by outside agencies, with report on the reasons and necessity for same; supervise and witness the tests conducted under the auspices of the Board, and assist generally in all technical matter coming before the Board.

8. The Chief Clerk shall keep all accounts, keep the files and indices in proper order and up to date, and generally assist the Secretary. During the absence or disability of the Secretary, the Chief Clerk shall act in that capacity.

9. A complete stenographic record of the transactions at public meetings shall be made for the files, including verbatim reports of such parts as may be directed, and there shall be prepared, after each meeting and in time for the next publication of the Bulletin, the abstract of the minutes which is to appear in such Bulletin.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, April 17, 1928, 10 a. m.

Minutes of Regular Meeting, April 17, 1928, 2 p. m.

Corrections.

Appliances Approved.

Reserve Calendar.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, April 24, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 1, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

Absent 0

THE RESOLUTION—

(1054-27-A)

WHEREAS, Philip Steigman, for Augustus Van Stuyvesant, owner, filed, September 26, 1927, an appeal from an order of the fire commissioner, affecting premises 135-137 East 12th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 30, 1927 (Order No. 39540-LC), reads:

"Section 232-2, Chapter 10, Code of Ordinances prohibits the storage of nitro-cellulose products in any building, inside the fire limits that is not of fireproof construction of more than 3 stories in height and in any building which is not equipped with an approved two source system of automatic sprinklers.

"You are therefore hereby ordered to:

"1. Remove all the nitro-cellulose products from the premises.";

and

WHEREAS, the building is non-fireproof, four stories in height, 40 ft. by 31 ft. in area on the first story and 40 ft. by 25 ft. in area above; OCCUPIED: 1st story, store; 2nd story, office; 3rd story, factory, 2 persons (manufacturing watch crystals); 4th story, vacant; and

WHEREAS, appellant contends that the celluloid used in the manufacture of unbreakable watch crystals is received in quantities of two to four dozen sheets, weighing from 15 to 25 pounds; the sheets are 20 inches by 25 inches, 1/16 of an inch thick, which are cut into watch crystals; the raw sheets are stored in an approved steel cabinet, vented to the outer air and the finished stock is kept in paper boxes on shelves as in an ordinary store.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1221-27-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Continental Baking Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—499-507 Carroll street and 530-550 President street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(1221-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Continental Baking Co., Inc., owner, filed, November 18, 1927, an appeal from an order of the fire commissioner,

MINUTES

affecting premises 499-507 Carroll street and 530-550 President street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 3, 1927, reads:

"Order No. 22233-F:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½" standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, with a frontage of 100 ft. on Carroll street and 200 ft. on President street and a depth of 200 ft., two and three stories in height; OCCUPIED: cellar, storage and baking, 18 persons; 1st story, office and shipping, 14 persons; 2nd story, stable and mixing dough, 9 persons; 3rd story, storage and carpenter shop, 2 persons; EQUIPPED with a two-source sprinkler system with a 20,000-gallon tank on roof and 6-inch connection to main on President street, with Central Office Supervisory Alarm; and

WHEREAS, the appellant contends that the building is in constant operation and equipped with sprinkler system, fire pails and fire extinguishers and that the greatest height of the President street section is 43 ft. 10 in. and the balance of the building is 32 ft. 4 in. above grade; and

WHEREAS, the premises are operated in single tenancy and use.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that building as now equipped with an approved two-source wet sprinkler system with central office connection shall be maintained; that the building shall not be increased in height, area or dimension; that the use and operation of premises shall be maintained in one tenancy, and granted only as long as conditions as to occupancy and use otherwise remain unchanged.

1191-27-A.

APPELLANT—William F. Doyle, for Weprin & Glass Holding Corp., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—208 East 55th street, Manhattan.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(1191-27-A)

WHEREAS, William F. Doyle, for Weprin & Glass Holding Corp., filed, November 10, 1927, an appeal from a decision of the fire commissioner, affecting premises 208 East 55th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated October 25, 1927 (Plan No. 162-27), reads:

"2. Thickness of shell and head shall be not less than 5/16".

"1. Flat surfaces of tank shall be braced, and bracing shall be done either by using structural members, which shall act as girders and which will safely carry the load with a factor of safety of 5, or by using bars

from side to side and to end and top to bottom of the tank, as the case may be.";

and

WHEREAS, the building is fireproof, two stories and basement in height, having a frontage of 125.10 ft. on East 55th street, 50 ft. 10 in. on East 54th street and a depth of 200.10 ft.; OCCUPIED as a garage for the storage of more than five motor vehicles, 25 persons in entire premises; and

WHEREAS, a fuel oil burning system has been installed, the fuel oil being stored in two tanks, each of approximately 550 gallons capacity, each tank being 3 ft. 2 in. in diameter and 9 ft. long, the thickness of the shell being ¼ in. instead of the required 5/16 in. thickness; the tanks are encased on the bottom and sides in 12 inches of concrete and are buried below the floor of the cellar of the building; the tanks are not braced; and

WHEREAS, appellant contends that the tanks were formerly used for the storage of gasoline and were installed in conformity with the requirements of a gasoline storage system according to the fire department requirements and requests the acceptance of the tanks contending that fuel oil is less hazardous than gasoline; and

WHEREAS, the existing tanks had been installed and used for gasoline storage with the approval of the fire department, said tanks being buried below the cellar bottom encased in stone concrete; and

WHEREAS, it is proposed to use two tanks at the 54th street section of building for fuel oil storage.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the third tank in the battery of tanks located at the 54th street end shall be filled with dry sand and sealed and that the fuel oil equipment and operation shall be maintained in accordance with the fuel oil rules in all other respects.

1217-27-A.

APPELLANT—Reliance Fireproof Door Company, owner

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—19-37 Norman avenue, 65-71 Dobbin street and 173-179 Banker street, Brooklyn.

APPEARANCES—

For Appellant: Jacob A. Rappaport.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(1217-27-A)

WHEREAS, Reliance Fireproof Door Co., for Jassmir Corp., owner, filed, November 17, 1927, an appeal from an order of the fire commissioner, affecting premises 19-37 Norman avenue, 65-71 Dobbin street and 173-179 Banker street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 1, 1927 (Order No. 28096-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, one story in height, with a frontage of 99 ft. 8 in. on Dobbin street, 104 ft. 8 in. on Banker street and 200 ft. on Norman avenue;

MINUTES

OCCUPIED for the manufacture of steel doors; EQUIPPED with an approved sprinkler system; and

WHEREAS, the appellant contends that the building faces on three streets, sets back 10 ft. on the easterly side and 65 ft. on the westerly side from adjoining buildings and that there is no cellar except the 13 ft. by 15 ft. fireproof boiler room with access from the street only and that there is no wood used in the manufacture and that fire buckets are evenly distributed; and

WHEREAS, the structure on this plot known as 19-37 Norman avenue is but one story in height, equipped with a street connection sprinkler system and the industrial operation is limited to the manufacture and assembling of steel doors and steel door frames.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension and shall be equipped throughout with an approved one-source wet sprinkler system with street main connection, and granted only as long as conditions as to operation and use remain unchanged.

1220-27-A.

APPELLANT—Samuel Rosenblum, for Leon Ottinger, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—114 Barrow street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

THE RESOLUTION—

(1220-27-A)

WHEREAS, Samuel Rosenblum, for Leon Ottinger, owner, filed, November 17, 1927, an order of the fire commissioner, affecting premises 114 Barrow street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 9, 1927, reads:

“Order No. 39086-LC:

“1. Discontinue the maintenance of a motor vehicle repair shop on these premises for the reason that building is a frame construction.”;

and

WHEREAS, the building is frame and non-fireproof construction, three stories in height, 20 ft. by 70 ft. in area on the first story and 20 ft. by 40 ft. in area above, located in an unrestricted district under the building zone resolution; OCCUPIED: 1st story, repair of automobiles in the rear extension, the remainder of the premises occupied as a dwelling; and

WHEREAS, the appellant contends that the total number of cars does not exceed two at any one time; that there is no heavy machinery or motor apparatus of that nature, but merely minor alterations and repairs with hand tools; that the westerly wall of the one-story building is brick; the northerly and southerly walls are frame, covered with metal; that the openings in the brick piers between one-story and three-story portions have been covered with wood partitions with stamped metal coverings; that these openings will be bricked up so that the one-story extension will be completely separated by brick wall from the rest of the premises, and that it is proposed to cover the north and south walls and ceiling with approved fireproof material; and

WHEREAS, the order is based on the frame construction of the one-story addition.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the repair work shall be restricted to the one-story extension, and that this extension shall be separated from the three-story building on the Washington street frontage by walls of approved masonry, and that the northerly and southerly walls and the ceiling of the one-story extension shall be protected with fire-resisting construction on the interior; that there shall be no open flame, furnace or forge maintained or operated on these premises; that the exit shall be maintained to the Barrow street front, and that the existing premises shall not be increased in height, area or dimension.

1168-27-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., substituted for Gustave Erda, for Gleason-Tiebout Glass Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—93-99 Commercial street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(1168-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Gleason-Tiebout Glass Co., owner, filed, October 31, 1927, an appeal from an order of the fire commissioner, affecting premises 93-99 Commercial street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 24, 1927 (Order No. 12202.01), reads:

“Provide a gravity tank for standpipe system in accordance with the rules of the Board of Standards and Appeals.”;

and

WHEREAS, the premises consist of a plot of ground on which is located eight buildings, interconnected, Building No. 1 being three stories in height, 40 ft. by 100 ft. in area; Building No. 2, four stories, 31 ft. by 39 ft. in area; Building No. 3, two stories, 39 ft. by 39 ft. in area; Building No. 4, three stories, 40 ft. by 100 ft., irregular, in area; Building No. 5, three stories and basement, 41 ft. by 99 ft. in area; Building No. 6, one story and basement, 39 ft. by 109 ft. in area; Building No. 7, one story, 81 ft. by 100 ft. in area; Building No. 8, one story and basement, 90 ft. by 100 ft. in area; the entire premises being occupied for the manufacture of glassware; Buildings 2, 4 and 5 being sprinklered, with a 25,000-gallon tank on the roof of Building No. 2; the building is provided with a standpipe system consisting of a 4-inch city main connection, entire Building No. 1 on the Commercial street front and a 4-inch supply main continuing through Buildings 1, 2 and 4 and to the rear of Building No. 5, with a 2½-inch line to Buildings 7 and 8 with three-inch riser branches in Buildings 1, 3, 4 and 6 with 1½-inch outlets provided with 50 ft. of ½-inch hose, with a yard hydrant in the interior court, equipped with 2½-inch outlet and 150 ft. of hose; and

WHEREAS, appellant wishes to be relieved of providing a gravity tank; on the ground there is sufficient pressure in the city main, 50 pounds, the street main being 20 inches in diameter, fed two ways; and

WHEREAS, the premises are equipped with a sprinkler system throughout; and

MINUTES

WHEREAS, the rules of exception would permit of the variation except for the connection of Buildings 6 and 7 on the first story.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the provision of a gravity tank, *on condition* that the buildings shall not be increased in height, area or dimension and that a 4-inch street connection to the city main shall be provided and a pressure of not less than 25 pounds at the highest outlet shall be maintained, and that the standpipe system shall be installed and maintained in accordance with the standpipe rules in all other respects.

1188-27-A.

APPELLANT—M. Reischmann & Sons, Inc., owner.
SUBJECT—Appeal from order of the fire commissioner.
PREMISES AFFECTED—138-162 Willow avenue, The Bronx.

APPEARANCES—

For Appellant: Henry Reischman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(1188-27-A)

WHEREAS, M. Reischmann and Sons, Inc., owner, filed, November 9, 1927, an appeal from an order of the fire commissioner, affecting premises 138-162 Willow avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated October 10, 1927 (Order No. 26981-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, five stories and basement (63 ft.) in height, 200 ft. by 75 ft., 15,000 sq. ft. in area; OCCUPIED for manufacturing furniture: basement, woodworking, 25 persons; 1st story, offices and cabinets, 32 persons; 2nd story, finishing room, 35 persons; 3rd story, assembling, 6 persons; 4th story, assembling, 10 persons; 5th story, storage, 2 persons; EQUIPPED with a sprinkler system, fed by two 15,000-gallon gravity tanks; and

WHEREAS, the appellant claims that there is a 60,000-gallon tank in the yard connected with a fire pump of 1,000-gallons-per-minute capacity, which may be used as an additional supply for the sprinkler system; that there are 157 water pails, 10 sand pails and 12 safety chemical fire extinguishers throughout the building; that the building has frontage on three streets and without any dangerous abutting property; furthermore, the appellant contends that the building is of the mill construction, slow-burning type; and

WHEREAS, the premises are equipped with a sprinkler system; and

WHEREAS, because of the occupancy not exceeding twenty-five persons above the second floor, the requirement as to stair hall fire-resisting enclosure would not be enforceable, and if standpipes were installed they would be in the open loft.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased

in height, area or dimension and that the existing sprinkler system shall be equipped with siamese street connections on the 134th and 135th street fronts or on the Willow avenue front at the extreme ends of the building; that the sprinkler system shall comply with the sprinkler rules in all respects, and granted only as long as conditions as to occupancy and use otherwise remain substantially unchanged.

THE RESOLUTION—

(1180-27-BZ)

WHEREAS, Daniel E. Ragalie, owner, filed, November 3, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises northeast corner of 15th avenue and Burton street, Whitestone, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 17, 1928, after due notice by publication, in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Willets Point boulevard, 15th avenue and Utopia Parkway are all in a business district and Burton street, north of a point 100 ft. north of 15th avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 13, 1927, reads:

"1. The erection of a structure for use in conjunction with a proposed gasoline selling station, and the creation of a gasoline selling station by installing gasoline tanks, all within a business district, is contrary to the provisions of the Zone Resolution.";

and

WHEREAS, the premises consist of an irregular shaped plot of ground having a frontage of 109.59 ft. on Burton avenue, 55.69 ft. on 15th avenue and 104.72 ft. on Willets Point boulevard, upon which it is proposed to erect a one-story office, 20 ft. by 20 ft. in area, and to install six 550-gallon tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

1121-27-BZ.

THE RESOLUTION—

(206-28-BZ)

WHEREAS, John J. O'Connell, owner, filed, March 7, 1928, an application, under the building zone resolution, to permit in an "F" area and residence use district the erection and maintenance of a building set back less than 15 ft. from the street line; premises 147-61 Jasmine avenue and 46-16 156th street, Flushing, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 17, 1928, after due notice by publication, in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that Jasmine avenue, 156th street and Queens avenue are in an "F" area and residence use district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 29, 1928, in acting on N. B. 1169-28, reads:

"Contrary to Article 4, Section 15A of the Building Zone Resolution in that proper size front yard is not provided. Front yard is 5' 4". Should be 15' 0"."

and

WHEREAS, the proposed building is to be of frame, brick veneer construction, two and one-half stories in height, with a frontage of 22 ft. 8 in. and a depth of 56 ft.; to be occupied as a private dwelling and having the face of the

open porch 5 ft. 4 in. from the street line and the body of the building 9 ft. 4 in. from the street line on the 156th street front; the zone resolution requires a clear setback of 15 ft. from the street line in an "F" area district; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it affects the 156th street frontage, on condition that the face of the building on the 156th street front shall set back not less than 9 ft. 4 in. from the building line; that the requirements of the building zone resolution, so far as it affects Jasmine avenue front and the remainder of the plot, shall be complied with in all other respects; the use and occupancy of the premises to be limited to a single private dwelling, and all permits necessary shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

84-28-BZ.

APPLICANT—William F. Doyle, for Hakan B. Steffanson, owner.

THE RESOLUTION—

(84-28-BZ)

WHEREAS, William F. Doyle, for Hakan B. Steffansen, owner, filed, January 30, 1928, an application, under the building zone resolution, to permit in a residence district the alteration and change of occupancy in part, from residence to a business use; premises 444-446 Park avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 17, 1928, after due notice by publication, in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue is in a residence district, East 57th street is in a business district and East 56th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 5, 1927 (re Alt. 1727-1927), reads:

"11. Store in No. 446 is unlawful as the building is located in a residence district. See resolution of Board of Standards and Appeals under case 711-22-BZ, filed in page 14, alteration application 360-1922. Extension of business into rear of 1st and 2nd floors of No. 444 is unlawful. Sec. 6, subdivision b2 of the Building Zone Resolution."

and

WHEREAS, the existing buildings are of non-fireproof construction, four stories in height, with a total frontage of 33 ft. 4 in. and a depth of 50 ft.; to be occupied in part for business use; and

WHEREAS, application for the extension of the business use throughout these premises was denied by the board under Cal. No. 711-22-BZ; and

MINUTES

WHEREAS, there now exists, by authority of law business use in premises 444 Park avenue; and

WHEREAS, it is proposed to reduce the existing business use of 444 Park avenue, restricting said use to the first story of 444 and extending it to the first story of 446 Park avenue, which abuts the business use district and an existing business building.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the first story, street grade, for use of professional offices, display room and the conduct of an interior decorator's business, *on condition* that there shall be no advertising display on these premises other than a flat wall metal sign indicating the name and type of the professional practice conducted thereon, and that the remainder of the premises shall be restricted to conforming residential use and occupancy; that all exits required by the building code shall be installed and maintained; that return drawings shall be made to this board for approval; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action, and granted on condition that the building shall not be increased in height, area or dimension.

109-28-BZ.

APPLICANT—F. W. Woolworth Co., lessee for term of 30 years.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district extending from a business district and also in a "C" area district, the alteration and extension of a business building, and also the omission of a rear yard required by the zone resolution.

PREMISES AFFECTED—780-784 Flatbush avenue, Brooklyn.

APPEARANCES—

For Applicant: James A. Blanchfield.

For Opposition: Thomas P. Peters and E. G. Patterson.

ACTION OF BOARD—Application granted on condition.

THE RESOLUTION—

(109-28-BZ)

WHEREAS, F. W. Woolworth Co., owner of thirty-year lease, filed, February 3, 1928, an application, under the building zone resolution, to permit in a residence district, extending from a business district, and also within a "C" area district, the alteration and extension of a business building and also the omission of a rear yard required under the zone resolution; premises 780-784 Flatbush avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 17, 1928, after due notice by publication, in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Flatbush avenue is in a business district, Lenox road is in a residence district and Kenmore place is in a residence district and also within a "C" area district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 12, 1927 (re Applic. 22790-27), reads:

"1. Proposed extension of store projecting partly into a Residential District is Contrary to Zone resolution, Art. II, Sect. 3.

"2. Proposed one-story extension and stair bulkhead

extension into required rear yard is contrary to Zone Resolution, Art. III, Sect. 13-16.";

and

WHEREAS, the existing one-story building occupied for store purposes is on the front of the lot and located entirely within a business district; it is proposed to erect a rear one and two-story extension, size 37 ft. 4 in. by 70 ft., which would cover the entire depth of the lot, omitting the rear yard in a "C" area district and also extending 13 ft. into a residence district; and

WHEREAS, applicant amended his application to include section 7, subdivisions a, b and c in his basis of appeal; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivisions a, b and c; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed one story in height above the Flatbush avenue grade level for use as retail merchandise business and an extension at the rear of the premises, one and two stories in height, the second story not exceeding in dimension 16 ft. 2 in. in depth by 37 ft. in width, which second story is to be used and restricted to executive offices of the business conducted on the premises; that there shall be provided at the rear of first story a doorway leading to open yard of abutting premises to the north, in same control, with egress through the building to the street; that the rear and gable walls otherwise within the residence use area of the plot shall be unpierced throughout their entire height and length; that the exterior of the rear wall shall be finished with light-color brick or painted a light color, and that all permits required shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

118-27-BZ.

APPLICANT—Philip J. Sinnott, for R. G. & F. Construction Corp., owner.

SUBJECT—Application for reopening—extension of time to procure permits—re decision of the superintendent of buildings—under sections 7-e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—Northwest corner of Sedgwick avenue and West 167th street, The Bronx.

APPEARANCES—

For Applicant: Philip J. Sinnott.

For Opposition: None.

ACTION OF BOARD—Application reopened and time, to procure permits, extended.

THE RESOLUTION—

(118-27-BZ)

WHEREAS, Philip J. Sinnott, for R. G. & F. Construction Corp., owner, filed, February 5, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises northwest corner of Sedgwick avenue and West 167th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 26, 1927, after due notice by publication in the

MINUTES

Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sedgwick avenue is in a business district, West 167th street, west of Sedgwick avenue, is in an unrestricted district and West 167th street, east of Sedgwick avenue, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 2, 1927 (re N. B. 101-1926), reads:

"1. The erection of a public garage for more than five (5) motor vehicles is not permitted in a business district.";

and
WHEREAS, the proposed building is to be of non-fireproof construction, one story and basement (17 ft. 6 in.) in height, with a frontage of 194 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7e in that there existed prior to the adoption of the zoning resolution and still exists a stable for more than five horses on the premises under appeal; and

WHEREAS, this application was granted by the board at its meeting, April 26, 1927, on certain conditions, and applicant requested a modification of the time limit imposed and an extension of time.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be restricted in height to a one-story structure above grade; that the exterior walls on the street fronts shall be finished with face brick and architectural terra cotta or stone trimmings, other than the corner occupancy, which is to be developed for store or office use, finished with plate glass show window; that the roof shall be of flat design and construction; that the northerly and westerly walls shall be unpierced throughout their entire height and length; that there shall be no signs erected on the Sedgwick avenue front other than one projecting electrically illuminated sign, indicating the name and title of business conducted on the premises; that the architect shall make a return to this board for approval of proposed design of facade; that there shall be no portable gasoline tanks operated outside the buildings; that there shall be no roof sign erected or maintained, and that all permits required shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from January 26, 1928.

735-19-BZ.

APPLICANT—William J. Ryan, Inc., owner.

SUBJECT—Application for reopening—modification—re application under building zone resolution to permit in a business district the alteration and conversion of an existing three-story brick stable into a two-story and basement garage.

THE RESOLUTION—

(735-19-BZ)

WHEREAS, Land Estates, Inc., owner, filed, October 2, 1919, with the board of appeals, an application, under the building zone resolution, to permit in a business district the alteration and conversion of an existing three-story brick stable for more than five horses into a two-story and basement garage for more than five motor vehicles; premises 149-151 East 119th street, northeast corner of Lexington avenue and 119th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, November 18, 1919, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that both Lexington avenue and East 119th street are located in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered August 20, 1919, in acting on Alteration Application 1879-1919, reads:

"1. In a business district no building shall be structurally altered and its use changed to that of a garage—Building Zone Resolution, Article 2, Section 4.";

and
WHEREAS, the existing building is of non-fireproof construction, three stories in height, with a frontage of 60 ft. and a depth of 100 ft. 11 in., irregular, in area; occupied as a stable for more than five horses, which it is proposed to alter into a two-story and basement, non-fireproof garage building, 60 ft. by 100 ft. 11 in., irregular, in area; and

WHEREAS, there is an existing garage for more than five motor vehicles adjoining the premises in question; and

WHEREAS, a variation was granted by this board on November 18, 1919, with stipulations prohibiting entrance on Lexington avenue; and

WHEREAS, in 1927, under Alt. Plan 2177 of the bureau of buildings, permits were issued for alteration and further permits having been issued by the fire department for gasoline storage; and

WHEREAS, after work had substantially progressed, the bureau of buildings revoked the building permit on information as to the stipulations of original resolution granted in 1919 with respect to entrance on Lexington avenue; and

WHEREAS, the board deems that hardship would result in the cancellation of this permit and its prohibition, the applicant having exhausted, in accordance with the law as he understood it, all remedy for this relief and obtained the permits from the different departments having jurisdiction.

Resolved, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that any permits necessary for the prosecution of the work shall be obtained within nine months of the date of this action, and that the building shall be completed within eighteen months of the date of this action.

490-27-BZ.

APPLICANT—William F. Doyle, for Frederick Semken, owner.

SUBJECT—Application for reopening—amendment—re application (decision of fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

THE RESOLUTION—

(490-27-BZ)

WHEREAS, William F. Doyle, for Frederick Semken, owner, filed, May 5, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner of Bay 32nd street and Cropsey avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 25, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cropsey avenue is in a business district, Bay 31st and Bay 32nd streets are in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered April 23, 1927 (re Order No. 941-1927), reads:

"1. A gasoline service station may not be permitted in a business district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 60 ft. and a depth of 40 ft., upon which it is proposed to erect (at the westerly portion) a one-story office and accessory store and, also, the necessary tanks, pumps and piping for a gasoline service station; and

WHEREAS, it is proposed to locate this gasoline selling station 40 ft. westerly on the private right-of-way leading to Gravesend Bay from the westerly line of Cropsey avenue; and

WHEREAS, the board, in acting on Cal. No. 490-27-BZ, on October 25, 1927, made certain restrictions, stipulating the occupancy of the Cropsey avenue frontage for a depth of 40 ft. by a dwelling; and

WHEREAS, Cropsey avenue is proposed to be widened 40 ft., in which event no building can be erected within 40 ft. of the avenue.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the gasoline service station shall be limited to a plot with a 60 ft. frontage on the private right-of-way and 40 ft. depth, and that the gasoline station shall be set back 40 ft. westerly from the existing westerly building line of Cropsey avenue; that the exit and entrance shall be confined to the private right-of-way; there shall be no portable gasoline tanks maintained or operated from these premises, and that any permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

1016-27-BZ.

APPLICANT—Arthur B. Daub, for Max Daub, owner.
SUBJECT—Application for reopening—rescindment of dismissal—re application (decision of fire commissioner) under sections 7-g and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Southeast corner of Walker boulevard and Outerbridge avenue, Richmond.

APPEARANCES—

For Applicant: None.

For Opposition: None.

ACTION OF BOARD—Chairman read communication from applicant; application reopened and action of board of February 7, 1928, rescinded; and action of board of April 3, 1928, reaffirmed.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND CORRECT RECORDS—

Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1016-27-BZ)

WHEREAS, Arthur B. Daub, for Max Daub, owner, filed, September 16, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southeast corner of Walker boulevard and Outerbridge avenue, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Walker boulevard, Outerbridge avenue and Bridge Plaza are in business districts; and

WHEREAS, the decision of the fire commissioner, rendered August 31, 1927 (re Plan No. 2611-1927), reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals."

and

WHEREAS, it is proposed to erect a non-fireproof office, 22 ft. by 22 ft., bury two 550-gallon tanks and erect three pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deemed it against public interest to grant a variation for a gasoline service station, unsupported by local requirement in this virgin territory, and located at the contemplated public plaza, notwithstanding the consents by property all in one ownership amounting to 100 per cent. of the area deemed by the board to be affected, and that the consenting property should more properly apply to the Board of Estimate and Apportionment for a change of use district; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal under section 21 of the building zone resolution on the grounds of practical difficulty and unnecessary hardship; and

WHEREAS, this application was dismissed by the board at its meeting, February 7, 1928, for lack of prosecution and the board deemed that this action of dismissal should be rescinded and the action of April 3, 1928, affirmed.

Resolved, that the decision of the fire commissioner be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(1160-27-S)

WHEREAS, United Real Estate Owners Association, for Ablemo Realty Co., Inc., owner, filed, October 28, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 99-101 Fifth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 3, 1927 (Order No. 26665-LD), reads:

"2. Remove all articles or wares from stairway enclosure or the landings, platforms or passageways connected therewith at north and south side of building, including lunch and cigar stands at 1st story as per Rule of the Board of Standards and Appeals adopted February 23, 1927.";

and

WHEREAS, the building is fireproof, eleven stories in height, 59 ft. by 100 ft. in area; OCCUPIED: 1st story, store; upper stories, tenant factories, principally neckwear, approximately 25 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there is a cigar stand located on the first story in the north stair hall and a lunch counter located on the first story in the south stair hall of the building; and

WHEREAS, petitioner contends that neither the lunch stand or the cigar stand obstruct the exits from the building.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION—

(1057-27-S)

WHEREAS, Buchman & Kahn, for Bomzon Realty Corp., owner, filed, September 29, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 49-53 West 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 4, 1927 (Order No. 15536-LD), reads:

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, sixteen stories in height, 51 ft. by 98 ft. 9 in. in area at first story and 51 ft. by 88 ft. 9 in. in area above; OCCUPIED: 1st story, store; upper stories, offices, showrooms and tenant factories (mostly millinery), approximately 60 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, partitions not constructed of incombustible materials have been erected on the fourth, fifth, sixth, eighth, ninth, tenth, eleventh, twelfth, fourteenth and sixteenth stories of the building; and

WHEREAS, petitioner contends that most of the partitions are less than 7 ft. in height and that they do not interfere with the operation of the sprinklers or with the means of egress of the premises.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION—

(1218-27-S)

WHEREAS, The Carlay, Inc., owner, filed, November 17, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 502-504 Metropolitan avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 7, 1927, reads:

"Order No. 7805-LD:

"2. Arrange bars on windows on north, south, east and west sides of building on 1st, 2nd, 3rd and 4th stories so as to be readily movable or removable from

MINUTES

both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Sec. 272 of the Labor Law.”;

and

WHEREAS, the building is non-fireproof, two stories in height at front and four stories in height at the rear, 32 ft. by 82 ft. in area; OCCUPIED by one concern for dressing and dyeing furs: 1st story, 13 persons; 2nd story, 9 persons; 3rd story, 9 persons; 4th story, 1 person; EXITS: three interior open wooden stairways, extending from the first story to top stories; a fire escape on the easterly wall of the rear section of building, having fireproof openings along the course thereof, extending from the roof to the center courtyard of the premises, with EGRESS from the termination of the fire escape by means of a door in fence leading to premises to the north; and

WHEREAS, there are windows on each story of the building covered with iron bars; and

WHEREAS, petitioner contends that a large quantity of furs are always in work on the premises; that the bars were installed to prevent theft and proposes to pivot one window in the rear wall on each story of the premises.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION—

(1260-27-S)

WHEREAS, Ellis, Aaronson & Heidrich, for Framax Realty Corp., lessee, filed, December 1, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 125-129 West 45th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered November 25, 1927 (re N. B. App. 425-1927), reads:

“8. Lights in windows may not exceed 720 sq. inches. Sec. 264-7 L. L. and Rule 503 Industrial Code.”;

and

WHEREAS, the building is fireproof, fifteen stories in height, 57 ft. 6 in. by 82 ft. in area at first story and 57 ft. 6 in. by 73 ft. 9 in. in area above; OCCUPIED for offices and 25 per cent. manufacturing, not more than 80 persons on a story; EXITS: a fire tower, an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use plate glass ¼ inch in thickness in windows at front, the maximum size on first story, 7 ft. 10 in. by 4 ft. 6 in.; second story, 7 ft. 4 in. by 7 ft. 6 in., and at third story, 3 ft. 8½ in. by 4 ft. in approved metal frames; and

WHEREAS, the petitioner claims that to divide the glass in smaller lights would detract from the architectural appearance of the building; also, that in all other respects the building will be erected strictly in conformity with the labor law.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the three lower stories on the street front, on condition that all openings shall be equipped with approved metal frames and sash, glazed with one-quarter inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION—

(1040-27-S)

WHEREAS, Sigmund Schuler, for United Cigar Stores Company of America, lessee, filed, September 22, 1927, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 173 Bowery, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated August 6, 1927, read:

"Order No. 25255-LD:

"1. Provide exit signs, letters to be at least 8 inches in height at all means of egress with a red light over all such exits for use in time of darkness as per Section 272 of the labor law.";

and

"Order No. 25256-LD:

"1. Provide an outside iron balcony fire escape on the west side of building with balconies 4 feet in width connected by stairways not less than 22 inches wide, placed at an incline of not more than 45 degrees, extending from the ground to the highest story, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with section 271 of the Labor Law.

"2. Arrange the fire escape on the east side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals.

"Note: Among defects noted are the following:

"Windows on course not fireproof, self-closing.

"No counterbalanced stairway from lowest balcony to ground.

"Rails around balconies and well-hole not three feet high.

"No 2 foot by 6 foot fireproof door leading to balconies provided.

"No steps to sill provided.";

and

WHEREAS, the building is non-fireproof, four stories in height, 20 ft. 1 in. by 125 ft. 6 in. in area on the first story and 20 ft. 1 in. by 115 ft. in area above; OCCUPIED: cellar, storage; 1st story, stores, 10 persons; 2nd story, offices and studios, 10 persons; 3rd story, offices and union rooms, 10 persons; 4th story, studios and living quarters for the janitors, 8 persons; the means of EGRESS consist of an interior stairway, extending from the first story to the roof and partly enclosed in fireproof partitions with wood doors at the openings; a fire escape on the easterly side of the building with balcony and 45-degree stairs with landing on extension roof from second story with gooseneck ladder to roof and drop ladder from extension roof to the street.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, of Order No. 25256-LD, on condition that a balcony fire escape with 60-degree connecting stairs and counterbalanced drop ladder in guides to street shall be provided on the Delancey street front, on each section of the building, east and west of the main stairs, embracing not less than two windows with non-fireproof openings along the

course thereof; granted, as to Item 2, on condition that a counterbalanced drop ladder is provided from lowest balcony to street; and that the petition as to Item 1, of Order No. 25255-LD, be and it hereby is denied.

1136-27-S.

PETITIONER—Samuel Rosenblum, for Nathan Brender, lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

THE RESOLUTION—

(1136-27-S)

WHEREAS, Samuel Rosenblum, for Nathan Brender, lessee, filed, October 22, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 27 West 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 18, 1927 (Order No. 20967-LD), reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals. * * *

"Among the defects noted are the following: No fireproof passageway from termination to street. Height of balconies not 4' 6".

"2. Enclose the interior stairway at west side of building serving as a required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fire-resisting material extending continuously from the cellar to 3' above the roof constructed as per Section 271 of the Labor Law.

"3. Provide an additional means of exit from 1st story remote from present exit. Sec. 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, six stories (70 ft.) in height, 22 ft. by 98 ft. 9 in. in area at first story and 22 ft. by 73 ft. in area above; OCCUPIED: 1st story, store (beads), 6 persons, 2nd story, jobber of hats, 5 persons; 3rd story, manufacture of hats, 6 persons; 4th story, manufacture of hats, 10 persons; 5th story, manufacture of jewelry, 13 persons; 6th story, manufacture of hats, 7 persons; 41 persons above the first story; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in wood lath and plaster partitions with wooden doors at openings; a fire escape on the rear of the building having fireproof openings along the course thereof, extending from the top story to the roof of the first story extension, with EGRESS from the termination of the fire escape by means of a connection at the rear of the extension roof leading to a balcony on the one-story extension of the building to the east; this balcony being part of the fire escape on the building to the east; ROOFS of adjoining buildings: to west, 12 stories higher; to east, 3 stories higher; and

WHEREAS, petitioner has amended his papers under date of April 14, 1928, to omit the occupancy of the pent house

MINUTES

or sixth story and maintain same vacant, and to maintain total occupancy of the premises so there shall be no more than twenty-five persons above the second story.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1, only so far as it affects egress from the termination of the fire escape at the second story level, *on condition* that the entire ceiling of the extension shall be fire-retarded; that the mutual exchange of the owner to the east for egress through adjoining premises shall be maintained and filed with the fire department; *granted*, as to Item 3, *on condition* that a 60-degree iron ladder with solid treads shall be provided along the rear wall on the inside of building, first story, with egress to the roof of extension by counter-balanced scuttle or bulkhead, with egress therefrom by means of the fire escape provided for in Item 1; that the building shall be not increased in height or area; that this variation is granted so long as conditions as to occupancy and use remain unchanged, and *denied* as to Item 2.

1222-27-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for Continental Baking Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

THE RESOLUTION—

(1222-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Continental Baking Co., Inc., filed, November 18, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 499-507 Carroll street and 530-550 President street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 3, 1927 (Order No. 22226-LD), reads:

"1. Provide an additional means of exit from 2nd story of building, northwest corner on President Street, as per Rule 8, Board of Standards and Appeals, adopted Feb. 23, 1927.

"3. Provide an additional means of exit from 2nd and 3rd stories of three story building, southeast corner of building, as per Section 271 of the Labor Law.

"4. Provide an additional means of exit from the northwest corner of cellar (remote from present exit), as per Sec. 271 of the Labor Law.

"5. Enclose all interior stairways with partitions of fire resisting material, said enclosure to extend from floor of 1st story to the underside of the 2nd story as per Rules 7 and 9 Board of Standards and Appeals adopted Feb. 23, 1927."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 200 ft. on President street, 100 ft. on Carroll street and a depth of 200 ft., upon which are located two non-fireproof interconnected buildings; the westerly building being three stories and basement in height and 121 ft. by 100 ft. in area; the easterly building being two stories and basement in height and 79 ft. by 200 ft. in area;

OCCUPIED as a bakery: basement, storage and baking, 18 persons; 1st story, office, shipping and wagon storage, 14 persons; 2nd story, stable, storage and mixing dough, 9 persons; 3rd story, carpenter shop, 2 persons; EQUIPPED with a sprinkler system; EXITS: three-story building, two interior wooden stairways, one extending from the basement to top story and one extending from the first to top story, enclosed in wood board partitions with wooden doors at openings; two-story building, an open wooden stairway, extending from the first to second story; a fire escape on the President street front of the three-story building, with unprotected openings along the course thereof, extending from the top story balcony to street; and

WHEREAS, petitioner proposes, as to Item 1, to provide on the second story of the building and near the President street front, an opening in the partition wall between the flour room and the stable; as to Item 3, claims that order affects only a small section of building on Carroll street front, the second and third stories of which are not used; as to Item 4, claims there are two means of exit from cellar, one being the interior stairway and the other a doorway with steps up to same, which leads directly to open driveway; as to Item 5, claims rule 6 of rules of board exempt building from enclosure of stairway.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Items 3 and 5, *on condition* that there shall be no gasoline-driven vehicles stored, temporarily or otherwise, on these premises, and that the petition be and it hereby is *denied* in all other respects.

THE RESOLUTION—

(978-27-S)

WHEREAS, Kramer & Kleinfeld, substituted on behalf of Commercial Outfitting Co., owner, filed, September 6, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner and decision of the superintendent of buildings, affecting premises 27 East Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 6, 1927, reads:

"Order No. 13904-LD:

"1. Discontinue the use of the above premises for factory purposes for the reason that same does not conform to Section 270 of the Labor Law. Among the defects noted are the following:

"1. Building not fireproof.

"2. Fire escape cannot be accepted as a second means of exit."

and

WHEREAS, the decision of the superintendent of buildings, rendered July 8, 1927, reads:

"Relative to your application for Certificate of Occupancy for the above building we beg to state that application is disapproved for the reason that the building

MINUTES

must be of fireproof construction for the occupancy asked for.”;

and

WHEREAS, the building is non-fireproof, seven stories in height, 25 ft. by 100 ft. in area at first story and 25 ft. by 90 ft. in area above; OCCUPIED: 1st story, clothing store; 2nd story, showroom for clothing, 7 persons; 3rd story, showroom for clothing, 7 persons; 4th story, offices and manufacture of clothing, 15 persons; 5th story, showroom for clothing, 6 persons; 6th story, showroom for clothing, 2 persons; 7th story, offices, 25 persons; 62 persons above the first story; EXITS: an interior iron stairway, extending from the first story to roof, enclosed in fireproof partitions with metal-covered wood doors at openings; a fire escape on the rear of the building having non-fireproof openings along the course thereof, extending from the top story balcony to the roof of the first story extension, with EGRESS from the roof of the extension by means of a sliding drop ladder to the yard of the premises to the east, thence by passageway in building to the east to street; ROOFS of adjoining buildings: to east, 21 ft. lower; to west, 25 ft. lower; and

WHEREAS, petitioner contends that the only manufacturing done in the building is on the fourth story, where fifteen persons are engaged at tailoring, busheling and altering garments which are sold on the premises and requests the acceptance of the existing means of egress; and

WHEREAS, a transcript of the records of the labor department, dated 1916, on file in the fire department, disclosed this as an existing premises; and

WHEREAS, the building has been extensively altered since its acceptance as a factory building by the fire department.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the mercantile industrial work and operation in this building shall be restricted to the fourth story and limited to the adjustment, alteration and minor repairs of merchandise purchased on the premises, the occupancy not to exceed five persons so engaged, so long as the building is operated in single tenancy and use; that a secondary means of exit shall be provided with variation only as to egress from the termination of the fire escape by means of a gooseneck ladder from the roof of the first story extension to the adjoining premises to the east.

851-27-S.

PETITIONER—Samuel Rosenblum, substituted for George M. Wood, for Hechwil Realty Corp., lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—161-165 Perry street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION—

(851-27-S)

WHEREAS, Samuel Rosenblum, substituted for George M. Wood, for Hechwil Realty Corp., lessee, filed, July 26, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 161-165 Perry street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 19, 1927 (Order No. 11818-LD), reads:

“1. Comply with Calendar No. 1259-18-S of the Board of Standards and Appeals adopted July 23, 1918,

re: to be relieved of re-arranging the fire escape at northwest corner of building, premises 161-165 Perry Street, Manhattan, and whereas it appears that the area in first story and 66 feet by 90 feet above that there is an interior fireproof stairway extending from first to sixth story, enclosed in fireproof partitions with fire doors at openings, that there is a rear sub-standard fire escape, with counterweighted drop ladder from second story balcony to yard of adjoining building at rear; that the building is provided with an interior fire alarm signal system; that the building is occupied for grocery and wine storage, with a machine works in fifth story with not more than forty-five persons employed above the first story any;

OR

“2. Arrange the fire escape on the north side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of Labor Law.

“SEE NOTE.

“NOTE—Among the defects noted are the following: Rusted—requires painting, No fireproof passageway from termination to street. No stairway to roof. Doors and windows on course defective, rusted and not self-closing.”;

and

WHEREAS, the building is fireproof, six stories in height, 66 ft. 3 in. by 100 ft. 3 in. in area at first story and 66 ft. 3 in. by 92 ft. in area above; OCCUPIED: 1st story, shipping; 2nd story, manufacturing hat boxes, 50 persons; 3rd story, manufacturing garment bags, 20 persons; 4th story, manufacturing batteries, 16 persons; 5th story, manufacturing batteries, 18 persons; 6th story, storage of denatured alcohol, 2 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the first story to top story, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building having fireproof openings along the course thereof, extending from the second story to top story; a gooseneck ladder to roof and a counterbalanced stairway from the second story balcony extended to yard of adjoining premises at north, thence through the premises to the street; ROOFS of adjoining building: two stories lower at west; two stories higher at east; and

WHEREAS, the petitioner claims that direct egress may be had from foot of rear fire escapes to yard of premises adjoining at north and through hall of a three-story residence to the street (a copy of consent, signed by the owner of the adjoining premises at north is filed in the case); that there is no safe means of egress from the roof; furthermore, the petitioner contends that the occupancy does not exceed the capacity of interior stairs with the sprinkler allowance.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the fire escape, on condition that a counterbalanced stairs shall be provided from the lowest balcony at second story level to the yard of the premises to the rear, 362 West 11th street, with egress therefrom through premises 362 and 364 West 11th street, direct to the street; that written consent of the owner of the premises to the rear shall be filed with the fire department, and that the order shall be complied with in all other respects.

CONCRETE RULES

USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, April 3, 1928, as they appeared in Bulletin No. 15, Vol. XIII, are hereby corrected to read as follows:

936-27-BZ.

APPLICANT—Philip J. Sinnott, for Benjamin Siegel, owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Southwest corner of Fiske avenue and Queens boulevard, Winfield, Queens.

APPEARANCES—

For Applicant: Philip J. Sinnott.

For Opposition: George P. Heinberger, Adrian Kenk and Joseph Rodelli.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioner Guilfoyle..... 1
Negative: Chairman Walsh, Commissioners Connell and Holland..... 3
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(936-27-BZ)

WHEREAS, Philip J. Sinnott, for Benjamin Siegel, owner, filed, August 19, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner of Fiske avenue and Queens boulevard, Winfield, Borough of Queens; and

WHEREAS, a public hearing was held on this application

* Correction—Words superintendent of buildings in line 27 and line 41 of resolution changed to fire commissioner.

by the board of standards and appeals, at its regular meeting, April 3, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Queens boulevard is in a business district; Fiske avenue, north of Queens boulevard, is in a business district; Fiske avenue, south of Queens boulevard, east side, from 47th avenue to a point 100 ft. south of Queens boulevard, is in an unrestricted district; Fiske avenue, south of Queens boulevard, west side, between a point 100 ft. north of 47th avenue and a point 100 ft. south of Queens boulevard, is in an unrestricted district; 47th street, east of Fiske avenue, north side, is in an unrestricted district; 47th street, east of Fiske avenue, south side, from Fiske avenue to a point 100 ft. east, is in a business district; 47th street, east of Fiske avenue, south side, east of a point 100 ft. east of Fiske avenue, is in an unrestricted district, and 47th street, west of Fiske avenue, is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered December 3, 1927 (re App. No. 4336-1926), reads:

"1. A gasoline service station may not be permitted in a business district.";

and
WHEREAS, the premises consist of an irregular-shaped plot of ground having a frontage of 67.12 ft. on Queens boulevard and 73.25 ft. on Fiske avenue, upon which it is proposed to erect a one-story office, 15 ft. by 20 ft. in area, and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the application be and it hereby is denied.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, April 20, 1928, 10 a. m.

Minutes of Special Meeting, April 20, 1928, 2 p. m.

Minutes of Regular Meeting, April 24, 1928, 10 a. m.

Minutes of Regular Meeting, April 24, 1928, 2 p. m.

Concrete Flat Slabs, Rules.

Reserve Calendar.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 1, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 8, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, May 1, 1928, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:*

CAL. NO. 1081-27-BZ—Application, October 5, 1927, under section 21 of the building zone resolution, of McCooey & Conroy, applicants, substituted for Henry Felsenstein, on behalf of William T. Parker and Margaret Parker Bracken, owners, to permit in a residence and "C" area district the alteration and extension in height and area of an existing garage for the storage of more than five (5) motor vehicles; also the omission of the rear yard required under the building zone resolution; premises 2042-2044 Ocean avenue, Brooklyn.

CAL. NO. 1103-27-BZ—Application, October 11, 1927, under section 21 of the building zone resolution, of William Domroe and Philip J. Sinnott, applicants, on behalf of Thomas J. Burnett, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, also a gasoline service station; premises 105-113 Northern boulevard, south side of Northern boulevard, 187 ft. east of Main street, Flushing, Borough of Queens.

CAL. NO. 1174-27-BZ—Application, November 2, 1927, under section 21 of the building zone resolution, of Joseph A. Cox, applicant, on behalf of Mero Realty Corp., owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 679-687 Utica avenue, northeast corner of Clarkson avenue, Brooklyn.

CAL. NO. 1203-27-BZ—Application, November 14, 1927, under section 21 of the building zone resolution, of Edward S. Shepherd, applicant and owner, to permit in a residence district the erection and maintenance of a gasoline service station; premises 8711 Canarsie lane, northeast corner of Yarkens Hook road, Brooklyn.

CAL. NO. 1249-27-BZ—Application, November 29, 1927, under section 21 of the building zone resolution,

tion, of A. J. Simberg, applicant, on behalf of Plandwell Construction Corp., owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 1403-1407 Boston road, north side of Boston road, 25 ft. west of Prospect avenue, The Bronx.

CAL. NO. 228-27-BZ—Application, March 4, 1927, under section 21 of the building zone resolution, of Thomas J. Higgins, applicant, substituted for Philip J. Sinnott, on behalf of Grace Neiderstein, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 14-30 Empire boulevard, south side of Empire boulevard, 93 ft. east of Flatbush avenue, Brooklyn.

CAL. NO. 1084-27-BZ—Application, October 5, 1927, under section 21 of the building zone resolution, of James H. Manney, applicant, on behalf of Robert Goelet, owner, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a gasoline service station; premises 425 Edgecombe avenue, Manhattan.

CAL. NO. 1137-27-BZ—Application, October 24, 1927, under section 21 of the building zone resolution, of Egan & Ittelson, applicants, on behalf of Bingham Holding Corp., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 1731-1741 Jerome avenue, west side of Jerome avenue, 163 ft. south of West 176th street, The Bronx.

CAL. NO. 1163-27-BZ—Application, October 28, 1927, under section 21 of the building zone resolution, of Alfred J. Boulton, applicant, on behalf of Danwall Realty Co., Inc., owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 2985-2995 Avenue S, northwest corner of Gerritsen avenue, Brooklyn.

CAL. NO. 1250-27-BZ—Application, November 29, 1927, under section 21 of the building zone resolution, of Louis I. Sieven, applicant and owner, to permit in a business district the erection and maintenance of a gasoline service station; premises south side of Fort Hamilton Parkway, 225 ft. west of Chester street, Brooklyn.

CAL. NO. 16-28-BZ—Application, January 9, 1928, under section 21 of the building zone resolution, of Philip J. Sinnott, applicant, on behalf of Mollie Rubin, owner, to permit in a residence district the erection and maintenance of an apartment house with store occupancies on the first story; premises southwest corner of Shakespeare avenue and Anderson avenue, The Bronx.

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1208-27-S)

WHEREAS, Henry C. Pelton, for John D. Rockefeller, Jr., owner, filed, November 15, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 680-684 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated October 17, 1927 (Alt. App. No. 2305-1927), reads:

"2. Windows should comply with Section 264 Labor Law and Rule 503 Industrial Code.";

and

WHEREAS, the building is fireproof, six stories in height, having a frontage of 48 ft. 3½ in. on Fifth avenue and 122 ft. 6 in. on West 54th street; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent. manufacturing, approximately 140 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are windows on the first and second stories in both street walls of the building glazed with ¼ in. thick plate glass, some windows being pivoted and some of casement type; the maximum area of the glass on the first story being 23,760 sq. in., and on the second story being 20,200 sq. in.; and

MINUTES

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the two lower stories.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows of the first two stories on the street fronts, *on condition* that the openings shall be equipped with approved metal frames and sash, glazed with $\frac{1}{4}$ in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION—

(1212-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for B. Zukerman and Brothers, Inc., owner, filed, November 15, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 109-111 Prince street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 17, 1927 (Order No. 91185-LD), reads:

"2. Provide an additional means of exit from the cellar and sub-cellar, said exit to be located at East side of building, in accordance with the provisions of Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories, cellar and sub-cellar in height, 50 ft. by 95 ft. in area; OCCUPIED: sub-cellar, boiler room, storage of crockery, no occupants; cellar, storage of paper stock, 1 person; 1st story, printing, 18 persons; 2nd story, binding, 8 persons; 3rd story, clothing manufacturer, 40 persons; 4th story, clothing manufacturer, 45 persons; 5th story, vacant at present; EQUIPPED with a fire alarm signal system; EXITS: two interior wooden stairways, extending from the first story to roof, enclosed in wire lath and $\frac{3}{4}$ in. P.C. mortar partitions from first to fifth stories with fireproof doors at openings; the southwest wooden stairway, enclosed in wood board partitions, extends to the sub-cellar; there being, also, an engineer's ladder extending from the sub-cellar (only) to the street; and

WHEREAS, petitioner proposes to provide an engineer's ladder at the easterly center of the cellar story leading to proposed opening in the sidewalk vault lights.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that a 60-degree iron stair shall be provided in the rear extension, in space adjoining the elevator landing in the entrance hall at the northerly end of the building at street level, closed in at entrance hall with fire-resisting construction.

THE RESOLUTION—

(609-27-S)

WHEREAS, Detroit Cadillac Motor Car Realty Co., Inc., owner, filed, May 27, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 243-249 West 67th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 2, 1927, reads:

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, six stories in height, with a frontage of 100 ft. on West 67th street and 49 ft. $10\frac{1}{2}$ in. on West 58th street, running through from street to street; OCCUPIED: street level, automobile storage and offices, 20 employees; 2nd story, stock room and offices, 30 employees; 3rd, 4th, 5th and 6th stories, automobile repairs, averaging 25 employees per floor; EXITS consisting of three interior stairways, extending from the first story to the roof, enclosed in fireproof partitions with fireproof doors at the openings; an interior iron stairway on the rear of building, extending from the second story to the roof, with fireproof passageway to 67th street; ROOFS of adjoining buildings: 15 ft. lower on the westerly side; and

WHEREAS, wood and glass partitions and wire partitions have been erected on the second story and on the third story; and

WHEREAS, petitioner contends that the building is used as a service station; that the contract of sale of the land and building has been executed and that the corporation is now erecting a new building on Columbus avenue, between 62nd and 63rd streets, and proposes to move into the new building within a few months, and that to remove the present partitions and build new ones will involve an expenditure.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION—

(1199-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Active Operating Corp., et al., owner, filed, November 11, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 130-132 West 29th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 9, 1926, reads:

"Order No. 652-LD:

"1. Provide a fireproof passageway independent from any other exit leading from the termination of the exterior stairway to the street, as per Section 268 of the Labor Law."

and

WHEREAS, the building is fireproof, twelve stories in height, 40 ft. by 90 ft. 9 in. in area at first story and 40 ft. by 85 ft. 3 in. in area above; OCCUPIED: 1st story, stores, 9 persons; 2nd story, offices and manufacturing furrier, 10 persons; 3rd story, office, showrooms and manufacturing furrier, 11 persons; 4th story, offices, showrooms and manufacturing furrier, 20 persons; 5th story, manufacturing of dresses and furrier, 30 persons; 6th, 7th and 8th stories, offices, showrooms and manufacturing furriers, 15 persons on each story; 9th story, manufacture of clothing and furrier, 15 persons; 10th story, manufacture of coats, 14 persons; 11th story, showroom and office, 8 persons; 12th story, manufacturing furrier, 15 persons; 160

persons above the first story; EQUIPPED with a sprinkler system; EXITS: an interior iron riser and slate-treads stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; an exterior iron stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the mezzanine level, with EGRESS from the termination of the exterior iron stairway by means of a fireproof passageway extending along the mezzanine level and connecting to the main stairway; ROOFS of adjoining buildings: to east, nine stories lower; to west, same level; and

WHEREAS, the petitioner proposes to limit the occupancy of the building to the capacity of the interior stairway plus the sprinkler allowance and requests the acceptance of existing conditions.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects a separate and independent passageway from the termination of the exterior screened stairway, on condition that a fireproof passageway at intermediate story level between first and second story shall be provided of fireproof construction leading direct to main entrance at the front of the building, and that the occupancy shall be limited to the legal capacity of the interior primary means of exit, plus allowance for sprinkler installation.

THE RESOLUTION—

(1281-27-A)

WHEREAS, Socony Burner Corp., for Standard Oil Com-
pany of New York, owner, filed, December 7, 1927, an
appeal from a decision of the fire commissioner, affecting
premises 525 East 119th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated
November 5, 1927 (No. 3909-26), reads:

"2. Industrial type burners must be approved by
Board of Standards and Appeals."

and
WHEREAS, the building is fireproof, three stories in height,
60 ft. by 100 ft. in area; OCCUPIED: cellar, boiler room,
2 persons; 1st story, garage and stores, 40 persons; 2nd
story, office, carpenter and machine shop, 60 persons; 3rd
story, blacksmith, repair and painting, 100 persons; a fuel
oil heating system having been installed consisting of a
1,080-gallon storage tank, buried outside, 2 ft. below grade,
connected by all necessary piping to a 200-gallon auxiliary
tank and two industrial Type A burners located in the cellar
using Grade B fuel oil; and

WHEREAS, the appellant claims the burner is listed as
"standard" by the Fire Underwriters Laboratories, approved
by the Department of Public Safety of Philadelphia, Pa.,
and by the Bureau of Fire Risks, Newark, N. J.; further-
more, the appellant contends that the burners are in charge
of an attendant who has a certificate of fitness from the
Bureau of Fire Prevention.

Resolved, that the decision of the fire commissioner be and
it hereby is affirmed, and the appeal be and it hereby is
denied.

1225-27-A.

APPELLANT—William F. Doyle, substituted for Eugene
De Rosa, for 254 West 54th Street Corp., owner.

SUBJECT—Appeal from decision of the superintendent of
buildings.

229-237 West 53rd street, Manhattan.

APPEARANCES—

For Appellant: William F. Doyle.
For Administration: Samuel Cohen, assistant engi-
neer of bureau of buildings, and Captain Mc-
Carthy of the fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0
Negative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Chief
Kenlon 5
Absent 0

THE RESOLUTION—

(1225-27-A)

WHEREAS, William F. Doyle, substituted for Eugene De
Rosa, Inc., filed, November 19, 1927, an appeal from a de-
cision of the superintendent of buildings, affecting premises
234-256 West 54th street and 229-237 West 53rd street,
Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings,
dated November 16, 1927, reads:

"In the matter of the wood wainscoting on the walls
of the auditorium of the Gallo Theatre situated at 229-37
West 53d Street and 234-56 West 54th Street, I beg to
state that the samples of said wainscoting which were
selected on November 10th, 1927, were submitted to the
Columbia University Testing Laboratories for a test and
the result of said test shows that the samples would not
pass the test.

"You are hereby directed to remove said wood wains-
coting or cut it down to six (6) feet in height and fill in
solidly behind said wainscoting with fireproof material."

and

WHEREAS, the premises consist of a plot of ground with
a frontage of 112 ft. 6 in. on West 53rd street, 50 ft. on
54th street and a depth of 100 ft. 5 in. from 53rd street
and a depth of 100 ft. 5 in. on 54th street; the 53rd street
section being two stories, fireproof construction, occupied
as a theatre; the 54th street section is fireproof, sixteen
stories in height, occupied as a theatre and office building,
the seating capacity of the theatre being 740 persons in
the orchestra and 554 in the balcony; there has been in-
stalled around the auditorium of the theatre wood wains-
coting to a height of from 8 to 11 ft. (the law permitting
wainscoting to a height of 6 ft.) the wood used in the
wainscoting having been fireproofed and a certificate to that
effect from Columbia University Laboratories having been
received, the building inspector, after taking samples of
wood from the job, and after a test reached the conclusion
that although the wood had been fireproofed it did not
conform to the rules of the board; and

WHEREAS, appellant contends that the carpenter installed
the woodwork in good faith and that it would now be a
hardship to make any alterations in the wainscoting.

Resolved, that the decision of the superintendent of build-
ings be and it hereby is affirmed, and the appeal be and it
hereby is denied.

1228-27-A.

APPELLANT—Ben Levy, owner.

SUBJECT—Appeal from orders of the fire commissioner.

THE RESOLUTION—
(1228-27-A)

WHEREAS, Ben Levy, owner, filed, November 22, 1927, an appeal from orders of the fire commissioner, affecting premises 346-360 Maujer street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated October 18, 1927, read:

“Order No. 27354-F:

“1. Provide a separate and distinct system of *Automatic Sprinklers* throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24th, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.

“Order No. 27355-F:

“1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.”;

and

WHEREAS, the building, facing on two street fronts, is non-fireproof, one story (19 ft. 6 in.) in height, 183 ft. by 95 ft. ⅛ in. (approximately 17,400 sq. ft.) in area, subdivided by brick walls with openings therein provided by fireproof doors and windows; the area of the largest subdivision being approximately 12,400 sq. ft.; OCCUPIED as offices (in the northeast portion) and for the storage of sawdust in bags, 3 persons; and

WHEREAS, appellant contends that the building is accessible from two street fronts; that the premises (excepting for the office portion) is unheated; that there are eighty-five fire pails distributed throughout the building and that there are city fire hydrants in the immediate vicinity.

Resolved, that the orders of the fire commissioner be and they hereby are *modified*, and that the appeal be and it hereby is *granted*, as to Order No. 27354-F, only so far as it affects the office space on the Morgan avenue front to a distance of 22 ft. westerly therefrom, *on condition* that the remainder of the premises used for and maintained for storage of sawdust shall be equipped with a one-source sprinkler system with four-inch street connection and equipped with a dry pipe valve, and that the building shall be not increased in height or area; *granted*, as to Order No. 27355-F, as to installation of the standpipe, *on condition* that the premises shall be equipped with a sprinkler system as stipulated in this appeal.

1243-27-A.

THE RESOLUTION—
(1243-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Strauss & Co., lessee, filed, November 26, 1927, an appeal from an order of the fire commissioner, affecting premises 604-628 West 43rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 14, 1927, reads:

“Order No. 14873-F:

“1. Provide a tank on the roof of at least 3,500 gallons capacity for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 ft. above the roof level. Sec. 20, Chap. 12, Code of Ordinances.”;

and

WHEREAS, the building is non-fireproof (mill constructed) and separated into two sections by a brick wall with an opening (protected with a fireproof door) on each story leading into the interior stairway; the westerly section is further subdivided by a twelve-inch brick wall with openings (some unprotected) on each story; the easterly section is five stories (65 ft. to lower chord of truss) in height and 100 ft. by 56 ft. (5,300 sq. ft. inside area) in area; OCCUPIED for the storage of theatrical scenery, 6 persons in entire section; the westerly section is four stories (50 ft. 8 in. to lower chord of truss) in height and 175 ft. by 91 ft., irregular (approximately 12,800 sq. ft. inside area), in area; total inside area of both sections being approximately 18,100 sq. ft.; westerly section OCCUPIED: 1st story, stock of sheet metal, 25 persons; 2nd story, offices and manufacture of metal signs, 30 persons; 3rd story, vacant at present; 4th story, sign painting and carpenter work, 20 persons; and

WHEREAS, appellant contends that the premises are equipped with an interior fire alarm system and with a dry pipe standpipe system consisting of a riser in each of the two fireproof stairways and fed only from two siamese connections on the street fronts; that under Rule 44 of the Standpipe Rules same is an existing system which has been previously accepted and contends, further, that it is due only to the slight excess in area that a standpipe could be required.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the two existing tanks shall be supported on steel beams with the ceiling immediately below fire-retarded throughout, providing an aggregate equally divided capacity not exceeding 3,200 gallons, and that standpipe installation otherwise shall comply with the rules in all other respects.

1238-27-A.

APPELLANT—James W. Byrnes, for A. B. Ansbacher Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

THE RESOLUTION—

(1238-27-A)

WHEREAS, James W. Byrnes, for A. B. Ansbacher Co., Inc., owner, filed, November 22, 1927, an appeal from an order of the fire commissioner, affecting premises 300-326 North 7th street, 479-495 Metropolitan avenue and 289-295 North 6th street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 20, 1927 (Order No. 711-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story including basements, cellars and roofs, placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the premises consist of an irregularly shaped plot of ground having a frontage of 378 ft. 10 in. on North 7th street, 183 ft. 2 in. on Metropolitan avenue and 111 ft. 5½ in. on North 6th street, upon which is located a group of eight interconnected, non-fireproof buildings: Building No. 1 is three stories (48 ft. 6 in.) in height, 65 ft. by 93 ft., irregular (approximately 5,100 sq. ft.) in area; Building No. 2 is three stories (48 ft. 6 in.) in height, 25 ft. by 73 ft., irregular (approximately 1,800 sq. ft.) in area; Building No. 3 is one story (20 ft. 2 in. to bottom of truss) in height, 99 ft. by 100 ft., irregular (approximately 8,700 sq. ft.), in area; Building No. 4 is two stories (44 ft. 8 in.) in height, 90 ft. by 95 ft. (approximately 8,500 sq. ft.) in area; Building No. 5 is one story (24 ft.) in height, 44 ft. by 109 ft., irregular (approximately 4,800 sq. ft.), in area; Building No. 6 is one story (20 ft.) in height, 121 ft. by 74 ft., irregular (approximately 8,800 sq. ft.), in area; Building No. 7 is one story (19 ft.) in height, 75 ft. by 100 ft. (7,500 sq. ft.) in area; Building No. 8 is one story (11 ft. 3 in.) in height, 25 ft. by 100 ft. (2,500 sq. ft.) in area; a total area of approximately 48,000 sq. ft.; OCCUPIED by one concern for the manufacture of insecticides and dry colors: 1st story, 45 persons; 2nd story, 12 persons; 3rd story, 7 persons; a total number of 64 persons in the entire premises; and

WHEREAS, appellant contends that all openings between the eight buildings are protected by fireproof doors on both sides of the dividing walls; that the largest subarea is less than 9,000 sq. ft.; that at various places throughout the premise there are tanks of water (primarily used in manufacturing processes) having a total capacity of 409,000 gallons, to which fire hose is connected; that there is provided National District Telegraph service for watchmen and that there are twelve stations in the plant; that the buildings are low in height and are accessible on three street fronts; and

WHEREAS, the premises consisting of a group of buildings separated by a brick wall, no building of which exceeds 10,000 sq. ft. in area or 85 ft. in height.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the premises as now subdivided, as indicated on plans filed in this appeal, shall be not increased in height or area; that all horizontal openings in the subdivision walls of these premises shall be equipped with fireproof doors and that all auxiliary fire-fighting equipment, as directed by the fire commissioner, shall be installed and distributed according to such direction, so long as conditions as to occupancy and use remain substantially unchanged.

BUILDING ZONE CASES

1164-27-BZ.

APPLICANT—Robert W. Maloney, for A. W. Palumbo, owner.

SUBJECT—Application (re decision of the superintendent

of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

THE RESOLUTION—

(1234-27-BZ)

WHEREAS, Alonzo E. DeBaun, owner, filed, November 22, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of an automobile showroom and service station in connection therewith; premises south side of Hillside avenue, 120 ft. west of 146th street (Colonial avenue), Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hillside avenue is in a business district, 144th street is in a business district, 146th street, south of a point 100 ft. south of Hillside avenue, is in a residence district, 88th avenue, from a point 100 ft. east of 144th street to a point 100 ft. east of 146th street, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered March 8, 1927 (re Plan No. 1828-1926), reads:

"1. Automobile showroom and service station in connection therewith not permitted in a business district extending into a residence district. * * *";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 122.54 ft. and a depth of 163.24 ft., irregular; to be occupied as a showroom and service station; an irregular shaped portion along the rear of the proposed building is in the residence district, 32 ft. by approximately 120 ft., 3,800 sq. ft. in area, and the remainder, approximately 19,500 sq. ft. of the building is in the business district; proposes to use that portion of the building facing on Hillside avenue as automobile showrooms and as a driveway leading to the service station at the rear; and

WHEREAS, the entire premises is in single ownership, the rear portion of which extends into the residence use area.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only as far as it affects the first story, street grade level of the entire plot, on condition that any structure erected in excess of one story shall be restricted to conforming uses, and on condition that no part or portion of these premises shall be used, maintained or operated for automobiles in live storage, use or operation, and that any industrial work, use or operation on any automobiles on these premises shall be restricted to that of manual operation; that no machinery, open furnace, flame or torch shall be permitted in the use and operation of any business conducted on the premises; that there shall be no roof signs erected or maintained; that the rear and gable walls within the business use area of the premises shall be unpierced throughout their entire height and length; that any permits required shall be obtained within six months and all work involved completed within one year from the date of this action.

THE RESOLUTION—

(1056-27-BZ)

WHEREAS, Henry G. Harrington, for Felice Mancuso, owner, filed, September 28, 1927, an application, under the building zone resolution, to permit the extension, from an unrestricted district into a business district, of a proposed garage for the storage of more than five (5) motor vehicles; the board having permitted the erection of a garage for more than five (5) motor vehicles on a portion of this site under certain conditions; premises 608-610 Union street and 569-577 President street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Union street, west of a point 100 ft. west of Fourth avenue, is in an unrestricted district; Union street, east of a point 100 ft. west of Fourth avenue, is in a business district; President street, west of a point 100 ft. west of Fourth avenue, is in an unrestricted district; President street, east of a point 100 ft. west of Fourth avenue, is in a business district, and Fourth avenue, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 8, 1927 (re App. No. 16368-27), reads:

"1. Proposed extension of Public Garage for more than 5 motor vehicles extends partly into a business district. Therefore same is contrary to Art. II, Sect. 4 of Zone Resolution.

"2. Also proposed change violates Board of Appeals Resolution in omitting brick wall in rear of building, 95' 0" back from Union St.

"Proposed changes are therefore denied.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 100 ft. on Union street, 100 ft. on President street and a depth of 190 ft.; the easterly portion of the plot, 20 ft. frontage by 190 ft. deep (3,800 sq. ft.) is in the business district; the westerly portion of the plot, 80 ft. frontage by 190 ft. deep (15,200 sq. ft.), is in the unrestricted district; under Cal. No. 579-26-BZ the board granted permission for the erection of a one-story garage, 100 ft. by 95 ft. in area, on the northerly portion of this plot; this garage is not erected; on July 19, 1927, the board granted an extension of time to July 26, 1928, for the completion of the garage; under Cal. No. 579-26-BZ the garage was granted on condition that the building shall not exceed one story in height above grade and shall be constructed fireproof; and

WHEREAS, the board, under Cal. No. 579-26-BZ, did grant, under sections 7e, 7g and 21 of the building zone resolution, permission for the erection of a one-story building on the Union street side of the site under appeal in this application; and

WHEREAS, in this application the applicant has filed 87 per cent. duly acknowledged consents of the property deemed affected by the board; and

WHEREAS, it is proposed to erect this building on a 100 ft. frontage by 95 ft. in depth, contiguous to and in conjunction with a garage immediately to the north and front-

MINUTES

ing on Union street, permit for which is now in force, so that they will be operated as one continuous structure extending from Union to President street.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be constructed fireproof, not exceeding one story in height above grade; that the gable walls shall be unpierced throughout their entire height and length; that any skylights installed shall be glazed with plain glass, equipped with wire guards above and below; that there shall be no vehicular opening on the street front within 25

ft. of the easterly gable wall; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings of attractive architectural design; that there shall be no roof signs erected; that any gasoline storage equipment installed shall be located at the westerly end of the building near the street front; that the roof shall be of flat design and construction; that all permits required shall be obtained within nine months and any work involved completed within eighteen months from the date of this action.

Adjourned 3.10 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION—

(1074-27-BZ)

WHEREAS, John J. Dunnigan, for Gutttag Brothers Realty Co., Inc., owner, filed, October 5, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 585 St. Ann's avenue, northwest corner of East 150th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that St. Ann's avenue, north of East 149th street, is in a business district; St. Ann's avenue, south of East 149th street, west side, is in a business district; St. Ann's avenue, south of East 149th street, east side, is in a residence district, and East 150th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 27, 1927 (re App. N. B. 2130-27), reads:

"1. Erection and maintenance of gasoline selling station in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the premises consist of an irregular shaped plot of ground having a frontage of 94 ft. on St. Ann's avenue and 21 ft. 6 in. on East 150th street, upon which it is proposed to erect a small one-story office and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

1152-27-BZ.

APPLICANT—John J. Dunnigan, for Knickerbocker Hospital, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—505 West 131st street and 1448 Amsterdam avenue, northwest corner, Manhattan.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: Alfred J. Talley, Albert Zimmerman, Ira V. Livingston, Bernard Stein and Lydia Katz.

WHEREAS, Gardiner Conroy, for Max Silverman, owner filed, October 11, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 5702-

MINUTES

5712 Church avenue, southeast corner of East 57th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Church avenue is in a business district, East 57th street, south of a point 100 south of Church avenue, is in a residence district, and Kings Highway, south of a point 100 ft. south of Church avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 21, 1927 (re Applic. No. 13266-27), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4a, Subdivision No. 46. The installation of a gasoline service station in a business district."

and
WHEREAS, the premises consist of a plot of ground having a frontage of 102 ft. 23/4 in. on Church avenue, 53 ft. 5 1/8 in. on East 57th street and a depth across the rear of 88 ft., upon which it is proposed to erect a one-story office, 12 ft. by 16 ft. in area, and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, a committee of the board visited the premises and reported unfavorably on the application; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the appeal be and it hereby is denied.

976-27-BZ.

APPLICANT—Philip J. Sinnott, for McMahon Brothers, owners.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution to permit partly in a business district and partly in a residence district the extension in area and height of an existing garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—Southwest corner of Queens boulevard and Devon place, Forest Hills, Borough of Queens.

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(976-27-BZ)

WHEREAS, Philip J. Sinnott, for McMahon Brothers, owners, filed, September 6, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the extension in area and height of an existing garage for the storage of more than five motor vehicles; premises southwest corner of Queens boulevard and Devon place, Forest Hills, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Queens boulevard is in a business district, Devon place, south of a point 100 ft. south of Queens boulevard, is in a residence district, and Devon place, from Queens boulevard to a point 100 ft. south of Queens boulevard, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 5, 1927 (re Alt. No. 3609-27), reads:

"The erection or extension of a building in a business and residence district for use as a public garage is contrary to Art. 2, Section 4 Zone Law.";

and

WHEREAS, the northerly property (100 ft. by 100 ft. in area) of the building is in the business district and the southerly portion (100 ft. by 50 ft. in area) is in the residence district; the existing garage is non-fireproof, one story in height, having a frontage of 89 ft. 7 in. on Queens boulevard and 150 ft. on Devon place and sets back 10 ft. from the building line on Devon place; it is proposed to extend the first story out to the building line of Devon place for a 100 ft. portion of this frontage and to erect a second story over the entire structure as extended; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant is entitled to relief under section 21 of the building zone resolution; and

WHEREAS, applicant has filed 79 per cent. consents of an area deemed affected by the board, being practically in accordance with section 7g of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only as far as it affects the extension of the building on the Devon place frontage westward 10 ft. or to the building line of Devon place for a depth of 100 ft. and the addition of a story over the whole area, on condition that the facade of building shall be erected in keeping with the existing building, and that the structure shall comply with the requirements of the building code in all respects; all permits required shall be obtained within six months and all work completed within one year from the date of this action.

1123-27-BZ.

APPLICANT—William Meyer, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used for stores on the first story and as dwellings above.

PREMISES AFFECTED—Northwest corner of Central avenue and Meade street (68th street), Ridgewood, Borough of Queens.

APPEARANCES—

For Applicant: William Meyer.

THE RESOLUTION—

(1123-27-BZ)

WHEREAS, William Meyer, owner, filed, October 20, 1927, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used for stores on the first story and as dwellings above; premises northwest corner of Central avenue and Meade street (68th street), Ridgewood, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Meade street, north of Central avenue, is in a residence district; Central avenue, north side, west of a point 100 ft. east of Richard avenue, is in a

MINUTES

business district; Central avenue, north side, east of a point 100 ft. east of Richard avenue, is in a residence district; Central avenue, south side, is in a business district, and Richard avenue, north of a point 100 ft. north of Central avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 10, 1927 (re N. B. 13227-27), reads:

"The erection of a structure for use as a store within a residence district is contrary to Section No. 3 of the Zone Law.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 95 ft. on Central avenue and 100 ft. on Meade street; to be occupied as stores on first story and as dwellings above; and

WHEREAS, the applicant has, under the principle of section 7, subdivision g, on an area fixed by the board and deemed affected, filed 97 per cent. consents of the owners within said area.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, for business use only, so far as it affects the first story on the Central avenue front, *on condition* that the remainder of the building or any other building so erected on these premises shall be restricted to conforming residential use and occupancy; *on further condition* that the wall on the Meade street elevation shall return on the Central avenue front not less than 16 in.; that there shall be no commercial display or opening for business use on the Meade street front; that any windows within the store premises on the Meade street front shall be restricted to window openings equipped with fixed sash; that there shall be no advertising of any nature or description permitted on the Meade street elevation; that any advertising on the Central avenue elevation shall be limited to and restricted to the plate glass show windows on the store front; that the exterior of the building on both street fronts, other than the plate glass show windows on the Central avenue elevation, shall be finished with face brick and natural stone or architectural terra cotta trimmings, and that all permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

961-27-BZ.

APPLICANT—The New York Edison Company, owner.

SUBJECT—Application, re decision of the superintendent of buildings, under sections 7-c and 21 of the building zone resolution, to permit in a residence district the alteration and extension of an existing transforming and electrical distributing station.

PREMISES AFFECTED—148-148½ 40th street and 151-153 East 39th street, Manhattan.

APPEARANCES—

For Applicant: E. M. Van Nordan and Robert Kohler.

For Opposition: John P. Fox, J. Burmeister, David Kenymer, Philip Cobden, Mr. Mooney, Rosa Wolf and Prof. Kendrick.

THE RESOLUTION—

(961-27-BZ)

WHEREAS, The New York Edison Co., owner, filed, August 30, 1927, an application, under the building zone resolution, to permit in a residence district the alteration

and extension to an existing transforming and electrical distributing station; premises 151-153 East 39th street and 148-148½ East 40th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 39th street is in a residence district, that East 40th street is in a residence district and that Third avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 10, 1927 (re Applic. 1703-27), reads:

"1. Proposed occupancy is contrary to the provisions of Sections 3 and 6 of the Zoning Resolution.";

and

WHEREAS, the existing building is of fireproof construction, four stories in height, with a frontage of 36 ft. and a depth of 98 ft. 9 in.; occupied as a transforming and electrical distributing station; and

WHEREAS, it is proposed to erect a four-story fireproof rear extension, 98 ft. 9 in. by 36 ft., to the existing electric distributing station on East 39th street, the new rear addition will extend through the block and face on East 40th street, which is within a residence district; and

WHEREAS, the board deemed that applicant, in light of the existing public utility use, has substantiated his basis of appeal and the board is empowered under section 7, subdivision d, to vary the building zone resolution on the grounds of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the use district regulations with respect to this building, *on condition* that the building shall not exceed in height four stories, in dimensions 71 ft. above the mean curb level; that the use throughout shall be restricted to the conduct, housing and operation as a rotary transformer distributing station; that there shall be no machinery or machine shop operation conducted on these premises; that there shall be no trucking to or from these premises on the 40th street frontage and that there shall be no vehicular entrance on the 40th street frontage; that there shall not be more than one doorway, not exceeding a width of 44 inches maintained for the emergency exit and not for general entrance and operation of operators on the premises; that the architectural treatment on the street front shall be in substantial accordance with the plans filed in this appeal; that a return shall be made to this board by the architect of the actual working drawings for approval before submission to bureau of buildings; that the building on the street front shall be finished with face brick and natural stone trimmings; that there shall be no sign, lettering or advertising of any nature or description exposed or permitted on the exterior of the premises on 40th street frontage; that there shall be no openings in the gable walls on the property lines; that any machine installed or operated on these premises shall be maintained and stand free of the side gable walls; that there shall be no heating apparatus using coal or oil fuel operated on these premises, and that any permits required shall be obtained within nine months and all work involved shall be completed within eighteen months.

1126-27-BZ.

APPLICANT—Edward Hoffmann, for Pauline Brickman, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—1781 Hilder avenue, The Bronx.

MINUTES

THE RESOLUTION—

(1126-27-BZ)

WHEREAS, Edward Hoffman, for Pauline Brickman, owner, filed, October 20, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1781 Hilder avenue, north side of Hilder avenue, intersection of Pelham Parkway, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hilder avenue is in a business district, Pelham Parkway North is in a business district, Pelham Parkway, north side, to west of plot in question, is in an unrestricted district, and Pelham Parkway, south side, is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 9, 1928, reads:

"1. Erection and maintenance of gasoline selling station in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the premises consist of an irregular shaped plot of ground having a frontage of 24.76 ft. on Hilder avenue and 125.08 ft. on Pelham Parkway, upon which it is proposed to erect a one-story office building, 12 ft. by 20 ft. in area, and to install four gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the plot involved in this appeal is of triangular formation, backing up to a designated unrestricted use district and directly opposite, on the highway, an unrestricted district; and

WHEREAS, the applicant has filed owners' consents of 33 parcels of property out of 42 parcels affected by this application on the same street front; and

WHEREAS, the board feels this is a justifiable adjustment, supported by a majority of consents of property owners of interest, materially affected.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be a brick wall, not less than 12 ft. in height, erected on the northerly and easterly boundary lines of the property, faced on the interior of the premises with light-color enamel face brick, the walls coped with natural stone or architectural terra cotta; that no gasoline pump shall be erected within 10 ft. of the building line on the Pelham Parkway frontage; that there shall be but two vehicular entrances, one at the extreme easterly end of the property line of the highway frontage and one at the extreme westerly end of the property on the highway frontage; that these driveway entrances shall not exceed a width of 10 ft.; that a concrete curbing not less than 18 in. in height above grade and 12 in. in depth shall be erected on the building line, fronting the entire property; that there shall be no automobile crankcase or greasing racks, pits or frames erected, maintained or operated on the premises; that any signs or advertising display on the premises shall be restricted to the advertising on the illuminated glass globes of the gasoline pumps; that there shall be not more than

one building erected on the premises, not exceeding an area of 12 ft. by 20 ft., the exterior of which shall be finished with light-color enamel brick; that the roof shall be a hip roof covered with variegated slate or roof tile of Spanish type; that the use and conduct of this building shall be restricted to the accommodation and the shelter of the patrons and operators using the premises; that there shall be no signs displayed on this building other than the lettering restricted to the plate glass windows of this front, and that any permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

THE RESOLUTION—

(664-26-BZ)

WHEREAS, Rouse & Goldstone, for A. B.-28 East 52nd Street Corporation, owner, filed, July 30, 1926, an application, under the building zone resolution, to permit the extension from a business district into a residence district of a proposed business building; premises 28-36 East 52nd street and 481 Madison avenue (southeast corner), Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Madison avenue is in a business district, East 52nd street is in a residence district and East 51st street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 19, 1926 (re N. B. 341-1926), which reads:

"1. Building encroaches into residence district, contrary to the provisions of Section 2 of Building Zone Resolution.";

and

WHEREAS, the proposed building is of fireproof construction, 28 stories in height, with a frontage of 100 ft. 5 in. and a depth of 124 ft. 6 in.; to be occupied as a business building; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7c of the building zone resolution and that it would entail practical difficulties and unnecessary hardship to carry out the strict letter of the zoning requirements; and

WHEREAS, this application was granted by the board September 30, 1926, on certain conditions, and applicant requested a modification of the time limit imposed, which was

MINUTES

granted July 12, 1927, and applicant now requests a modification as to the location of business entrances and a further extension of time.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the area district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be no advertising display of any nature or description, signs or otherwise, within the residence use area; that the sills of any windows within the residence area shall be not less than 2 ft. 6 in. above grade; that the rear walls where exposed above adjoining and abutting premises shall be finished with light-colored face brick; that the requirements of the building zone resolution shall be complied with in all other respects, as to height, area, rear yard requirements and side courts; that all permits necessary for the prosecution of the work shall be obtained in nine months and the building completed within eighteen months from the date of this action—April 24, 1928.

WHEREAS, John J. Dunnigan, for C. B. Grundstein, owner, filed, April 22, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 1178 East 180th street and 1179 Lebanon street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 11, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 180th street is in a business and residence district, Lebanon street is in a business district and Morris Park avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 21, 1927 (re N. B. 902-1927), reads:

"Erection of proposed garage for storage of more than five (5) motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 80.66 ft. on Lebanon street and 28.92 ft. on East 180th street and a depth of 200.27 ft. and 209.27 ft., irregular; to be occupied as a garage for the storage of more than five (5) motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship, irregular shape of the plot and its location with relation to the railroad structure; furthermore, this plot, the property of the owner of adjoining six-story apartment house, offers a buffer between the railroad and apartment house and is intended for the accommodation of the automobiles of tenant occupants of apartment house; and

WHEREAS, this application was granted by the board at its meeting, October 11, 1927, on certain conditions, and applicant requested a modification of these conditions and omission of the restriction as to location of gasoline storage, which was granted by vote of the board.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be restricted in height to a two-story structure above grade on the Lebanon street frontage and shall be restricted to not more than one story in height above grade on the East 180th street frontage; that there shall be not more than one vehicular entrance, not exceeding nine (9) feet in clear width from jamb to jamb on the East 180th street frontage; that no sign or advertising structure shall be erected or maintained on the roof; that the easterly gable wall shall be unpierced throughout its entire height and length; that the elevations on both street fronts shall be finished with face brick and architectural terra cotta; that the front elevations on both streets shall be topped out with a pediment coping wall with architrave and frieze immediately above the lintels of the second story opening, the front wall to be laid up in two-tone buff-colored brick; that there shall be no portable gasoline tanks operated outside of this building on the street fronts; that all necessary permits shall be obtained within six months and the work completed within one year from the date of this action.

Adjourned 6.30 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

Amended Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

RULES

COVERING THE DESIGN OF REINFORCED CONCRETE FLAT SLABS.

Adopted by the Board of Standards and Appeals, July 8, 1920, under Cal. 395-20-S.

Rule 1. Application. The rules governing the design of reinforced concrete flat slabs shall apply to such floors and roofs, consisting of three or more rows of slabs, without beams or girders, supported on columns, the construction being continuous over the columns and forming with them a monolithic structure.

Rule 2. Compliance with Building Code. In the design of reinforced concrete flat slabs, the provisions of article 16 of the building code shall govern with respect to such matters as are specified therein.

Rule 3. Assumptions. In calculations for the strength of reinforced concrete flat slabs, the following assumptions shall be made:

(a) A plane section before bending remains plane after bending;

(b) The modulus of elasticity of concrete in compression within the allowable working stresses is constant;

(c) The adhesion between concrete and reinforcement is perfect;

(d) The tensile strength of concrete is nil;

(e) Initial stress in the reinforcement due to contraction or expansion in the concrete is negligible.

Rule 4. Stresses. (a) The allowable unit shear in reinforced concrete flat slabs on the bd section around the perimeter of the column capital shall not exceed one hundred twenty (120) pounds per square inch; and the allowable unit shearing stress on the bjd section around the perimeter of the drop shall not exceed sixty (60) pounds per square inch, provided that the reinforcement is so arranged or anchored that the stress may be fully developed for both positive and negative moments.

(b) The extreme fibre stress to be used in concrete in compression at the column head section shall not exceed seven hundred fifty (750) pounds per square inch.

Rule 5. Columns. For columns supporting reinforced concrete flat slabs, the least dimension of any column shall be not less than one-fifteenth ($1/15$) of the average span of any slabs supported by the columns; but in no case shall such least dimension of any interior column supporting a floor or roof be less than sixteen (16) inches when round nor fourteen (14) inches when square; nor shall the least dimension of any exterior column be less than fourteen (14) inches.

Rule 6. Column Capital. Every reinforced concrete column supporting a flat slab shall be provided with a capital whose diameter is not less than 0.225 of the average span of any slabs supported by it. Such diameter shall be measured where the vertical thickness of the capital is at least one and one-half ($1\frac{1}{2}$) inches, and shall be the diameter of the inscribed circle in that horizontal plane. The slope of the capital considered effective below the point where its diameter is measured shall nowhere make an angle with the vertical of more than forty-five (45) degrees. In case a cap of less dimensions than hereinafter described as a drop, is placed above the column capital, the part of this cap enclosed within the lines of the column capital extended upward to the bottom of the slab or drop at the slope of forty-five (45) degrees may be considered as part of the column capital in determining the diameter for design purposes.

Rule 7. Drop. When a reinforced concrete flat slab is thicker in that portion adjacent to or surrounding the column, the thickened portion shall be known as a drop. The width of such drop when used, shall be determined by the shearing stress in the slab around the perimeter of the drop, but in no case shall the width be less than 0.33 of the average span of any slabs of which it forms a part. In computing the thickness of drop required by the negative moment on the column head section, the width of the drop only shall be considered as effective in resisting the compressive stress, but in no case shall the thickness of such drops be less than 0.33 of the thickness of the slab. Where drops are used over interior columns, corresponding drops shall be employed over exterior col-

umns and shall extend to the one-sixth ($1/6$) point of the panel from the center of the column.

Rule 8. Slab Thickness. The thickness of a reinforced concrete flat slab shall be not less than that derived by the formulae $t = 0.024 L \sqrt{w} + 1\frac{1}{2}$ for slabs without drops, and $t = 0.02 L \sqrt{w} + 1$ for slabs with drops, in which t is the thickness of the slab in inches, L is the average span of the slab in feet, and w is the total live and dead load in pounds per square foot; but in no case shall this thickness be less than one-thirty-second ($1/32$) of the average span of the slab for floors, nor less than one-fortieth ($1/40$) of the average span of the slab for roofs, nor less than six (6) inches for floors nor less than five (5) inches for roofs.

Rule 9. Reinforcement. (a) In the calculation of moments at any section, all the reinforcing bars which cross that section may be used, provided that such bars extend far enough on each side of such section to develop the full amount of the stress at that section. The effective area of the reinforcement at any moment section shall be the sectional area of the bars crossing such section multiplied by the sine of the angle of such bars with the plane of the section. The distribution of the reinforcement of the several bands shall be arranged to fully provide for the intermediate moments at any section.

(b) Splices in bars may be made wherever convenient but are preferably at points of minimum stress. The length of any splice shall be not less than eighty (80) bar diameters and in no case less than two (2) feet. The splicing of adjacent bars shall be avoided as far as possible. Slab bars which are lapped over the column, the sectional area of both being included in the calculation for negative moment, shall extend to the lines of inflection beyond the column center.

(c) When the reinforcement is arranged in bands, at least fifty (50) per cent of the bars in any band shall be of a length not less than the distance center to center of columns measured rectangularly and diagonally; on bars used as positive reinforcement shall be of a length less than half ($1/2$) the panel length plus forty (40) bar diameters for cross bands, or less than seven-tenths ($7/10$) of the panel length plus forty (40) bar diameters for diagonal bands and no bars used as negative reinforcement shall be of a length less than half ($1/2$) the panel length. All reinforcement framing perpendicular to the wall in exterior panels shall extend to the outer edge of the panel and shall be hooked or otherwise anchored.

(d) Adequate means shall be provided for properly maintaining all slab reinforcement in the position assumed by the computations.

Rule 10. Line of Inflection. In the design of reinforced concrete flat slab construction, for the purpose of making calculations of the bending moments at sections other than defined in these rules, the line of inflection shall be considered as being located one-quarter ($1/4$) the distance, center to center, of columns, rectangularly and diagonally, from center of columns for panels without drops, and three-tenths ($3/10$) of such distance for panels with drops.

Rule 11. Moment Sections. For the purpose of design of reinforced concrete flat slabs, that portion of the section across a panel, along a line midway between columns, which lies within the middle two quarters of the width of the panel shall be known as the inner section, and those portions of the section in the two outer quarters of the width of the panel shall be known as the outer sections. Of the section which follows a panel edge from column to column and which includes the quarter perimeters of the edges of the column capitals, that portion within the middle two quarters of the panel width shall be known as the mid section and the two remaining portions, each having a projected width equal to one-quarter of the panel width, shall be known as the column head sections.

RULES

Rule 12. Bending Moments. In the design of reinforced concrete flat slabs the following provisions with respect to bending moments shall be observed. In the moment expressions used:

W is the total dead and live load on the panel under consideration, including the weight of drop whether a square, rectangle or parallelogram;

W_1 is the total live load on the panel under consideration;

L is the length of side of a square panel center to center of columns; or the average span of a rectangular panel which is the mean length of the two sides;

n is the ratio of the greater to the less dimension of the panel;

h is the unsupported length of a column in inches, measured from top of slab to base of capital;

I is the moment of inertia of the reinforced concrete column section.

A. Interior Square Panels. The numerical sum of the positive and negative moments shall be not less than $1/17 W L$. A variation of plus or minus five (5) per cent shall be permitted in the expression for the moment on any section, but in no case shall the sum of the negative moments be less than sixty-six (66) per cent of the total moment, nor the sum of the positive moments be less than thirty-four (34) per cent of the total moment for slabs with drops; nor shall the sum of the negative moments be less than sixty (60) per cent of the total moment, nor the sum of the positive moments be less than forty (40) per cent of the total moment for slabs without drops.

1. In *two-way systems*, for slabs with drops, the negative moment resisted on two column head sections shall be $-1/32 W L$; the negative moment on the mid section shall be $-1/133 W L$; the positive moment on the two outer sections shall be $+1/80 W L$ and the positive moment on the inner section shall be $+1/133 W L$; and for slabs without drops, the negative moment resisted on two column head sections shall be $-1/36 W L$, the negative moment on the mid section shall be $-1/133 W L$, the positive moment on the two outer sections shall be $+1/63 W L$ and the positive moment on the inner section shall be $+1/133 W L$.

2. In *four-way systems*, the negative moments shall be as specified for Two-Way Systems; the positive moment on the two outer sections shall be $+1/100 W L$ and the positive moment on the inner section shall be $+1/100 W L$ for slabs with drops; and the positive moment on the two outer sections shall be $+1/174 W L$, and the positive moment on the inner section shall be $+1/100 W L$ for slabs without drops.

3. In *three-way systems*, the negative moment on the column head and mid sections and the positive moment on the two outer sections, shall be as specified for Four-Way Systems. In the expression for the bending moments on the various sections, the length L shall be assumed as the distance center to center of columns and the load W as the load on the parallelogram panel.

B. Interior Rectangular Panels.

1. When the ratio n does not exceed 1.1, all computations shall be based on a square panel of a length equal to the average span, and the reinforcement shall be equally distributed in the short and long directions according to the bending moment coefficients specified for interior square panels.

2. When the ratio n lies between 1.1 and 1.33, the bending moment coefficients specified for interior square panels shall be applied in the following manner:

(a) In *two-way systems*, the negative moments on the two column head sections and the mid section and the positive moment on the two outer sections and the inner section at right angles to the long direction shall be determined as for a square panel of a length equal to the greater dimensions of the rectangular panel; and the corresponding moments on the sections at right angles

to the short direction shall be determined as for a square panel of a length equal to the lesser dimensions of the rectangular panel. In no case shall the amount of reinforcement in the short direction be less than two-thirds ($2/3$) of that in the long direction. The load W shall be taken as the load on the rectangular panel under consideration.

(b) In *four-way systems*, for the rectangular bands, the negative moment on the column head sections and the positive moment on the outer sections shall be determined in the same manner as indicated for *two-way systems*.

For the diagonal bands the negative moments on the column head and mid sections and the positive moment on the inner section shall be determined as for a square panel of a length equal to the average span of the rectangle. The load W shall be taken as the load on the rectangular panel under consideration.

(c) In *three-way systems*, the negative and positive moments on the bands running parallel to the long direction shall be determined as for a square whose side is equal to the greater dimension; and the moments on the bands running parallel to the short direction shall be determined as for a square whose side is equal to the lesser dimension. The load W shall be taken as the load on the parallelogram panel under consideration.

C. Exterior Panels. The negative moments at the first interior row of columns and the positive moments at the center of the exterior panels on moment sections parallel to the wall, shall be increased twenty (20) per cent over those specified above for interior panels. The negative moment on moment sections at the wall and parallel thereto shall be determined by the conditions of restraint, but the negative moment on the mid section shall never be considered less than fifty (50) per cent and the negative moment on the column head section never less than eighty (80) per cent of the corresponding moments at the first interior row of columns.

D. Interior Columns shall be designed for the bending moments developed by unequally loaded panels, eccentric loading or uneven spacing of columns. The bending moment resulting from unequally loaded panels shall be considered as $1/40 W_1 L$, and shall be resisted by the columns immediately above and below the floor line under consideration in direct proportion to the values of their ratios of I/h .

E. Wall Columns shall be designed to resist bending in the same manner as interior columns, except that W shall be substituted for W_1 in the formula for the moment. The moment so computed may be reduced by the counter moment of the weight of the structure which projects beyond the center line of the wall columns.

F. Roof Columns shall be designed to resist the total moment resulting from unequally loaded panels, as expressed by the formulae in paragraphs (D) and (E) of this rule.

Rule 13. Walls and Openings. In the design and construction of reinforced concrete flat slabs, additional slab thickness, girders or beams shall be provided to carry any walls or concentrated loads in addition to the specified uniform live and dead loads. Such girders or beams shall be assumed to carry twenty (20) per cent of the total live and dead panel load in addition to the wall load. Beams shall also be provided in case openings in the floor reduce the working strength of the slab below the prescribed carrying capacity.

Rule 14. Special Panels. For structures having a width of less than three (3) rows of slabs, or in which exterior drops, capitals or columns are omitted, or in which irregular or special panels are used, and for which the rules relating to the design of reinforced flat slabs do not directly apply, the computations in the analysis of the design of such panels, shall when so required, be filed with the superintendent of buildings.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 8, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 15, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

MINUTES

THE RESOLUTION—

(1284-27-A)

WHEREAS, William Wilson, for Cedar Street Corporation, owner, filed, December 9, 1927, an appeal from a decision of the fire commissioner, affecting premises 52-56 Cedar street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated November 23, 1927 (Plan No. 1380-27), reads:

"6. Show on section, not to be located over or near shafts or stairs, a standpipe tank of at least 3,500 gallons reserved for standpipe use located at least 20' above penthouse roof level."

and

WHEREAS, the building is fireproof, seven stories and pent house (116 ft.) in height, 66 ft. 4 in. by 63 ft. 8 in. and 76 ft. 6 in., irregular, about 4,600 sq. ft. in area; OCCUPIED for office and banking purposes, not more than 30 persons on a story; EQUIPPED with a standpipe system consisting of one four-inch riser line with outlets at each story and one above the pent house roof, with siamese connection at the street front, fed from a 1,100-gallon pressure tank and a 2,500-gallon supply tank located in the cellar, also two ten horsepower automatic centrifugal pumps; and

WHEREAS, the appellant claims that cast iron columns were used in the construction of the building which are now overstrained according to the present requirements under the building code for cast iron columns; furthermore, the appellant contends that the superintendent of buildings would not permit the additional load of a tank placed on the roof; also that the present standpipe system is adequate.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1288-27-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Adams-Starke Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—575 Columbia street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(1288-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Adams-Starke Co., Inc., owner, filed, December 12, 1927, an appeal from an order of the fire commissioner, affecting premises 575 Columbia street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 14, 1927 (Order No. 12414-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is of frame construction, one story in height, 120 ft. by 150 ft. and 100 ft., irregular, about 15,600 sq. ft. in area; OCCUPIED for the purpose of galvanizing and the storage of iron, 12 persons; and

WHEREAS, the appellant claims that the premises faces on two streets, open and accessible on all sides, within easy reach of seven city fire hydrants; furthermore, the appellant

contends that the nature of the occupancy is non-hazardous; and

WHEREAS, the order is predicated on the area of the premises exceeding 10,000 sq. ft.; and

WHEREAS, the premises consist of a single structure, one story in height, maintained and operated for incombustible industrial operation in single tenancy.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that such auxiliary fire extinguishing appliances as shall be directed by the fire commissioner otherwise shall be installed and maintained, and granted only as long as conditions as to occupancy and use remain unchanged and that the building shall not be increased in height, area or dimension.

1295-27-A.

APPELLANT—James W. Byrnes, for Levy Bros., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—239-245 Hamilton avenue, Brooklyn.

APPEARANCES—

For Appellant: James W. Byrnes.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(1295-27-A)

WHEREAS, James W. Byrnes, for Levy Brothers, owner, filed, December 13, 1927, an appeal from an order of the fire commissioner, affecting premises 239-245 Hamilton avenue and 92-96 Nelson street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 26, 1926 (Order No. 4453-F), reads:

"1. Provide a separate and distinct system of Automatic sprinklers throughout the building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals, May 24th, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919."

and

WHEREAS, the building, facing on two street fronts, is one and four stories in height; the four-story portion having a frontage of 50 ft. on Hamilton avenue, 50 ft. on Nelson street and a depth of 50 ft. at the rear; the one-story section having a frontage of 25 ft. on Hamilton avenue, 27 ft. on Nelson street and a depth of 68 ft. 4 in. at the rear; OCCUPIED by one concern for the manufacture of mattresses and bed springs: 1st story (easterly portion), picking cotton by machine, 4 persons; (westerly section), offices and storage, 2 persons; 2nd story, stuffing and finishing mattresses, 6 persons; 3rd story, operators room, 4 persons; 4th story, manufacture of box springs, 1 person; and

WHEREAS, appellant proposes to provide fireproof sliding doors at the opening on the first story in the brick wall between the easterly and westerly portions of the premises and to provide, on the first story of the building, a sprinkler system fed from the city main; and

WHEREAS, the statement of the Department of Water Supply, Gas and Electricity filed in this case establishes the fixed water pressure as forty-five pounds at curb level on the six and eight-inch mains on the Hamilton and Nelson street fronts.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be equipped throughout with a sprinkler system supplied by a four-inch

MINUTES

connection to the city main; that the building shall not be increased in height, area or dimension, and granted only as long as conditions as to occupancy and use remain substantially unchanged.

1245-27-A.

APPELLANT—Louis A. Hornum, for Doran Manganese Bronze Co., lessee.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—526 Columbia street, Brooklyn.

APPEARANCES—

For Appellant: Louis A. Hornum.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle and Chief	
Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(1245-27-A)

WHEREAS, Louis A. Hornum, for Doran Manganese Bronze Co., filed, November 11, 1927, an appeal from a decision of the fire commissioner, affecting premises 526 Columbia street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated November 9, 1927 (Alt. 796-23), reads:

"1. Oil burning devices must be approved by the Board of Standards and Appeals.

"6. Pumps must be of a type approved by the Board of Standards and Appeals.

"7. File a certified drawing of pump as approved by the Board of Standards and Appeals."

and

WHEREAS, the building is non-fireproof, one story (42 ft. to top of truss) in height, 88 ft. by 99 ft. 4 in. in area; OCCUPIED as a bronze foundry, 15 persons; and

WHEREAS, there has been installed an oil burning system consisting of a 2,000-gallon fuel oil storage tank, buried outside the building, and 3 ft. below grade; three oil burners for the melting of copper, known as the Hawley-Schwartz Type furnace—a 3/4-inch Monarch oil pump and the necessary valves and piping for a complete installation; and

WHEREAS, appellant contends that the burners are used for melting copper and is known as the Hawley Schwartz type furnace process; that the air pressure used is ten ounces; that the pressure on the oil is just enough to lift it to the top of the furnace where it drips into the air line and is carried by the air into the melting chamber where combustion takes place; that this system is the only practical method known to appellant for use in casting propeller wheels and requests the acceptance of this particular installation; and

WHEREAS, this appeal is limited and restricted to the oil furnace on this particular site and in this particular industrial operation and does not include the general approval of this method of oil burning device.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only as far as it affects the operation of an industrial oil heating furnace on these premises only, *on condition* that the mechanical oil burning equipment shall comply in all other respects with the fuel oil rules of the board of standards and appeals.

BUILDING ZONE CASES

1103-27-BZ.

APPLICANT—Philip J. Sinnott and William Domroe, for Thomas J. Burnett, owner.

WHEREAS, Edward S. Shepherd, owner, filed, November 14, 1927, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a gasoline service station; premises 8711 Canarsie lane, northeast corner of Varkens Hook road, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 1, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Canarsie lane, Varkens Hook road and Farragut road are all in a residence district and that Foster avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 24, 1927 (re App. No. 19562), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The installation of a gasoline service station in a residential district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 99 ft. 10 in. on Canarsie lane, 77 ft. 43/8 in. on Varkens Hook road and a depth of 53 ft. 5 in. at the rear, upon which is located a two-story frame dwelling of owner of premises; on the northerly portion of the plot it is proposed to erect a one-story office, 10 ft. by 16 ft. in area, and to install two gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the grounds of practical difficulty and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(1250-27-BZ)

WHEREAS, Louis I. Sieven, owner, filed, November 29, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises south side of Fort Hamilton Parkway, 225 ft. west of Chester avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 1, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fort Hamilton Parkway, south side, east of a point 100 ft. east of 36th street, is in a business district; Fort Hamilton Parkway, north side, is in a residence district; 36th street is in an unrestricted district; Minna street, east of a point 100 ft. east of 36th street, is in a residence district; Chester avenue, from Fort Hamilton Parkway to a point 100 ft. south, is in a business district, and that Chester avenue, south of a point 100 ft. south of Fort Hamilton Parkway, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered November 19, 1927 (re Plan No. 3884-27), reads:

"1. A gasoline service station may not be permitted in a business district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 150 ft. on Fort Hamilton Parkway and a depth of 102 ft. 2 7/8 in., upon which it is proposed to erect a one-story office and accessory store and to install six gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, it developed at the public hearing that the applicant purchased property within the past year; and

WHEREAS, the board deemed that applicant failed to substantiate his basis of appeal under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the decision of the fire commissioner be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(85-28-BZ)

WHEREAS, William F. Doyle, for Louis Security Co., owner, filed, January 30, 1928, an application, under the building zone resolution, to permit in a one and one-half times height district the erection and maintenance of the street walls in excess of the height permitted under the zone resolution; premises 576-582 Eighth avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 1, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that area, west of a north and south line located 100 ft. east of Eighth avenue, north of West 38th street (except the block front on west side of Eighth avenue between 38th street and 39th street is in a one and one-half times height district; area east of a north and south line located 100 ft. west of Eighth avenue, south of West 39th street (except the block front on east side of Eighth avenue between 38th and 39th street), is in a two times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 24, 1928 (re N. B. 29-28), reads:

"1. Height of building exceed limitations imposed by Sections 8 and 9 Building Zone Resolution."; and

WHEREAS, it is proposed to erect a building with 25 per cent. manufacturing and remainder office occupancy, with the front street wall erected 200 ft. in height, at this height the first setback, conforming to a two times height district, will start; the street wall in this case is limited to 150 ft. in height without a setback under the requirements of the zone resolution; and

WHEREAS, this property lies within a one and one-half times height district; the entire street front on opposite side of this street and for five blocks south on both sides of the street is within a two times height district; this section to the east on all streets is in a two times height district; and

WHEREAS, the board deems that this is a proper case for the adjustment and exercise of its discretion under section 21 of the building zone resolution; and

WHEREAS, a general application addressed to the Board of Estimate and Apportionment, supported by 80 per cent. of the ownership of property on Eighth avenue, north of 33rd to 56th street endorsing the amendment to the zoning law for the increased two times height district on Eighth avenue was filed in this case.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the height

district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects a variation of the height regulations of the zoning resolution for a two times height district, *on condition* that the requirements of the zoning law shall be complied with in all other respects, and that all permits shall be obtained within nine months and all work in connection therewith shall be completed within one year from the date of this action.

THE RESOLUTION—

(1054-23-BZ)

WHEREAS, F. W. Rinn, for Frank R. Hewitt, owner, filed, September 4, 1923, an application, under the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of two pleasure motor vehicles, two spaces rented to persons not residing on the premises; premises 2250 Aqueduct avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, February 5, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Aqueduct avenue and Buchanan place are residence districts; and

WHEREAS, the order of the fire commissioner, dated August 16, 1923 (Order No. 19432-C), reads:

"1. Discontinue the use of premises as a garage which is not used as an accessory to dwelling on same lot."; and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 18½ ft. and a depth of 25 ft., located at the rear of a frame dwelling; occupied as a garage for two motor vehicles; and

WHEREAS, applicant has filed the duly acknowledged consents of the owners of 85 per cent. of the property frontage deemed by the board to be affected; and

WHEREAS, this application was granted February 5, 1924, and April 27, 1926, for a temporary period of two years, and applicant requests a further extension of time.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the capacity of the garage be limited to two automobiles of the pleasure car type, space for which may be rented to persons not residing on the premises; that the ceiling shall be fire-retarded in accordance with the rules of the board of standards and appeals and fire-stopped at junction of side walls and ceiling; that the wall shall be of unpierced masonry, and that this permission shall be granted for a temporary period of one year from April 27, 1928.

CONCRETE RULES

USE OF HYDRATED LIME IN CONCRETE

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

THE RESOLUTION—

(1242-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Larson Glass Sales Corp., owner, filed, November 26, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 4815 32nd place, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated May 13, 1927 (Order No. 20588-LD), reads:

"1. Provide an additional 2nd means of exit from 2nd story as per Sec. 270 of the Labor Law."

and
WHEREAS, the building is non-fireproof, two stories and basement in height, 60 ft. by 90 ft. in area at first story and 60 ft. by 45 ft. 6 in. in area above; OCCUPIED: basement, manufacture of glass letters, 25 persons; 1st story, shipping and stock room of glass letters, 7 persons; 2nd story, offices, 9 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the basement story to the second (top) story, enclosed in fireproof partitions with fireproof doors at openings; a gooseneck ladder extending from the first story extension roof to the main roof of the building; there being, also, a ramp leading from the yard at basement level to street; ROOFS of adjoining buildings: no adjoining buildings; and

WHEREAS, petitioner contends that the premises are equipped with watchmen's service with central office connection; that all manufacturing is done in the basement, which is separated from the rest of the building by a fireproof, reinforced concrete ceiling, the only connection with the rest of the building being by means of a fireproof doorway leading to the interior stairway and contends, further, that the second story is small in area and proposes to erect a fire escape balcony with 45-degree counterbalanced stairway leading to the street, at the second story front, with a fireproof casement door leading to same.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that an exterior fire escape shall be provided at the extreme northerly end of the building, on the street front; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain unchanged.

916-27-S.

PETITIONER—William F. Doyle, for Central Zone Corp., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner and superintendent of buildings.

(916-27-S)

WHEREAS, William F. Doyle, for Central Zone Corp.,

MINUTES

owner, filed, August 16, 1927, a petition for a variation from the requirements of the labor law, as cited in orders of the superintendent of buildings and fire commissioner, affecting premises 15-19 East 33rd street and 18-22 East 34th street, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated February 24, 1927 (Violation Order No. 930-1927), reads:

"You are hereby notified that the building, occupied as office with 25% light manufacturing and known as No. 18-22 East 34th St. and 15-19 East 33rd Street, in the Borough of Manhattan, in the City of New York, does not conform to section 270 of the Labor Law of the Building Code, in the respects noted below:

"In that of constructing non-fireproof partitions on 1st, mezzanine, 3rd, 4th, 6th, 7th, 8th, 10th, 11th, 12th, 14th, 17th, 18th, 19th and 21st floors contrary to law.";

and
WHEREAS, the order of the fire commissioner, dated April 4, 1927 (Order No. 15539-LD), reads:

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law.";

and
WHEREAS, the building is fireproof, twenty stories in height, 80 ft. by 197 ft. 6 in. in area; OCCUPIED: 1st story, stores; 2nd to 6th stories, inclusive, offices and showrooms, approximately 60 persons per story; 7th story, office, showrooms and manufacture of ties, 75 persons; 8th to 11th stories, inclusive, offices and showrooms, approximately 80 persons per story; upper stories, offices, showrooms and manufacture of kimono, underwear, etc., approximately 50 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that partitions not constructed of incombustible material have been erected on the seventh, twelfth, thirteenth, fourteenth, fifteenth, sixteenth, seventeenth, eighteenth, nineteenth and twentieth stories of the building, where manufacturing is being done; and

WHEREAS, petitioner requests permission to allow the wood partitions on the office floors, as now installed, where no manufacturing is done; to permit the factory portion of the present wood enclosures around showrooms to be backed up with three-inch of gypsum block and all openings to be provided with fireproof, self-closing doors and proposes to remove all incombustible partitions in the factory portion of the building.

Resolved, that the order of the superintendent of buildings be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION—

(1169-27-S)

WHEREAS, Wells & Newton Co., Inc., for The P. R. Mitchell Co., owner, filed, October 31, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 548-550 West 23rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 16, 1927 (Order No. 22998-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at east side of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law.";

and

WHEREAS, the building is non-fireproof (mill construction), six stories (62 ft.) in height, 40 ft. by 90 ft. 10 in. in area; OCCUPIED: 1st story, office, 2nd story, packing pillows and cushions, 5 persons; 3rd story, storage of pillows and cushions, no persons; 4th story, manufacturing pillows and cushions, 25 persons; 5th story, manufacture of pillows and cushions, 30 persons; 6th story, storage and manufacture of pillows and cushions, 3 persons; 63 persons above first story; EQUIPPED with a two-source sprinkler system and a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in fire-resisting partitions with metal-clad doors at openings; a fire escape on the east side of the building, having fireproof openings along the course thereof, extending from the roof to the iron balcony at the second story level (over the roof of the covered driveway), with EGRESS from the termination of the fire escape by means of an iron bridge leading to the extension roof of the factory building to the south (under same ownership) and thence by means of an iron stairway (at west side of extension roof) leading to yard and door opening into first story of building and thence to West 22nd street; there being, also, an iron platform leading from the extension roof of the 22nd street building to a fire escape on the rear of the building to the east; ROOFS of adjoining buildings: to west, 12 ft. lower; and

WHEREAS, petitioner contends that it is impractical to install a stairway or counterbalanced ladder at the 23rd street termination of the fire escape balcony, on the second story level, as it would interfere with the entrances to the office and the driveway on the first story and requests the acceptance of the existing egress from the termination of the fire escape.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION—

(1265-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Schlegel Investing Co., owner, filed, December 1, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 374-380 Second avenue and 300-310 East 22nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 28, 1927 (Order No. 21841-LD), reads:

"1. Reduce the area of wired glass in partitions enclosing stairway at east and west side of building all stories so that no single pane of glass shall exceed 360 sq. in. and not more than 720 sq. in. on any story as per rule 505 of the Industrial Code.

"4. Arrange exit doors leading to interior stairways west and east side of building, so that same will not obstruct stairways. Sec. 271 of the Labor Law."

and

WHEREAS, the building is fireproof, ten stories in height, 84 ft. 7 in. by 194 ft. 2 in. in area; OCCUPIED: 1st story, storage of printer's stock, 25 persons; 2nd story, printing, 35 persons; 3rd story, printing, 22 persons; 4th story, manufacture of buttons, 17 persons; 5th story, manufacture of buttons and jewelry cases, 40 persons; 6th story, printing, 55 persons; 7th story, printing, 20 persons; 8th story, printing, 12 persons; 9th story, printing, 14 persons; 10th story, printing, 20 persons; 235 persons above the first story; EQUIPPED with a sprinkler system; EXITS: four interior iron stairways, extending from the first story to roof, enclosed in a four-inch terra cotta partition with fireproof doors at openings; and

WHEREAS, in the partitions enclosing the easterly stairway there are four wire glass panels on each story and in the partitions enclosing the westerly stairway there are three wire glass panels on each story; each panel containing three lights of $\frac{1}{4}$ -inch wired glass, approximately $18\frac{1}{4}$ in. by 45 in. (822 sq. in.) in area; in each stair hall door there is a glass panel $18\frac{3}{4}$ in. by $41\frac{3}{4}$ in. (approximately 780 sq. in.) in area; on each side of both stairway enclosures, on each story, there is an opening 5 ft. wide equipped with a pair of fireproof doors, the one nearest the stairs being bolted top and bottom at all times, the other door swinging out; and

WHEREAS, petitioner contends that the glass panels and the stair doors were shown on the approved plans for the erection of the building; that the bolted section of the door is rarely used; that the occupancy of the greater portion of the building is less than 25 per cent. of the permissible occupancy; proposes to divide the glass panels horizontally, in the center, with metal muntins and requests the acceptance of the existing exit doors leading to the interior stairways.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION—

(1303-27-S)

WHEREAS, James W. Byrnes, for Metal Hose and Tube Co., Inc., owner, filed, December 16, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 253-263 Tillary street and 27-32 Park avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 29, 1927, reads:

"1. Provide two legal means of exit, in 4 story building No. 27 Park Avenue, said exit to be remote from each other as prescribed by section 270 of the Labor Law.

"2. Provide an interior stairway enclosed in partitions of fireproof material, remote from existing stairway as per Section 270 of the Labor Law in 3 story building known as 27-32 Park Avenue."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 122 ft. 10 in. on Park avenue, 203 ft. 2 in. on Ashland place, 128 ft. 3 in. on Tillary street and a depth of 200 ft. 7 in. across the rear, upon which is located the plant of the Metal Hose and Tubing Co. consisting of a group of one, two, three and four-story interconnected, non-fireproof buildings; the two buildings affected by the order being: a four-story (50 ft. 6 in. high) building (at the northwest corner of the plot) 90 ft. 7 in. by 23 ft. in area; OCCUPIED: 1st story, storage, no persons; 2nd story, foundry core room, 12 persons; 3rd story, drafting room and machine shop, 17 persons; 4th story, private quarters (porter), 1 person; EXITS: a fire escape on the south and easterly (rear) wall of the building with fireproof windows along the course thereof, extending from the roof to the open yard at the center of the plot, with EGRESS from yard through a covered driveway leading to Park avenue; there being, also, protected horizontal exits in the east wall leading to adjoining premises to the east; a three-story (39 ft. 6 in. high) building (at the northeast portion of the premises), having a frontage of 99 ft. 10 in. on Park avenue, 102 ft. 10 in. on Ashland place and an average depth of approximately 25 ft.; OCCUPIED: 1st story, mill room, vulcanizing tubing, 14 persons; 2nd story, hose room, 2 persons; 3rd story, loom room and carpenter shop, 20 persons; EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape at the southwest corner of the easterly wing extending from the main roof to an iron bridge on the roof of the second story building (to the west) and thence to the open yard at the center of the plot, with EGRESS from yard through a covered driveway to Park avenue; there being, also, horizontal exits, protected by fireproof doors leading to adjoining buildings on same plot; and

WHEREAS, petitioner contends that the premises is protected by a sprinkler system with central office connection; that there are siamese connections on each street front; that there is a fire alarm box on the premises; that there is no inflammable oil or liquid used in the premises; that the articles manufactured are not of a hazardous nature; that the openings between the various buildings are protected by fireproof doors and requests the acceptance of the existing means of egress.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION—

(1209-27-S)

WHEREAS, Patrick J. Murray, for Solomon Gensberg, owner, filed, November 15, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 10 West 55th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 21, 1927 (Order No. 18314-LD), reads:

"1. Arrange the fire escape at rear of building so that same will conform to Section 271 of Labor Law and the rules of the Board of Standards and Appeals adopted Feb. 23, 1927.

"Note: Defects noted are as follows: Doors and windows opening on course of fire escape not fireproof, self-closing. No safe egress from termination of fire escape to street. Doors opening to fire escape obstruct passageway.

"2. Enclose the interior stairway in partitions of fire-resisting material from floor to ceiling of basement including any exposed stair soffits, landings and passageways; openings to be protected with approved self-closing fire doors as per Rules of Board of Standards and Appeals adopted Feb. 23, 1927.

"3. Provide an additional means of exit from cellar, in accordance with the provisions of Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, four stories and basement in height, 23 ft. by 84 ft. in area at basement, first and second stories and 23 ft. by 54 ft. in area above; OCCUPIED: cellar, storage, 1 person; basement story, restaurant, 45 persons; 1st story, tailor, 8 persons; 2nd story, club room, 10 persons; 3rd story, living apartment, 3 persons; 4th story, dressmaking, 15 persons; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in stud and plaster partitions (wire lath and P. C. mortar at basement story only), with wooden doors at openings; wooden stairs to roof scuttle; a fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from the ground level to roof, with no legal means of egress from the termination of the fire escape to street; ROOFS of adjoining buildings: 10 ft. higher at west; five stories higher at east; and

WHEREAS, the petitioner claims, as to Item 1, that it is impossible, without great expense, to provide fireproof passageway from foot of rear fire escapes to the street; as to Item 2, that the present hall partition is of fire-retarding material; as to Item 3, that the cellar is not used or occupied by anyone except the furnace man; furthermore, as to Item 1, the petitioner proposes to provide wire glass in openings along the course of the rear fire escape.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, only so far as it affects the kind of glass, on condition that the windows and doors on the course of the fire escape shall be glazed with wire glass or plate glass; that egress shall be provided from the yard through an opening in the existing brick fence wall to the premises adjoining to the west, with egress from the adjoining yard to street; granted, as to Item 2, on condition that the restaurant use

and occupancy in any part of the premises shall be discontinued and that the occupancy shall not exceed twenty-five persons above the second story; granted, as to Item 3, on condition that there shall be no house heating apparatus installed or operated within the cellar area of the premises; that there shall be no storage maintained in the cellar; that a fixed iron ladder shall be provided from the cellar to an exterior area at rear of building with egress through window at rear of cellar; that the iron grating of the rear area shall be provided with hinges at yard level and made movable, and that this variation is granted so long as conditions as to occupancy and use otherwise remain unchanged.

THE RESOLUTION—

(1132-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for 578 Madison Avenue Corp., owner, filed, October 22, 1927, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner and decision of the superintendent of buildings, affecting premises 578 Madison avenue and 24-26 East 57th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated January 15, 1927, read:

"Order No. 8712-LD:

"1. Provide fireproof windows at all openings on west side of building, as per Section 270 of the Labor Law."

and

"Order No. 8713-LD:

"1. Replace the revolving door at termination of stairway to street with a door, opening outwardly (on Madison Ave. side), as per Section 270 of the Labor Law."

and

"Order No. 8714-LF:

"An inspection of the premises 578 Madison Ave. and 24-6 East 57th Street, Borough of Manhattan, shows that a fire drill should be established and maintained therein according to the requirements of Section 279 of the Labor Law. The Labor Law specifically charges the Fire Commissioner with the duty of enforcing the provisions of the law, as to fire drills.

"This law also holds the owner of such premises responsible for the proper supervision and maintenance of fire drills. It is therefore your duty to organize and maintain a fire drill in the above premises in accordance with the rules and regulations of the Board of Standards and Appeals.

"A record of such drills, including the name and number of each certified drill conductor engaged in conducting each drill, the date of each drill and the number of persons taking part in each drill, shall be transmitted by you or your representative to this office semi-annually."

and

MINUTES

WHEREAS, the decision of the superintendent of buildings, dated April 2, 1928, reads:

"1. All windows must comply with Section 264 Labor Law.

"5. All doors leading to exits must be 44 inches in clear width.

"6. All partitions must be of incombustible material.

"7. Linoleum or other combustible floor covering must be removed from the entire building."

and

WHEREAS, the building is fireproof, twenty stories in height, 125 ft. 5 in. by 47 ft. and 75 ft., irregular, in area; OCCUPIED: 1st story, stores, 30 persons; 2nd and 3rd stories, interior decorators, 15 persons on each story; 4th story, alterations on gowns, 50 persons; 5th story, interior decorator, 12 persons; 6th to 20th stories, inclusive, offices, 30 persons on each story; EQUIPPED with a fire alarm signal system; EXITS: a fire tower; an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims, as to Order No. 8712-LD, also Item 1 of the decision, that all windows on the west side up to and including the eleventh story are fireproof; above the eleventh story the windows have steel frames with 1/4-inch plate glass, no light exceeding 720 sq. in.; as to Order No. 8713-LD, that there is a swinging door 44 in. in width on each side of the revolving door leading to Madison avenue in accordance with the requirements of the revolving door rules; also, that the rules do not apply to this building; as to Order No. 8714-LF, that the building is equipped with a fire alarm system, but fire drills are not performed; as to Item 5 of the decision, that all doors opening into the stairway and fire tower are now 44 in. in width; as to Item 6 of the decision, that all combustible partitions on the fourth story will be removed; as to Item 7 of the decision, that there is no linoleum or other combustible floor covering on the fourth story; furthermore, the petitioner contends that the building was erected in 1925; that there are only forty-five persons employed at manufacturing on the fourth story (during a few months of the year), all other parts of the building are used for office and business purposes; that the factory occupancy in the building will be discontinued after August 31, 1931.

Resolved, that the orders of the fire commissioner be and they hereby are *affirmed*, and the petition be and it hereby is *denied*.

744-26-S.

PETITIONER—John J. Gilmartin, for Michael Erlanger, owner, substituted for previous applicant and owner.

SUBJECT—Application for reopening—modification—re-variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—114-116 East 28th street, Manhattan.

APPEARANCES—

For Petitioner: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Deputy

Chief Martin..... 5

Negative 0

Absent 0

THE RESOLUTION—

(744-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Anna Holding Co., owner, filed, September 2, 1926, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 114-116 East 28th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 29, 1926 (Order No. 97446-LD), reads:

"1. Enclose the interior stairway at centre of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3' above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"2. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"NOTE: Among the defects noted on this fire escape are the following:

"No safe passageway to the street from the termination. No 45° stairs connecting balconies.

"3. Provide continuous safe and unobstructed passageways at least 3' wide throughout their length leading directly to both required means of exit on all stories, as per Section 271 and 272 of the Labor Law. NOTE: No means of reaching both means of exit provided on all stories.

"NOTE: Plans for all structural changes should be filed in the Bureau of Buildings as required by Chapter 503, Laws of 1916.

"Unless the violations above mentioned are removed within twenty days we shall be obliged to begin enforcement proceedings."

and

WHEREAS, the building is fireproof, seven stories in height, 40 ft. by 90 ft. in area; OCCUPIED: 1st story, stores and office, 15 persons; 2nd story, manufacture of infant's wear and embroideries, 10 persons; 3rd story, embroideries, 7 persons; veilings, stock room and office, 10 persons; rug repairs, 3 persons; 4th story, printing, 7 persons; offices, 3 persons; 5th story, offices and showrooms, 12 persons; 6th story, designing wallpaper, 10 persons; radio repairs, 6 persons; office, 2 persons; 7th story, embroideries, 12 persons; paper stock, 3 persons; artists, 4 persons; means of EGRESS consists of an interior stairway, extending from the first story to the seventh story, enclosed on three sides with fireproof partitions and open on the fourth side to an interior corridor running through the center of the building, with iron ladder in the top story hall leading to the roof; a fire escape on the rear of the building consisting of balconies and 60-degree stairs at each story with gooseneck ladder to roof and stationary stair to yard; egress from the termination of the fire escape being through a fireproof passageway in the first story to street, it being proposed to extend the balcony at this story to take in the rear of store; and

WHEREAS, the petitioner contends that it is impossible to enclose the stairway except by constructing partitions with doors on each floor landing; and as to Item 2, requests acceptance of the fireproof passageway from the first story to street, and as to Item 3, as to the proposed extension of balcony in the first story there will be safe passageway to both means of egress; and

WHEREAS, this petition was granted by the board at its meeting, March 1, 1927, on certain conditions, and petitioner requested a modification of these conditions as to egress from termination of fire escape.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and the petition be and it hereby is *granted*, as to Order No. 97446-LD, Item 1, *on condition* that the northerly wall of the stairs be continued 4 1/2 ft. to the easterly wall of the corridor and that self-closing, fireproof doors shall be installed therein with clear wire glass panels not exceeding 720 sq. in., and that all openings within the stair hall en-

MINUTES

closure to the offices shall be equipped with self-closing, fireproof doors and that all doors to the openings on the course of the corridors shall be made self-closing, and *granted*, as to Item 2, only so far as the order affects the passageway and the connecting stairs, *on condition* that the balcony shall be extended at the first story westerly, connecting by means of an iron bridge to opening in rear brick fence of premises to the rear on East 27th street at yard level; *granted*, further, as to Items 2 and 3, *on condition* that the fire escape shall conform in all other respects with the requirements of the labor law and the rules of the board except that the stairways shall be at an angle of not more than 60 degrees, and only so long as conditions as to occupancy and use remain substantially unchanged.

APPLIANCE SUBMITTED FOR APPROVAL.

328-27-SA.

PETITIONER—Frank A. Holby Corp.

SUBJECT—Holby Oil Burner, approval of.

APPEARANCES—

For Petitioner: Worrell H. Holby and George J. Woehrlin.

For Administration: Inspector Maher of fire department.

RULES

RULES FOR THE TESTING OF WOOD

Pursuant to the Provision of Section 356 of Chapter 5 of the Code of Ordinances (Building Code).

(639-27-SR)

Adopted by the Board of Standards and Appeals July 22, 1927. Amended March 16, 1928.

Rule 1. Before any wood may be used for flooring or interior trim where incombustible materials are required under the provisions of section 356 of the Building Code, the superintendent of buildings must be notified promptly upon the delivery at the job of a consignment of such material. One test sample for each 2,000 feet of material will then be selected by a representative of the Bureau of Buildings, marked for identification, and forwarded to the testing laboratory, where, under the supervision of the superintendent of buildings or his representative, the samples shall be subjected to the following tests:

Before making tests of all specimens for testing shall be oven dried at a temperature of 140° F. to a point where there is no further loss of weight due to evaporation of moisture content.

A. SHAVING TEST—A mass of shavings cut fairly thick from the outside and interior of sticks of the treated wood are to be tested separately. These shavings shall be placed to a depth of two inches in a metal vessel twelve inches square, the bottom of which shall consist of a wire screen of ½ inch mesh. The shavings shall be packed down moderately to reduce the air spaces. A Bunsen yellow flame shall then be placed beneath the receptacle so that the flame is in contact with the shavings. After twenty-five seconds the flame shall be removed. The flame at no time should show higher than six inches above the top of the bed of shavings and the shavings should not be consumed in less than five minutes.

B. TIMBER TEST. Two samples ¾ inch by 1½ inches in cross section and twelve inches long shall be

laid side by side across the top of a gas crucible furnace with a pyrometer between them. The specimens shall be subjected to a flame at 1700 deg. Fahrenheit for two minutes, the test pieces shall then be removed, and the time of duration of flame and glow observed. The sticks shall then be cut through the middle at the most burned section and the area of the unburned wood measured with a planimeter. The flame must not persist longer than 15 seconds nor the glow longer than 20 seconds, and, in the case of hard woods, the unburned area should not be less than 55 per cent., nor in the case of soft woods less than 45 per cent.

C. CRIB TEST—Twenty samples are to be prepared, each ½ inch square and 6 inches long. These shall be built up on a ring support to form a crib work five tiers high, four sticks to a tier, making the crib six inches by six inches and approximately 2½ inches high. The crib shall be set six inches above a Bunsen burner to which the crib shall be exposed for a period of one minute at a temperature approximating 1200 deg. Fahrenheit. The flame must not persist more than twenty seconds after the Bunsen burner is removed, nor the glow last more than thirty seconds. The tendency of the flame to spread from stick to stick must also be noted.

Rule 2. All of the above tests shall be at the expense of the owner or contractor or other interested party.

If the tests are satisfactory the entire shipment will be permitted to be taken into the building and used. If not, the entire shipment shall be condemned and must be removed from the premises.

In general, acceptance shall be predicated upon the existence of a complete plant in full working order from which the material is shipped, and each shipment, or, where possible, each piece shall be trade marked in a conspicuous manner so that there may be no doubt as to its identity.

BUILDING CODE ON SALE.

Copies of the Building Code are now on sale at the Distribution Division of the City Record Office, 125 Worth street. Price, \$1.25; by mail, \$1.35.

ELECTRICAL CODE ON SALE.

Copies of the Electrical Code are now on sale at the Distributing Division of the City Record Office, 125 Worth street. Price, 30c; by mail, 35c.

PUBLIC HEARING

PROPOSED AMENDMENTS TO "STANDPIPE"- "FIRELINE" RULES

[281-22-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, May 18, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to "Standpipe"—"Fire Line" Rules.

Matter in *italics* is new.

Rule 1. PLANS. A preliminary set of paper plans and cross sections, drawn clearly and distinctly, to a scale of $\frac{1}{4}$ -inch or, by permission of the Fire Commissioner, $\frac{1}{8}$ -inch to the foot, for each proposed standpipe (fire line) installation or alteration, shall be submitted to and approved by the Fire Commissioner before the work in connection with the installation is started. Such preliminary plans shall show the size and location of the standpipe (fire line) risers, size and location of siamese and cross-connections, valves, tanks and connections, pumps, hose stations, lengths of hose, etc., and the location of stairways and enclosing partitions in relation to the standpipe risers and hose stations. From these approved preliminary plans, three sets of plans on cloth, in clean and clear detail, shall be filed for final approval by the Fire Commissioner. A certified copy of approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If an automatic sprinkler system is provided throughout the building or in any portion of the building, the plans shall include a note to that effect.

Rule 2. APPROVAL. Before acceptance all standpipe (fire lines) shall be tested, for at least one hour, under a hydrostatic pressure of not less than 300 pounds per square inch at the street siamese, and at each pump supply level, or such additional pressures as may be required to give 100 pounds at the highest hose outlet supplied by such pump, except that when a change is made in a source of supply, or minor changes are made in an existing equipment previously approved, the system shall be tested to a pressure sufficient to give 50 lbs. per sq. in. at the highest story hose outlet. These tests to be made in the presence of a representative of the Fire Prevention Bureau.

No valves, risers, or other material portions of any standpipe (fire lines) equipment shall be covered or permanently concealed until tested and approved, in writing, by the Bureau of Fire Prevention.

When entirely completed in accordance with the approved plans, and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the standpipe equipment is approved, the applicant will be so advised, in writing, by the Bureau of Fire Prevention.

When deemed necessary by the Fire Commissioner, sectional diagrams of the standpipe (fire line) equipment in buildings of large area or height, not more than three in number and printed on cloth in size not less than $8\frac{1}{2}$ x 11 in., shall be filed by the applicant for the use of fire companies in the district in which the premises are located.

Rule 3. STANDPIPE-FIRE LINE CERTIFICATE. The engineer, superintendent or persons in charge of the standpipe-fire line system in all buildings exceeding eighty-five feet in height shall be registered, and submit to an examination in the Fire Department. Upon evidence of fitness to properly operate and maintain the standpipe system he shall be granted a Certificate to that effect. The certificate shall contain the full name and a small photograph of the holder.

Day and night service shall be maintained in all buildings exceeding 250 ft. in height in which there is a fire pump.

Theatre buildings provided with fire pumps shall have at least one certified operator on duty during every performance. Buildings of large areas, industrial plants, amusement parks, etc., shall have at least one certified operator on duty when deemed necessary by the fire commissioner.

Rule 4. MONTHLY INSPECTION. All valves, hose, tools and other auxiliary fire appliances shall be kept in perfect working order, and at least once a month the person holding certificate of fitness shall make a thorough inspection of all the fire appliances to see that they are in perfect working order and ready for immediate use by the Fire Department. Fire pumps shall be tested every 30 days by the person holding the certificate of fitness.

He shall also instruct all employees under his charge in the use and practice of all auxiliary fire appliances. A detailed record of each inspection shall be kept on the premises for examination by a representative of the Fire Department.

All standpipe equipment in buildings exceeding 85 ft. in height shall be subject to a flow test with a pressure of not less than 50 lbs. at the top floor outlet, at least once in every two years, test to be conducted in the presence of a representative of the Fire Department.

Rule 5. APPROVED DEVICES. All devices approved for use in new standpipe fire line equipments shall bear the manufacturer's name and the date of and the number of the approval. Certified copies of the approval, working drawings and photographs of the device approved, shall be submitted to the administrative authority having jurisdiction for preservation as records and reference data.

Rule 6. ELEVATOR IN READINESS. In every building exceeding 150 feet in height at least one passenger elevator and in buildings in course of construction a hoist or elevator shall be kept in readiness for immediate use by the Fire Department during all hours of the night and day, including holidays and Sundays, and a man competent to operate the elevator shall be present at all times.

Rule 7. AREA OF BUILDINGS. For the application of Section 581 of Chapter 5 of the Code of Ordinances the area of a building shall be taken as the area within the exterior walls, or the area between fire walls.

When the fire walls are constructed in accordance with Section 371, Chapter 5 of the Code of Ordinances, and all openings are protected on both sides of fire wall or walls with automatic fireproof self-closing doors, the area within such fire walls or exterior walls and a fire wall, shall be considered a separate building.

Rule 8. HEIGHT. The term "height" as applied to a building or structure, as described in Chapter 5, Code of Ordinances, means the vertical distance measured in a straight line from the curb level, to the highest point of the roof beams in the case of flat roofs, and to the average height of gable in case of roofs having a pitch of more than 20 degrees with a horizontal plane.

Rule 9. STANDPIPE EQUIPMENT shall consist of a system of piping connected to one or more approved sources of water supply and provided with sufficient number of hose outlets and hose located as hereinafter set forth, to make possible the covering of every portion of each floor area with a standpipe hose stream, except that where the 1st story or basement or both are occupied as stores without connection or communication with the entrance hall or stair enclosure to upper stories, the Fire Commissioner may permit the omission of standpipe protection in such stores and, if so omitted, may prescribe such portable protection as he may deem necessary. Cellars, sub-cellars, basements, etc., shall be protected in the same manner as the stories above.

PUBLIC HEARING

Every standpipe (fire line) equipment shall be a Standard Wet System, except as hereinafter provided for:

(a) In any building not exceeding 40 feet in height, and 20,000 sq. ft. in area, a four-inch street supply system having one four (4) inch direct connection to a street main fed two ways or having one 4-in. direct connection to each of the two street mains on two street fronts, each main so fed that the shutting off of one main will not interfere with the supply of the other main, may be installed, provided there is a sufficient pressure in the street main or mains to maintain a minimum of twenty-five (25) pounds per square inch static pressure at the highest hose outlet.

Evidence establishing the fact that water main conditions and pressures are as required shall be submitted to the Fire Department.

Rule 10. CLASSIFICATION OF STANDPIPE-FIRE LINE EQUIPMENTS. For the purpose of these rules standpipe equipments shall be classified as:

(a) Standard Wet System in which the pipes are of sizes as specified in Section 581 of the Building Code, and in which the system is at all times filled with water from at least one standard source of supply.

(b) Four-inch street connection system, in which the pipes are of sizes as specified in Section 581 of the Building Code and the system is at all times filled with water from one or more 4-in. diameter direct connections to public water mains in the street.

(c) Automatic dry systems, in which the pipes are of sizes as specified in Section 581 of the Building Code, and are normally dry, the system being connected to a source of water supply controlled by an automatic dry pipe valve as defined elsewhere in these rules.

Rule 11. TANKS ABOVE ROOF. Construction shall be as per Section 428 of the Building Code and tank structure and supports shall be approved by the Superintendent of Buildings. The covers of all unenclosed standpipe tanks shall be conical in shape and protected with a type of roofing approved by the Superintendent of Buildings.

Rule 12. RESERVE FOR STANDPIPE. Gravity roof tanks, except as otherwise required by Rule 83, shall contain not less than 3,500 gallons of water at all times, reserved solely for standpipe fire line purposes.

When a gravity tank is to be used for both standpipe and house supply, the connection for the latter shall be made through the side of the tank above the level of the required standpipe reserve. This type of house and standpipe supply tank is preferred and recommended.

When two gravity tanks are used, one for standpipe fire line reserve and the other for the house supply, the house supply tank may be so arranged that it can only be filled by an overflow from the tank used for standpipe fire line purposes.

Rule 13. STANDPIPE AND SPRINKLER SUPPLIES. Standpipe and sprinkler supply shall not be taken from one tank unless there is available 5,000 gallons of water for the standpipe system which shall be in excess of the amount of water required for the sprinkler system. Standpipe supply shall be taken from the uppermost portion, and through the side of the tank, or through the bottom, provided that portion of the pipe within the tank is of brass or other non-corroding material.

Rule 14. BUILDINGS IN GROUP UNDER THE SAME OWNERSHIP AND OPERATION:

One gravity tank of at least 5,000 gallons water capacity to supply the largest unit of a group of separate and distinct buildings operating under one ownership, and located at such elevation that the bottom of the tank will be at least 20 feet above the roof of the highest building of the group, will be accepted as an adequate tank supply for the entire standpipe equipment, provided a dead riser is carried down from the bottom of the tank to an underground header system having a Post Indicator control valve for each building

unit, the P. I. valves to be located as the Fire Commissioner may direct.

Rule 15. UNDERGROUND PIPING. All underground piping shall be extra heavy cast iron installed in accordance with the standard specifications of the American Water Works Association: for 4-inch lines Class C requirements shall be used, 6-inch Class D, 8-inch Class E.

Rule 16. ADDITIONAL TANKS. When, in his opinion, the area covered is excessive or the occupancy is such that an unusual fire hazard is introduced, the Fire Commissioner may require additional protection in the nature of additional tank or tanks located remote from any other standpipe tank, or additional water supply in the main gravity tank, or a fire pump and suction tank of size and capacity to be determined by the Fire Commissioner or the Board of Standards and Appeals, or a combination of any of the foregoing supplies.

Rule 17. STANDARD SOURCE OF SUPPLY. Gravity tank located so that the bottom of same will be not less than 20 feet above the roof level and of a capacity as stated elsewhere in these rules and directly connected with the standpipe equipment by pipes of the same diameter as that of the largest riser.

Rule 18. TANK FEED. Tanks shall not be fed through the standpipe fire line, but shall be fed through a separate line at least 2 inches in diameter, discharging into the top of each tank above the overflow level through the side or through the bottom, that portion of the pipe within the tank to be of brass or bronze. An electric or steam pump of sufficient capacity to deliver at least 65 gallons of water per minute at the tank shall be provided, or if the pressure in the service line is sufficient and the plumbing is such that a minimum of 65 gallons of water per minute may be delivered to the tank, connection to the house water service main in the basement, cellar or lowest story may be used instead of pump.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, when a ball (float) valve is provided for each tank. Floats shall be of copper.

Rule 19. OVERFLOW. An overflow of diameter at least as large as that of the the fill line shall be provided for each roof standpipe tank. The overflow line from all intermediate tanks shall be at least 6 inches in diameter. It may be run through the bottom of the tank, provided it is of brass or bronze and has no joint inside of the tank, otherwise it must be brought through the side of the tank, 3 inches below the top (of sides). Overflows shall terminate in a 90 degree elbow not more than 24 inches above the roof.

Rule 20. EMERGENCY DRAIN. There shall be provided for each tank an emergency drain not less than 4 inches in diameter connected directly to the bottom of the tank or to the standpipe supply line above the tank check, and terminating not less than 30 inches nor more than 4 feet above the roof in a horizontal run. Emergency drain shall be provided with a 4-inch O. S. & Y. gate valve located in a readily accessible position not more than 4 feet above the roof.

Rule 21. ELEVATION OF TANK. The bottom of each gravity tank used for standpipe fire line supply shall be at least 20 feet above the level of the roof. When the area of a pent house exceeds 50% of the roof area or when it exceeds an area of 2,500 sq. ft., the bottom of the tank shall be required to be not less than 20 ft. above the level of the pent house roof. In existing standpipe equipment the bottom of the gravity standpipe tank shall not be required to be more than 20 feet above the outlet in the highest story.

Rule 22. PYRAMID OR TOWER ROOFS. Where the roof of the building is designed so as to finish in a

PUBLIC HEARING

pyramid or tower form, the gravity tank shall be elevated as high as practicable, within the pyramid or tower. Provided, however, that in all cases, the gravity tank is not less than twenty (20) feet above the hose outlet in any room or space occupied other than for tank houses, elevator machinery or machine shop for repairing elevator machinery. Fire appliances, as may be required by the Fire Commissioner, shall be provided in such tank houses, elevator machine rooms, etc.

Rule 23. ACCESS TO TANK. Access to the top of each standpipe tank shall be provided by means of an iron gooseneck ladder of substantial construction and rigidly braced. Access to the tanks on theatre building shall be from the stage level to the roof by means of double-rung ladders set at an angle of not more than 70°, with intermediate landings every 12 ft. or less.

Rule 24. HIGH AND LOW WATER ALARM. Every gravity tank hereafter installed for standpipe fire line purposes shall be equipped with an electric closed circuit high and low alarm as provided under Rule 88, in order that it may be determined at any time whether or not the required standpipe reserve is in the tank, except when the house supply is taken from the tank, or where the house supply tank can only be filled from an overflow of the standpipe fire line reserve tank, a high and low alarm need not be provided when an automatic tank filling pump is installed.

Rule 25. CHECK VALVE. There shall be provided in a horizontal run of pipe in the top story stair enclosure or in a heated enclosure on the main roof, in the line connecting the standpipe tank with the standpipe riser, an approved type swing check valve opening downstream toward riser, except that where a siamese connection has been omitted, under these rules, no check valve shall be required. An O. S. & Y. gate valve shall be provided on each side of the check valve and shall be scaled open in an approved manner.

Rule 26. HEATING OF TANKS. All tanks used for standpipe supply purposes shall be heated by means of steam supplied through a brass coil with brass fittings and of a type and radiating surface as prescribed by the Board of Standards and Appeals. The heater shall be fed through a 1¼-inch steam line with a 1-inch return, separately trapped. The water in the tank shall be maintained at a temperature above 40° F.

Tanks in hotels, hospitals, institutes or similar buildings using the tank supply seven days a week supplying both standpipe and house service lines shall not require heating. If in an adequately heated enclosure, interior heating of tanks shall not be required.

Rule 27. LOWEST SUCTION TANKS. Tanks shall have at least 10,000 gallon effective water capacity as specified in Schedule A, reserved for the lowest fire pump use exclusively and shall be constructed of steel or reinforced concrete, located below the grade, or lowest story, if there is no cellar under the building. The Fire Commissioner may permit suction tanks to be located in a separate enclosure or building provided they are accessible and when, in his judgment, such location will be more practicable. House supply tanks may be connected to the fire pump suction line, provided an O. S. & Y. gate valve, scaled closed, shall be provided on such house supply lines.

Rule 28. LOWEST TANK SUPPLY. The lowest suction tanks shall be fed by a connection at least 4 inches in diameter taken directly and independently from the public street main. The supply shall be not less than 750 gallons a minute, and shall enter the suction tank above the top or through the side near the top of the tank and shall be controlled by suitable bronze ball cock and copper float.

Rule 29. SUPPORT FOR TANKS. Tanks of more than 500 gallons capacity hereafter placed in or on any building shall be supported on masonry, reinforced concrete or steel construction of sufficient strength and carried to a proper foundation as provided for in section 428, Chapter 5 of the Code of Ordinances.

Rule 30. INTERMEDIATE TANKS. The location of intermediate tanks hereafter installed shall be determined

and directed by the Fire Commissioner and as prescribed in Schedule A. Each such tank shall have at least 5,000 gallons of water reserved exclusively for fire line and pump purposes. The bottom of each tank shall be at least 20 feet above the highest outlet supplied therefrom. The method of water supply to tanks, the overflow, the high and low water alarm, the emergency drain, etc., shall be as prescribed for tanks above the roof except that the overflow and emergency drain shall be connected to the drainage system of the building or discharge on intermediate levels.

The connection of the tank to the system shall be as hereinafter set forth:

Piping of the same diameter as the riser shall connect the tank with the riser of the portion of equipment supplied from that tank and in this connecting line in a horizontal run there shall be placed an approved swing check valve opening downward, and two O. S. & Y. gate valves, one at each side of the check valve. Each tank section shall be directly connected to the tank section above by means of piping of the same diameter as that of the largest riser and in a horizontal connecting line shall be provided an approved swing check valve opening upward, with an O. S. & Y. gate valve, at each side of the check valve, in order that water pumped into the siamese connection may enter the entire equipment of the building, and that each tank will supply only its portion of the system.

Rule 31. VALVES. All valves controlling standpipe water supply except valves at hose outlets shall be iron body brass mounted, or cast steel designed in accordance with specifications of the American Society of Mechanical Engineers, gate valves shall be of outside Stem & Yoke type, and shall be located in an accessible position. All emergency control valves 6 inch and larger shall be of the by-pass type.

Rule 32. PIPING. Materials of Construction. All new piping for standpipe fire lines shall be of genuine full weight wrought iron or steel and properly tested by the manufacturer to withstand the required water working pressures. All pipes shall be lapwelded. Where working pressures are in excess of 150 lbs. to the square inch extra heavy cast iron, malleable iron or cast steel valves, and fittings constructed in accordance with the specifications of the American Society of Mechanical Engineers, able to withstand the required water working pressure shall be provided. The standard weight fittings and valves may be used where the pressure is not more than 150 lbs. per sq. in. Fittings in horizontal runs shall have long turns. All underground piping shall be of extra heavy cast iron as required by Rule 15.

The water working pressure on piping, valves and fittings shall be determined by the total head of water plus 50 pounds at the top floor hose outlet plus a factor of safety of at least 50 per cent. Specifications as to the construction and water working pressure of all piping, valves and fittings shall be marked on plans filed with fire commissioner.

Rule 33. CONSTRUCTION. Each standpipe fire line riser shall be supported at the bottom and at every other (alternate) story, and shall be properly braced. Horizontal lines shall be supported by standard heavy wrought or malleable iron hangers attached to or extending around and over floor beams at intervals of not more than 8 ft., and at more frequent intervals if deemed necessary by the Fire Commissioner and shall be securely braced to withstand vibration. Hangers may be supported by straps or bars extending over and around bars of at least 1 in. in diameter and 12 in. in length embedded in concrete floors parallel to and at least 2 in. from the undersurface or by approved malleable iron concrete inserts. The arrangement of lines must be straight and as direct as practicable. Offsets will be permitted only when unavoidable or where necessary to install horizontal check valves. Except where flange fittings and pipes are permitted elsewhere in this rule, all joints shall be screwed joints made up thoroughly water tight with red lead, litharge and glycerine, or compressed graphite lead and boiled linseed oil, or any joint compound that shall be approved by the Board of Standards and Appeals.

PUBLIC HEARING

In horizontal runs of piping of standpipe fire line systems, if larger than 4 in. in diameter, fittings and valves may be of the flange type, provided flange faces are machined true and smooth and do not show rings, sand holes or other imperfections. All joints shall be provided with proper copper gaskets.

All standpipe (fire line) equipments shall be installed in a workmanlike manner.

Rule 34. PROTECTION OF FIRE LINES. Standpipe lines when not located within a fire protected stair enclosure shall be protected against interior fire damage by means of at least one inch asbestos covering, or a covering of expanded metal lath and three-quarters inch Portland cement plaster or by a 2 in. terra cotta block encasement.

Rule 35. FROST PROTECTION. Standpipe lines shall be properly protected from freezing in the following manner:

One wrapping of tar paper equivalent to Asphalt Saturated Wool Felt paper weighing 12 lbs. per 100 sq. ft.

Three (3) layers of standard 1 in. high grade "long cows' hair" felt interposed and covered with one (1) layer of builders' paper equivalent to red rosin sized sheathing paper weighing 40 lbs. per 500 sq. ft.

One (1) covering of 8 oz. canvas, painted with two (2) coats of waterproof paint.

All wrappings to be independently applied and securely fastened in place with heavy jute twine. Circumferential and longitudinal joints to have at least a 2 in. lap staggered with adjacent layers and opposing leakage to the hair felt.

In groups of pipes each water pipe is to be wrapped separately with the tar paper, but subsequent layers of felt and paper may be applied collectively if space does not permit of individual wrapping.

Where a heating pipe is one of the group, the wrapping should be applied so that the hot line would serve all pipes in the enclosure. The initial wrapping of tar paper around each water pipe should be applied with laps down and the whole group wrapped with tar paper with laps up. If due to the position of the hot line sufficient air space would not insulate the hair felt, then protection to be effected by suitable separators, or a wrapping of asbestos paper instead of the tar paper around the group.

On vertical pipes particular provision to be made to prevent slipping and tearing of insulation due to its weight.

To prevent slipping away of insulation at point of entrance of pipes into a tank, and to shed leakage from slip joints, a 16 oz. duck to be provided, doubled and securely fastened to bottom of the tank overlapping inside and outside the insulation of the group for a distance of 18 in. below the tank. This duck to be well coated with paint. Loose hair felt to be packed about connection at tank bottom to safeguard against settling.

Rule 36. NUMBER OF RISERS. Each building fronting on more than one street shall have at least one riser for each street front. For the application of this rule a corner building shall not be considered as facing on more than one street when it is on but one corner. In all cases regardless of area or location there shall be a sufficient number of risers, so that any portion of each floor area may be covered by the stream from a standpipe hose not exceeding 100 ft. in length.

Rule 37. FIRE TOWER RISER. Each standpipe riser shall be located within a stair enclosure and one riser must be located in main stairway or fire tower.

Where impracticable to locate a riser within the stair enclosure, the Fire Commissioner may permit it to be located immediately adjacent to a stair enclosure, public corridor or other suitable place.

Rule 38. HOSE STREAM ALLOWANCE. Not more than 10 feet will be allowed for the throw of hose stream, except where the static pressure at the hose outlet is 15 lbs. or more, when 20 ft. will be allowed.

Rule 39. SIZE OF CROSS-CONNECTION. Where there are two or more risers in a standpipe (fire line) equipment, all risers shall be cross-connected by piping of a diameter at least equal to the diameter of the largest riser, but in no case shall the cross-connection be less than five inches.

Rule 40. FIRE PUMPS. Where Required:

(a) In every building hereafter erected exceeding 250 ft. in height, as described in Schedule A, an electric centrifugal fire pump shall be kept in readiness for immediate use of the Fire Department during all hours of the night and day, including Sundays and holidays.

Rule 41. ARRANGEMENT AND SUPPLY OF FIRE PUMPS. Fire pumps shall be connected to the standpipe systems and have a capacity of 750 gallons of water per minute at a pressure of from 50 to 80 lbs. at uppermost hose outlet, fed from such pumps. Fire pumps shall draw from steel or reinforced concrete suction tanks. For the purpose of testing fire pumps a 4 in. diameter branch shall be taken from the discharge line at the pump side of the check valve and run to the suction tank over the side or through the side above the overflow level. From this branch there shall be taken a 4 in. line with an approved type pressure relief valve, extending to the tank in a manner similar to that of the 4 in. test line. In the 4 in. test line between the 4 in. relief branch and the tank there shall be placed an O. S. & Y. gate valve, which shall be kept closed except during a test of the fire pump. In the line from the fire pump to the standpipe risers and beyond the test branch there shall be placed an approved type check valve in a horizontal position and also an O. S. & Y. gate valve, the latter to be open except when the fire pump is undergoing test. A pressure gauge shall be provided and connected to the discharge line of the pump.

The piping connecting discharge from fire pumps shall be of same diameter as the main riser.

Rule 42. NUMBER AND LOCATION OF FIRE PUMPS.

SCHEDULE A

Height from Uppermost Hose Outlet to Grade	Total No. of Pumps Required	Approximate Location of Pumps			
		1st Pump	2nd Pump	3rd Pump	4th Pump
			Above level of First Pump	Above level of First Pump	Above level of First Pump
250' to 400'	1	Below grade level			
401' to 500'	2	Below grade level	200' to 250'		
501' to 600'	2	Below grade level	250' to 300'		
601' to 700'	3	Below grade level	200' to 250'	400' to 500'	
701' to 800'	3	Below grade level	250' to 300'	500' to 600'	
801' to 900'	4	Below grade level	200' to 250'	400' to 500'	600' to 750'
901' to 1000'	4	Below grade level	250'	500'	750'

Rule 43. FIRE PUMPS IN BUILDINGS EXCEEDING 1,000 FEET. All buildings exceeding 1,000 feet from grade level to uppermost hose outlet shall be provided with a fire pump for every 250 feet of elevation above the centre line of the lowest pump.

Rule 44. TANK CAPACITIES. Suction tanks supplying the first or lowest pump shall contain not less than 10,000 gallons reserved for fire pump. Intermediate tanks and uppermost supply tanks for buildings between 250 and 400 ft. as described in above schedule shall contain not less than 5,000 gallons reserved for fire pump. Uppermost supply tanks on all other buildings shall contain not less than 3,500 gallons reserve for standpipe fire line.

PUBLIC HEARING

Rule 45. TANK STRAINERS. All supply tanks shall be provided with proper strainers at pump and riser intake lines.

Rule 46. CENTRIFUGAL FIRE PUMPS. Fire pumps installed under these rules shall have a capacity of 750 G. P. M. and shall be of the multi-stage motor driven Centrifugal type designed, constructed and installed to render the highest possible efficient and reliable fire service.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

The pumping equipment shall be adaptable for heavy duty service having all parts of ample strength with liberal water passage and all working parts exposed to corrosion of phosphor bronze.

The pumps shall be fitted with fire fittings consisting of capacity name plate, pressure gauges, relief valves, hose manifold and three (3) approved $2\frac{1}{2}$ in. hose valves with Standard Fire Department male threads. Fire pumps shall take suction supply under a head of water and in no case shall there be less than six (6) feet between water level in tank and centre line of pump.

The pump specifications shall be within the uniform requirements of "The National Standard" as adopted by the following associations:

Associated Factory Mutual Companies,
National Board of Fire Underwriters,

or as approved by the Board of Standards and Appeals.

Fire pumps to be designed to operate at not less than five (5) pre-determined speeds to give five (5) pre-determined pressures which will insure a maximum pressure of 80 lbs. and a minimum pressure of 50 lbs. throughout the building.

Fire pump equipment shall be so designed that it will operate normally at least five (5) speeds to provide a minimum of 50 lbs. pressure, and where more than one pump is required it shall be capable of pumping to the level of the next highest pump station in case of breakdown of intermediate pumping unit.

To provide for this standby service the fire pump shall run at nine (9) pre-determined speeds, namely, five (5) for continuous service and four (4) for standby service.

Rule 47. GENERAL SPECIFICATIONS. Pumping equipment shall be free from defects in design, workmanship and material and shall give proper and continuous operation under the conditions of service specified and shall be subject to approval of the Board of Standards and Appeals.

Materials entering into construction of this equipment shall be the best quality of their respective kinds and all parts shall be amply proportioned so as to be adaptable for heavy duty service.

CASING: Casing shall be of close grained cast iron and divided horizontally, and having suction and discharge connections in the lower half, so that the top casing can be removed without breaking water connections. Casing shall have in addition to flange bolts, additional heavy bolts inside of flange to prevent leakage between stages. Casing shall be tested and guaranteed to withstand pressure 50% in excess of working pressure.

SHAFT: Shaft shall be made of best grade nickel steel and shall be ground all over to close limits and a high finish.

IMPELLERS: Impellers shall be of the enclosed type of best grade of phosphor bronze finished all over.

WEARING RINGS: Shall be of phosphor bronze and of renewable labyrinth or other equal type. Impeller wearing rings shall be securely attached to impeller, and casing ring shall be securely locked in the casing.

SHAFT SLEEVES: Shaft sleeves shall be of bronze and extend through stuffing boxes to protect the shaft from corrosion and wear from the packing.

BEARINGS: Bearing brackets shall be of the best grade of close grained cast iron and securely bolted to the lower half of the casing.

Bearing brackets shall contain cast iron bearings lined with high grade babbitt and shall be removable. Each bearing shall be equipped with two oil rings to insure proper lubrication.

COUPLING: Coupling shall be of best grade cast iron finished all over and keyed to shaft. The two halves shall be connected by coupling pins, transmitting power through rubber bushings, vulcanized on steel sleeves.

STUFFING BOXES: Stuffing boxes shall be of sufficient depth to prevent excessive leakage and shall contain water seal rings of bronze.

PACKING: Packing shall be held in place by bronze glands horizontally split and bolted together.

BED PLATE: Bed plate shall be of cast iron of heavy box type and provided with finished pads to which the pump is bolted and doveled. Foundation bolt rings shall be drilled for foundation bolts. Jack-screw pads to be cast with bed and jack-screws furnished to assist in aligning. Bed plate shall be provided with ample drip rims, drilled and tapped for piping connections on both ends.

PAINTING: Pumps shall be painted, filled, rubbed down to an even surface and finished with a drab steel-color machine paint, and the inside of the oil reservoirs in the bearing brackets to be painted white with a special oil-resisting paint.

TESTING: Pumps shall be tested at the plant of manufacturer to prove that they can fulfill requirements of specifications and guarantees made.

Rule 48. SPECIFICATIONS FOR ELECTRICAL CONTROL AND OPERATION OF FIRE PUMPS.

MOTOR: (a) Direct-current motors must be of the shunt or cumulative compound wound types. The speed of the motor at no load must not exceed the speed at full load by more than 10%.

Alternating current motors shall be of a slip ring type that will surely start and attain full speed under the current supply conditions where pump is to be installed. Approval of fire pump installations will be contingent on proper attention being given to the features mentioned herein.

(b) With a room temperature not exceeding 40 deg. C., motors shall be designed for a temperature rise not exceeding 40 deg. C. when carrying their rated full load continuously and shall also be able to run continuously with an overload of 15% without stress and without injurious rise in the temperature. Motors shall be able to withstand under the above room temperature an overload of 25% for 2 hours or a momentary overload of 50% without injury. No electrical or mechanical weakness should develop during these tests. The rise in temperature shall be measured in accordance with the Standardisation Rules of the American Institute of Electrical Engineers.

Motors shall be of such capacity that at rated voltage 115% of its full load ampere rating will not be exceeded under any conditions of pump load.

(c) Motor and control apparatus must be protected from water coming from possible leakage, or breakage of any connection at the pump or other piping in its vicinity, including hose lines which may be connected to the pump.

(d) Motor windings shall be thoroughly impregnated with an insulating compound suitable for resisting moisture.

(e) Bearing shells and caps for motors shall be of the split type on at least the driving end, to permit removal and replacement without disturbing the motor or shaft after installment.

VARIABLE SPEED CONTROL OF MOTORS shall be provided except for fire pumps in theatres as required under Rule 86. Not less than five stages of speed variation will be permitted.

PUBLIC HEARING

AUTOMATIC STARTERS will not be permitted except as provided for under Rule 86 (Theatres, etc.) of Standpipe Fire Line Rules.

CONTROLLING EQUIPMENT: The following specifications cover the construction and installation of controlling equipments of manually operated devices for the control of electric motors driving fire pumps.

In materials, details of construction, test and installation, except as modified or supplemented by these requirements, all parts of the equipment shall comply with Chapter 9 of the Code of Ordinances.

All equipments shall be specifically approved for fire pump controlling purposes.

DESIGN: (a) The design of all parts must be such as to secure simplicity, strength, durability and ease of operation.

(b) All parts must be mounted on one or more panels of slate, marble or other approved material, supported in a substantial manner on an iron frame, and the entire equipment must comply with the requirements for switchboards in Chapter 9 of the Code of Ordinances.

(c) All parts, such as bearings, cams and latches, the operation of which is liable to be interfered with by corrosion, must be made of phosphor bronze or similar metal, except where magnetic qualities are essential. Springs must be of phosphor bronze or similar metal, or protected against corrosion in an approved manner.

OPERATING MECHANISM: (a) The operation shall be such that the motor is directly started by a single lever, which shall be arranged to move in one direction from the initial to the final position.

(b) Electrical actuating devices will not be approved.

(c) Where direct current is used, an auxiliary field resistance shall be provided which can be used to increase the motor speed 10 per cent.

RESISTANCES: Starting resistances must be, unless inside of the motor, of the grid type, and comply with the requirements of starting duty rheostats as given in Chapter 9 of the Code of Ordinances.

OVERLOAD PROTECTION: (a) Each motor lead must be protected by a circuit-breaker. With direct current motors, leads must be protected by a single-pole circuit-breaker in each lead, or by an approved double coil, double pole circuit-breaker so designed that each pole must be closed independently of the other.

(b) Circuit-breakers to be calibrated to 400 per cent of normal motor current.

(c) No fuses nor other overload release devices except circuit-breakers are permitted, except in instrument and pilot light leads.

WIRING: All wiring shall be installed in rigid iron conduit.

SWITCH: An approved knife switch for independent sources of supply must be provided, having one pole for each supply wire in circuit.

PILOT LAMP AND INSTRUMENTS: (a) A pilot lamp connected on the motor side of the circuit-breaker must be provided to indicate the presence of voltage on the line.

(b) A voltmeter and ammeter must be provided and suitably mounted and connected as a part of the control equipment.

MARKING: (a) A name plate must be provided giving the name of the manufacturer and the rating of the equipment in volts and amperes.

(b) All line and motor terminal connections must be suitably marked so that they can be readily identified.

CONTROL PANEL: The control panel shall be constructed of a high grade of electrical slate or marble or other approved material.

The supporting frame shall be so arranged that the bottom of the panel will not be less than 24 inches above the floor.

INSTALLATION OF APPARATUS: The control panel shall be located close to and within sight of the motor. If a pump room used for no other purpose and containing no other apparatus except the fire pump, its motor and its accessory appliances, is provided, the controlling equipment shall be placed in this room.

The control panel shall be so protected that it will not be injured by water escaping from pump or connections.

Except where special permission is granted by the Fire Commissioner the controlling equipment shall be protected from mechanical injury by one of the following methods:

(a) Grille or lattice partitions so placed as to completely enclose the control panel and starter.

(b) The entire equipment of the panel and starter may be enclosed at the sides, front, back and top in a thoroughly substantial, ventilated sheet iron or steel cabinet of not less than No. 12 U. S. metal gauge in thickness with hinged doors with glass panel in front of pilot light. When panel is in a fireproof room and not subject to mechanical injury an enclosing cabinet shall not be required.

TEST OF EQUIPMENT: The entire equipment shall be subject to test and inspection by representatives of the Fire Commissioner.

POWER SUPPLY: Where the power supply can be obtained from two separate street feeders, two separate and distinct services shall be installed.

Isolated Plant: Where the source of supply is an isolated plant located in the building an auxiliary service of sufficient capacity shall be obtained from some outside source.

Transmission Lines: (a) The lines between the power plants and the pump room must be of such number, so arranged and so located that there will be small chance of an interruption of service to the motor, due to accident to the lines. All wiring in the pump room must be in approved conduit.

Where the valves involved are large and the crippling of this pump service would seriously affect the protection of the property, at least two separate lines from the power plant or plants to the pump installation shall be provided. The lines must be run by separate routes or in such manner that a failure of both at the same time will be only a remote possibility.

Where current is taken from an underground Edison 3-wire system it will be considered that two independent lines have been provided if connections are brought into the pump room from two street mains or feeders not terminating directly in the same junction box.

(b) Each line between the power plant and pump room shall be of such size that its safe carrying capacity as given in Chapter 9 of the Code of Ordinances will not be exceeded by the load carried.

Where direct current motors are used, the voltage at the motors must not drop more than 5 per cent below the voltage rating of the motors when the pumps are being driven at rated output, pressure and speed, and the lines between motors and power stations are carrying their peak loads.

When alternating current motors are used, the voltage at the motors under these same conditions must not drop more than 8 per cent below the voltage rating of the motors.

(c) The overload protective devices at the power plants, and where provided at various points on the lines, must be of such rating and so set that they will open the circuit only under short circuit conditions.

Approved fuses may be used, if desired, except for the protection of the pump motor where circuit breakers are required. The fuses, however, must be of such size that an overload or short circuit at the motor or its control apparatus will not cause them to open the circuit, but instead, the circuit breaker protecting the motor.

TRANSFORMERS: Where it is necessary to install transformers they shall be installed in accordance with Chapter 9 of the Code of Ordinances.

PUBLIC HEARING

Rule 49. SIGNALLING DEVICES. All buildings where variable speed control of fire pump motors is required shall be equipped with an approved coded closed circuit signalling system. The signalling stations shall be located one on each floor at main riser. This system shall be so arranged that a coded signal can be transmitted to the pump rooms. An eight-inch gong shall be provided in all pump rooms and at such other locations as the Fire Commissioner may direct. All apparatus used in connection with the signalling system shall be of an approved type and installed as outlined in rules governing the installation of interior fire alarm systems.

At alternate signal sending stations there shall be provided an approved closed circuit strap key enclosed in a sheet metal box equipped with a paracentric Fire Department lock and approved hinges.

The strap key shall be connected in series with the box circuit of the signal sending station.

A card of instructions shall be placed in the pump room giving code numbers of signalling stations, the pressures obtainable at different speeds of the motor and such other information that the Fire Commissioner may direct.

A card of instructions shall be placed in the pump room giving code numbers of signalling stations, the pressures obtainable at different speeds of the motor and such other information that the Fire Commissioner may direct.

Rule 50. RELAY STANDPIPE SYSTEM. All buildings hereafter erected exceeding 400 feet from grade to highest hose outlet shall be provided with an intermediate combination gravity and suction standpipe supply tank and a fire pump as required under Schedule A.

Each tank shall have at least 5,000 gallons of water reserved for the fire lines and shall be connected to the fire line system as described in Rule 30 for intermediate tanks except that in addition to the requirements of Rule 30, there shall be provided a long turn by-pass 8 inches in diameter around the tank check valve and the O. S. & Y. gate valves. An 8-inch O. S. & Y. gate valve SEALED CLOSED shall be provided in the by-pass line.

Each tank shall be provided with overflow and emergency drain lines as required in Rules 19 and 20, except that such lines shall drain to roofs of set backs on building, or into house drain lines providing the house drain line or lines are equal in sum total to the sum total in diameter of the drain lines.

The fire pump shall have a capacity of not less than 750 gallons of water per minute and shall deliver through the standpipe main feed riser at a pressure not less than 50 lbs. to the square inch at the highest hose outlet fed by said pump.

All fire pumps shall be located on a raised base at least 24 inches above the floor and on the floor below the supply tank, with the suction line as direct as practicable.

The pump discharge line shall be connected to the main feed riser feeding up, and outside the horizontal tank check valve line, and the upward swinging check valve in the main riser. An O. S. & Y. gate valve shall be provided at a point between the pump discharge connection and the upward swinging check valve SEALED OPEN.

The fire pump and motor shall be located in a watertight room as close to fire tower as practicable, properly drained by a 3-inch line to house drain or scuppers in exterior wall. The electric switch controlling the motor shall be marked on panel "FIRE PUMP SWITCH" in 1 inch white letters on a red background.

Rule 51. NUMBERING ON VALVES. All gate valves on tanks, fire lines and pumps shall be numbered by 3-inch red metal disc with white numbers 2 inches high secured to wheel of valves.

Rule 52. PUMP ROOM DIAGRAM. A white and black print drawn to a scale of one-quarter inch to the foot shall be provided in a glass frame showing the tank, fire pump, all pipe lines and valves. The number of each valve shall be shown in addition to purpose of each water line.

The blue print shall include instructions as to method of starting and operating pump, closing main line, gate valve and opening by-pass valve.

Rule 53. FIRE LINE TELEPHONE. In all buildings where a variable speed control of fire pump motors is required there shall be provided a multiple telephone system with a master telephone in each pump room, and in the main lobby and individual telephones located on alternate floors near the main fire line riser.

The operation of the system shall be such that any individual telephone may call and converse directly with any master telephone. The master telephones may call and converse directly with each master telephone.

A six-inch vibrating call bell shall be located at the master telephones.

The master telephones in pump room below grade level shall be equipped with a loud speaking receiver so that the voice can be clearly and audibly heard at a distance of not less than fifteen feet from the receiver.

WIRING: The wiring for the telephone system shall not be smaller than No. 18 rubber covered wire installed in rigid iron conduit. The conduit system shall contain no conductors other than fire line telephone conductors.

The fire line telephone system shall be properly maintained and ready for use by the Fire Department at all times.

Rule 54. MAIN LINE EMERGENCY CONTROL VALVES IN BUILDINGS OVER 400 FEET IN HEIGHT (per Schedule A). At the base of the main feed riser or below the hose outlet valves on the first story; at each pump room elevation, and at each approximate one-third the height above the fire pump elevations and the pump or roof tank next above, there shall be provided O. S. & Y. emergency control valves in the main feed riser properly numbered and shown on the fire pump blue print heretofore described.

Rule 55. EMERGENCY TOOL BOX. Where fire pumps are required under these rules there shall be provided in each pump room an emergency fire department tool box, painted a fire department red, with 3-inch white letters reading, "Emergency fire line tool box." The box shall be secured to the wall and be fitted with a fire department lock and contain the following:

- 1—3-foot Stillson wrench.
- 4—2½-inch plugs with pipe threads.
- 4—2½-inch caps with hose threads.
- 2—Spanner wrenches of Fire Department pattern.
- 4—2½-inch double female hose connections, with Fire Department threads.

Rule 56. EMERGENCY AND TESTING HOSE. Where fire pumps are required under these rules there shall be provided in each pump room not less than two 50-foot lengths of rubber lined 2½-inch hose, of Fire Department quality, and one 1½-inch nozzle of controlling type. All couplings to be of Fire Department pattern and threads. Hose shall be supported by hooks secured to enclosure walls of pump room.

Rule 57. LOCATION OF LOWER FIRE PUMP IN RELATION TO HORIZONTAL LINE CONTROL VALVES. In a single main riser system the fire pump discharge line to riser shall be as short as practicable.

In a two (2) main riser system the pump discharge line to cross connection shall be located between the two risers. An emergency gate valve of the O. S. & Y. type, sealed open, shall be provided in the cross-connection on each side of the discharge line connection.

In a three (3) main riser system the pump discharge line shall be connected to the cross-connection on each side of the central riser. Three (3) emergency gate valves as above shall be provided as follows: One (1) at the base of the central main riser and one (1) on each side of the discharge line connection on the riser side.

In a four (4) main riser system the pump discharge line to the cross-connection shall be centrally located so as to

PUBLIC HEARING

provide two risers on each side of pump connection. An emergency gate valve shall be provided in the cross-connection on each side of the discharge connection.

In a five (5) main riser system the pump discharge line shall be connected on each side of the third, or central riser, and shall be provided with gate valves located as described in a 3 riser system.

In a six (6) main riser system the pump discharge line shall be centrally located so as to provide three risers on each side of pump connection and shall be provided with gate valves located as described in a two and four riser system.

For the purpose of this rule a main riser is any vertical riser other than a branch riser with not more than three (3) hose outlets above the cross-connection.

Rule 58. EMERGENCY SAFEGUARDS. For the purpose of prolonging the use of the standpipe fire lines in case of failure or break, it is necessary to provide and properly locate emergency gate valves of the O. S. & Y. type as follows:

Rule 59. EMERGENCY VERTICAL LINE CONTROL VALVES. All standpipe fire line systems hereafter installed in buildings over four (4) stories or 50 ft. in height, and up to 400 ft., as described in Schedule B, shall be provided for as follows: In each riser an O. S. & Y. gate valve shall be provided below the first story hose outlet. If the interior stairway extends from hallway on first story to cellar the gate valve shall be located within the stairway enclosure below the first story level.

A two-way 2½-inch hose outlet tee with two 2½-inch approved valves, one of which may be capped, shall be provided in all main risers 6 ft. to 7 ft. above floor or stair landing level of first story with the O. S. & Y. control valve below the outlet tee.

Where a single main riser system or a main riser feed system is installed and the uppermost hose outlet exceeds 150 ft. above grade level there shall be provided in each riser O. S. & Y. gate valves, in addition to the gate valve below the first story hose outlet at approximately the level above grade hereafter specified.

SCHEDULE B

Height from Uppermost Hose Outlet to Grade	Total Number of Valves Required	Approximate Location of Valves Above Grade					
		1st Valve	2nd Valve	3rd Valve	4th Valve	5th Valve	6th Valve
150' to 200'	2 to 3	Below the 1 sty. outlet	75'	150'			
200' to 250'	2 to 3	"	75'	150'			
250' to 300'	3 to 4	"	75'	150'	225'		
300' to 400'	4 to 5	"	75'	150'	225'	300'	

Rule 60. UPPER CROSS-CONNECTION EMERGENCY CONTROL VALVES. When a two (2) main riser system is installed there shall be provided O. S. & Y. emergency gate valves between the risers in each cross-connection, located within the stairway enclosure when practicable, or as near the door to main stairway of fire tower as practicable, and where the uppermost hose outlet exceeds 150 ft. above grade, the risers shall be provided with O. S. & Y. gate valves as described in Schedule B.

Where a three (3) main riser system is installed there shall be provided O. S. & Y. gate valves between any two of the risers in each cross-connection and one in the central riser at each cross-connection.

Where a four (4) main riser system is installed there shall be provided O. S. & Y. gate valves in each cross-connection between the 2 central risers, so as to provide 2 risers on each side of control valves.

Where a five (5) main riser system is installed there shall be provided O. S. & Y. gate valves between the second and third central riser in each cross-connection and one in the central riser at each cross-connection as described in a 3 riser system.

Where a six (6) main riser system is installed there shall be provided O. S. & Y. gate valves centrally located in each cross-connection so as to provide 3 risers on each side of gate valve—as described in a two and four riser system.

Rule 61. LOWEST CROSS-CONNECTION CONTROL VALVES. When the building is provided with a fire pump as required by the Rules the gate valves required in the lowest cross-connection shall be located as described under location of Fire Pumps and Horizontal Line control valves.

Rule 62. FIRE TOWER RISER. Where the building is provided with an exterior enclosed fireproof stairway or fire tower the main riser shall be installed in such stairway and properly protected from freezing in accordance with these rules unless stairway is adequately heated.

Rule 63. VALVE SEALED OPEN. All O. S. & Y. gate valves shall be located in an accessible position and be sealed open in an approved manner.

Rule 64. LADDERS TO VALVES. Where the gate valve is more than 7 ft. above any floor or stair landing a single rung iron ladder with ½-inch rungs and not less than 10 inches between strings shall be provided at each gate valve properly secured at top and bottom.

Rule 65. VALVE SIGNS. Where the gate valves on the upper cross-connections are not located in the stair-enclosure, a sign with red background and white letters not less than 3 inches high shall be painted on the face of the wall within the stairway enclosure on the story where the gate valve is located, which shall read as follows: "STANDPIPE CONTROL VALVE NO. 0 IN LOFT."

Where a standpipe riser is located in a fire tower a sign with red background and 3-inch letters as above shall be painted on the wall at fire tower exit door, which shall read: "STANDPIPE IN TOWER," except on that story on which the emergency control valve is located, there the sign shall read: "STANDPIPE CONTROL VALVE NO. 0 IN TOWER."

Rule 66. VALVES NUMBERED. All emergency control valves shall be numbered by means of a metal disc not less than 3 inches in diameter painted red with a white number not less than 2 inches high and shall be secured to wheel of valve by chain or metal clamp.

Rule 67. FIRE LINES PAINTED. All standpipe lines not located within a stairway enclosure or public corridor and including the siamese connection street riser wall collars and caps shall be painted a Fire Department red.

Rule 68. SIAMESE CONNECTIONS FOR FIRE DEPARTMENT USE. Each standpipe system shall be provided with one or more approved type 3 inch x 3 inch inlet siamese connections for use by the Fire Department as hereinafter set forth. When a building faces on but one street and has a frontage of less than 250 ft. and requires but one four (4) inch diameter standpipe riser one siamese connection shall be provided; where the street frontage exceeds 200 ft. in length and requires but two four (4) inch diameter standpipe risers two siamese connections shall be provided for each 200 ft. of street frontage or fraction thereof. Buildings exceeding 250 ft. in height shall have not less than two siamese steamer connections for each riser and buildings not more than 250 ft. in height shall have at least one siamese connection for each 6 inch riser. Buildings having frontages on more than one street shall have a siamese connection on each street front when the frontage is not continuous but in all cases where more than one siamese connection is required they shall be properly distributed, and not grouped, as the Fire Commissioner may direct.

Rule 69. SIAMESE HEADERS. Siamese headers shall be independent of each other and lead, as direct as

PUBLIC HEARING

practicable, to riser or cross-connection header. There shall be at least 2 siamese for every 8-inch riser and at least 1 siamese for every 4 or 6 inch riser. Where there are more than one riser, the siamese headers shall divide on each side of any emergency control valve in the cross-connection, and such headers shall be equal in sum total, to the sum total of all risers on either side of the emergency control valves.

No siamese header shall be larger than 6 inches. Siamese risers, when extending through sidewalk, shall be of bronze or fitted with a brass sleeve, packed with a waterproof compound between sleeve and riser.

Rule 70. SIAMESE OMITTED. Any building, other than theatre with stage, not over 45 feet in height shall not be required to have a siamese connection except when such building is on a water-front or when it is one of a group of buildings and has a cross-connection to the standpipe equipment in one or more of the other buildings.

Rule 71. LOCATION. Each siamese connection placed on the street front of a building shall be located not less than 18 inches and not more than 36 inches above the sidewalk level and shall be set in a horizontal position and shall be readily accessible for Fire Department use. Each siamese shall have cast in the body on top or on wall plate, in letters at least 1 inch in length and not less than $\frac{1}{8}$ inch in depth, the word "STANDPIPE."

The piping connecting the siamese with the standpipe equipment proper shall be not less than 5 in. in diameter where there are two or more 4 in. risers and not less than 6 in. in diameter for risers of 6 and 8 in. diameter. When there is but one 4 in. riser, connection from siamese may be 4 in. in diameter.

Rule 72. SIAMESE CHECK AND DRIP. In each line between the siamese connection and the standpipe system there shall be placed an approved type swing check valve located where practicable within 10 feet from the building wall. Between the siamese and its check valve there shall be placed a $\frac{3}{4}$ -inch automatic ball drip of an approved type which will close under a pressure of not more than 7 lbs. per square inch.

Rule 73. SIAMESE CONNECTIONS FOR FIRE-BOAT USE, EXCEPT WHERE THE SOURCE OF SUPPLY IS FROM THE STREET MAIN DIRECT. Siamese connection on piers or warehouses, etc., intended for fireboat use exclusively shall be $3\frac{1}{2}$ in. x $3\frac{1}{2}$ in. at inlets with Fire Department female thread. Between siamese and the system proper there shall be an approved type swing check valve, and between the check valve and the siamese either a $\frac{1}{2}$ -in. open drip without valve or cock, or a $\frac{3}{4}$ -in. automatic ball drip of approved type closing under a pressure of not more than 7 lbs. per sq. inch. Where systems have both fireboat and shore siamese the shore siamese shall have male connections and shall be without clappers, but shall have on each inlet a 3 in. gate valve with Fire Department male thread for hose connection. Check valve shall not be provided for the land end siamese.

Rule 74. HOSE OUTLETS. When practicable all hose outlets shall be placed within a stair enclosure. They shall be $2\frac{1}{2}$ in. in diameter, set not less than 5 ft. nor more than 6 ft. above the floor or landing as the case may be. Outlets and racks shall be located above the floor or landing and shall not be over a run of stairs or in a stair well. When impracticable to place hose outlets within the stair enclosure, the Fire Commissioner may permit them to be located immediately adjacent to a stair enclosure, in a conspicuous place, in which case there shall be painted upon the stair side of the wall of the stair enclosure a conspicuous sign in letters not less than 8 in. in height indicating the location of the outlet. Where there is a 4-in. riser system its termination above roof shall be a $2\frac{1}{2}$ -in. outlet hose valve properly capped.

Rule 75. MAIN ROOF OUTLETS. All 6 and 8-inch main riser systems shall extend to the highest roof level, and be provided with not less than three $2\frac{1}{2}$ -inch hose valve manifold, with male threads. Roof outlets shall be located not less than 24 ins. nor more than 5 ft. above the roof and each valve shall be provided with regulation $2\frac{1}{2}$ -in. Fire Department caps. Where roof outlets cannot be located within a heated stair enclosure, the control valve shall be located below the roof and shall have a long stem extending above the roof with a wheel handle at the upper end. Between the long stem valve and the roof outlet there shall be a $\frac{1}{2}$ in. open drip extending to a sink or a $\frac{3}{4}$ in. automatic ball drip of approved type.

In buildings not exceeding 40 ft. in height hose outlets above roof shall not be required.

Each outlet other than roof outlet shall have attached thereto $2\frac{1}{2}$ in. unlined linen hose of lengths as stated elsewhere in these rules, except that in buildings or premises that do not contain occupancies storing, handling or using inflammable motion picture films or nitro cellulose products, and which are not classified as hazardous, the Fire Commissioner may permit in addition to the $2\frac{1}{2}$ -inch outlet the installation of $1\frac{1}{2}$ in. unlined linen hose and valve.

Rule 76. SPANNER WRENCH. A spanner wrench may be provided at each hose outlet valve, such wrench shall be of the goose-neck Fire Department pattern.

Rule 77. BRANCH LINE SIZE. No branch line may be less than 4 in. in diameter, except that any branch from a riser or cross-connection to but one hose outlet may be $2\frac{1}{2}$ in. if not over four (4) feet in length, and may be 3 in. in diameter if not more than twenty-five (25) feet in length.

Rule 78. NOZZLES. All $2\frac{1}{2}$ -in. fire hose shall be provided with approved smooth bore nozzles 15 in. in length, the outlet at the tip to be not less than 1 in. nor more than $1\frac{1}{8}$ in. in diameter.

Rule 79. HOSE. Hose shall be approved unlined linen. There shall not be more than 100 ft. of hose at any outlet, as required by Section 581, Chapter 5, Code of Ordinances. No single length of hose shall be less than 50 ft.

All hose used in connection with the standpipe fire line system shall be at least equal in material and construction to the type of hose bearing the approval label of the National Board of Fire Underwriters.

Rule 80. COUPLINGS. Hose couplings for standpipe shall be equal to hose couplings of the regular Fire Department pattern and thread.

Rule 81. RACKS. All standpipe hose shall be suspended from racks of stamped steel, malleable iron or other metal equal thereto, of approved swing type, so designed and constructed that they will permit of ready and easy release of hose for use. The racks shall be supported securely and substantially from standpipe risers or wall, except that where a cast nipple of non-corroding material is screwed into the hose outlet valve the rack may be suspended from said nipple. The minimum thickness of nipple to be $\frac{5}{16}$ in. In no case will automatic racks be permitted.

Racks shall be not more than 7 feet 6 inches above the floor.

Rule 82. HOSE CABINETS. Hose racks may be installed in cabinets, provided the cabinets are conspicuously located within a stair enclosure, and are of a size sufficient to accommodate the entire equipment and permit of easy handling of hose and operation of valve.

In theatres cabinets may be permitted outside of stair enclosures, provided they are conspicuous, and that during performances the cabinets are illuminated by means of an electric lamp placed inside. Each cabinet shall have a clear

PUBLIC HEARING

glass door (one panel only) without lock and shall have the words "FIRE HOSE" painted on the glass in letters not less than 2½ inches in height.

Rule 83. REGULATION AND REDUCTION OF PRESSURES. All buildings hereafter erected over 250 ft. in height and which do not exceed 400 ft. in height from the grade to highest hose outlet shall be provided with a roof gravity tank of not less than 5,000 gallons.

Where the above described height exceeds 400 feet, fire pump and suction tanks shall be provided as described under Schedule A.

Where the pressure on any hose outlet valve exceeds 50 lbs. either, approved outlet pressure reducers set as prescribed by the Chief of the Fire Department, or the Board of Standards and Appeals, shall be provided at such outlets.

Rule 84. BUILDINGS IN COURSE OF ERECTION. In buildings in course of erection standpipe fire lines shall be carried up with each story after the structure reaches the 7th story or a height of 85 ft., and there shall be provided an outside siamese pumper connection in a proper and accessible place. Regulation hose outlets on each story above the 2nd shall be provided as the work progresses. *Hose outlets shall be provided with male threads of Fire Department pattern, with hose and nozzle attached, to at least every second outlet.* The top and bottom of each riser and all cross connections shall be securely capped at all times during the progress of the work except when work on the standpipe fire line is in progress at that point. *Temporary standpipe risers used in construction work and not less than 3 inches in diameter for buildings, not exceeding 400 ft. in height, and of larger diameters, in buildings exceeding 400 ft. in height, when maintained to supply water at all times, may be accepted in lieu of the regulation standpipe, provided it is equipped with hose outlets, hose and siamese as required above.*

Elevators or hoists shall be provided as required in Rule 6.

Rule 85. PLACES COVERING LARGE AREAS. Ship yards, oil storage plants, amusement or exhibition parks or other enclosures when deemed necessary by the Fire Commissioner shall have one yard hydrant and hose for each 20,000 sq. ft. of area, but in no case shall there be more than 250 ft. distance between hydrants. *Hydrants and sufficient approved hose and a smooth bore 1½-inch Underwriters playpipe shall be placed in an approved hose house, painted red, with words "FIRE HOSE" in 6-inch white letters on door.* Where the area exceeds 20,000 sq. ft. and not exceeding 40,000 sq. ft. in area, a gravity tank of at least 20,000 gallons, elevated 50 ft. above the yard, or 25 ft. above the highest structure in the yard, or a fire pump of at least 1,000 gallons a minute, with a suction tank of at least 25,000 gallons, or river suction supply shall be provided. Plants exceeding 40,000 sq. ft. in area shall be provided with a fire pump of not less than 1,000 gallons per minute capacity, suctioning from a tank or sump of at least 30,000 gallons capacity. The Fire Commissioner may permit suction from a river or well if in his opinion the required quantity of reasonably clean water may be obtained thereby, except that where river suction is proposed and standpipe primary water supply is taken from street main, approval of the proposition shall be obtained also from the Department of Water Supply, Gas and Electricity. In addition to yard hydrants, the Fire Commissioner may require one Monitor nozzle with remote control for each 40,000 sq. ft. of area or fraction thereof when in his opinion an unusual hazard exists or may exist. Monitor nozzles shall be located as ordered by the Fire Commissioner.

Standpipe risers may be connected to yard hydrant systems when such systems are provided with gravity tanks in accordance with these rules, or when same conforms with Rule 9, Subdivision A (city main connection).

Yard hydrant systems connected to city main shall be provided with Post Indicator valve located in an accessible posi-

tion. The Post Indicator valve shall be sealed or locked open and be painted a Fire Department red.

Yard hydrant systems with more than one hydrant shall not be connected to City mains outside of the high pressure fire service area, unless approved by the Board of Standards and Appeals.

Provision for steamer connections, fireboat connections, pressure reliefs and general layout of plant standpipe systems shall be made by the Fire Commissioner as his judgment may dictate for each individual case.

Fire extinguishing equipments in addition to the foregoing shall be prescribed by the Fire Commissioner for all oil storage plants, oil refineries, fire work plants and other plants when deemed by the Fire Commissioner as presenting unusual fire hazards.

Rule 86. THEATRES, ETC. In every theatre or opera house or other building used for theatrical or operatic purposes or amusement purposes as per Section 520, Chapter 5, of the Code of Ordinances, the standpipe fire line equipments in addition to the tank shall also be supplied by approved electric pump or pumps having a capacity of at least 250 gals. per minute at 100 lbs. per square inch in buildings without occupancy above the roof and at 125 lbs. per square inch pressure in buildings having any occupancy above the auditorium roof. Power for pumps shall be supplied by electric motors of sufficient horsepower to drive pump without sign of overload. Pumps shall be bypassed to suction tanks, as provided for elsewhere in these rules under FIRE PUMPS. Pumps shall suction from steel or reinforced concrete tanks of not less than 5,000 gallons water capacity. Pumps shall deliver initial supply of water and shall be connected to an approved electric device which, upon a reduction of pressure below the allowable minimum, will automatically start the pump and, upon a restoration of the required pressure, will automatically shut off the pump. The automatic starting device shall be set to cut in at 60 lbs. pressure and to cut out at 80 lbs. pressure. In addition to the automatic starting device there shall be provided a hand starter for emergency use and there shall also be provided a pressure gauge on the panel board.

Rule 87. STREET MAIN CONNECTIONS. Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each standpipe connection to a street main shall be not less than 4 in. in diameter and shall have a conveniently accessible control valve in the line at or near the curb or when practicable in a more remote location. The control valve shall be fitted with a frost and waterproof box not less than 4 ft. nor more than 6 ft. below the curb with a fixed stem extending to a compartment at the level of the sidewalk. The cover shall be bolted to the casing, and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be of an indicating pattern, operating by a special socket wrench approved by the Department of Water Supply, Gas and Electricity. The water meters used in standpipe fire line supplies shall be of a type allowing free flow of water and be of approved type. Supply through the meter shall be checked against the Fire Department Siamese Supply and against tank supply.

Where, due to the presence of a vault under the sidewalk and extending to within 18 in. of the curb, it is impracticable to install a control valve box at the curb, there shall be placed in the feed line from the main a control valve located not more than two ft. from the point of entry.

Rule 88. HIGH AND LOW WATER ELECTRIC ALARMS. The high and low water electric alarm for gravity tanks shall be so constructed and arranged that a decrease in the quantity of water below the required fire line reserve shall cause an alarm to be given in either the pump room or engineer's room. An annunciator shall be provided in connection with the alarm system. The high

PUBLIC HEARING

and low tell tale electric devices for gravity tanks shall be so constructed that they will not be affected by moisture and the parts shall be heavy and rugged. The level of the water in the gravity tank shall be indicated by an approved device.

The audible signalling device for high and low water electric alarm shall consist of vibrating gong of at least 6 inches diameter of the enclosed type and arranged for conduit installation, the same to be operated automatically. The control cabinet shall be arranged for conduit installation and shall be located in the engineer's room or pump room where it will be under supervision of the person in charge of the standpipe supply.

All wiring shall be installed in rigid conduits and the installation shall be in accordance with the provisions of Chapter 9 of the Code of Ordinances. Control panels must be approved by the Board of Standards and Appeals.

The following sources of energy may be employed and are given in their order of preference:

1. Public utility electric light and power systems.
2. Independent electric generating plants.
3. Storage batteries in duplicate.
4. Primary batteries of closed circuit type.

When the system is connected to a 110 volt lighting service a suitable cut-out is to be provided and it shall be enclosed in a locked or sealed metal cabinet. The connection to system shall be the first connection on the house side of and as near as practicable to the meter. When batteries are used to operate the system they shall be placed in an approved cabinet provided with a lock and key.

Rule 89. DRY PIPE VALVE. A dry pipe valve shall be taken to mean a valve automatically controlling the water supply of the standpipe system in such a manner that under normal conditions its piping system will be maintained dry, but in the event of a hose valve being opened, the dry pipe valve automatically releases the water into the standpipe system.

In refrigerating plants or in unheated buildings, piers or warehouses where wet lines are impracticable, dry pipe valves may be installed.

Type A, in which the valve is actuated by the release of compressed air in the standpipe system due to the opening of a hose valve; and Type B, in which the valve is actuated by an approved trip under electrical control of an approved non-coded or coded closed circuit system operated from the control station at each hose outlet. Dry pipe valve shall be located as near as practicable to the standpipe system, in an enclosed place, protected from mechanical injury and freezing.

When Type A valve is installed the air pressure in the standpipe system under such dry pipe valve control shall not exceed 40 lbs. per sq. in. nor be permitted to fall below 25 lbs. per sq. in. nor shall it be less than one-sixth of the water pressure in any case. Not more than 16 hose outlets shall be supplied through one dry pipe valve. The air compressor shall have a capacity of not less than 11 cu. ft. per minute, and the air supply for the pump shall be taken, if possible from a room containing dry air, or it shall pass through a drying chamber containing calcium chloride in order to avoid the introduction of moisture into the system.

A closed circuit alarm shall be provided in connection with each dry pipe valve installation; the electrical layout shall be approved by the Fire Commissioner.

Rule 90. MONITOR NOZZLE. Monitor nozzles shall be so constructed and designed that they may be moved in both vertical and horizontal arcs, and shall be so located that streams may be brought to bear on all portions of the plant or building within the effective radius of stream play and such other exposing properties as may be within this radius. They shall be supplied from connections to the standpipe system not less than 4 in. in diameter with remote control.

Rule 90a. ROOF SETBACK HOSE OUTLETS. A two-way hose outlet tee, with one outlet properly capped, shall be provided in the standpipe risers on floor level of any intermediate roof setbacks on all buildings exceeding one hundred feet in height when the following conditions exist:

1. When the building has a frontage of fifty feet or over.
2. And there are adjoining roofs, window openings or other exterior exposures within fifty feet of the roof parapet.
3. And the depth of the set-back exceeds ten feet.
4. And the set-back exceeds one hundred feet above grade level.

Rule 91. EXISTING STANDPIPES. Standpipe fire line equipments which were approved by the Fire Commissioner as conforming to the rules and regulations then being enforced, shall not be required to be altered to conform to the provisions of these rules, except where substantial additions or extension in height or area is made to the building, when these rules shall apply if deemed advisable or necessary by the Fire Commissioner, and except that all such fire line systems shall have or be provided with the following:

1. Roof gravity tank shall have a reserve of approximately 3,500 gallons of water for fire line.
2. The bottom of the gravity tank shall be not less than 20 feet above the hose outlet in the highest story.
3. A 4-inch emergency drain with gate valve.
4. House lines taken from outside of tank.
5. Tank properly heated and provided with overflow line.
6. Tank shall not be fed through fire line.
7. Tank to be fed at not less than 65 gallons a minute by pump or direct city connection.
8. An iron ladder of substantial construction, properly braced, extending to top of tank.
9. At least one gate valve at the down stream side of tank check.
10. Hose valves and hose not less than 2½ inches in good serviceable condition. No automatic hose valves permitted.
11. Wheel of hose valve within 6 ft. 6 in. of stair landing or of steps within 2 ft.
12. An open or automatic ball drip between the siamese check and siamese.
13. Approved 3 in. x 3 in. siamese, with approved caps.
14. The words "STANDPIPE" cast in the body of the valve, or on metal plates secured to siamese riser, or secured to face of building behind the siamese.
15. The siamese street riser, wall collars and caps painted a Fire Department red.
16. Outlet pressure reducers on all hose outlet valves where the pressure exceeds 50 lbs. per square inch.
17. In factory or other buildings of hazardous use, where the fire lines are not within a protected stair enclosure and which may be subjected to fire exposure because of such location, shall be protected by asbestos covering, wire lath and cement, or terra cotta blocks as described in these rules.
18. Fire lines shall be protected from freezing as specified in these rules.
19. The tank shall be provided with a high and low water electric alarm, except where there is an automatic filling pump installed.
20. The bonnets or caps of all siamese or tank check valves where practical which have been in the fire lines for at least ten years shall be removed and the interior of valve cleaned of all rust or other accumulations. The body of the valve shall then be given a good coat of red lead and linseed oil.

Rule 92. HOSE OUTLET VALVE. Hose outlet valves shall be 2½ in.

A—All hose outlet valves hereafter installed in buildings not exceeding 300 feet in height, or for the uppermost 300 feet in any building, shall conform to the following specifications:

PUBLIC HEARING

1. Valves shall have a clear waterway of at least 5 sq. in. in area.
2. They shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute.
3. They shall close tightly against 300 lbs. hydraulic pressure under normal working conditions.
4. They shall stand a hydrostatic pressure test of 750 lbs. per sq. in. for 30 minutes and not distort.
5. They shall stand the operation of full opening and closing 300 times under 150 lbs. pressure without leaking at stuffing box or seat.
6. They shall not be of cast or malleable iron.
7. Only angle globe valves shall be permitted.

B—Hose outlet valves hereafter installed in buildings exceeding 300 feet in height, except as provided for in Subdivision A, shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute; they shall close tightly against 500 lbs. hydraulic pressure under normal working conditions; they shall stand a hydrostatic test of 1,500 lbs. per square inch for 30 minutes and not distort; they shall stand the operation of full opening and closing 300 times under 250 lbs. hydraulic pressure without leaking at stuffing box or seat. They shall be of brass or best grade of valve bronze.

Straight-way gate valves may be submitted for test.

All hose outlet valves hereafter installed shall have cast in the body of the valve:

1. The manufacturer's name or trade-mark.
2. The working pressure of the valve.
3. The approval number of the Board of Standards and Appeals.

Not less than 2 approved hose valves shall be delivered to the office of the Board of Standards and Appeals, the weight and other general matter noted, and valves certified. One of the valves shall then be delivered to the office of the Fire Commissioner, with certified specifications.

Rule 93. SPECIFICATIONS. Siamese Connections.

Fire Department siamese connection shall be as herein-after stated in this rule.

1. The body of the siamese may be of cast iron, cast steel, brass or any other suitable metals of sufficient strength to comply with Item 8 of this specification. All movable parts, clappers, swivels and all bolts, washers, nuts, screws and pin bearings and all swivel bearings shall be of non-corrodible metal.

2. Clapper valve seats shall be made of non-corrodible metal and shall be machined to insure a tight seat for clapper valves.

3. Each inlet to siamese shall be provided with a clapper valve machined to a true face. Single clapper siamese connections shall not be permitted.

4. The inside diameter of valve seats shall not be less than the inside diameter of the hose couplings. The area of the waterway beyond the valve seats shall not be less than the combined areas of the waterways through the two valve seats. The area of the waterway of each inlet shall not be reduced by the clapper when in a position of maximum opening.

5. Clappers shall be so hung that when siamese connection is placed in a horizontal position the clappers will be seated.

6. Swivels, attached to the body of the siamese by means of a collar expanded cold or screwed into the body of the siamese, or with other bearing surface extending entirely around the opening and exerting uniform shear, will be approved if giving a strength sufficient to meet item 8.

7. Clapper valves must be of such design and area that a pressure of 100 lbs. per sq. in. on the standpipe side will not prevent their opening when the pressure on the steamer side is 150 lbs. They must be so hung that with a discontinuance of flow into the siamese through that inlet the valve will close, and that it will not close where there is an inward flow and the pressure on the inlet is 5 lbs. or more greater than the standpipe pressure.

8. Siamese connections must stand a pressure test of 500 lbs. for 30 minutes and not distort.

9. Clapper valves shall be tight for any pressure on standpipe side up to 300 lbs.

10. Approved caps or plugs must be provided to protect the threads of the inlets.

11. The inlet swivels to siamese connection shall be provided with threads to fit the Fire Department hose.

12. The word "STANDPIPE" shall be cast into the top of the body of the siamese in 1 in. letters not less than $\frac{1}{8}$ of an in. in depth.

13. Where there is a fire boat siamese connection in the same system with a land end siamese connection, clapper valves shall be omitted from the land end siamese.

Saving Clause. All rules and regulations previously adopted and conflicting with these rules are hereby rescinded.

WILLIAM E. WALSH, *Chairman.*

WILLIAM J. O'GORMAN, *Secretary.*

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First. That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second. That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third. That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth. That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth. That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth. That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

BOARD OF STANDARDS AND APPEALS,
Room 1001, Municipal Building,
New York City.

Fire Retarding Rules.

Fuel Oil Burners Approved.

Reserve Calendar.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 15, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 22, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, *Chairman*.

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY MORNING, MAY 8, 1928

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.

The minutes of the regular meeting of the board, held on Tuesday morning, May 1, 1928, and the minutes of the regular meeting of the board, held on Tuesday afternoon, May 1, 1928, were approved as printed in the Bulletin, No. 19, Vol. XIII.

APPEALS FROM ADMINISTRATIVE ORDERS

1310-27-A.

APPELLANT—Edward Whitwell, lessee.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—1120 East 177th street, The Bronx.

APPEARANCES—None.

ACTION OF BOARD—Laid over to May 22, 1928, at 10 a. m., on request of applicant.

1328-27-A.

APPELLANT—J. Byers Holbrook, for Norris Berry, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—880 Utica avenue, Brooklyn.

APPEARANCES—None.

ACTION OF BOARD—Appeal withdrawn on written request.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent	0

1309-27-A.

APPELLANT—Globe Automatic Sprinkler Co., for Rug Renovating Co., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—78-92 Ridge street, Astoria, Borough of Queens.

APPEARANCES—

For Appellant: A. P. Foreman.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent	0

THE RESOLUTION—

(1309-27-A)

WHEREAS, Globe Automatic Sprinkler Co., for Rug Renovating Co., owner, filed, December 19, 1927, an appeal from a decision of the fire commissioner, affecting premises 78-92 Ridge street, Astoria, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated November 16, 1927 (re Plan No. 1485-1927), reads:

"Pending the approval of Plan No. 1485-27, premises 78-92 Ridge St., Astoria, Queens, which plan shows the installation of a 30,000 gallon gravity tank, you will be required to appeal to the Board of Standards and Appeals for the installation of same.";

and

WHEREAS, the building is non-fireproof, two stories in height, 150.83 ft. by 51.35 ft. to 59.94 ft., irregular, in area; OCCUPIED as a rug cleaning establishment: 1st story, 20 persons; 2nd story, 56 persons; and

WHEREAS, the appellant proposes to erect a wood gravity tank, 30,000 gallons capacity, 20 ft. above the roof upon an approved steel truss work, used solely to supply the existing sprinkler system in the building, the tank to be maintained full in accordance with rules of the board.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only as to the capacity of the tank in excess of the requirements of the existing rules, *on condition* that the total capacity shall not exceed 30,000 gallons, and that the support of said tank shall be subject to the approval of the superintendent of buildings as to structural design, capacity and strength, etc., and that the sprinkler system shall otherwise comply with the rules in all respects and that the building shall not be increased in height.

1230-27-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Chas. Ross & Son Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—148-156 Classon avenue and 73-81 Emerson place, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent	0

THE RESOLUTION—

1230-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Charles Ross and Son Co., owner, filed, November 22, 1927, an appeal from an order of the fire commissioner, affecting premises 148-156 Classon avenue and 73-81 Emerson place, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 18, 1927 (Order No. 23125-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the premises facing on two street fronts consist of a group of interconnected one-story buildings, the main building (machine shop) being non-fireproof and the remainder of the buildings being fireproof; the main building being 84 ft. by 228 ft. (approximately 19,000 sq. ft.) in area and the rest of the group being 105 ft. 6 in. by 85 ft., irregular (approximately 8,900 sq. ft.) in area, a total combined area of 27,900 sq. ft.; OCCUPIED for the manufacture of mixing and grinding machinery, total capacity 70 persons; and

WHEREAS, appellant contends that the premises is open on practically all sides; equipped throughout with a one-source sprinkler system fed from the city main in Classon avenue; that there is a siamese connection for the sprinkler system in each street front and that the openings in the walls separating the various sections are provided on each side of the wall with standard fireproof doors.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises throughout shall be equipped with an approved sprinkler system and that the building shall not be increased in height, area or dimension,

MINUTES

and granted only as long as the occupancy and use remains unchanged and in single tenancy.

1232-27-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Fred L. Lavanburg Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—190-204 North 12th street and 165-169 North 11th street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent	0

THE RESOLUTION—

(1232-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Fred L. Lavanburg Co., owner, filed, November 22, 1927, an appeal from an order of the fire commissioner, affecting premises 190-204 North 12th street and 165-169 North 11th street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 26, 1927, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the premises facing on two street fronts consist of an irregularly shaped group of interconnected, non-fireproof buildings, one and two stories (25 ft. 6 in.) in height, having a frontage of 200 ft. and a depth of 200 ft. (approximately 31,000 sq. ft.) in area; subdivided by walls with openings therein protected by fireproof doors into several units; the area of the largest section being 6,500 sq. ft.; OCCUPIED for the manufacture of dry colors: 1st story 68 persons; 2nd story, 22 persons; and

WHEREAS, appellant contends that the two buildings on the easterly portion of the North 11th street front are equipped with a sprinkler system fed by a 9,300-gallon gravity tank and the rest of the premises are equipped with a sprinkler system fed from the city main in North 12th street, and contends, further, that the buildings are under watchmen's supervision; that central office fire alarm boxes are distributed throughout the premises and that the buildings are low in height and no single area exceeds 10,000 sq. ft.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the premises throughout shall be equipped with an approved wet sprinkler system and that the building shall not be increased in height, area or dimension, and granted only as long as conditions as to occupancy and use remain unchanged and the premises remain in single tenancy and operation.

1305-27-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Commonwealth Color & Chemical Co., Inc., lessee.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—203-229 Nevins street, 259-279 Butler street and 500-520 Baltic street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent	0

THE RESOLUTION—

(1305-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Commonwealth Color and Chemical Co., Inc., filed, December 17, 1927, an appeal from an order of the fire commissioner, affecting premises 203-229 Nevins street, 259-279 Butler street and 500-520 Baltic street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 25, 1927, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the premises consist of brick and frame adjoining structures, one, two and three stories (36 ft. 9 in.) in height, 200 ft. by 225 ft., 45,000 sq. ft. floor area at first story, 9,000 sq. ft. floor area at 2nd story and 5,800 sq. ft. floor area at 3rd story; OCCUPIED for the manufacture of aniline colors, dry sizing, etc., 42 persons throughout the premises; EQUIPPED with a sprinkler system throughout (except the six drying rooms at east side, first story), fed through a four-inch connection to the street main with siamese connection on Nevins street and Baltic street fronts; and

WHEREAS, the appellant claims that the premises are divided into small floor areas by brick walls, with communicating openings at the first story only, which are provided with fire doors; that the largest single area is the yard, roofed over, about 14,800 sq. ft. floor area; all other floor areas are less than 5,500 sq. ft.; that there are nine city fire hydrants within easy reach of the premises; furthermore, there are fire pails and fire extinguishers distributed throughout the premises.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the premises throughout shall be equipped with a one-source wet sprinkler system provided with dry pipe valve and four-inch connection to the city main; that all horizontal openings on the first story shall be equipped with approved fireproof doors and that any horizontal openings above the first story shall be built up with fireproof material of approved masonry, and granted only as long as the occupancy and use of the building remains unchanged, in single tenancy and operation.

1264-27-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Frank Habeck, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—4149-4151 Park avenue and 410-420 East 176th street, The Bronx.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

THE RESOLUTION—

(1264-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Frank Habeck, owner, filed, December 1, 1927, an appeal from an order of the fire commissioner, affecting premises 4149-4151 Park avenue and 410-420 East 176th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated August 5, 1927, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, two stories (27 ft. 8 in.) in height, having a frontage of 50 ft. on Park avenue, 180 ft. on East 176th street and a distance of 107 ft. across the rear, a total inside area of approximately 13,700 sq. ft.; the first story of the premises being divided by brick walls (with openings therein to be bricked up) into three sections; the largest area being approximately 9,900 sq. ft. (inside measurement) and the two smaller areas being approximately 1,900 sq. ft. each; the second story of the premises being divided into two sections by a four-inch terra cotta block partition with a fireproof door at the opening therein; the westerly section being approximately 9,900 sq. ft. and the easterly section being approximately 3,800 sq. ft. (inside measurement); OCCUPIED: 1st story, garage, auto repair shop and household specialties, 12 persons; 2nd story, manufacture of middy blouses, auto tire covers, baby carriages and club rooms, 50 persons; and

WHEREAS, appellant contends that the premises are low in height, that they are open on practically all sides and that when the openings in the division wall on the first story are blocked up no single area will exceed 10,000 sq. ft. and the combined areas will not exceed 15,000 sq. ft., and that the conditions in this building will be practically in compliance with rule 6 of the standpipe rules.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1252-27-A.

APPELLANT—70 Park Avenue Corporation, owner.
SUBJECT—Appeal from order of the superintendent of buildings.

PREMISES AFFECTED—68-70 Park avenue, Manhattan.
APPEARANCES—

For Appellant: Timothy J. Healy and Thomas C. Sheridan.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Commissioners Connell, Holland
and Guilfoyle and Deputy Chief Martin.. 4
Negative: Chairman Walsh..... 1
Absent 0

THE RESOLUTION—

(1252-27-A)

WHEREAS, 70 Park Avenue Corp., owner, filed, November 29, 1927, an appeal from an order of the superintendent of buildings, affecting premises 68-70 Park avenue, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated November 17, 1927 (Viol. Order No. 5140-1927), reads:

"You are hereby notified that the building situated on the front of the lot on the west side of Park Avenue,

commencing about on the northwest corner of 38th Street and Park Avenue, being a 15 and pent house story fireproof building, about 49 ft. 4½ in. front, 49 feet rear, 80 feet deep and 159 ft. 8 in. in height, and occupied as a Transit Hotel and known as Number 68-70 Park Avenue, in the Borough of Manhattan, in the City of New York, does not conform to section 356 of the Building Code, section of the in the respects noted below:

"In that of installing wood doors leading to all rooms and wood flooring in all rooms from the 1st to 15th floor are of combustible material.

"You are hereby directed to remove all combustible material from the 1st to 15th floor.";

and

WHEREAS, the building is sixteen stories (159 ft. 8 in.) in height, the top story being set back from the street walls and forming a pent house, having a frontage of 80 ft. on East 38th street and 49 ft. 4½ in. on Park avenue; of fireproof construction but with wood doors and flooring installed on the second to fifteenth floors, inclusive; OCCUPIED as an apartment hotel, seven apartments on each story and one apartment in pent house story; and

WHEREAS, appellant contends that the building is provided with a double stairway separated by a fireproof wall; that all doors on all stories leading to the public halls are fireproof; that the code permits wood floors and trim in a building 150 ft. in height; that the building in question exceeds this height by only 9 ft. 8 in. and that there is no wood flooring or doors on the first story or in the pent house story; and

WHEREAS, the building exceeds in height but 9 ft. 8 in. in excess of the requirement as to fireproof construction throughout; and

WHEREAS, that portion of the building exceeding 150 ft. is fireproof in all respects; and

WHEREAS, the exit facilities are in excess of those required by law.

Resolved, that the order of the superintendent of buildings be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall not be increased in height and that any portion above 150 ft. shall be fireproof throughout in all respects; that all doors opening from or on all public corridors throughout the building shall be fireproof and self-closing and that there shall be no wood or combustible trim or flooring in any part of any public hall or corridor.

1049-21-A.

APPELLANT—Pendleton & Pendleton, for Isabelle Realty Co., Inc., owner.

SUBJECT—Application for reopening—interpretation of resolution—re appeal from order of fire commissioner.

PREMISES AFFECTED—539-543 West 39th street, Manhattan.

APPEARANCES—

For Appellant: F. W. Mayes.

ACTION OF BOARD—Appeal reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Deputy
Chief Martin 5
Negative 0
Absent 0

THE RESOLUTION—

(1049-21-A)

WHEREAS, Pendleton & Pendleton, for Isabelle Realty Co., Inc., and Jacob Brothers Co., owner, filed, September 9, 1921, an appeal with the board of appeals from an order of the fire commissioner, affecting premises 539-541 West 39th street, Borough of Manhattan; and

MINUTES

WHEREAS, the order of the fire commissioner, dated November 26, 1920 (Order No. 14881-F), reads:

"1. Provide iron or kalameined shutters at all openings in the exterior wall above first story which are distant in a direct line less than 30 ft. from any openings in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at rear of building or other approved protection as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is of non-fireproof (mill construction), seven stories in height, 75 ft. by 85 ft. in area at the street level and 75 ft. by 75 ft. above; OCCUPIED for the assembly of pianos: basement, 7 persons; 1st story, 20 persons; 2nd story, 9 persons; 3rd story, 9 persons; 4th story, 9 persons; 5th story, 7 persons; 6th story, 8 persons; 7th story, 5 persons; there being four windows in the rear of the building within 30 ft. of openings in adjoining buildings, the building being equipped with a 100 per cent. sprinkler system, supplied from two sources, the building in the rear owned by the same owner also equipped with 100 per cent. sprinkler system; and

WHEREAS, this appeal was granted by the board at its meeting, October 25, 1921, the statement having been made that a dilapidated frame structure in which the order was based would be unlikely to remain; and

WHEREAS, a new order was issued by the fire commissioner and covering the same matter of fire shutters; and

WHEREAS, the board deemed that this frame structure constituting the exposure was not a hazard.

Resolved, that the order of the fire commissioner be and it hereby is *reversed*, and the appeal be and it hereby is *granted*, only so long as conditions as to the adjoining exposure which constitutes the basis of this order remain unchanged.

THE RESOLUTION—

(1185-27-BZ)

WHEREAS, Walter S. Beaver, for William and Lena Schwartzberg, owner, filed November 7, 1927, an application under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 458-466 Leonard street, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting May 8, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Leonard street, Manhattan avenue and Engert avenue are in business, residence and unrestricted districts; and

WHEREAS, the decision of the superintendent of buildings rendered October 24, 1927 (re App. No. 19656-27), reads:

"Gas station in business district, prohibited use. Art. II, 4(a), B. Z. Resolution.";

and

WHEREAS, the premises, triangular in plan, consists of a one-story garage. It is proposed to remove a portion of the garage at the junction point of the streets, erect a one story brick office, 12 feet by 7 feet, bury four 550-gallon tanks and erect six pumps for the purpose of conducting a gasoline service station within a business district;

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution,

Resolved, that the decision of the superintendent of building be and it hereby is *affirmed* and the application be and it hereby is *denied*.

1235-27-BZ.

THE RESOLUTION—

(1235-27-BZ)

WHEREAS, Harry Cook, for Landau Holding Corp., owner, filed November 22, 1927, an application under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises northwest corner of Beach 71st street and Hammels boulevard, Arverne, Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting May 8, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hammels boulevard is a business district; Beach 71st street, from L. I. R. R. to a point 100 feet north, is an unrestricted district; Beach 71st street, north of a point 100 feet north of L. I. R. R. is a business district; Beach 72nd street, west side, is an unrestricted district; Beach 72nd street, east side, is a business district; and

WHEREAS, the decision of the fire commissioner rendered November 15, 1927 (re Alt. 3794-1927), reads:

"1. A gasoline service station may not be permitted in a business district."

and

WHEREAS, the premises consist of an irregularly shaped plot of ground, having a frontage of 38.68 ft. on Beach 71st street, 12.46 ft. and 47.24 ft. on Hammels boulevard, and a distance of 39.58 ft. along the rear, upon which it is proposed to erect a small one-story office and to install 4 gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant failed to substantiate his basis of appeal under section 21 of the building zone resolution;

Resolved, that the decision of the fire commissioner be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

1292-27-BZ.

APPLICANT—McCooley & Conroy, for Harold D. Watson, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a business building.

PREMISES AFFECTED—55-61 East 18th street, east side of East 18th street, 105 ft. 9¾ in. north of Church avenue, Brooklyn.

APPEARANCES—

For Applicant: John H. McCooley, Jr.
For Opposition: Max M. Schwartz and Albert H. Davis.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Deputy
Chief Martin 5
Negative 0
Absent 0

THE RESOLUTION—

(1292-27-BZ)

WHEREAS, McCooley & Conroy, for Harold D. Watson, owner, filed December 13, 1927, an application under the building zone resolution, to permit in a residence district the

erection and maintenance of a business building; premises 55-61 East 18th street, east side of East 18th street, 105 ft. 9¾ in. north of Church avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting May 8, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 18th street is in a residence district, Church avenue is in a business district, and St. Paul's place is in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered November 23, 1927 (re App. No. 21779-27), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3. The erection of a building with stores and a restaurant in a residence district."

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories and cellar in height, with a frontage of 60 ft. and a depth of 13 ft. to 65 ft. irregular, to be occupied as a business building; and

WHEREAS, this plot is of an eccentric plottage, and is bounded on the north side by the open railroad cut and is contiguous on the southerly property line to the business property of Church avenue, the residence use of the street is thereby practically segregated from this proposed invasion by the open cut of the B. M. T. R. R., which lies below grade, the board deems it is justified under section 21 to grant relief.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* for business use only so far as it affects the first story (street grade) of the proposed building, *on condition* that any use above this first story level shall be restricted to conforming residential use and occupancy; that any advertising exposed or displayed shall be restricted to flat wall signs or the plate glass show windows of the street front; that the northerly portion of the structure on the street front as indicated on the elevations filed in this appeal as blank walls shall be finished with two-tone face brick in panel treatment; and that all permits required shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

THE RESOLUTION—

(1161-27-BZ)

WHEREAS, Abraham Schwartz, for Consolidated Laundries, Inc., owner, filed October 28, 1927, an application under the building zone resolution, to permit in a business district the extension of a laundry occupancy in an existing building, premises 2112-2128 Neptune avenue, southeast corner of West 22nd street, Brooklyn; and

MINUTES

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting May 8, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Neptune avenue, north side, is business district; Neptune avenue, south side, from West 21st street to a point 100 ft. west, is residence district; Neptune avenue, south side, west of a point 100 ft. west of West 21st street, is business district; West 22nd street, north of a point 100 ft. north of Neptune avenue, is unrestricted district; West 22nd street, south of a point 100 ft. north of Neptune avenue, is business district; and

WHEREAS, the decision of the superintendent of buildings rendered October 13, 1927, reads:

"Proposition denied. Extension of laundry in a business district contrary to Building Zone Resolution, Art. II, 4(a).";

and

WHEREAS, the premises consist of an irregularly shaped plot of ground having a frontage of 157 ft. 7½ in. on Neptune avenue, 140 ft. on West 22nd street, and (100 ft. south of Neptune avenue) a frontage of 120 ft.—upon which are located several buildings comprising the plant of the Consolidated Laundries, Inc.; with the exception of the building in question, these structures (laundries and garage) were erected prior to March, 1923, when the vicinity was in an undetermined district; the building in question was erected in 1927; it is non-fireproof, one story in height and 37 ft. 7½ in. by 100 ft. in area; it is connected to the adjoining laundry buildings and it is proposed to occupy it as a laundry; and

WHEREAS, the board granted a variation under Cal. No. 222-23-BZ for the operation of a laundry on these premises; and

WHEREAS, the time for the completion of same expired by limitation of the building code and the conditions of the resolution,

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* only as far as it affects specifically the premises No. 2128 Neptune avenue, Brooklyn, *on condition* that there shall be no power plant installed on this portion of the general premises, any power employed thereon being supplied from the adjoining premises in the same ownership and operation; and that the laundry operation shall be confined to the rear fifty feet of this section of the premises; that the building shall not exceed one story above grade in height; that the remainder of this building on the plot formed by the intersection of Neptune avenue and West 22nd street shall be restricted to the office use and occupancy of the business conducted throughout these and the adjoining premises.

THE RESOLUTION—

(1140-27-BZ)

WHEREAS, Westboro Family Laundry Service, Inc., lessees, filed October 24, 1927, an application under the building zone resolution, to permit in a business district the maintenance of an existing wet wash laundry, premises 1422-1424 Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting May 8, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue, east side, is business district; Jerome avenue, west side, north of Macombs road, is business district; Jerome avenue, west side, south of Macombs road, is residence district; East 170th street is business district; East 171st street, Jerome avenue to a point 100 ft. east, is business district; East 171st street, east of a point 100 ft. east of Jerome avenue, is residence district; Townsend avenue, north of a point 100 ft. north of 170th street, is residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 24, 1927 (Violation Order No. 2095-1927), reads:

"You are hereby notified that the building occupied as a wet wash laundry and shown as Number 1422-24 Jerome Avenue and located in a business district in the Borough of The Bronx, in the City of New York, does not conform to section 4 of the Building Zone Resolution of the Board of Estimate and Apportionment adopted July 25, 1916, in the respects noted below:

"Occupying the first story as a wet wash laundry, said occupancy being prohibited by law.

"You are hereby directed to discontinue said use, in compliance with the requirements of the Building Zone Resolution."

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 50 ft. and a depth of 100 ft., occupied as wet wash and steam laundry; and

WHEREAS, the application is brought by the present lessee, who has a lease for ten years beginning 1926; and

WHEREAS, the present lessee took this property in use and operation from a former occupant and operator of a laundry on these premises; and

WHEREAS, the administrative order has been brought about by the application of substitution of increased horsepower boiler capacity; and

WHEREAS, on the same street front there now exists non-conforming uses in the nature of garages, the board deems that it is justified in the adjustment under section 21 of the building zone resolution,

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that in the installation of any increased horse-power boiler capacity there shall be erected a brick chimney to a height not less than the height of the adjoining premises to the rear and that the top of the chimney shall be equipped with a revolving metal hood; that all permits for the construction of the chimney shall be obtained from the bureau of buildings.

THE RESOLUTION—

(1055-23-BZ)

WHEREAS, F. W. Rinn, for Michael Lyndsey, owner, filed September 4, 1923, an application, under the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of three (3) pleasure motor vehicles; three spaces rented to persons not residing on the premises; premises 2218 Aqueduct avenue, Borough of Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting February 5, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Aqueduct avenue and Buchanan place are residence districts; and

WHEREAS, the order of the fire commissioner, dated August 16, 1923 (Order No. 19377-C), reads:

"1. Discontinue the maintenance of a garage which is not maintained strictly as an accessory to dwelling on same lot on these premises.";

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 31 ft. and a depth of 20½ ft.; occupied as a garage for three motor vehicles, three spaces rented to persons not residing on premises; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 84 per. cent of the property frontage deemed by the board to be affected; and

WHEREAS, this application was granted by the board at its meeting February 5, 1924, and May 11, 1926, for a temporary period and applicant requests an extension of this period,

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the capacity of the garage be restricted to three automobiles of the pleasure car type, space for two of which may be rented to persons not residing on the premises, and that this permission, granted May 11, 1926, be *extended* for a temporary period of two years from the date of this action, May 8, 1928, on condition that the public use shall be discontinued on or before May 8, 1930.

THE RESOLUTION—

(682-26-BZ)

WHEREAS, William F. Doyle, for William Hagedorn, owner, filed, August 4, 1926; reopened March 27, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles (previously denied); premises southeast corner of Jerome avenue and East 182nd street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 8, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district; East 182nd street, from Jerome avenue to a point 100 ft. east, is in a business district; East 182nd street, east of a point 100 ft. east of Jerome avenue, is in a residence district; Walton avenue is in a residence district; Cameron place, from Jerome avenue to a point 100 ft. east, is in a business district, and Cameron place, east of a point 100 ft. east of Jerome avenue, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered August 4, 1926, in acting on App. No. 1710-1926, reads:

"Garage for more than five cars may not be permitted in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 148 ft. on Jerome avenue and a depth of 100 ft. on East 182nd street; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision e, and was entitled to relief under section 21 of the building zone resolution on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be constructed fireproof throughout and shall not exceed a height of two stories above Jerome avenue grade; that the rear easterly wall shall be unpierced throughout its entire height and length; that there shall be no vehicular entrance of any nature or description on texture and general design of the elevation on 182nd street front shall be restricted to window, sashes, subdivided in lights not more than 8 in. by 12 in. in area; that there shall be no signs or advertising of any nature or description erected or permitted on the 182nd street front; that the exterior of the street walls on 182nd street and Jerome avenue shall be finished with face brick and natural stone trimmings, of attractive architectural design; that the color, texture and general design of the elevation on the 182nd street shall conform substantially with that of the adjoining apartment house; that the first story street front, other than for the entrance to the garage area of the premises to the rear, shall for a depth of not less than 20 ft. be developed and maintained for store or showroom purposes; that there

MINUTES

shall be no portable gasoline tanks maintained or operated on these premises; no roof signs shall be erected; that any gasoline equipment installed shall be located at the extreme southerly end of these premises; that any ascending ramp from Jerome avenue front shall set back from the building line not less than 10 ft., and that all permits shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

THE RESOLUTION—

(1251-27-BZ)

WHEREAS, Ozark Realty Co., owner, filed, November 29, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 594 92nd street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 8, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 92nd street is in a business district; Dahlgren place, from 92nd street to a point 100 ft. south, is in a business district; Dahlgren place, south of a point 100 ft. south of 92nd street, is in a residence district; Dahlgren place, from 92nd street to a point 100 ft. north, is in a business district; Dahlgren place, north of a point 100 ft. north of 92nd street, is in a residence district; Gatling place, from 92nd street to a point 100 ft. north, is in a business district, and Gatling place, north of a point 100 ft. north of 92nd street, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered November 19, 1927, reads:

"Plan No. 3900-27. 1. A garage for more than five cars may not be permitted in a business district.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories and cellar in height, with a frontage of 70 ft. and a depth of 134 ft. 8 in.; to be occupied as a garage for the storage of more than five cars; and

WHEREAS, there is a use, non-conforming and prohibitive to business district regulations now existing on these premises in the nature of a public gasoline service station; and

WHEREAS, the board deems that it would be justified under the circumstances under the rules of exception 21 in permitting the substitution of the proposed use namely, public garage for more than five motor vehicles, for the existing industrial and commercial and non-conforming use on these premises.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations, and that the application be and it hereby is granted on condition that the building shall not exceed a

height of two stories above grade; that it shall be constructed fireproof throughout; that a rear yard of not less than 10 ft. in depth shall be established at the grade of the second story floor level; that the gable walls throughout shall be unpierced; that the rear wall, first story, shall be unpierced; that any openings in the rear, second story, shall be equipped with metal frame and sash with two ventilators to each opening; that iron stairs shall be provided at the rear of first story to a counterbalanced scuttle in the roof of first story, rear; that any ascending ramps from the first story shall be located not less than 10 ft. inside the building line; that the front elevation shall be finished with face brick, two-tone, of attractive architectural design; that any advertising displayed on the front of building shall be restricted to flat wall signs and not more than one projecting illuminating sign, indicating the name and title of the business conducted on the premises; that a return of the front elevation shall be made to this board before submission to the bureau of buildings, and that all permits shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from the date of this action.

547-20-BZ.

APPLICANT—William F. Doyle, for Dorsma Garage Corp., owner.

SUBJECT—Application for modification of the previous resolution re application (under section 21 of the building zone resolution) to permit partly in a business district and partly in a residence district the extension in area of an existing garage for more than five (5) motor vehicles, and also the installation of a gasoline service station.

THE RESOLUTION—

(547-20-BZ)

WHEREAS, Irving E. Smalley, president, Dorsma Garage Corp., owner, filed, September 3, 1920, with the board of appeals, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the extension in area of an existing garage for more than five motor vehicles; premises 1016 St. Nicholas avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, October 19, 1920, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that St. Nicholas avenue is in a business district and Sylvan terrace, Jumel terrace and West 162nd street are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered July 23, 1920, in acting on Alt. App. 2265, reads:

"Proposed extension of proposed garage in business district is contrary to section 6 of the building zone resolution.";

and

WHEREAS, the existing building is non-fireproof, one story in height, 57 ft. 11 3/16 in. by 122 ft. 8 1/4 in. in area; it is proposed to extend this building on the side, the extension to be of non-fireproof construction, one story in height, 79 ft. 10 1/2 in. by 122 ft. 5 1/4 in. in area, the entire structure to be used as a garage for more than five motor vehicles; and

MINUTES

WHEREAS, there existed a garage for more than five motor vehicles on this street between the intersecting streets on July 25, 1916, which garage still exists; and

WHEREAS, this application was granted by the board at its meeting, October 19, 1920, the following resolution being adopted:

"Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed addition to the existing garage shall be separated from the showrooms facing on St. Nicholas avenue by a partition wall of terra cotta blocks, extending in a northerly direction from the north wall of the existing structure to the north wall of the proposed addition, and that said wall shall be unpierced throughout its entire length and height, except for two self-closing, fireproof doors as fire exits not exceeding 3 ft. 8 in. each in width; that the side and rear walls of the proposed extension shall be unpierced throughout their entire length and height, and that no skylights in the roofs of the structure shall be placed within 20 ft. of the rear or easterly wall or within 10 ft. of the northerly wall of the proposed extension, and that all skylights shall be glazed with plain glass and protected by wire screens above and below; that the St. Nicholas avenue front of the building shall be constructed of pressed brick with stone trim, ornamental in character and windows in same to be glazed with plate glass; the design for this facade to be submitted in duplicate and approved by the board."

and

WHEREAS, the owner, through his representative, William F. Doyle, has requested a reopening of this case and a modification of the resolution to permit the alteration of the front of the building and the installation of a gasoline service station, and the case was reopened May 17, 1928; and

WHEREAS, the decision of the superintendent of buildings, rendered February 18, 1928, in acting on Alt. App. No. 312-1928, reads:

"1. A gasoline service station may not be installed in a garage situated in a business district. This is contrary to Art. II, Par. 4, Zoning Resolution and the Resolution of the Board of Standards and Appeals (Cal. No. 547-20-BZ, Vol. 5, No. 43, Page 597.)";

and

WHEREAS, at the public hearing, May 8, 1928, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

AREA FIXED.

(1061-27-BZ)

The chairman presented and read a communication from Thomas D. La Cella, requesting the board to fix the area deemed affected and within which to obtain consents to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 103-12 Gilbert street, Jamaica, Borough of Queens.

The following area was approved by the board:

Both sides of Gilbert street from Liberty avenue to a point 400 ft. south of the premises in question, and also the property at the rear and for a distance of 50 ft. each side of the rear lot lines of the property in question.

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY AFTERNOON, MAY 8, 1928

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.

PETITIONS FOR VARIATION

1134-27-S.

PETITIONER—William I. Hohausser, Inc., for Estey Construction Corp., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—245-249 West 27th street, Manhattan.

APPEARANCES—

For Petitioner: William I. Hohausser.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to May 22, 1928, at 2 p. m.

1204-27-S.

PETITIONER—Ludwig Hanauer, for Josberg Realty Co., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—361 East 182nd street, northwest corner of Webster avenue, The Bronx.

APPEARANCES—

For Petitioner: L. Hanauer.

ACTION OF BOARD—Laid over to May 29th, 1928, at 2 p. m., on request of petitioner.

1223-27-S.

PETITIONER—Edwin H. Thatcher, for Decorated Metal Mfg. Co., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—199 Sackett street and 192-196 Degraw street, Brooklyn.

APPEARANCES—

For Petitioner: Edwin H. Thatcher.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to May 29, 1928, at 2 p. m., to embrace exit conditions in new six-story addition on Sackett street.

1319-27-S.

PETITIONER—Samuel Rosenblum, for Jacob Weisz, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—7-9 Lispenard street, Manhattan.

MINUTES

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to special meeting, May 11, 1928, at 10 a. m., due to lateness of hour.

1330-27-S.

PETITIONER—William F. Doyle, for Maral Realty Company, Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—334-336 Seventh avenue and 200 West 29th street, southwest corner, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

ACTION OF BOARD—Laid over to special meeting, May 11, 1928, at 10 a. m., due to lateness of hour.

798-27-S.

PETITIONER—Thomas B. Leahy, for 37 West 57th Street Corp., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—37-39 West 57th street, Manhattan.

APPEARANCES—

For Petitioner: Thomas B. Leahy.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to special meeting, May 11, 1928, at 10 a. m., due to lateness of hour.

1187-27-S.

PETITIONER—James P. Wiskeman, for Vincent Astor, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—18 West 33rd street, Manhattan.

APPEARANCES—

For Petitioner: James P. Whiskeman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to special meeting, May 11, 1928, at 10 a. m., due to lateness of hour.

1200-27-S.

PETITIONER—Crocker Natl. Fire Prev. Eng. Co., for Carl Rosenbaum, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—142 Greene street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to special meeting, May 11, 1928, at 10 a. m., due to lateness of hour.

1159-27-S.

PETITIONER—Philip J. Sinnott, for James S. Clifford, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—244-246 East 52nd street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Petition withdrawn.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin 5

THE RESOLUTION—

(1229-27-S)

WHEREAS, Alexander S. Traub, for Sinclair Howard Armstrong, owner, filed, November 22, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 67-69 Park place, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 2, 1927 (Order No. 28194-LD), reads:

"1. Provide an additional means of exit from each floor of the building remote from the interior stairway as per Section 271 of the Labor Law.";

and
WHEREAS, the building is non-fireproof, five stories and cellar in height, 45 ft. by 88 ft. 2 in. in area at first story and 45 ft. by 78 ft. 6 in. in area above; OCCUPIED: cellar, kitchen, 9 persons; 1st story, restaurant, 200 persons; 2nd story, manufacture of electrical supplies, 4 persons; 3rd story, electricians, 20 persons; 4th story, book bindery, 12 persons; 36 persons above the first story; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in 1/2-inch plaster boards and 26 gauge metal on wood stud partitions, with fireproof doors at openings; a substandard fire escape on the front of the building, extending from the top story to the second story balcony, with EGRESS from the termination of the fire escape by means of counterbalanced ladder in guides to street; there being iron stairs on the second and fourth stories, a fireproof bridge on the third story and a horizontal exit on the fifth story leading to building to the west; ROOFS of adjoining buildings: to west, 7 ft. 9 in. lower; to east, 6 ft. 6 in. higher; and

WHEREAS, petitioner contends that all openings leading to the buildings to the west are protected with fireproof doors; that the building in question and the buildings to the west are under one ownership and requests the acceptance of the existing means of egress.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that all exits as shown on the blueprints filed with this petition shall be provided and maintained with the exception that on the fifth story, from the horizontal exit there shall be provided an independent hallway on the top floor of Nos. 71-73 Park place (in the same ownership), enclosed in fire-resisting material.

311-28-S.

PETITIONER—Egan & Ittelson, for Nomar Real Estate Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

MINUTES

PREMISES AFFECTED—469-479 Seventh avenue, Manhattan.

APPEARANCES—

For Petitioner: Raphael Egan.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Deputy Chief Martin 4
Negative: Commissioner Connell..... 1
Absent 0

THE RESOLUTION—

(311-28-S)

WHEREAS, Egan & Ittelson, for Liberty Place Holding Corp. and Normar Real Estate Corp., owners, filed, April 4, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 469-479 Seventh avenue and 160-166 West 36th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated March 15, 1928 (re Certificate of Occupancy), reads:

"1. All steel should be encased in at least 2 inches fireproof material.

"2. Area of plate glass panes in exterior windows on the street fronts should not exceed 720 sq. inches.";

and

WHEREAS, the building is fireproof, sixteen stories in height, 98 ft. 9 in. by 140 ft. in area; OCCUPIED for offices, showrooms and 25 per cent. manufacturing, not more than 90 persons on a story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: a fire tower; two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims, as to Item 1, that the structural steel of the building is at present encased in 1½ inches of concrete and in addition thereto ⅞ inch of patent fire-resisting plaster; as to Item 2, the petitioner proposes to use large lights of glass in windows on the two street fronts, the maximum size on first story, 9 ft. by 13 ft.; second story, 5 ft. 6 in. by 6 ft.; the lower sash on all stories above the second story, 3 ft. by 4 ft.; all other sashes and windows will conform to the requirements of the labor law; furthermore, the petitioner contends that due to the character of the building smaller lights would not add to the safety of the occupants.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, on condition that all steel work shall be encased in accordance with the building code, and granted, as to Item 2, only so far as it affects the windows on the street fronts of the first story and the lower sash of all windows above the first story, on condition that all openings shall be equipped with approved metal frames and sash, glazed with one-quarter inch polished plate glass; that the factory occupancy of these premises shall not exceed 25 per cent. of the floor area, the factory occupancy to be restricted to that of the needle trades, and that the labor law shall be complied with in all other respects.

1306-27-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for Commonwealth Color & Chemical Co., Inc., lessee.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—203-229 Nevins street, 259-279 Butler street, and 500-520 Baltic street, Brooklyn.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin 5
Negative 0
Absent 0

THE RESOLUTION—

(1306-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Roloc Realty Corp., owner, filed, December 17, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 203-229 Nevins street and 259-279 Butler street and 500-520 Baltic street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 25, 1927 (Order No. 18655-LD), reads:

"1. Provide an additional means of exit from two story building No. 229 Nevins Street, remote from present exit, as per Rule 8, Board of Standards and Appeals adopted Feb. 23, 1927.

"2. Provide an outside iron balcony fire escape on north side of three story building No. 512-14 Baltic Street with balconies 4' in width connected by stairways not less than 22" wide, placed at an incline of not more than 45 degrees, extending from the ground to the highest story, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law.";

and

WHEREAS, the premises consist of brick and frame adjoining structures, one, two and three stories in height, 200 ft. by 225 ft., 45,000 sq. ft. at first story, 9,000 sq. ft. at second story and 5,800 sq. ft. at third story; OCCUPIED for the manufacture of aniline colors, dry sizing, etc., 42 persons throughout the premises; EQUIPPED with a sprinkler system throughout (except the six drying rooms at east side of first story); EXITS from buildings No. 229 Nevins street and Nos. 512-514 Baltic street: an interior open wooden stairway, extending from the first story to top story of each building; and

WHEREAS, the petitioner claims, as to Item 1, that the building No. 229 Nevins street is two stories in height, used as an office on first story, 10 persons; 2nd story for ladies lavatory; that no factory work is done on the building; as to Item 2, that the building Nos. 512-514 Baltic street is three stories in height, used for manufacturing colors: 1st story, 4 persons; 2nd story, 3 persons; 3rd story, storage, no occupancy; furthermore, the petitioner contends that there are doorways at the rear of second story of each building which lead to the roof of the one-story portion of the premises which extends 200 ft. away from each of said buildings.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the building shall be not increased in height or area, and that the means of egress shall be maintained, as shown on plans filed, over the roof of the one-story extension to Baltic street by means of doors from the two sections of the building covered by the foregoing order.

502-27-S.

PETITIONER—Thomas I. Sheridan, for Stephen Realty Co., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—16-24 West 47th street, Manhattan.

APPEARANCES—

For Petitioner: Thomas I. Sheridan.

For Administration: Inspector Maher of fire department.

MINUTES

ACTION OF BOARD—Petition granted on condition. THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Deputy
Chief Martin 5
Negative 0
Absent 0

THE RESOLUTION—

(502-27-S)

WHEREAS, Thomas I. Sheridan, for Stephen Realty Co., owner, filed, May 7, 1927, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 16-24 West 47th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated February 19, 1927, read:

"Order No. 11705-LD:

"1. Remove all partitions not built of incombustible material on all stories, as per Subdivision 6 of Section 270 of the Labor Law.";

and

"Order No. 11706-LD:

"1. Arrange all doors on all stories so as to open outwardly, as per Sec. 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, fourteen stories in height, 100 ft. by 100 ft. in area; OCCUPIED principally as offices and showrooms for jewelers, watch and clock jobbers, about 40 persons on each story and one living apartment on the roof for the superintendent of the building; EQUIPPED with a fire alarm signal system; EXITS: a fire tower and also an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that the only manufacturing done in the building consists of inserting watch works into watch cases and buffing jewelry by means of buffing machines, operated by one-quarter horse power electric motors; that the partitions in question do not interfere with the exits, and to open the doors into the corridors would create a hazard to persons using the corridors, and contends, further, that there are large glass panels in the doors in question which could be readily broken to afford an emergency means of egress from the offices; and

WHEREAS, the order is predicated on the alleged industrial operation, which is stated by the petition to be in substance and principally the adjustment and timing of clocks and watches and the minor adjustment of jewelry purchased on the premises.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the stair halls, corridors and required means of exit shall be enclosed in materials of fireproof construction, with self-closing, fireproof doors at all openings thereto; that any industrial operation shall be restricted to the minor repairs and adjustments of time pieces and jewelry purchased on the premises, and that the conditions as adopted by this board in Cal. No. 56-26-S, affecting the same premises, shall also be complied with and maintained.

1308-27-S.

PETITIONER—Samuel Rosenblum, substituted for Shampan & Shampan, for K. & K. Laundry Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—1155-1159 61st street, Brooklyn.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition. THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Deputy
Chief Martin 5

THE RESOLUTION—

(1308-27-S)

WHEREAS, Samuel Rosenblum, substituted for Shampan & Shampan, for K. & K. Laundry Co., Inc., owner, filed, December 19, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 1155-1159 61st street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 7, 1927 (Order No. 29493-LD), reads:

"1. Discontinue the use of the above premises for manufacturing purposes which is occupied in violation of Section 270 of the Labor Law.

"Defects noted are as follows:

"(a). The interior exit stairway is not 44" wide, is not constructed of fireproof material and is not enclosed in fireproof partitions.

"(b). A secondary means of egress remote from the interior stairway from each story has not been provided.";

and

WHEREAS, the building is non-fireproof, two stories in height, 60 ft. by 100 ft. in area at first story and 20 ft. by 68 ft. in area above; OCCUPIED as a laundry: 1st story, 15 persons; 2nd story, 25 persons; EXITS: an interior wooden stairway, 41 inches in width, extending from the first story to second story, enclosed in wood studs and cement plaster partitions with fireproof doors at openings; an iron ladder to roof scuttle; ROOFS of adjoining buildings: one story lower; and

WHEREAS, the petitioner claims that Certificate of Occupancy No. 5159 was issued August 26, 1924, for laundry, first story, 7 persons; 2nd story, 16 persons; that the interior stairs are enclosed in fire-retarding material; furthermore, the petitioner proposes to provide an outside iron stairway on west side leading from second story to floor of open court adjoining and under the same ownership, such court leads direct to the street; and

WHEREAS, there is a Certificate of Occupancy No. 5159, dated August 26, 1924, issued for a laundry use in these premises by the superintendent of buildings.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that a 3 ft. 8 in. wide outside iron stairway with fireproof openings shall be provided on the westerly gable wall from the second story, with termination at street level in an open court, with egress direct to the street on property contiguous to the north and in the same and single ownership; that the building shall be not increased in height, area or dimension; that all openings on the course of this exterior stairs shall be made fireproof, self-closing; that a horizontal exit shall be provided at the rear of the first story in the westerly gable wall to premises adjoining immediate to the west, in the same and single ownership.

1114-27-S.

PETITIONER—William F. Doyle, for Henry Russell, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—810 Broadway, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle and Henry Russell.

For Administration: Inspector Maher of fire department.

MINUTES

ACTION OF BOARD—Petition granted on condition. THE VOTE—

THE RESOLUTION—

(1114-27-S)

WHEREAS, William F. Doyle, for Henry Russell, owner, filed, October 17, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 810 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 7, 1927 (Order No. 3111-LD), reads:

"1. Arrange the fire escape at the rear of building and the openings leading thereto and the windows opening on the course thereof, so that same are in compliance with the provisions of Section 79B-4 and 79B-5 of the Labor Law and the Rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 79B-1 of the Labor Law.

"Among the defects noted on this fire escape are the following: Windows on course not fireproof; stairs are not 45 degrees; doors to balconies at least 2' x 6' not provided. No stairway from top balcony to roof; no stairway from lowest balcony to ground, not screened to height of 4' 6" ; no hand rail on balcony openings; no passageway from termination of fire escape to street; hand rail on long side of balcony opening on one side of stairs not 36" high."

and

WHEREAS, the building is fireproof, eight stories in height, 25 ft. by 120 ft. in area at first story and 25 ft. by 112 ft. in area above; OCCUPIED: 1st story, store; upper stories, manufacture of clothing, not more than 5 persons on any story; EQUIPPED with a fire alarm signal system;

EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from the second story to the roof; a drop ladder to yard level; with no legal means of egress from the termination of the fire escape; and

WHEREAS, the same order was granted on condition by the board under Cal. No. 989-22-S, one of which reads: "that a fixed double-rung iron ladder with hand rails shall be provided from lowest balcony to yard"; such a ladder was constructed from lowest balcony terminating in the adjoining yard at east; thereafter the owner of adjoining premises at east erected an iron shed covering the width of his lot; and

WHEREAS, the bureau of fire prevention has refused to accept the above condition as a compliance with the resolution of the board; and

WHEREAS, the petitioner has filed drawings showing a proposed extension of the second story fire escape balcony at rear with a hinged movable stairs reaching the roof of an adjoining extension at east; furthermore, the petitioner contends that otherwise the rear fire escape complies with all requirements of the resolution under Cal. No. 989-22-S and that the exits are adequate.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that an iron balcony not less than 36 inches wide for the entire width of the building at the second story level shall be provided connecting to an iron fire escape on the premises immediately adjoining to the north, with egress through plain glass openings of the adjoining premises and thence to street, and that the requirements of the resolution under Cal. No. 989-22-S be complied with in all other respects.

Adjourned 7.15 p. m.

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing ~~not~~ more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

RULES

FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1927; Amended November 1, 1917, and Feb. 3, 1922.

Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations. In garages, motor vehicle repair shops and all selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth ($1/200$) part of the span.

Rule 2. Wood Joisted Floor Construction. Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

Rule 3. Floor Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations

(a) Seven-eighths ($7/8$) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ($2\frac{1}{2}$) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ($1/4$) of one (1) per cent of steel mesh.

(b) Two and one-half ($2\frac{1}{2}$) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

Rule 4. Ceiling Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ($1/2$) inch plaster boards, or three-eighths ($3/8$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ($1/4$) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($3/4$) inch thick.

Rule 5. Attachment to Ceiling. Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

Rule 6. Openings in Fire-Retarding Floors. Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

Rule 7. Columns. All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

Rule 8. Girders. All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

Rule 9. Shaft Enclosures. Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($3/4$) of an inch thick;

(b) Two by four inch wood studs placed not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($7/8$) inch wood sheathing, one-half ($1/2$) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($7/8$) inch wood sheathing, two thicknesses of one-quarter ($1/4$) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

RULES

REPORTING STRUCTURAL ALTERATIONS, ADOPTED FEBRUARY 8, 1917, UNDER CAL. 352-16-S.

Resolved, That for the purpose of establishing uniform practice with regards to the reporting of structural alterations made under the requirements of the labor law, the following rule be and it is hereby adopted:

When plans have been filed with the proper superintendent of buildings and structural alterations have been made to comply with the requirements of the labor law relating to exits and fire protection, or with an order of the State

Labor Department relating to exits issued prior to October 1, 1916, or with an order of the fire commissioner issued subsequent to October 1, 1916, a report shall be made by the superintendent of buildings to the fire commissioner stating whether the work done complies with the order of the State Labor Department, with the order of the fire commissioner, or with the provisions of the State Labor Law, as the case may be.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

MAY 29 1928

HOURS FOR CONSULTATION

UNIVERSITY OF ILLINOIS

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 22, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 29, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR TUESDAY, MAY 22, 1928, 2 P. M.

Building Zone Cases.

1297-27-BZ.

APPLICANT—Daniel McNamara, Jr., for Cordovian Realty Corp., owner.

PREMISES—392 14th street, south side of 14th street, 122 ft. 10½ in. east of Seventh avenue, Brooklyn.
APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the erection and maintenance of a garage for the storage of four (4) motor vehicles (moving vans).

1340-27-BZ.

APPLICANT—Erin Realty Corp., owner.

PREMISES—4582-4588 Broadway, Manhattan.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

1348-27-BZ.

APPLICANT—Edward P. Doyle, for Joseph Friedman, owner.

PREMISES—2753-2761 Coney Island avenue, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

1-28-BZ.

APPLICANT—John J. Ryan, for Florence M. Steinberg, owner.

PREMISES—3401 Kingsland avenue, northwest corner of Boston road, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

4-28-BZ.

APPLICANT—William F. Doyle, for Locust Hill Avenue Co., owner.

PREMISES—1870-1878 Flatbush avenue, southeast corner of East 38th street, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

CALENDAR

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, May 22, 1928*, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

CAL. NO. 1275-27-BZ—Application, December 6, 1927, under section 21 of the building zone resolution, of Frank W. Fitzpatrick, applicant, on behalf of Western District Cleaners and Dyers, owner, to permit in a business district the maintenance of a dry cleaning establishment; premises 132-136 Academy street, Long Island City, Borough of Queens.

CAL. NO. 1286-27-BZ—Application, December 9, 1927, under sections 7e and 21 of the building zone resolution, of Edward P. Doyle, applicant, on behalf of G. M. S. Realty Corp., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 41-43 Snyder avenue, north side of Snyder avenue, 150 ft. 11¼ in. west of Bedford avenue, Brooklyn.

CAL. NO. 1068-27-BZ—Application, October 3, 1927, under sections 7c and 21 of the building zone resolution, of Edward P. Doyle, applicant, on behalf of Livia M. Pepe, owner, to permit in a residence district the maintenance of an existing building occupied on the basement story as a French dry cleaning, dyeing and pressing business and as dwellings above (previously denied); premises 124 Waverly place, Manhattan.

CAL. NO. 220-28-BZ—Application, March 12, 1928, under section 21 of the building zone resolution of William J. Cherry, applicant, on behalf of Lutheran Church of the Advent, owner, to permit in a residence and "E" area district the erection and maintenance of a building less than ten (10) feet from the street line and also to occupy more than 70 per cent. of a corner lot at curb level, and more than 40 per cent. at a point 18 ft. above the curb level; premises 1201-1211 Avenue P, northeast corner of East 12th street, Brooklyn.

CAL. NO. 538-27-BZ—Application, May 16, 1927, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Manufacturers Trust Co., owner, for a modification of the original resolution, to permit in a one and one-half times height district, extending from a two times height district, the erection and maintenance of the street walls in excess of the height permitted by the zone resolution; premises 481-497 Eighth avenue, 301-307 West 34th street and 302-320 West 35th street, Manhattan.

CAL. NO. 1171-27-BZ—Application, November 1, 1927, under section 21 of the building zone resolution, of Gardiner Conroy, applicant, on behalf of Sinking Fund Corp., owner,

to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 8414-8448 New Utrecht avenue, west side of New Utrecht avenue, 7 ft. 9¾ in. north of 18th avenue, Brooklyn.

CAL. NO. 1231-27-BZ—Application, November 22, 1927, under sections 7b, 7c and 21 of the building zone resolution, of Ferdinand Savignano, applicant, on behalf of West Eighth Street Arcade, Inc., owner, to permit, partly in a residence district and partly in a business district, the erection and maintenance of a building to be used as a motion picture theatre, restaurants and offices and also the omission of the required legal rear yard; premises 52-54 West 8th street, Manhattan.

CAL. NO. 1263-27-BZ—Application, December 1, 1927, under section 21 of the building zone resolution, of J. Burmeister, applicant, on behalf of Laura J. Ligh, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 614 Rockland avenue, Egbertville, Borough of Richmond.

CAL. NO. 1294-27-BZ—Application, December 13, 1927, under sections 7e and 21 of the building zone resolution, of Matthew F. Fagan, applicant, on behalf of Daleson Realty Corp., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises north side of East New York avenue, 40 ft. west of Troy avenue, Brooklyn.

CAL. NO. 1336-27-BZ—Application, December 23, 1927, under sections 7e, 7g and 21 of the building zone resolution, of Henry G. Harrington, applicant, on behalf of Albert L. Gray, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 1785-1789 Bushwick avenue, northeast corner of Jamaica avenue, Brooklyn.

CAL. NO. 176-28-BZ—Application, February 29, 1928, under section 21 of the building zone resolution, of Harry Baer, applicant, on behalf of 373 Park Avenue Corp., owner, to permit in a residence district the alteration and change of occupancy of the first story from a residence use to a business use; premises 375 Park avenue, Manhattan.

CONCRETE RULES

USE OF HYDRATED LIME IN CONCRETE

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

MINUTES

BOARD OF STANDARDS AND APPEALS

SPECIAL MEETING

FRIDAY MORNING, MAY 11, 1928.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.

PETITIONS FOR VARIATIONS

1330-27-S.

PETITIONER—William F. Doyle, for Maxal Realty Company, Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—334-336 Seventh avenue and 200 West 29th street, southwest corner, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1330-27-S)

WHEREAS, William F. Doyle, for Maxal Realty Co., Inc., owner, filed, December 22, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 334-336 Seventh avenue and 200 West 29th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered December 12, 1927 (Application No. 107-1927), reads:

"12. All windows should comply with Sec. 264 Labor Law and Rule 503 Industrial Code.";

and
WHEREAS, the building is fireproof, twenty stories in height, 123 ft. 8 in. by 99 ft. 2¾ in. in area; OCCUPIED: stores, offices, showrooms and 25 per cent. manufacturing; not more than 200 persons on a story; EQUIPPED with a sprinkler system; EXITS: a fire tower; two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use one-quarter inch plate glass in front windows facing Seventh avenue and on 29th street, the maximum size on first story, 4 ft. 10½ in. by 7 ft. 8 in.; second and third stories, 6 ft. 8 in. by 6 ft. 8 in.; fourth story, 7 ft. 6 in. by 12 ft.; furthermore, the petitioner contends that to use smaller glass in the windows in question would detract from the architectural appearance of the building and would prevent the use of the specified stories for store and showroom purposes.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows of the three lower stories on the street front, *on condition* that the openings shall be equipped with approved metal frames and sash, glazed with one-quarter inch polished plate glass, and that the requirements of the labor law shall be complied within all other respects.

1187-27-S.

PETITIONER—James P. Whiskeman, for Alice Astor Oberlensky, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—18 West 33rd street, Manhattan.

APPEARANCES—

For Petitioner: James P. Whiskeman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1187-27-S)

WHEREAS, James P. Whiskeman, for Alice Astor Oberlensky, owner, filed, November 9, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 18 West 33rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 5, 1927 (Order No. 30740-LD), reads:

"1. Arrange the fire escape at rear of building which serves as a required means of egress so as to conform to Sect. 274 of the Labor Law and the rules of the Board of Standards and Appeals adopted Feb. 23, 1927.

"NOTE: Among the defects noted are the following: Fire doors 2' x 6' opening to balconies not provided. Windows opening on course not self-closing. No gooseneck ladder from top balcony to roof. Balconies and stairways not screened to a height of 4' 6". No guard rails around well hole openings of balconies.";

and

WHEREAS, the building is fireproof, six stories in height, 25 ft. by 98 ft. 9 in. in area at first story and 25 ft. by 91 ft. 3 in. in area above; OCCUPIED: 1st story, store; 2nd story, tailor, 4 persons; 3rd story, showroom, 3 persons; 4th story, office, 12 persons; 5th story, vacant; 6th story, dressmaking, 6 persons; EXITS: an interior fireproof stairway, extending from the first story to top story, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the top story down to the second story, with EGRESS from the termination of the fire escape by means of extended balcony and steps to premises adjoining at west; ROOFS of adjoining buildings: 80 ft. higher at east and west; and

WHEREAS, the petitioner claims that the building is of fireproof construction, erected in 1912; that the occupancy is not hazardous and the exits are adequate; and

WHEREAS, the petitioner requests a variation of the labor law only so far as it affects the top story for limited industrial use and operation.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the factory occupancy shall be restricted to the top story, limited to six persons employed in the conduct of needle trades; that one window on the top story to the fire escape shall be equipped with a fireproof casement door opening out; that iron steps shall be provided from the floor to sill level of balcony door; that an iron gooseneck ladder shall be provided from the top story fire escape balcony to the roof; that the well holes throughout the rear fire escape shall be provided with guard rails; that the building shall be not increased in height or area.

1200-27-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for Carl Rosenbaum, owner.

SUBJECT—Variation of the labor law, as cited in order of the fire commissioner.

PREMISES AFFECTED—142 Greene street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

THE RESOLUTION—

(1200-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Carl Rosenbaum, owner, filed, November 11, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 142 Greene street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 18, 1927 (Order No. 17009-LD), reads:

"1. Provide an additional means of exit from cellar and 1st story same to be located at rear of building as per Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories, cellar and sub-cellar in height, 50 ft. 10 in. by 100 ft. in area at first story and 50 ft. 10 in. by 96 ft. in area above; OCCUPIED: sub-cellar, storage of cardboard and boiler room, no occupants; cellar, cutting and stitching cardboard, 2 persons; 1st story, manufacture of paper boxes, 20 persons; 2nd story, manufacture of suitcases, 15 persons; 3rd story, manufacture of paper boxes, 11 persons; 4th story, spinning cord, 4 persons; 5th story, manufacture of cord and tassels, 18 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in fire-retarding partitions with fireproof doors at openings; there being, also, wooden stairways leading from the sub-cellar to the cellar and from the cellar to first story; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the top story balcony to the second story balcony, with EGRESS from the termination of the fire escape by means of a counterbalanced stair leading to street; there being, also, a fire escape leading from the yard (at sub-cellar level) to the first story; there being, also, an engineer's ladder from sub-cellar to sidewalk; ROOFS of adjoining building: to north, one story lower; to south, one story higher; and

WHEREAS, there is an open yard 10 ft. by 25 ft. in area at the rear of these premises from the sub-cellar to the first story level.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that an iron stairs shall be provided from the grade of the rear yard, sub-cellar level to the level of the yard of the premises immediately to the rear, 163 Mercer street, with egress through openings in the rear of 163 Mercer street and through the open yard of the adjoining premises, 161 Mercer street, as shown on the plans filed with this petition; that the verified consent of the owner of the premises to the rear on Mercer street for this means of egress shall be filed with the fire department; that this building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

1319-27-S.

PETITIONER—Samuel Rosenblum, for Jacob Weisz, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—7-9 Lispenard street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION—

(1319-27-S)

WHEREAS, Samuel Rosenblum, for Jacob Weisz, owner, filed, December 21, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 7-9 Lispenard street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 26, 1927 (Order No. 28975-LD), reads:

"1. Arrange the fire escape at front of building and the openings leading thereto so that same will conform to Section 271 of the Labor Law and the rules of the Board of Standards and Appeals adopted February 23rd, 1927. Defects noted as follows: (a) No approved fire doors at openings to balconies. (b) Windows opening on course of fire escape not fireproof, self-closing.

"2. Extend the interior stairway at the centre of building to the roof, as per Section 271 of the Labor Law.

"3. Provide an unobstructed passageway around hoistway leading from the foot of the stairway at centre of building to the street, said passageway to be not less than 3' in width as per Section 272 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, three stories in height, 40 ft. 8¾ in. by 70 ft. in area at first story and 40 ft. 8¾ in. by 50 ft. in area above; OCCUPIED: 1st story, stores; 2nd story, manufacture of coats and aniline colors, 9 persons; 3rd story, stuffed prunes and dates, normal occupancy 10 persons; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in wood board partitions with wood sash doors at openings; an iron ladder from top story to roof scuttle; a fire escape on the front of the building, having non-fireproof openings along the course thereof, extending from the top story to sidewalk; ROOFS of adjoining buildings: three stories higher at east; same height at west; and

WHEREAS, the petitioner claims, as to Items 1 and 2, that the front fire escapes are provided with a counterbalanced stairway at second story; that the building is divided into two sections, with an iron ladder from top story of each section to the scuttles in the roof; that the occupancy is very small and not of a hazardous nature; as to Item 3, the petitioner proposes to provide chain device on the hoistway door at second story, arranged to operate with the action of the door, so that when the hoistway is in use the chains will be lowered to form a curtain and when not in use the chains will be lifted upwards; and

WHEREAS, the fire escape on the front of the building complies with the labor law in all respects other than fireproof equipment on the windows; and

WHEREAS, there is a fixed double-rung iron ladder to scuttle in the roof from each loft; and

WHEREAS, the hoistway is only for the operation of a sling device.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, on condition that the building shall be not increased in height or area; granted, as to Item 2, on condition that there shall be provided within the stairhall enclosure a fixed double-rung iron ladder to a 2 ft. by 3 ft. movable scuttle in the roof, and granted, as to Item 3, on condition that a fixed bulkhead platform at a height of not less than 7 ft.

MINUTES

shall be provided in the entrance hall enclosure underneath the existing hoistway, and that this variation is granted so long as conditions as to occupancy and use remain unchanged.

798-27-S.

PETITIONER—Thomas B. Leahy, for 37 West 57th Street Corp., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner and superintendent of buildings.

THE RESOLUTION—

(798-27-S)

WHEREAS, Thomas B. Leahy, for 37 West 57th Street Corp., owner, filed, July 8, 1927, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner and the superintendent of buildings, affecting premises 37-39 West 57th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated June 14, 1927, read:

“Order No. 22734-LD:

“1. Arrange all doors on all stories to open outwardly, as per Sec. 270 of the Labor Law.”;

and

“Order No. 22733-LD:

“1. Remove wire glass from doors leading to fire tower on all stories as per Sec. 270 of the Labor Law.

“3. Provide fireproof windows on the 11th story front of building. Above order is issued as modification of Item 4 of Cal. No. 437-24-S and Cal. No. 822-23-S is being violated.”;

and

WHEREAS, the order of the superintendent of buildings, dated May 19, 1927 (Violation No. 3327-1926), reads:

“Reinspection of the above premises recently by this Bureau shows that before a Certificate of Occupancy shall be issued and violation 3327-1926 dismissed, the following objections must be removed:

“1. All doors to vestibule leading to fire tower should be 44 inches in clear width; wire glass in same is unlawful.

“2. Plain glass in doors opening on main stair is unlawful. Proposal in Cal. 437-24-S, Board of Standards and Appeals, relative to ventilating stairs not carried out.

“3. Unobstructed egress from sub-divided floor areas at front of building should be provided to both stairs.

“4. Present occupancy not confined to within 30 feet of rear wall and signs indicating limited factory area not provided in accordance with modification.

“7. Partitions of combustible material erected throughout building, contrary to Sec. 264 of the Labor Law.

“8. Combustible floor finish is contrary to Section 264 of the Labor Law.”;

and

WHEREAS, the building is fireproof, twelve stories in height, 58 ft. 4 in. by 100 ft. 5 in. in area at first story and 58 ft. 4 in. by 90 ft. 5 in. in area above; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent. of the floor area for manufacturing; 2nd story, 12 persons; 3rd story, vacant at present; 4th story, 19 persons; 5th story, 34 persons; 6th story, 13 persons; 7th story, 24 persons; 8th story, 18 persons; 9th story, 23 persons; 10th story, 32 persons; 11th story, 20 persons; 12th story, 13 persons; EQUIPPED with a sprinkler system; EXITS: an interior fireproof stairway, extending from the first story to roof, and a fire tower adjoining the main stairs, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner, as to Fire Department Order No. 22734-LD, Item 1, contends that doors leading to fire tower open outwardly and doors to vestibules open into lofts and to open these doors out would form an obstruction, and as to Order No. 22733-LD, Item 1, proposes to install sheet steel panels over the glass on the loft side of door, and as to Item 3, contends that to provide the required windows would alter the entire architectural effect of the building; as to building department orders, Item 1, contends that all doors to vestibule leading to fire tower are 44 inches wide and proposes to provide steel panels over the glass on the loft side of the door; as to Item 3, contends that free egress is afforded to both stairs; as to Item 4, contends that the factory occupancy is in some cases 7 ft. beyond the limiting line and requests the acceptance of this condition; as to Item 7, contends that the partitions do not interfere with the exits or with the sprinkler system, and as to Item 8, contends that linoleum has been placed in the various rooms and in the main stair hallways and requests the acceptance of such floor covering.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 8 of Violation No. 3327-1926 of the superintendent of buildings, only as far as it affects the floor covering, restricted to and only within the business use occupancy of the premises, and that the petition be and it hereby is denied in all other respects, and that the resolutions of Cal. No. 822-23-S and Cal. No. 437-24-S shall be complied with and maintained.

Adjourned 11.45 a. m.

WILLIAM J. O'GORMAN, Secretary.

RULES

REPORTING STRUCTURAL ALTERATIONS, ADOPTED FEBRUARY 8, 1917, UNDER CAL. 352-16-S.

Resolved, That for the purpose of establishing uniform practice with regards to the reporting of structural alterations made under the requirements of the labor law, the following rule be and it is hereby adopted:

When plans have been filed with the proper superintendent of buildings and structural alterations have been made to comply with the requirements of the labor law relating to exits and fire protection, or with an order of the State

Labor Department relating to exits issued prior to October 1, 1916, or with an order of the fire commissioner issued subsequent to October 1, 1916, a report shall be made by the superintendent of buildings to the fire commissioner stating whether the work done complies with the order of the State Labor Department, with the order of the fire commissioner, or with the provisions of the State Labor Law, as the case may be.

THE RESOLUTION—

(1143-27-A)

WHEREAS, Parshelsky Brothers, Inc., owner, filed, October 24, 1927, an appeal from an order of the fire commissioner, affecting premises 131-149 Morgan avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 17, 1926, reads:

"Order No. 97620-F:

"1. Install standpipe system with risers four inches in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and two and one-half inch regulation fire department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, one story in height, irregular in area, having a frontage of 200 ft. on Morgan avenue, 114 ft. on Meserole street and a maximum depth of 282 ft., a total area of approximately 39,000 sq. ft., subdivided into three sections by 12-inch brick walls, with openings therein protected by fireproof doors, area of the largest section being approximately 27,800 sq. ft.; OCCUPIED as a warehouse for lumber storage, 25 persons in entire premises; and

WHEREAS, appellant contends that the building is low in height and open on all sides, and is equipped with an interior fire alarm system connected with fire headquarters, and in lieu of the required standpipe system proposes to install a sprinkler system.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the building shall be not increased in height or area, so long as conditions as to occupancy and use remain unchanged, and that the premises shall be equipped throughout with an approved sprinkler system.

1299-27-A.

APPELLANT—Cornell Utilities Company, Inc., for Char-mouth Realty Corporation, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—233 Harris avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: William Porter.

MINUTES

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(1299-27-A)

WHEREAS, Cornell Utilities Co.; Inc., for Charmouth Realty Corp., owner, filed, December 14, 1927, an appeal from a decision of the fire commissioner, affecting premises 233 Harris avenue, Long Island City, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated November 21, 1927 (Plan No. 993-27), reads:

"1. Boiler room must have entrance from street, yard or court only.

"2. Boiler room must be completely cut off from the rest of the building by fireproof partitions, ceiling and floor constructed of not less than 8" for brick or 6" for concrete or terra cotta."

and

WHEREAS, the building is fireproof, five stories and basement in height, 50 ft. by 87.55 ft. in area; OCCUPIED by one concern for the refinishing and storage of furniture, 65 persons in entire premises; and

WHEREAS, a fuel oil burning system has been installed consisting of a 1,080-gallon fuel oil storage tank (buried outside the premises), an approved Nokol Oil Burner and the necessary valves and piping for a complete equipment; and

WHEREAS, appellant contends that the opening forming the exit from the boiler room into the fireproof stairway is protected by a fireproof door; that the fuel oil rules are complied with in all respects excepting as to the two items of the order and requests the acceptance of the existing conditions.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, as to Items 1 and 2, *on condition* that the boiler room shall be cut off from the remainder of the cellar by concrete walls; that exits shall be provided from the boiler room by means of stairway direct from the boiler room to the entrance vestibule at first story, enclosed in 6-inch terra cotta partitions, provided with self-closing, fireproof doors at the cellar level and first story level; that the boiler room shall be ventilated by not less than two windows at the street front above sidewalk grade; the areas of the windows to be not less than 18 in. by 20 in., and that the fuel oil burning installation shall comply with the rules in all other respects.

1289-27-A.

APPELLANT—S. Battilanti, for H. Horn Realty Co., lessee.

SUBJECT—Appeal from order of the fire commissioner.
PREMISES AFFECTED—648 Broadway, Manhattan.

THE RESOLUTION—

(1289-27-A)

WHEREAS, S. Battilanti, for H. Horn Realty Co., lessee, filed, December 13, 1927, an appeal from an order of the

fire commissioner, affecting premises 648 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 4, 1927, reads:

"Order No. 39880-LC:

"1. Forthwith remove all nitro-cellulose products."; and

WHEREAS, the building is of steel frame and brick construction, ten stories in height, 30 ft. 5 in. by 150 ft. in depth; OCCUPIED: cellar and 1st story, restaurant, 30 persons; 2nd and 3rd stories, manufacture of clothing, 15 persons on each story; 4th story, manufacture of hats, 20 persons; 5th story, manufacture of shirts, 16 persons; 6th and 7th stories, manufacture of hats, 17 persons on each story; 8th story, vacant; 9th story, six tenants, manufacturing, 30 persons; 10th story, five tenants, manufacturing, 9 persons; and

WHEREAS, the appellant claims that the lessee occupies a room on the tenth story, shown on plan in hatched lines, for which this appeal is made; that the work consists of decorating and rhinestoning ornaments; that not more than five pounds of celluloid are stored on the premises at any time; furthermore, the appellant contends that the board granted a prior tenant permission to use five pounds of celluloid; and

WHEREAS, the board granted an appeal under Cal. No. 1132-24-A on exactly the same issue but under another individual tenancy; and

WHEREAS, the present order has been reissued against the present tenant.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, reaffirming the action of this board under Cal. No. 1132-24-A, dated January 6, 1925, *on condition* that not more than five pounds of celluloid shall be maintained on premises, stored in metal cabinet, constructed of heavy gauge metal and angle iron frame, with self-closing door to same, and granted so long as conditions as to use, occupancy and operation otherwise remain substantially unchanged.

1312-27-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Henry B. Nevins, Inc., owner.

SUBJECT—Appeal from orders of the fire commissioner.
PREMISES AFFECTED—196-206 City Island avenue, The Bronx.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(1312-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Henry B. Nevins, Inc., owner, filed, December 19, 1927, an appeal from orders of the fire commissioner, affecting premises 196-206 City Island avenue, Borough of The Bronx; and

WHEREAS, the orders of the fire commissioner, dated June 18, 1927, read:

"Order No. 23146-F:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements,

MINUTES

cellars and roofs), placed within main stairway enclosure.”;
and

“Order No. 23147-F:

“1. Provide yard hydrants, hose and pump as per rule 37 of the Board of Standards and Appeals, and standpipe rules and Sec. 20, Ch. 12, Code of Ordinances.”;

and

WHEREAS, the premises consists of a large plot of ground, maintained as a ship and yacht building yard, about 197,000 sq. ft. in area, with several one and two-story brick, corrugated iron and concrete block buildings, the largest building being 110 ft. by 130 ft., about 14,000 sq. ft. floor area at first story and 6,300 sq. ft. floor area at second story; OCCUPIED: 1st story, woodworking shop, 30 persons; 2nd story, joiner shop, 10 persons; and

WHEREAS, the appellant claims, as to Order No. 23146-F, that the building is open on all sides, equipped with a sprinkler system, fed from the water main on City Island avenue; that due to the slight excess in area of the first story the standpipe order was issued; as to Order No. 23147-F, that the premises are used by a yacht builder, the greater portion of which are open and not used; that most of the premises are within 250 ft. of a city fire hydrant; that there is a city fire alarm box immediately in front of the premises; that fire pails and extinguishers are distributed throughout; furthermore, the appellant contends that Engine House No. 70 is about 150 ft. from the premises.

Resolved, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal be and it hereby is *granted*, as to Item 1 of Order No. 23146-F, affecting the building located on City Island avenue, approximately 362 ft. southerly from Scofield street, *on condition* that the building shall be not increased in height or area; that the building shall be equipped throughout with a sprinkler system and approved watchman system; *granted*, as to Item 1 of Order No. 23147-F, *on condition* that such auxiliary fire extinguishing appliances, as shall be directed by the fire commissioner, shall be distributed throughout the premises, yards and buildings, so long as conditions as to occupancy and use of these premises remain substantially unchanged.

484-27-A.

APPELLANT—Samuel Rosenblum, substituted for George M. Wood, for Weisberg Baer Co., owner.

SUBJECT—Appeal from orders of the fire commissioner.
PREMISES AFFECTED—1015 Boulevard, Astoria, Queens.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

Absent	0

THE RESOLUTION—

(484-27-A)

WHEREAS, Samuel Rosenblum, substituted for George M. Wood, for Weisberg Baer Co., owner, filed, May 3, 1927, an appeal from orders of the fire commissioner, affecting premises 1015 Boulevard, Astoria, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 8, 1927 (Order No. 7958-LF), reads:

“1. Separate all hydrants with hose outlets from the sprinkler system. Sec. 20, Ch. 12, Code of Ordinances and Rule 1, Sprinkler Rules, Board of Standards and Appeals.”;

and

WHEREAS, the order of the fire commissioner, dated February 21, 1927 (Order No. 7962-LF), reads:

“1. File plans for automatic sprinkler systems. Said plans and sprinkler system must conform to the rules of the Board of Standards and Appeals, and be approved by this Department. Sec. 20, Ch. 12, Code of Ordinances.”;

and

WHEREAS, the order of the fire commissioner, dated January 10, 1927 (Order No. 7967-F), reads:

“1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.”;

and

WHEREAS, the premises consist of a plot of ground situated on the northerly side of Boulevard, 200 ft. east of Perrott place, extending to the East River, on which are located several interconnected buildings; a three-story brick building, 40 ft. by 130 ft. in area, a three-story brick building 50 ft. by 115 ft. in area; a two-story frame building 42 ft. by 292 ft.; a two-story brick building 25 ft. by 50 ft.; a loading platform 25 ft. by 50 ft.; premises are EQUIPPED with a sprinkler system with a 50,000-gallon gravity tank and a 1,000-gallon-per-minute electric pump; there is also a fire boat connection on the river front and six yard hydrants and two hydrants at the street fronts, the yard hydrants supplied with water from 8-inch mains connected with the sprinkler tank; the buildings are OCCUPIED for storage of lumber and manufacture of window frames and parts; there is a total of 15 persons on the first story and 6 persons on each story above; and

WHEREAS, appellant contends that the order calls for separation of all hydrants with hose outlets from the sprinkler system and installation of standpipe system and that the only building affected is the two-story building which is 12,000 sq. ft. in area, separated from the other sections by walls with openings protected with fireproof, self-closing doors, which due to the location and means of fighting fire are adequate.

Resolved, that the orders of the fire commissioner be and they hereby are *modified*, and that the appeal be and it hereby is *granted*, as to Item 1 of Order No. 7958-LF, *on condition* that there shall be installed in the pump house at the entrance gate, street front on Boulevard, a control valve on the city main connection; that there shall be installed at the dock front on the shore side of the existing siamese a P. I. control valve sealed open; *granted*, as to Item 1 of Order No. 7967-F, *on condition* that the building shall be not increased in height or area and that the existing subdivision of premises shall remain unchanged; that the building throughout shall be equipped with a wet sprinkler system, and so long as conditions as to occupancy and use remain unchanged, and *withdrawn*, as to Item 1 of Order No. 7962-F, as having been rescinded of record in the fire department.

BUILDING ZONE CASES

1236-27-BZ.

APPLICANT—Theodore Smith, owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Southeast corner of Woodhaven boulevard and 163rd avenue (Sheridan avenue), Aqueduct, Borough of Queens.

THE RESOLUTION—

(1219-27-BZ)

WHEREAS, Gardiner Conroy, for Richard P. Sherlock, owner, filed, November 17, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 388-394 Coney Island avenue and 1901 Caton avenue, northwest corner, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 15, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Caton avenue is in a business and residence district, Coney Island avenue is in a business, residence and unrestricted district and Kermit place is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 25, 1927 (re Applic. No. 19496-27), reads:

"Application denied contrary to Art. 2, Sect. 4-46 of Zone Resolution, gasoline station in business district.";

and

WHEREAS, it is proposed to erect a brick office, 12 ft. by 12 ft., bury tanks and erect five pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

THE RESOLUTION—

(1257-27-BZ)

WHEREAS, James P. Whiskeman, for Ronel Realty Co., owner, filed, November 30, 1927, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a business building; premises 9 East Mosholu Parkway North, east side, 78.66 ft. south of Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 15, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Mosholu Parkway North is in a residence district, East 208th street and East 210th street is in a residence district and Jerome avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 15, 1927 (re N. B. 2483-27), reads:

"1. Erection of proposed business building partly in a business district and partly in residence district is contrary to provisions of Building Zone Resolution.";

and
WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 25 ft. and a depth of 65 ft.; to be occupied as a business building; and

WHEREAS, the application comes within the purview of the rules of exception, subdivisions 7b and 7c, and the entire frontage of the property on the street is within the business use influence of Jerome avenue.

MINUTES

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the southerly gable wall shall be unpierced throughout its entire height and length; that the use and occupancy of the premises shall be restricted to retail mercantile stores, specifically prohibiting, though, the conduct of a delicatessen store, fish market or meat market on these premises; any advertising displayed shall be restricted and confined to flat lettering on the plate glass of the windows of the store front; that all permits required shall be obtained within six months and all work completed within one year from the date of this action.

490-27-BZ.

APPLICANT—William F. Doyle, for Frederick Semken, owner.

SUBJECT—Application for reopening—correction of location—re application (decision of fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Southwest corner of Bay 32nd street and Cropsey avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution corrected as to location.

THE VOTE TO REOPEN AND CORRECT RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(490-27-BZ)

WHEREAS, William F. Doyle, for Frederick Semken, owner, filed, May 5, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner of Bay 32nd street and Cropsey avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 25, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cropsey avenue is in a business district, Bay 31st and Bay 32nd streets are in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered April 23, 1927 (re Order No. 941-1927), reads:

"1. A gasoline service station may not be permitted in a business district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 40 ft. on Cropsey avenue and a depth of 130 ft., upon which it is proposed to erect (at the westerly portion) a one-story office and accessory store and, also, the necessary tanks, pumps and piping for a gasoline service station; and

WHEREAS, it is proposed to locate this gasoline selling station 40 ft. westerly on the private right-of-way leading to Gravesend Bay from the westerly line of Cropsey avenue; and

WHEREAS, the board, in acting on Cal. No. 490-27-BZ, on October 25, 1927, and April 17, 1928, made certain restrictions, stipulating the occupancy of the Cropsey avenue frontage for a depth of 40 ft. by a dwelling, which it is now proposed to omit, as street is being widened by the city, and it now appears that the description of the property as originally given was incorrect, the frontage being 130 ft.; and

WHEREAS, Cropsey avenue is proposed to be widened 40 ft., in which event no building can be erected within 40 ft. of the avenue.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the gasoline service station shall be limited to a plot with a 130 ft. frontage on the private right-of-way and 40 ft. depth, and that the gasoline station shall be set back 40 ft. westerly from the existing westerly building line of Cropsey avenue; that the exit and entrance shall be confined to the private right-of-way; there shall be no portable gasoline tanks maintained or operated from these premises, and that any permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

707-26-BZ.

APPLICANT—William F. Doyle, for Jamaica Water Supply Co., owner.

SUBJECT—Application for reopening—amendment—re application (decision of superintendent of buildings) under sections 7a and 21 of the building zone resolution, for a modification of the previous resolution, to permit in a residence district the extension of an existing office building.

PREMISES AFFECTED—Southwest corner of 162nd street and 89th avenue, Jamaica, Queens.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution interpreted.

THE VOTE TO REOPEN AND INTERPRET RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(707-26-BZ)

WHEREAS, William F. Doyle, for Jamaica Water Supply Co., owner, filed, August 13, 1926, reopened May 3, 1927, and November 1, 1927, an application, under the building zone resolution, to permit, for a modification of the previous resolution, in a residence district the extension of an existing office building; premises southwest corner of 89th avenue and 162nd street, Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 13, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 89th avenue is in a residence district; 162nd street, south of 89th avenue, is in a business district, and 162nd street, north of 89th avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 13, 1927, reads:

"Contrary to the conditions of the resolution of the Board of Standards and Appeals under Cal. No. 707-26-BZ, premises southwest corner of 89th Avenue and 162nd Street, Jamaica, Borough of Queens."

and

WHEREAS, the existing office building is non-fireproof, two stories in height, 33 ft. by 57 ft. in area; it is proposed to increase the building one story in height and to add an extension to this building, which will face on 89th avenue; the proposed extension is non-fireproof, three stories in height, 67 ft. 6 in. by 57 ft., irregular, in area and pro-

MINUTES

poses to occupy the entire building as offices for the Jamaica Water Supply Co.; and

WHEREAS, the board deems the application comes within the purview of section 7, subdivision d, of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, December 13, 1927, on certain conditions, and applicant requested an interpretation of the resolution as to the height of building permitted; and

WHEREAS, the intention of the board was to embrace the last administrative determination in force at that time, which was for a three-story building throughout, based on an amendment filed in the building bureau subsequent to the original application.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure shall be restricted in height to a three-story building above grade, the extension to be of fireproof construction; that the front elevation shall be finished with limestone or natural stone finish of architectural design; that any advertising display shall be restricted to flat wall metal sign located on the pier at main entrance of the building; that all permits required shall be obtained within nine months and the work involved completed within eighteen months from the date of this action.

THE RESOLUTION—

(1146-27-A)

WHEREAS, Starrett & Van Vleck, for Jerry O'Mahony, owner, filed, October 24, 1927, an appeal from an order of the fire commissioner, affecting premises 462 Eighth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 17, 1927 (Order No. 23131-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not more than 50' above a neighboring roof at rear of building, or other approved protection, as per Section 375, Article 18, Chapter 5, of the Code of Ordinances."

and

WHEREAS, the building is non-fireproof, four stories (40 ft. 8 in.) in height, 24 ft. 8 1/4 in. by 100 ft. 8 in. in area at first story and 24 ft. 8 1/4 in. by 45 ft. 3 in. in area above; OCCUPIED: 1st story, store; 2nd story, offices, vacant at present; 3rd story, silver polishing, 4 persons; 4th story, offices, vacant at present; and

WHEREAS, there are three windows in the rear wall on the third and fourth stories of the building within 30 ft. of openings in a neighboring four-story building to the southeast or within 50 ft. of the one and two-story extension roofs of abutting buildings; and

WHEREAS, appellant contends that the buildings forming the exposures are not hazardous occupancies, being used on the first story as stores and as rooming houses on the upper stories.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, so long as the existing exposure conditions remain unchanged, and that the occupancy and use of these premises remain unchanged.

THE RESOLUTION—

(1253-27-A)

WHEREAS, Richmond Screw Anchor Co., lessee, filed, November 30, 1927, an appeal from an order of the fire commissioner, affecting premises 526 Smith street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 19, 1927, reads:

"1. Discontinue the use of a fuel oil burner which is not of an approved type (Dempsey).";

and

WHEREAS, the building is non-fireproof, one story in height, 150 ft. by 100 ft. in area; OCCUPIED as a machine shop, 10 persons; a fuel oil burning system having been installed consisting of a storage tank of 1,000 gallon capacity, a Dempsey Burner connected up with all necessary piping and using Grade A oil; and

WHEREAS, the appellant claims that the fuel oil burning system has been installed in accordance with requirements

of the fuel oil rules; that the Dempsey Burner is now before the board for approval; furthermore, the appellant requests permit to maintain the Dempsey burner in this particular installation; and

WHEREAS, under Cal. No. 907-24-SA, approval of the Dempsey Burner with Grade A oil was recommended by a committee of the board for general heating purposes not including private dwelling domestic use when installed and operated in accordance with the fuel oil rules on condition that thermostatic control be provided on the boiler and that the word domestic be eliminated; and

WHEREAS, the Dempsey High and Low Pressure Burner for use in domestic and industrial plants has been recommended for approval under Cal. No. 1391-22-SA.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the fuel oil installation shall be installed and maintained in accordance with the fuel oil rules of the board of standards and appeals.

THE RESOLUTION—

(1258-27-A)

WHEREAS, International Bitumenoil Corp., for Estate of Jacob S. Bleyer, owner, filed, November 30, 1927, an appeal from an order of the fire commissioner, affecting premises 498 Broome street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 19, 1927 (Order No. 39996-LC), reads:

"1. Discontinue the manufacture, distilling or refining of shale oil on these premises.";

and

WHEREAS, the building is non-fireproof, five stories in height, 20 ft. by 65 ft. in area; OCCUPIED: 1st and 4th stories, vacant; 2nd story, office, 1 person; 3rd story, research laboratory, 3 persons; 5th story, printing, 4 persons; and

WHEREAS, the appellant claims that the laboratory on third story is used only for testing the volume of oil contents in shales and other carbonaceous materials shipped to them from various parts of the world, resulting in a recovery of one pint to a quart of oil; that no shale oil is manufactured, distilled or refined on the premises; furthermore, the appellant contends that the work done on the premises does not come within the meaning of section 110 chapter 10 of the code of ordinances; and

WHEREAS, the appellant claims there is no manufacturing distilling or refining of shale oil; and

WHEREAS, the appellant holds that any shale oil produced on the premises is the result of chemical research and at no time does it exceed one gallon; and

WHEREAS, the production of the shale oil is the result of analytical chemical research work and conducted in conjunction therewith.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that there shall at no time be more than one gallon of shale oil on the premises, maintained in

MINUTES

a covered metal container, and that this work shall be conducted under the supervision of a graduate chemical engineer.

THE RESOLUTION—

(1280-27-A)

WHEREAS, Samuel Rosenblum, for Aljean Realty Corp., owner, filed, December 6, 1927, an appeal from a decision of the superintendent of buildings, affecting premises 289 Fulton street and 264 Washington street, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings, rendered November 17, 1927 (re App. No. 23420-1926), reads:

"No one continuous building for lodging house purposes permitted.

"An open space between each house and rear end of lot required.

"And not more than 65 per cent of the lot shall be occupied. Contrary to Sec. 1315 of Chap. 19.";

and

WHEREAS, the premises consist of a plot of ground with a frontage of 26 ft. 7 2/3 in. on Fulton street and 22 ft. 11 in. on Washington street and a depth of 214 ft. 7 in., upon which is located two buildings, the one facing Fulton street being non-fireproof, four stories in height, with a depth of 125 ft. on the first and second stories and 40 ft. 2 in. on the third and fourth stories; the building facing on Washington street having a depth of 79 ft. 6 1/2 in. on the first and second stories and 55 ft. 2 in. on the third story; the building facing on Fulton street being OCCUPIED as a lodging house; and

WHEREAS, it is proposed to alter the building facing on Washington street, to cut openings in the division wall between the two buildings on the first and second stories, and to occupy the entire premises as a lodging house, the openings to be protected by fireproof sliding doors on both sides of the opening; the means of EGRESS consisting of an interior stairway in the Fulton street building, extending from the first story to the roof, enclosed in fire-retarding partitions; a proposed fireproof stairway in the Washington street building, extending from the first story to the roof, enclosed in fireproof partitions with fireproof, self-closing doors at the openings; the Fulton street building to be occupied by 38 persons on the first story; 57 on the second, and 16 on the third and fourth stories, respectively; the Washington street building to be occupied by 39 persons on the first story, 37 on the second story and 22 on the third story; and

WHEREAS, appellant contends that the buildings have been erected over thirty years; that the four-story building on Fulton street has been used as a lodging house for that length of time and has received permits from the various city departments and that alterations were made several years ago to comply with all legal requirements; that the three-story building has been used for a factory; that re-

garding the area of the lot occupied, which is more than 65 per cent., it is the intention to operate both buildings under one management and the connection between the buildings will facilitate operation; that through ventilation will be secured by providing the connection between the buildings; that the first and second stories are more than normal height, being 14 ft. and 15 ft., respectively, thus aiding ventilation; that as the Fulton street building is 125 ft. deep and the Washington street building 79 ft. 6 1/2 in. deep, there will be an improvement for both sections by making the proposed change, and that the proposed horizontal exits create a better physical condition for the Fulton street as well as the Washington street section and, also, numerous skylights have been provided in the extension roof; and

WHEREAS, these two buildings now exist back to back, and the Fulton street section is now authorized for occupancy as lodging house and the Washington street section occupied as factory; it is proposed to combine the both buildings by means of horizontal openings only with general use throughout both structures for lodging house purposes.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area; the horizontal opening at rear between both buildings shall be equipped with an automatic self-closing fireproof door; that there shall be provided at the rear on the existing Fulton street lodging house two skylights not less than 4 ft. by 11 ft. each in square area, one in each corner, equipped with an electric fan, the ventilating shaft to be provided with a fixed open louvre skylight at roof level; that the skylights as indicated on the plans filed in this appeal for the second story shall be provided; that the premises shall otherwise comply with all laws and ordinances applicable thereto; that all permits necessary shall be obtained within ninety days and any work involved thereby shall be completed within six months.

BUILDING ZONE CASES.

925-27-BZ.

APPLICANT—John J. Dunnigan, for Towruss Realty Corp., owner.

THE RESOLUTION—

(1144-27-BZ)

WHEREAS, Marben Realty Corp., for Marben Realty Corp., owner, filed, October 24, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises southeast corner of Cedar avenue and West 179th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 15, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cedar avenue is in a business district, West 179th street is in both a business and unrestricted district and West 178th street is in a residence district; and

MINUTES

WHEREAS, the decision of the superintendent of buildings, rendered October 13, 1927 (re N. B. 2249-27), reads:

"1. Erection of a garage for more than five motor vehicles in a business district is contrary to the provisions of the zone resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one and two stories in height, with a frontage of 168.93 ft. on Cedar avenue and a depth of 73.94 ft. and 168.89 ft., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, at the public hearing there was general opposition from the surrounding property owners; and

WHEREAS, the board deemed the applicant failed to make out a case under section 21, practical difficulty and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(1061-27-BZ)

WHEREAS, Thomas D. La Colla, for Elizabeth Warns, owner, filed, September 30, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 103-12 Gilbert street (170th street) and 502 South street (Liberty avenue), Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 15, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Liberty avenue, north side, is in an unrestricted district; Liberty avenue, south side, is in a business district, and that 170th street, south of a point 100 ft. south of Liberty avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 13, 1927 (re Plan No. 19385-26), reads:

"The erection of a garage for more than five motor vehicles in a business district and extending into a residence district is contrary to sections 3 and 4 of Art. 2 of the Zone Law.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 100.02 ft. on Liberty avenue and 114.37 ft. on 170th street; on the northeast portion of the plot there is a two-story frame dwelling of the owner of the prem-

ises, and on the southwest portion there is a two-story bottling works; it is proposed to erect on the southeast portion of the plot a non-fireproof building, one story in height, and 36 ft. 6 in. by 43 ft. in area, to be used for the storage of motor trucks used in connection with the owner's business (bottling works); the northerly portion of the garage (22 ft. 6 in.) is in the business district and the southerly portion of the building (14 ft.) is in the residence district; and

WHEREAS, the applicant conducts a commercial business on these premises, a mineral water bottling plant; and

WHEREAS, it is proposed to conduct in conjunction therewith said garage for the motor vehicle service of the business; and

WHEREAS, the applicant has filed 99 per cent. consents of area fixed and deemed affected under section 7, subdivision g.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that a commercial garage, limited to the storage and occupancy of not more than eight motor vehicles, used in conjunction with and incidental to the business conducted on these premises shall be maintained; that no space shall be hired or rented for public garage use; that the building shall not exceed in height one story above grade; that the gable walls shall be unpierced throughout their entire height and length; that the front elevation shall be finished with face brick, two-tone in color, with trim of architectural terra cotta or natural stone; that there shall be no sign or advertising display on the street front of any nature or description, and that all permits required shall be obtained within ninety days and any work involved shall be completed within six months from the date of this action.

THE RESOLUTION—

(85-28-BZ)

WHEREAS, William F. Doyle, for Louis Security Co. owner, filed, January 30, 1928, an application, under the building zone resolution, to permit in a one and one-half times height district the erection and maintenance of the street walls in excess of the height permitted under the zone resolution; premises 576-582 Eighth avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 1, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that area, west of a north and south line located 100 ft. east of Eighth avenue, north of West 38th street (except the block front on west side of Eighth avenue between 38th street and 39th street) is in a one and one-half times height district; area east of a north and south line located 100 ft. west of Eighth avenue, south of West 39th street (except the block front on east side of Eighth avenue between 38th and 39th street), is in a two times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 24, 1928 (re N. B. 29-28), reads:

"1. Height of building exceed limitations imposed by Sections 8 and 9 Building Zone Resolution."; and

WHEREAS, it is proposed to erect a building with manufacturing and office occupancy, with the front street wall erected 200 ft. in height, at this height the first setback, conforming to a two times height district, will start; the street wall in this case is limited to 150 ft. in height without a setback under the requirements of the zone resolution; and

WHEREAS, this property lies within a one and one-half times height district; the entire street front on opposite side of this street and for five blocks south on both sides of the street is within a two times height district; this section to the east on all streets is in a two times height district; and

WHEREAS, the board deems that this is a proper case for the adjustment and exercise of its discretion under section 21 of the building zone resolution; and

WHEREAS, a general application addressed to the Board of Estimate and Apportionment, supported by 80 per cent. of the ownership of property on Eighth avenue, north of 33rd to 56th street endorsing the amendment to the zoning law for the increased two times height district on Eighth avenue was filed in this case; and

WHEREAS, this application was granted by the board at its meeting, May 1, 1928, and applicant requested a correction of the preamble as to the percentage of manufacturing use, the premises being located in an unrestricted use district which request was granted by vote of the board.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the height district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects a variation of the height regulations of the zoning resolution for a two times height district, *on condition* that the requirements of the zoning law shall be complied with in all other respects, and that all permits shall be obtained within nine months and all work in connection therewith shall be completed within one year from the date of this action.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, May 18, 1928, 10 a. m.

Minutes of Regular Meeting, May 22, 1928, 10 a. m.

Minutes of Regular Meeting, May 22, 1928, 2 p. m.

Approved Fuel Oil Pumps.

"Standpipe"—"Fireline" Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 29, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, June 5, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CONCRETE RULES

USE OF HYDRATED LIME IN CONCRETE

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1 $\frac{1}{2}$ -3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2 $\frac{1}{2}$ -5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle	4
Negative	0
Absent: Chief Kenlon	1

THE RESOLUTION—

(1285-27-A)

WHEREAS, J. Michaels, Inc., owner, filed, December 9, 1927, an appeal from an order of the fire commissioner, affecting premises 408-422 Hicks street and 120 Warren street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 13, 1927 (Order No. 27089-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, four stories (45 ft.) in height, 130 ft. by 80 ft. and 200 ft., irregular, about 17,300 sq. ft. floor area; OCCUPIED for the storage of furniture, 5 persons throughout; and

WHEREAS, the appellant claims that the building is equipped with an approved sprinkler system; that fire buckets and axes are distributed through the building according to recommendation of the fire underwriters; furthermore, the appellant contends that the exits are adequate and the occupancy is very small; and

WHEREAS, the premises face on three street fronts and the building is but four stories in height, occupied in single tenancy, use and operation.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the premises shall be equipped throughout with an approved two-source wet sprinkler system with standard siamese street connection; that the building shall not be increased in height, area or dimension and that any horizontal openings between the Hicks street building and the extension on Warren street shall be equipped with approved fire doors, and granted only as long as conditions as to operation and use remain unchanged.

1321-27-A.

APPELLANT—James W. Byrnes, for Metal Hose & Tube Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—253-263 Tillary street and 27-32 Park avenue, Brooklyn.

APPEARANCES—

For Appellant: James W. Byrnes.

MINUTES

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.
THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1321-27-A)

WHEREAS, James W. Byrnes, for Metal Hose and Tube Co., Inc., owner, filed, December 21, 1927, an appeal from an order of the fire commissioner, affecting premises 253-263 Tillary street and 27-32 Park avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 29, 1927 (Order No. 29120-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch extending from cellar to roof, with necessary check valve and a 2½ inch regulation Fire Department outlet on each story (including basement, cellars and roof), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, one, two, three and four stories (14 ft. to 51 ft) in height, 122 ft. 10 in. by 100 ft. 7 in. and 203 ft. 2 in., irregular, about 19,710 sq. ft. floor area at first story, 16,855 sq. ft. at second story, 6,500 sq. ft. at third story and 1,650 sq. ft. at fourth story; OCCUPIED: 1st story, vulcanizing rubber, 70 persons; 2nd story, foundry and brass shop, 70 persons; 3rd story, machine shop, 40 persons; 4th story, private dining room; and

WHEREAS, the appellant claims that the building is equipped with a sprinkler system; that there are four city hydrants abutting the premises; that the premises are subdivided by brick walls 12 and 16 inches in thickness; furthermore, the appellant proposes to provide fireproof, self-closing doors at openings in dividing wall so that no single area will exceed 6,900 sq. ft. floor area.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension and shall remain in single tenancy, use and operation; that the premises throughout shall be equipped with a sprinkler system in accordance with the rules for existing sprinkler equipment and that the floor areas as now subdivided by walls of approved masonry shall remain unchanged; that all horizontal openings in subdividing fireproof walls shall be provided with approved fireproof door equipment, and granted only as long as conditions as to operation and use otherwise remain unchanged.

1351-27-A.

APPELLANT—Samuel Rosenblum, for Excelsior Estates Co., owner.

SUBJECT—Appeal from orders of the fire commissioner.
PREMISES AFFECTED—139 Centre street and 105 Walker street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.
THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Chief
Kenlon 5
Negative 0
Absent 0

THE RESOLUTION—

(1351-27-A)

WHEREAS, Samuel Rosenblum, for Excelsior Estates Co.,

owner, filed, December 30, 1927, an appeal from orders of the fire commissioner, affecting premises 139 Centre street and 105 Walker street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated December 9, 1927, read:

"Order No. 29632-F:

"1. Raise standpipe tank to 20 ft. above top floor outlet, Sec. 580 & 581, Article 28, Chapter 5, Code of Ordinances.";

and

"Order No. 29633-F:

"4. Arrange the siamese on both street fronts, to be in a horizontal position between 18 and 24" above sidewalk.";

and

WHEREAS, the building is fireproof, eight stories and pent house (114 ft.) in height, 146 ft. 9¾ in. by 83 ft. 11 in., irregular, in area; OCCUPIED: 1st story, stores; upper stories, offices, approximately 100 persons per story; the 7th, 8th and pent house stories being vacant at present but will be used for offices; and

WHEREAS, the building was erected in 1896 and the pent house story was added in 1911; there is a tank, serving both the standpipe system and the house supply, of 9,000 gallons capacity, located on the roof of the pent house, 22 ft. 5 in. above the outlet on the eighth story and 11 ft. above the outlet on the pent house story; and

WHEREAS, appellant contends that it would be difficult to raise the tank so as to be 20 ft. above the pent house outlet; that there is no hazardous occupancy in the premises, being occupied as an office building, and proposes to arrange the house supply line at a level on the tank so that there will be a 5,000 gallon supply for the standpipe system and to provide a coupling in a horizontal position on the siamese connection and requests that the connection be permitted to remain in the present position, 28 in. above the sidewalk; and

WHEREAS, there now exists a gravity tank of 9,000 gallon capacity located above the roof structure.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Order No. 29632-F, Item 1, *on condition* that there shall be reserved for standpipe use not less than 5,000 gallons of water and, further, that not less than four approved 2½-gallon portable fire extinguishers shall be provided and distributed throughout the roof structure, as directed by the fire department; that the roof structure shall not be increased in height, area or dimension and that the use and occupancy of building throughout shall be restricted to office business and occupancy with no manufacturing of any nature or description or industrial operation, and *denied* as to Order No. 29633-F, Item 4.

BUILDING ZONE CASES

1171-27-BZ.

Negative: Commissioners Connell, Holland and Guilfoyle	3
Absent: Chief Kenlon	1

THE RESOLUTION—

(176-28-BZ)

WHEREAS, Harry Baer, for 373 Park Avenue Corp., owner, filed, February 29, 1928, an application, under the building zone resolution, to permit in a residence district the alteration and change of occupancy of the first story from a residence use to a business use; premises 375 Park avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue, East 52nd street and East 53rd street are in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 31, 1928 (re Alt. 182-28), reads:

"1. Proposed use is unlawful in a residence district, Section 3 of the Zone Resolution.";

and

WHEREAS, the existing building is of fireproof construction, twelve stories in height, with a frontage of 200 ft. 10 in. and a depth of 179 ft. 10 in.; to be occupied as stores on the first story and dwellings above; and

WHEREAS, the board deemed that applicant failed to substantiate his basis of appeal under section 21 on the grounds of practical difficulties and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

1263-27-BZ.

APPLICANT—J. Burmeister, for Laura J. High, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—614 Rockland avenue, Egbertville, Richmond.

APPEARANCES—

For Applicant: J. Burmeister and Laura J. Ligh.
For Opposition: None.

THE VOTE TO GRANT—

Affirmative: Commissioners Holland and Guilfoyle and Chief Kenlon	3
Negative: Chairman Walsh and Commissioner Connell	2
Absent	0

THE RESOLUTION—

(1263-27-BZ)

WHEREAS, J. Burmeister, for Laura J. Ligh, owner, filed, December 1, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 614 Rockland avenue, Egbertville, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the

MINUTES

Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Rockland avenue and Brielle avenue are both in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 1, 1927 (re N. B. App. No. 1579-27), reads:

"New Bldg. App. No. 1579-1927 filed by you on July 26, 1927, for the erection of a gasoline station on the premises 614 Rockland Avenue, Cor. Brielle Avenue, Egbertville, Staten Island, is hereby disapproved for the reason that the erection of a gasoline station in a business district is contrary to the Zoning Law.";

and

WHEREAS, the premises (a part of a larger area under same ownership) consists of a plot of ground having a frontage of 200 ft. on Rockland avenue and a depth of 200 ft. upon which it is proposed to erect a one-story office, 16 ft. by 20 ft. in area, and the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

1286-27-BZ.

APPLICANT—Edward P. Doyle, for G. M. S. Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—41-43 Snyder avenue, north side of Snyder avenue, 150 ft. 11¼ in. west of Bedford avenue, Brooklyn.

APPEARANCES—

For Applicant: Edward P. Doyle, J. Irving Walsh and Joseph M. Stratton.

For Opposition: John J. Snyder and Samuel Rosenblat.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Absent	0

THE RESOLUTION—

(1286-27-BZ)

WHEREAS, Edward P. Doyle, for G. M. S. Realty Corp., owner, filed, December 9, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 41-43 Snyder avenue, north side, 150 ft. 11¼ in. west of Bedford avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Snyder avenue, Bedford avenue and Flatbush avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered November 23, 1927 (re App. No. 21763-1927), reads:

"The erection of a building to be used as a garage for more than five motor vehicles and the installation of a gasoline service station in a business district. Proposition contrary to the Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof

construction, two stories in height, with a frontage of 50 ft. and a depth of 197 ft. 7 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, though the board concedes that applicant substantiated his basis of appeal brought under section 7e, so far as the street front is concerned, this one side of street is as yet unoccupied and backs up to Erasmus High School plot; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

1068-27-BZ.

APPLICANT—Edward P. Doyle, for Livia Pepe, owner.

SUBJECT—Application re decision of the superintendent of buildings, under sections 7c and 21 of the building zone resolution, to permit in a residence district the maintenance of an existing building occupied on the basement story as a store and as dwellings above (previously denied).

PREMISES AFFECTED—124 Waverly place, Manhattan.

APPEARANCES—

For Applicant: Edward P. Doyle.

For Opposition: Thomas B. Murray, Jr., Edward D. Steinert, George A. Francour, Inspector Alexander McPhee for the superintendent of buildings.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Absent	0

THE RESOLUTION—

(1068-27-BZ)

WHEREAS, Edward P. Doyle, for Livia M. Pepe, owner, filed, October 3, 1927; reopened May 8, 1928, an application, under the building zone resolution, to permit in a residence district the maintenance of an existing building occupied on the basement story as a store and as dwelling above; premises 124 Waverly place, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sixth avenue is in a business district; Waverly place, east of a point 100 ft. east of Sixth avenue, is in residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 2, 1927 (re Viol. Order No. 79-27), reads:

"You are hereby notified that the building occupied as a dwelling and known as No. 124 Waverly Place and located in a residence district in the Borough of Manhattan, in the City of New York, does not conform to Section 3 of the Building Zone Resolution of the Board of Estimate and Apportionment adopted July 25, 1916, in the respects noted below:

"In that of occupying the basement floor as a French dry cleaning, dyeing and pressing business in a residence district which is not permitted in the said residence district in which such building is located.";

and

WHEREAS, the existing building is of non-fireproof construction, four stories and basement in height, with a frontage of 22 ft. and a depth of 50 ft.; to be occupied as store in basement and dwellings above; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under sections 7c and 21 of the building zone resolution.

MINUTES

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is denied.

336-27-BZ.

APPLICANT—Henry G. Harrington, for Albert L. Gray, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7e, 7g and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—1785-1789 Bushwick avenue and 51-59 Jamaica avenue, Brooklyn.

APPEARANCES—

For Applicant: Henry G. Harrington.
For Opposition: None.

THE RESOLUTION—

(1336-27-BZ)

WHEREAS, Henry G. Harrington, for Albert L. Gray, owner, filed, December 23, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1785-1789 Bushwick avenue and 51-59 Jamaica avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bushwick avenue is in a business district, Jamaica avenue is in a business district and Pennsylvania avenue is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 17, 1927 (re App. No. 21473-1927), reads:

"Proposition contrary to the Zone Resolution, Art. II, Section 4-a, 46.

"The installation of a gasoline service station in a business district.";

and

WHEREAS, it is proposed to remove existing building from the site, erect an open shed over the entire lot, also an office, 53 ft. by 20 ft., and two grease racks; bury five 50-gallon tanks and erect seven pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the applicant has filed 80 per cent. consents of the area deemed affected and fixed by this board under the principle of rule of exception, section 7, subdivision g.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the plot shall be developed and the structures erected thereon strictly in accordance with the plans and drawings filed in this appeal; that the pumps shall be set back from the building line not less than 10 ft; that there shall be erected in the building line a concrete curbing not less than 18 inches in height, 12 inches in depth, other than the drive-ways to and from the premises, and that all permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

275-27-BZ.

APPLICANT—Frank W. Fitzpatrick, for Western District Cleaners and Dyers, owner.

SUBJECT—Application (re order of the fire commissioner and decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the maintenance of a dry cleaning establishment.

PREMISES AFFECTED—132-136 Academy street, Long Island City, Borough of Queens.

THE RESOLUTION—

(1275-27-BZ)

WHEREAS, Frank W. Fitzpatrick, for Western District Cleaners and Dyers, owner, filed, December 6, 1927, an application, under the building zone resolution, to permit in a business district the maintenance of a dry cleaning establishment; premises 132-136 Academy street, Long Island City, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Academy street is in a business district; Paynter avenue, west of a point 100 ft. east of Academy street, is in a business district; Paynter avenue, east of a point 100 ft. east of Academy street, is in an unrestricted district; Beebe avenue, west of a point 100 ft. east of Academy street, is in a business district; Beebe avenue, east of a point 100 ft. east of Academy street, is in an unrestricted district, and 30th street is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 3, 1928, and order of the fire commissioner, rendered July 5, 1927, read:

"Your request for a Certificate of Occupancy, premises Academy Street, east side, 150 feet north of Paynter Avenue, Long Island City, to be used as dry cleaning establishment, is hereby denied for the reason that a business of this character is not allowed in this district.";

and

WHEREAS, the order of the fire commissioner reads:

"4. Portion of premises used as dyeing and cleaning establishment.";

and

WHEREAS, the premises consist of a group of non-fireproof buildings having a frontage of 75.06 ft. and a depth of 100.10 ft.; No. 132 and No. 134 being buildings occupied as a dry cleaning and dyeing establishment since the premises were in an unrestricted use district; No. 136, the building in question, being subsequently erected for use as a garage and for storage purposes; this building is non-fireproof, two stories in height, 25.02 ft. by 100.10 ft. in area and is now occupied on first story as a garage used in connection with the conduct of the business and as a receiving and spotting room; the second story being used as a pressing room; and

WHEREAS, the board deemed that applicant is entitled to relief under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that all motor vehicles shall be removed and the use and operation of any part of these premises as a garage shall be vacated and discontinued; that any existing gasoline storage

MINUTES

tanks for motor vehicle supply and use be removed or filled up with dry, clean sand and sealed; that the building shall not be increased in height, area or dimension; that all permits required shall be obtained within sixty days and any work involved by the terms of the foregoing resolution shall be completed within sixty days from the date of this action.

538-27-BZ.

APPLICANT—William F. Doyle, for Manufacturers Trust Co., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, for modification of the original resolution, to permit in a 1½ times height district, extending from a two times height district, the erection and maintenance of the street walls in excess of the height permitted by the zone resolution.

PREMISES AFFECTED—481-497 Eighth avenue, 301-307 West 34th street, and 302-320 West 35th street, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle.

THE RESOLUTION—

(538-27-BZ)

WHEREAS, William F. Doyle, for Manufacturers Trust Co., owner, filed, May 14, 1927; granted July 26, 1927; reopened April 10, 1928, an application, under the building zone resolution, to permit in a one and one-half times height district, extending from a two times height district, the erection and maintenance of the street walls in excess of the height permitted under the zone resolution; premises 481-497 Eighth avenue, 301-307 West 34th street and 302-320 West 35th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the height district maps accompanying the building zone resolution show that the area on the east side of a north and south line located 100 ft. west of Eighth avenue is in a two times height district and the area on west side of the foregoing area is in a one and one-half times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 14, 1928 (re N. B. App. No. 146-1928), reads:

"1. Building is excessive height for a plot extending more than 150' along the narrower street, Art. III, Zoning Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, thirty-nine stories in height, with a frontage of 197 ft. 6 in. and a depth of 175 ft.; to be occupied as a hotel; and

WHEREAS, this board did make a variation as to the height district regulations; and

WHEREAS, since such action the Board of Estimate and Apportionment has amended the height district regulations affecting this street front from a one and one-half times to a two times height district; and

WHEREAS, there is involved in this application but 25 ft. on the side street and the proposed substituted use from that of loft and office building to originally described the now proposed hotel use.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use dis-

trict regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed at the street wall a height of 200 ft., in accordance with the two times height district regulations; that the structure throughout shall be restricted and limited to a two times height district regulation; that the building zone resolution requirements otherwise shall be complied with in all respects, and that all permits shall be obtained within nine months and all work involved shall be completed within eighteen months from the date of this action.

1231-27-BZ.

APPLICANT—Ferdinand Savignano, for West 8th Street Arcade, Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7b, 7c and 21 of the building zone resolution, to permit partly in a residence district and partly in a business district the erection and maintenance of a building to be used as a motion picture theatre, restaurants and offices and also the omission of the required legal rear yard.

PREMISES AFFECTED—52-54 West 8th street, Manhattan.

APPEARANCES—

For Applicant: John F. Keating, John Caldwell Meyers and Arnold W. Lederer.

For Opposition: Thomas E. Murray, Jr., Edward A. Kole and Edward B. Steinert.

THE RESOLUTION—

(1231-27-BZ)

WHEREAS, Ferdinand Savignano, for West Eighth Street Arcade, Inc., owner, filed, November 22, 1927, an application, under the building zone resolution, to permit, partly in a residence district and partly in a business district, the erection and maintenance of a building to be used as a motion picture theatre, restaurants and offices and also the omission of the required legal rear yard; premises 52-54 West 8th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 8th street is in a business use and "B" area district; Waverly place is in a residence use and "B" area district; Sixth avenue is in a business district; McDougal street, from West 8th street to a point 100 ft. south, is in a business use and "B" area district; McDougal street, south of a point 100 ft. south of West 8th street, is in a residence use and "B" area district; and

WHEREAS, the decision of the superintendent of buildings rendered November 21, 1927 (re N. B. 472-27), reads:

"1. On that portion of the lot lying within the residence district, no building may be erected, the proposed use of which is not permitted by Sec. 3 of the Building Zone Resolution.

"2. Provide a lawful rear yard as required for residence districts by Sec. 17 of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, four stories and basement (44 ft.) in height with a frontage of 48 ft. and a depth of 142 ft., irregular; to be occupied as a motion picture theatre, restaurants and offices; and

MINUTES

WHEREAS, the board deemed that applicant substantiated his basis of appeal under sections 7b, 7c and 21 of the building zone resolution and was entitled to relief.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the use of the rear of the property, within the residence use district, *on condition* that the building shall be constructed fireproof throughout; that the building within the residence use area shall not be erected in excess of 23 ft. above the curb level; that the rear of building above that level shall be confined to the business use district of the plot; that the building shall be constructed in accordance with the requirements of the building code as to use and occupancy; that the rear and gable walls within the residence use area of the premises shall be unpierced throughout their entire height and length; that the building zone resolution shall be complied with in all other respects, and that all permits required shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

(1294-27-BZ)

APPLICANT—Matthew F. Fagan, for Daleson Realty Corp., owner.

SUBJECT—Application (re decision of the fire commissioner) under sections 7c and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—739-761 East New York avenue, north side of East New York avenue, 40 ft. west of Troy avenue, Brooklyn.

APPEARANCES—

For Applicant: Matthew F. Fagan.

THE RESOLUTION—..... (1294-27-BZ)

WHEREAS, Matthew F. Fagan, for Daleson Realty Corp., owner, filed, December 13, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 739-761 East New York avenue, north side, 40 ft. west of Troy avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 22, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East New York avenue, Troy avenue and Lefferts avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered December 8, 1927 (re Plan No. 4125-1927), reads:

"1. Garage for more than 5 cars may not be permitted in a business district; appeal may be taken to Board of Standards and Appeals."

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 198 ft. and a depth of 90 ft.; to be occupied as a public garage; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision e, and that applicant was entitled to relief under section 21 on the grounds of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be not erected in excess of two stories above the grade and shall be constructed fireproof throughout; that a rear yard for the full width of the property and not less than 10 ft. in depth shall be established at the level of the second story; that a fixed open louver ventilator shall be installed on the roof deck of the first story rear, rigidly fixed to the rear wall of the second story; that the rear and gable walls of the first story throughout shall be unpierced; that the facade of the building on East New York avenue shall be developed in simplified Gothic design faced with architectural terra cotta or natural stone or face brick with architectural terra cotta trim to all openings; that there shall be no advertising signs placed or displayed on the exterior of the building other than one electric projecting sign, indicating the name and title of the business conducted on the premises; that the architect shall make a return to this board of the drawings in accordance with the foregoing resolution for approval before submission to the superintendent of buildings, and that all permits required shall be obtained within nine months and any work involved shall be completed within one year from the date of this action.

(84-28-BZ)

APPLICANT—William F. Doyle, for Hokan B. Steffansen, owner.

SUBJECT—Application for reopening—interpretation of resolution—re application (decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence to a business use.

PREMISES AFFECTED—444-446 Park avenue, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle and Leslie H. Moore.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(84-28-BZ)

WHEREAS, William F. Doyle, for Hokan B. Steffansen, owner, filed, January 30, 1928, an application, under the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence to a business use; premises 444-446 Park avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 17, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue is in a residence district, East 57th street is in a business district and East 56th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 5, 1927 (re Alt. 1727-1927), reads:

"11. Store in No. 446 is unlawful as the building is located in a residence district. See resolution of Board of Standards and Appeals under case 711-22-BZ, filed in page 14, alteration application 360-1922. Extension of business into rear of 1st and 2nd floors of No. 444

MINUTES

is unlawful. Sec. 6, subdivision b2 of the Building Zone Resolution.”;

and

WHEREAS, the existing buildings are of non-fireproof construction, four stories in height, with a total frontage of 33 ft. 4 in. and a depth of 50 ft.; to be occupied in part for business use; and

WHEREAS, application for the extension of the business use throughout these premises was denied by the board under Cal. No. 711-22-BZ; and

WHEREAS, there now exists, by authority of law business use in premises 444 Park avenue; and

WHEREAS, it is proposed to reduce the existing business use of 444 Park avenue, restricting said use to the first story of 444 and extending it to the first story of 446 Park avenue, which abuts the business use district and an existing business building; and

WHEREAS, this application was granted by the board at its meeting, April 17, 1928, on certain conditions, and applicant requested a modification and interpretation of these conditions as to the use of the stores permitted.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the first story, street grade, for use as business offices or retail mercantile shops, specifically prohibiting the conduct and use of any business selling or dispensing edibles of any nature or description, *on condition* that there shall be no advertising display on these premises other than a flat wall metal sign indicating the name and type of the business conducted thereon, and that the remainder of the premises shall be restricted to conforming residential use and occupancy; that all exits required by the building code shall be installed and maintained; that return drawings shall be made to this board for approval; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action, and granted on condition that the building shall not be increased in height, area or dimension.

AREAS FIXED.

(1236-27-BZ)

The chairman presented and read a communication from Edward L. Kelly, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises southeast corner of Woodhaven boulevard and 163rd avenue (Sheridan avenue Aqueduct, Borough of Queens.

The following area was approved by the board:

Both sides of Woodhaven boulevard from a point 200 ft. north of 163rd avenue to a point 400 ft. south of premises in question; both sides of 163rd avenue from a point 100 ft. west of Woodhaven boulevard to a point 100 ft. east of Woodhaven boulevard.

(264-28-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix an area deemed affected and within which to obtain consents to permit, partly in a business district and partly in a residence district, the erection and maintenance of a gasoline service station; premises 120-06 Sutphin boulevard and 147²⁴ 120th avenue, Jamaica, Borough of Queens.

The following area was approved by the board:

Both sides of 120th avenue (Cooper street) from a point 200 ft. east of Sutphin boulevard to a point 400 ft. west of premises in question; both sides of Sutphin boulevard from a point 200 ft. north of 120th avenue (Cooper street) to a point 400 ft. south of premises in question; also both sides of 121st avenue (Mage street) from Sutphin boulevard to a point 200 ft. east of Sutphin boulevard.

Adjourned 3.45 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION—

(1134-27-S)

WHEREAS, William I. Hohausser, Inc., for Estey Construction Corp., owner, filed, October 22, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 245-249 West 27th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 19, 1927 (Order No. 17697-LD), reads:

"1. Remove all partitions not built of incombustible material as per Section 263 and 270 of the Labor Law;"

and

WHEREAS, the building is fireproof, fourteen stories in height, 75 ft. by 98 ft. 9 in. in area; OCCUPIED: stores and manufacturing purposes, not more than 45 persons on a story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims that the tenants erected dwarf combustible partitions on the second to the fourteenth stories, inclusive, which enclose offices and showrooms within the quarters of each individual tenant; furthermore, the petitioner contends that there is no more fire hazard involved due to these minor subdividing partitions than to wooden furniture or other equipment which may be installed in a loft.

MINUTES

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION—

(1138-27-S)

WHEREAS, Henry I. Oser, for Lafayette Walker Corp., lessee, filed, October 24, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 99-101 Walker street and 101-105 Lafayette street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated October 19, 1927 (N. B. App. No. 500-1926), reads:

"20. All windows in this building must comply with Labor Law, Sec. 264, and the Industrial Code."; and

WHEREAS, the building is fireproof, fourteen stories in height, having a frontage of 56 ft. 3¼ in. on Walker street and 62 ft. 10¼ in. on Lafayette street; OCCUPIED: 1st story, stores; upper stories, tenant factories, 60 persons per story; EQUIPPED with a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in both street walls of the building on the first, second and third stories, glazed with ¼-in. plate glass; the maximum area of the glass on the first story being 108 in. by 252 in., and on the second and third stories being 50 in. by 54 in.; and

WHEREAS, this petition was denied by the board at its meeting, March 20, 1928, and reopened by vote of the board; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lowest three stories.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front, three lower stories, *on condition* that all openings shall be provided with approved metal frames and sash, glazed with ¼-inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

2522-17-S.

PETITIONER—Philip J. Sinnott, for James S. Clifford, owner.

SUBJECT—Variation of the labor law, as cited in order of the fire commissioner (previously denied).

PREMISES AFFECTED—244-246 East 52nd street, Manhattan.

APPEARANCES—

For Petitioner: Philip J. Sinnott.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5

THE RESOLUTION—

(2522-17-S)

WHEREAS, Philip J. Sinnott, for James S. Clifford, present owner, substituted for Thomas B. Whiffen, former owner, filed, September 6, 1927, a petition with the board of standards and appeals for a variation from the requirements of the labor law, as cited in an order of the fire commissioner to be relieved of providing counterbalanced stairway from lowest balcony to street; premises 244-246 East 52nd street, Borough of Manhattan; and

WHEREAS, this petition was denied under date of October 15, 1918, and Philip J. Sinnott, on behalf of James S. Clifford, present owner, requested a reopening of the case on the basis of a new order of the fire commissioner which reads as follow:

"Order No. 89600-LD:

"1. Arrange the fire escape on the west side of building * * *

"Among the defects noted on this fire escape are the following:

"No stairway from top balcony to roof. No stairway from lowest balcony to ground. No safe passageway to the street from the termination."; and

and WHEREAS, the building is non-fireproof, three stories and basement in height, 50 ft. by 92 ft. in area at the first story and 50 ft. by 70 ft. in area above; OCCUPIED as a tenant factory: the present occupancy, basement, loft, shipping and express office, 5 persons; 1st story, manufacture of lamps, 10 persons; 2nd story, upholsterer and draper, 13 persons; 3rd story, upholsterer and draper, 10 persons; EXITS: an interior stairway, extending from the first story to roof, enclosed in brick walls with fireproof doors at the openings; a fire escape at the middle of the west side of the building with landing on extension roof above a skylight in the first story, with straight, vertical ladder leading down to the rear of the building adjoining, and a gooseneck ladder to roof; and

WHEREAS, petitioner contends that the exits have been improved by providing fireproof doors to the stairway, a ladder leading from the top story hall to a scuttle in the roof, and that the windows along the course of the fire escape have been made fireproof, and that a 7 ft. covered driveway on adjoining premises leads to the street from the termination of the fire escape.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the termination of the lowest balcony, *on condition* that a fixed double-rung iron ladder from the lowest balcony platform to the pavement of the driveway to the west shall be installed and so maintained.

1135-27-S.

PETITIONER—Samuel Rosenblum, for Schiff Bros., owners.

SUBJECT—Application for reopening—restoration to calendar, previously withdrawn—re variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—84-86 Withers street.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

THE RESOLUTION—

(1135-27-S)

WHEREAS, Samuel Rosenblum, for Schiff Brothers, owner, filed, October 22, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 84-86 Withers street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 25, 1927, reads:

"1. Enclose the interior stairways at the south and east side of building, serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material, extending continuously from the 1st story to 3 ft. above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, six stories (61 ft.) in height, 50 ft. by 70 ft. in area; OCCUPIED: 1st story, storage and boiler room, no persons; 2nd story, manufacture of chairs, 10 persons; 3rd story, vacant at present; 4th story, manufacture of metal models, 6 persons; 5th story, manufacture of shirts, 65 persons; 6th story, manufacture of coats, 45 persons; EQUIPPED with a sprinkler system; EXITS: two interior wooden stairways, extending from the first story to roof (the northerly stairway terminating at driveway), enclosed in wood board partitions with glass-paneled wooden doors at openings; a fire escape on the rear of the building having unprotected openings along the course thereof, extending from the top story balcony (with gooseneck ladder to roof) to the yard, with EGRESS from the termination of the fire escape by means of driveway to street and also through building (under same ownership) to east; ROOFS of adjoining buildings: to west, none; to east, 11 ft. lower; and

WHEREAS, this petition was withdrawn April 3, 1928, and reopened by vote of the board; and

WHEREAS, petitioner proposes to bring the fire escape on the rear of the building up to standard and requests the acceptance of the existing means of egress from the termination of the fire escape and, also, the existing interior stairways.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the termination of the rear fire escape, *on condition* that an open yard embracing this and the adjoining premises to the east in the same ownership shall be maintained open and unsubdivided, with egress through the adjoining building to the east and also through open driveway of these premises.

THE RESOLUTION—

(1291-27-S)

WHEREAS, William I. Hohausser, Inc., for Charles L. Tappin, owner, filed, December 13, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 126 West 34th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 26, 1927 (Order No. 28954-LD), reads:

"2. No safe egress from termination of fire escape to street;"

and

WHEREAS, the building is non-fireproof, six stories in height, 25 ft. by 98 ft. 9 in. in area at first story and 25 ft. by 88 ft. 9 in. in area above; OCCUPIED: 1st story, stores, 10 persons; 2nd story, beauty parlor, 25 persons; 3rd story, dressmaking, 8 persons; 4th story, musical instruments, 5 persons; 5th story, office, no occupancy; 6th story, manufacture of pearls, 10 persons; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in wood stud, metal lath and cement plaster partitions with kalamein doors at openings; a ladder from top story to roof scuttle; a fire escape on the rear of the building having fireproof openings along the course thereof, extending from the second story to the top story, with no legal EGRESS from the termination of the fire escape to the street; ROOFS of adjoining buildings: same height at east and west; and

WHEREAS, the petitioner proposes to provide egress from termination of rear fire escapes by connecting the second story fire escape balcony to the fire escape balcony of building adjoining at west and construct a bridge from the latter balcony to a balcony on the rear of building adjoining at south, known as 125-127 West 33rd street, where egress may be had through lofts to the fireproof hallways and thence to the street; furthermore, the petitioner contends that the buildings 125-127 West 33rd street are sprinklered; and

WHEREAS, the conditions as to the rear exit facilities have been changed since the action of this board in the former petition, Cal. No. 1402-22-S, so far as it affects egress from the rear termination in that the premises immediately to the rear have been built up to the property line.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the termination of the rear fire escape, *on condition* that a party wall fire escape balcony at the second story landing of fire escape connecting with the premises to the west shall be provided; that an iron balcony bridge, not less than 3 ft. in width, shall be provided connecting the fire escapes on the rear of this structure to a fire escape on premises 125-127 West 33rd street, with egress through said premises to street; that a fixed iron stairs shall be provided from the rear yard of first story of these premises (in run from east to west), connecting with the second story fire escape balcony; that an exit door shall be provided at the rear of the first story to the rear yard; that a metal sign painted white with red arrow indicating the line of travel shall be fixed to iron stairs from the yard to first story; that the consent of the owner, for egress through the adjoining premises in rear on West 33rd street shall be filed with the fire commissioner, and that all former actions of this board on these premises shall otherwise be complied with in accordance with the resolutions now in force.

THE RESOLUTION—

(1241-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for 21 West 38th Street Corp., filed, November 25, 1927, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 21-23 West 38th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated April 25, 1927, read:

"Order No. 18677-LD:

"1. Provide an independent fireproof passageway from exterior enclosed stairway as per Sec. 266 of the Labor Law.";

and

"Order No. 18678-LD:

"2. Remove cigar stand from interior stairhall on the 1st story, as per rule 10, Board of Standards and Appeals, adopted Feb. 23, 1927.";

and

"Order No. 18679-LD:

"2. Provide 3' aisles direct to both exits on all stories, as per Sec. 270 of the Labor Law.

"4. Remove wire glass in doors to interior stairway. Sec. 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, seventeen stories in height, 43 ft. by 98 ft. 9 in. in area at first story and 43 ft. by 88 ft. 9 in. in area above; OCCUPIED: 1st story, stores, 20 persons; 2nd story, vacant at present; 3rd story, vacant at present; 4th story, millinery manufacturing, 30 persons; 5th story, front, manufacture of hats, 12 persons; 5th story, rear, vacant at present; 6th story, front, printer, 6 persons; 6th story, rear, vacant at present; 7th story, front, vacant at present; 7th story, rear, manufacture of hats, 14 persons; 8th story, front, manufacture of hats, 8 persons; 8th story, rear, vacant at present; 9th story, front, manufacture of hats, 12 persons; 9th story, rear, vacant at present; 10th story, front, manufacture of hats, 9 persons; 10th story, rear, vacant at present; 11th story, front, vacant at present; 11th story, rear, hat manufacturing, 12 persons; 12th story, front and rear, hat manufacturing, 24 persons; 13th story, front, vacant at present; 13th story, rear, feathers, 6 persons; 14th story, front and rear, hat manufacturing, 30 persons; 15th and 16th stories, vacant at present; 17th story, manufacture of hats, 14 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior fireproof stairway, extending from first story to roof, enclosed in fireproof partitions with fireproof doors at openings; there being in each door leading to this stairway two wire glass panels 11½ in. by 58 in. (a total of 667 sq. in. in each panel); an exterior enclosed stairway, extending from the roof to a fireproof passageway at the mezzanine level leading to the main stairway, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there is a cigar stand in the main stair hall on the first story; and

WHEREAS, petition as to Order No. 18677-LD, contends that the rear stairway is 42 in. wide; that the passageway leading to the main stairway is 57 in. wide and that the main stairway from the mezzanine level to the first story is 63 in. wide and that ample allowance in width has been made for emergencies; that there is an additional exit from the termination of the rear stairway, at the mezzanine level, leading to the extension roofs of buildings at rear and fronting on 39th street (these buildings being under same ownership as the one in question); as to Order No. 18678-LD, Item 2, contends that the cigar stand does not obstruct the means of exit, and as to Order No. 18679-LD, Item 2, contends that this order refers to the fourth to the fourteenth stories, inclusive, which are subdivided by a cross partition at approximately the center of the loft, with a 54-in. wide hallway leading from the front stairway to a point directly behind the rear elevators and contends that the doors at this point, leading to the rear loft and to the rear stairway are open at all times during working hours, and as to Item No. 4 of this order proposes to subdivide each of the wired glass panels by a cross bar so that no area will exceed 360 sq. in.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 18677-LD, Item 1, on condition that the existing passageway from the termination of the exterior fire escape shall be maintained by fireproof passage direct to front stairs, main entrance; denied as to Order No. 18678-LD, Item 2; denied as to Order No. 18679-LD, Item 2, and granted, as to Order No. 18679-LD, Item 4, only so far as it affects the existing glass panels, on condition that the glass panels shall be subdivided in not less than four equal parts by means of fixed metal muntins; that the occupancy shall be restricted to the legal capacity of the interior primary exit, with the sprinkler allowance, and this variation is granted so long as conditions as to occupancy and use remain unchanged.

RULES

"STANDPIPE"- "FIRELINE" RULES, ADOPTED JUNE 27, 1922 AMENDED MAY 19, 1928

[281-22-SR]

Rule 1. PLANS. A preliminary set of paper plans and cross sections, drawn clearly and distinctly, to a scale of $\frac{1}{4}$ -inch or, by permission of the Fire Commissioner, $\frac{1}{8}$ -inch to the foot, for each proposed standpipe (fire line) installation or alteration, shall be submitted to and approved by the Fire Commissioner before the work in connection with the installation is started. Such preliminary plans shall show the size and location of the standpipe (fire line) risers, size and location of siamese and cross-connections, valves, tanks and connections, pumps, hose stations, lengths of hose, etc., and the location of stairways and enclosing partitions in relation to the standpipe risers and hose stations. From these approved preliminary plans, three sets of plans on cloth, in clean and clear detail, shall be filed for final approval by the Fire Commissioner. A certified copy of approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If an automatic sprinkler system is provided throughout the building or in any portion of the building, the plans shall include a note to that effect.

Rule 2. APPROVAL. Before acceptance all standpipe (fire lines) shall be tested, for at least one hour, under a hydrostatic pressure of not less than 300 pounds per square inch at the street siamese, and at each pump supply level, or such additional pressures as may be required to give 100 pounds at the highest hose outlet supplied by such pump, except that when a change is made in a source of supply, or minor changes are made in an existing equipment previously approved, the system shall be tested to a pressure sufficient to give 50 lbs. per sq. in. at the highest story hose outlet. These tests to be made in the presence of a representative of the Fire Prevention Bureau.

No valves, risers, or other material portions of any standpipe (fire lines) equipment shall be covered or permanently concealed until tested and approved, in writing, by the Bureau of Fire Prevention.

When entirely completed in accordance with the approved plans, and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the standpipe equipment is approved, the applicant will be so advised, in writing, by the Bureau of Fire Prevention.

When deemed necessary by the Fire Commissioner, sectional diagrams of the standpipe (fire line) equipment in buildings of large area or height, not more than three in number and printed on cloth in size not less than $8\frac{1}{2}$ x 11 in., shall be filed by the applicant for the use of fire companies in the district in which the premises are located.

Rule 3. STANDPIPE-FIRE LINE CERTIFICATE. The engineer, superintendent or persons in charge of the standpipe-fire line system in all buildings exceeding eighty-five feet in height shall be registered, and submit to an examination in the Fire Department. Upon evidence of fitness to properly operate and maintain the standpipe system he shall be granted a Certificate to that effect. The certificate shall contain the full name and a small photograph of the holder.

Day and night service shall be maintained in all buildings exceeding 250 ft. in height in which there is a fire pump.

Theatre buildings provided with fire pumps shall have at least one certified operator on duty during every performance. Buildings of large areas, industrial plants, amuse-

ment parks, etc., shall have at least one certified operator on duty when deemed necessary by the fire commissioner.

Rule 4. MONTHLY INSPECTION. All valves, hose, tools and other auxiliary fire appliances shall be kept in perfect working order, and at least once a month the person holding certificate of fitness shall make a thorough inspection of all the fire appliances to see that they are in perfect working order and ready for immediate use by the Fire Department. Fire pumps shall be tested every 30 days by the person holding the certificate of fitness.

He shall also instruct all employees under his charge in the use and practice of all auxiliary fire appliances. A detailed record of each inspection shall be kept on the premises for examination by a representative of the Fire Department.

All standpipe equipment in buildings exceeding 85 ft. in height shall be subject to a flow test with a pressure of not less than 50 lbs. at the top floor outlet, at least once in every two years, test to be conducted in the presence of a representative of the Fire Department.

Rule 5. APPROVED DEVICES. All devices approved for use in new standpipe fire line equipments shall bear the manufacturer's name and the date of and the number of the approval. Certified copies of the approval, working drawings and photographs of the device approved, shall be submitted to the administrative authority having jurisdiction for preservation as records and reference data.

Rule 6. ELEVATOR IN READINESS. In every building exceeding 150 feet in height at least one passenger elevator and in buildings in course of construction a hoist or elevator shall be kept in readiness for immediate use by the Fire Department during all hours of the night and day, including holidays and Sundays, and a man competent to operate the elevator shall be present at all times.

Rule 7. AREA OF BUILDINGS. For the application of Section 581 of Chapter 5 of the Code of Ordinances the area of a building shall be taken as the area within the exterior walls, or the area between fire walls.

When the fire walls are constructed in accordance with Section 371, Chapter 5 of the Code of Ordinances, and all openings are protected on both sides of fire wall or walls with automatic fireproof self-closing doors, the area within such fire walls or exterior walls and a fire wall, shall be considered a separate building.

Rule 8. HEIGHT. The term "height" as applied to a building or structure, as described in Chapter 5, Code of Ordinances, means the vertical distance measured in a straight line from the curb level, to the highest point of the roof beams in the case of flat roofs, and to the average height of gable in case of roofs having a pitch of more than 20 degrees with a horizontal plane.

Rule 9. STANDPIPE EQUIPMENT shall consist of a system of piping connected to one or more approved sources of water supply and provided with sufficient number of hose outlets and hose located as hereinafter set forth, to make possible the covering of every portion of each floor area with a standpipe hose stream, except that where the 1st story or basement or both are occupied as stores without connection or communication with the entrance hall or stair enclosure to upper stories, the Fire Commissioner may permit the omission of standpipe protection in such stores and, if so omitted, may prescribe such portable protection as he may deem necessary. Cellars, sub-cellars, basements, etc., shall be protected in the same manner as the stories above.

RULES

Every standpipe (fire line) equipment shall be a Standard Wet System, except as hereinafter provided for:

(a) In any building not exceeding 40 feet in height, and 20,000 sq. ft. in area, a four-inch street supply system having one four (4) inch direct connection to a street main fed two ways or having one 4-in. direct connection to each of the two street mains on two street fronts, each main so fed that the shutting off of one main will not interfere with the supply of the other main, may be installed, provided there is a sufficient pressure in the street main or mains to maintain a minimum of twenty-five (25) pounds per square inch static pressure at the highest hose outlet.

Evidence establishing the fact that water main conditions and pressures are as required shall be submitted to the Fire Department.

Rule 10. CLASSIFICATION OF STANDPIPE-FIRE LINE EQUIPMENTS. For the purpose of these rules standpipe equipments shall be classified as:

(a) Standard Wet System in which the pipes are of sizes as specified in Section 581 of the Building Code, and in which the system is at all times filled with water from at least one standard source of supply.

(b) Four-inch street connection system, in which the pipes are of sizes as specified in Section 581 of the Building Code and the system is at all times filled with water from one or more 4-in. diameter direct connections to public water mains in the street.

(c) Automatic dry systems, in which the pipes are of sizes as specified in Section 581 of the Building Code, and are normally dry, the system being connected to a source of water supply controlled by an automatic dry pipe valve as defined elsewhere in these rules.

Rule 11. TANKS ABOVE ROOF. Construction shall be as per Section 428 of the Building Code and tank structure and supports shall be approved by the Superintendent of Buildings. The covers of all unenclosed standpipe tanks shall be conical in shape and protected with a type of roofing approved by the Superintendent of Buildings.

Rule 12. RESERVE FOR STANDPIPE. Gravity roof tanks, except as otherwise required by Rule 83, shall contain not less than 3,500 gallons of water at all times, reserved solely for standpipe fire line purposes.

When a gravity tank is to be used for both standpipe and house supply, the connection for the latter shall be made through the side of the tank above the level of the required standpipe reserve. This type of house and standpipe supply tank is preferred and recommended.

When two gravity tanks are used, one for standpipe fire line service and the other for the house supply, the house supply tank may be so arranged that it can only be filled by an overflow from the tank used for standpipe fire line purposes.

Rule 13. STANDPIPE AND SPRINKLER SUPPLIES. Standpipe and sprinkler supply shall not be taken from one tank unless there is available 5,000 gallons of water for the standpipe system which shall be in excess of the amount of water required for the sprinkler system. Standpipe supply shall be taken from the uppermost portion, and through the side of the tank, or through the bottom, provided that portion of the pipe within the tank is of brass or other non-corroding material.

Rule 14. BUILDINGS IN GROUP UNDER THE SAME OWNERSHIP AND OPERATION:

One gravity tank of at least 5,000 gallons water capacity to supply the largest unit of a group of separate and distinct buildings operating under one ownership, and located at such elevation that the bottom of the tank will be at least 20 feet above the roof of the highest building of the group, will be accepted as an adequate tank supply for the entire standpipe equipment, provided a dead riser is carried down from the bottom of the tank to an underground header system having a Post Indicator control valve for each building

unit, the P. I. valves to be located as the Fire Commissioner may direct.

Rule 15. UNDERGROUND PIPING. All underground piping shall be extra heavy cast iron installed in accordance with the standard specifications of the American Water Works Association: for 4-inch lines Class C requirements shall be used, 6-inch Class D, 8-inch Class E.

Rule 16. ADDITIONAL TANKS. When, in his opinion, the area covered is excessive or the occupancy is such that an unusual fire hazard is introduced, the Fire Commissioner may require additional protection in the nature of additional tank or tanks located remote from any other standpipe tank, or additional water supply in the main gravity tank, or a fire pump and suction tank of size and capacity to be determined by the Fire Commissioner or the Board of Standards and Appeals, or a combination of any of the foregoing supplies.

Rule 17. STANDARD SOURCE OF SUPPLY. Gravity tank located so that the bottom of same will be not less than 20 feet above the roof level and of a capacity as stated elsewhere in these rules and directly connected with the standpipe equipment by pipes of the same diameter as that of the largest riser.

Rule 18. TANK FEED. Tanks shall not be fed through the standpipe fire line, but shall be fed through a separate line at least 2 inches in diameter, discharging into the top of each tank above the overflow level through the side or through the bottom, that portion of the pipe within the tank to be of brass or bronze. An electric or steam pump of sufficient capacity to deliver at least 65 gallons of water per minute at the tank shall be provided, or if the pressure in the service line is sufficient and the plumbing is such that a minimum of 65 gallons of water per minute may be delivered to the tank, connection to the house water service main in the basement, cellar or lowest story may be used instead of pump.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, when a ball (float) valve is provided for each tank. Floats shall be of copper.

Rule 19. OVERFLOW. An overflow of diameter at least as large as that of the fill line shall be provided for each roof standpipe tank. The overflow line from all intermediate tanks shall be at least 6 inches in diameter. It may be run through the bottom of the tank, provided it is of brass or bronze and has no joint inside of the tank, otherwise it must be brought through the side of the tank, 3 inches below the top (of sides). Overflows shall terminate in a 90 degree elbow not more than 24 inches above the roof.

Rule 20. EMERGENCY DRAIN. There shall be provided for each tank an emergency drain not less than 4 inches in diameter connected directly to the bottom of the tank or to the standpipe supply line above the tank check, and terminating not less than 30 inches nor more than 4 feet above the roof in a horizontal run. Emergency drain shall be provided with a 4-inch O. S. & Y. gate valve located in a readily accessible position not more than 4 feet above the roof.

Rule 21. ELEVATION OF TANK. The bottom of each gravity tank used for standpipe fire line supply shall be at least 20 feet above the level of the roof. When the area of a pent house exceeds 50% of the roof area or when it exceeds an area of 2,500 sq. ft., the bottom of the tank shall be required to be not less than 20 ft. above the level of the pent house roof. In existing standpipe equipment the bottom of the gravity standpipe tank shall not be required to be more than 20 feet above the outlet in the highest story.

Rule 22. PYRAMID OR TOWER ROOFS. Where the roof of the building is designed so as to finish in a

RULES

pyramid or tower form, the gravity tank shall be elevated as high as practicable, within the pyramid or tower. Provided, however, that in all cases, the gravity tank is not less than twenty (20) feet above the hose outlet in any room or space occupied other than for tank houses, elevator machinery or machine shop for repairing elevator machinery. Fire appliances, as may be required by the Fire Commissioner, shall be provided in such tank houses, elevator machine rooms, etc.

Rule 23. **ACCESS TO TANK.** Access to the top of each standpipe tank shall be provided by means of an iron gooseneck ladder of substantial construction and rigidly braced. Access to the tanks on theatre building shall be from the stage level to the roof by means of double-rung ladders set at an angle of not more than 70°, with intermediate landings every 12 ft. or less.

Rule 24. **HIGH AND LOW WATER ALARM.** Every gravity tank hereafter installed for standpipe fire line purposes shall be equipped with an electric closed circuit high and low alarm as provided under Rule 88, in order that it may be determined at any time whether or not the required standpipe reserve is in the tank, except when the house supply is taken from the tank, or where the house supply tank can only be filled from an overflow of the standpipe fire line reserve tank, a high and low alarm need not be provided when an automatic tank filling pump is installed.

Rule 25. **CHECK VALVE.** There shall be provided in a horizontal run of pipe in the top story stair enclosure or in a heated enclosure on the main roof, in the line connecting the standpipe tank with the standpipe riser, an approved type swing check valve opening downstream toward riser, except that where a siamese connection has been omitted, under these rules, no check valve shall be required. An O. S. & Y. gate valve shall be provided on each side of the check valve and shall be sealed open in an approved manner.

Rule 26. **HEATING OF TANKS.** All tanks used for standpipe supply purposes shall be heated by means of steam supplied through a brass coil with brass fittings and of a type and radiating surface as prescribed by the Board of Standards and Appeals. The heater shall be fed through a 1¼-inch steam line with a 1-inch return, separately trapped. The water in the tank shall be maintained at a temperature above 40° F.

Tanks in hotels, hospitals, institutes or similar buildings using the tank supply seven days a week supplying both standpipe and house service lines shall not require heating. If in an adequately heated enclosure, interior heating of tanks shall not be required.

Rule 27. **LOWEST SUCTION TANKS.** Tanks shall have at least 10,000 gallon effective water capacity as specified in Schedule A, reserved for the lowest fire pump use exclusively and shall be constructed of steel or reinforced concrete, located below the grade, or lowest story, if there is no cellar under the building. The Fire Commissioner may permit suction tanks to be located in a separate enclosure or building provided they are accessible and when, in his judgment, such location will be more practicable. House supply tanks may be connected to the fire pump suction line, provided an O. S. & Y. gate valve, sealed closed, shall be provided on such house supply lines.

Rule 28. **LOWEST TANK SUPPLY.** The lowest suction tanks shall be fed by a connection at least 4 inches in diameter taken directly and independently from the public street main. The supply shall be not less than 750 gallons a minute, and shall enter the suction tank above the top or through the side near the top of the tank and shall be controlled by suitable bronze ball cock and copper float.

Rule 29. **SUPPORT FOR TANKS.** Tanks of more than 500 gallons capacity hereafter placed in or on any building shall be supported on masonry, reinforced concrete or steel construction of sufficient strength and carried to a proper foundation as provided for in section 428, Chapter 5 of the Code of Ordinances.

Rule 30. **INTERMEDIATE TANKS.** The location of intermediate tanks hereafter installed shall be determined

and directed by the Fire Commissioner and as prescribed in Schedule A. Each such tank shall have at least 5,000 gallons of water reserved exclusively for fire line and pump purposes. The bottom of each tank shall be at least 20 feet above the highest outlet supplied therefrom. The method of water supply to tanks, the overflow, the high and low water alarm, the emergency drain, etc., shall be as prescribed for tanks above the roof except that the overflow and emergency drain shall be connected to the drainage system of the building or discharge on intermediate levels.

The connection of the tank to the system shall be as hereinafter set forth:

Piping of the same diameter as the riser shall connect the tank with the riser of the portion of equipment supplied from that tank and in this connecting line in a horizontal run there shall be placed an approved swing check valve opening downward, and two O. S. & Y. gate valves, one at each side of the check valve. Each tank section shall be directly connected to the tank section above by means of piping of the same diameter as that of the largest riser and in a horizontal connecting line shall be provided an approved swing check valve opening upward, with an O. S. & Y. gate valve, at each side of the check valve, in order that water pumped into the siamese connection may enter the entire equipment of the building, and that each tank will supply only its portion of the system.

Rule 31. **VALVES.** All valves controlling standpipe water supply except valves at hose outlets shall be iron body brass mounted, or cast steel designed in accordance with specifications of the American Society of Mechanical Engineers, gate valves shall be of Outside Stem & Yoke type, and shall be located in an accessible position. All emergency control valves 6 inch and larger shall be of the by-pass type.

Rule 32. **PIPING. Materials of Construction.** All new piping for standpipe fire lines shall be of genuine full weight wrought iron or steel and properly tested by the manufacturer to withstand the required water working pressures. All pipes shall be lapwelded. Where working pressures are in excess of 150 lbs. to the square inch extra heavy cast iron, malleable iron or cast steel valves, and fittings constructed in accordance with the specifications of the American Society of Mechanical Engineers, able to withstand the required water working pressure shall be provided. The standard weight fittings and valves may be used where the pressure is not more than 150 lbs. per sq. in. Fittings in horizontal runs shall have long turns. All underground piping shall be of extra heavy cast iron as required by Rule 15.

The water working pressure on piping, valves and fittings shall be determined by the total head of water plus 50 pounds at the top floor hose outlet plus a factor of safety of at least 50 per cent. Specifications as to the construction and water working pressure of all piping, valves and fittings shall be marked on plans filed with fire commissioner.

Rule 33. **CONSTRUCTION.** Each standpipe fire line riser shall be supported at the bottom and at every other (alternate) story, and shall be properly braced. Horizontal lines shall be supported by standard heavy wrought or malleable iron hangers attached to or extending around and over floor beams at intervals of not more than 8 ft., and at more frequent intervals if deemed necessary by the Fire Commissioner and shall be securely braced to withstand vibration. Hangers may be supported by straps or bars extending over and around bars of at least 1 in. in diameter and 12 in. in length embedded in concrete floors parallel to and at least 2 in. from the undersurface or by approved malleable iron concrete inserts. The arrangement of lines must be straight and as direct as practicable. Offsets will be permitted only when unavoidable or where necessary to install horizontal check valves. Except where flange fittings and pipes are permitted elsewhere in this rule, all joints shall be screwed joints made up thoroughly water tight with red lead, litharge and glycerine, or compressed graphite lead and boiled linseed oil, or any joint compound that shall be approved by the Board of Standards and Appeals.

RULES

In horizontal runs of piping of standpipe fire line systems, if larger than 4 in. in diameter, fittings and valves may be of the flange type, provided flange faces are machined true and smooth and do not show rings, sand holes or other imperfections. All joints shall be provided with proper copper gaskets.

All standpipe (fire line) equipments shall be installed in a workmanlike manner.

Rule 34. PROTECTION OF FIRE LINES. Standpipe lines when not located within a fire protected stair enclosure shall be protected against interior fire damage by means of at least one inch asbestos covering, or a covering of expanded metal lath and three-quarters inch Portland cement plaster or by a 2 in. terra cotta block encasement.

Rule 35. FROST PROTECTION. Standpipe lines shall be properly protected from freezing in the following manner:

One wrapping of tar paper equivalent to Asphalt Saturated Wool Felt paper weighing 12 lbs. per 100 sq. ft.

Three (3) layers of standard 1 in. high grade "long cows' hair" felt interposed and covered with one (1) layer of builders' paper equivalent to red rosin sized sheathing paper weighing 40 lbs. per 500 sq. ft.

One (1) covering of 8 oz. canvas, painted with two (2) coats of waterproof paint.

All wrappings to be independently applied and securely fastened in place with heavy jute twine. Circumferential and longitudinal joints to have at least a 2 in. lap staggered with adjacent layers and opposing leakage to the hair felt.

In groups of pipes each water pipe is to be wrapped separately with the tar paper, but subsequent layers of felt and paper may be applied collectively if space does not permit of individual wrapping.

Where a heating pipe is one of the group, the wrapping should be applied so that the hot line would serve all pipes in the enclosure. The initial wrapping of tar paper around each water pipe should be applied with laps down and the whole group wrapped with tar paper with laps up. If due to the position of the hot line sufficient air space would not insulate the hair felt, then protection to be effected by suitable separators, or a wrapping of asbestos paper instead of the tar paper around the group.

On vertical pipes particular provision to be made to prevent slipping and tearing of insulation due to its weight.

To prevent slipping away of insulation at point of entrance of pipes into a tank, and to shed leakage from slip joints, a 16 oz. duck to be provided, doubled and securely fastened to bottom of the tank overlapping inside and outside the insulation of the group for a distance of 18 in. below the tank. This duck to be well coated with paint. Loose hair felt to be packed about connection at tank bottom to safeguard against settling.

Rule 36. NUMBER OF RISERS. Each building fronting on more than one street shall have at least one riser for each street front. For the application of this rule a corner building shall not be considered as facing on more than one street when it is on but one corner. In all cases regardless of area or location there shall be a sufficient number of risers, so that any portion of each floor area may be covered by the stream from a standpipe hose not exceeding 100 ft. in length.

Rule 37. FIRE TOWER RISER. Each standpipe riser shall be located within a stair enclosure and one riser must be located in main stairway or fire tower.

Where impracticable to locate a riser within the stair enclosure, the Fire Commissioner may permit it to be located immediately adjacent to a stair enclosure, public corridor or other suitable place.

Rule 38. HOSE STREAM ALLOWANCE. Not more than 10 feet will be allowed for the throw of hose stream, except where the static pressure at the hose outlet is 15 lbs. or more, when 20 ft. will be allowed.

Rule 39. SIZE OF CROSS-CONNECTION. Where there are two or more risers in a standpipe (fire line) equipment, all risers shall be cross-connected by piping of a diameter at least equal to the diameter of the largest riser, but in no case shall the cross-connection be less than five inches.

Rule 40. FIRE PUMPS. Where Required:

(a) In every building hereafter erected exceeding 250 ft. in height, as described in Schedule A, an electric centrifugal fire pump shall be kept in readiness for immediate use of the Fire Department during all hours of the night and day, including Sundays and holidays.

Rule 41. ARRANGEMENT AND SUPPLY OF FIRE PUMPS. Fire pumps shall be connected to the standpipe systems and have a capacity of 750 gallons of water per minute at a pressure of from 50 to 80 lbs. at uppermost hose outlet, fed from such pumps. Fire pumps shall draw from steel or reinforced concrete suction tanks. For the purpose of testing fire pumps a 4 in. diameter branch shall be taken from the discharge line at the pump side of the check valve and run to the suction tank over the side or through the side above the overflow level. From this branch there shall be taken a 4 in. line with an approved type pressure relief valve, extending to the tank in a manner similar to that of the 4 in. test line. In the 4 in. test line between the 4 in. relief branch and the tank there shall be placed an O. S. & Y. gate valve, which shall be kept closed except during a test of the fire pump. In the line from the fire pump to the standpipe risers and beyond the test branch there shall be placed an approved type check valve in a horizontal position and also an O. S. & Y. gate valve, the latter to be open except when the fire pump is undergoing test. A pressure gauge shall be provided and connected to the discharge line of the pump.

The piping connecting discharge from fire pumps shall be of same diameter as the main riser.

Rule 42. NUMBER AND LOCATION OF FIRE PUMPS.

SCHEDULE A

Height from Uppermost Hose Outlet to grade*	Total No. of Pumps Required	Approximate Location of Pumps			
		1st Pump	2nd Pump	3rd Pump	4th Pump
250' to 400'	1	Below grade level			
401' to 500'	2	Below grade level	200' to 250'		
501' to 600'	2	Below grade level	250' to 300'		
601' to 700'	3	Below grade level	200' to 250'	400' to 500'	
701' to 800'	3	Below grade level	250' to 300'	500' to 600'	
801' to 900'	4	Below grade level	200' to 250'	400' to 500'	600' to 750'
901' to 1000'	4	Below grade level	250'	500'	750'

* The uppermost hose outlet shall not include pent house outlet.

Rule 43. FIRE PUMPS IN BUILDINGS EXCEEDING 1,000 FEET. All buildings exceeding 1,000 feet from grade level to uppermost hose outlet shall be provided with a fire pump for every 250 feet of elevation above the centre line of the lowest pump.

Rule 44. TANK CAPACITIES. Suction tanks supplying the first or lowest pump shall contain not less than 10,000 gallons reserved for fire pump. Intermediate tanks and uppermost supply tanks for buildings between 250 and 400 ft. as described in above schedule shall contain not less than 5,000 gallons reserved for fire pump. Uppermost supply tanks on all other buildings shall contain not less than 3,500 gallons reserve for standpipe fire line. Suction tanks shall be of the open type.

RULES

Rule 45. TANK STRAINERS. All supply tanks shall be provided with bronze strainers at pump and riser intake lines.

Rule 46. CENTRIFUGAL FIRE PUMPS. Fire pumps installed under these rules shall have a capacity of 750 G. P. M. and shall be of the multi-stage motor driven Centrifugal type designed, constructed and installed to render the highest possible efficient and reliable fire service.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

The pumping equipment shall be adaptable for heavy duty service having all parts of ample strength with liberal water passage and all working parts exposed to corrosion of phosphor bronze.

The pumps shall be fitted with fire fittings consisting of capacity name plate, pressure gauges, relief valves, hose manifold and three (3) approved $2\frac{1}{2}$ in. hose valves with Standard Fire Department male threads. Fire pumps shall take suction supply under a head of water and in no case shall there be less than six (6) feet between water level in tank and centre line of pump.

The pump specifications shall be within the uniform requirements of "The National Standard" as adopted by the following associations:

Associated Factory Mutual Companies,
National Board of Fire Underwriters,
or as approved by the Board of Standards and Appeals.

Fire pumps to be designed to operate at not less than five (5) pre-determined speeds to give five (5) pre-determined pressures which will insure a maximum pressure of 80 lbs. and a minimum pressure of 50 lbs. throughout the building.

Fire pump equipment shall be so designed that it will operate normally at least five (5) speeds to provide a minimum of 50 lbs. pressure, and where more than one pump is required it shall be capable of pumping to the level of the next highest pump station in case of breakdown of intermediate pumping unit.

To provide for this standby service the fire pump shall run at nine (9) pre-determined speeds, namely, five (5) for continuous service and four (4) for standby service.

Rule 47. GENERAL SPECIFICATIONS. Pumping equipment shall be free from defects in design, workmanship and material and shall give proper and continuous operation under the conditions of service specified and shall be subject to approval of the Board of Standards and Appeals.

Materials entering into construction of this equipment shall be the best quality of their respective kinds and all parts shall be amply proportioned so as to be adaptable for heavy duty service.

CASING: Casing shall be of close grained cast iron and divided horizontally, and having suction and discharge connections in the lower half, so that the top casing can be removed without breaking water connections. Casing shall have in addition to flange bolts, additional heavy bolts inside of flange to prevent leakage between stages. Casing shall be tested and guaranteed to withstand pressure 50% in excess of working pressure.

SHAFT: Shaft shall be made of best grade nickel steel and shall be ground all over to close limits and a high finish.

IMPELLERS: Impellers shall be of the enclosed type of best grade of phosphor bronze finished all over.

WEARING RINGS: Shall be of phosphor bronze and of renewable labyrinth or other equal type. Impeller wearing rings shall be securely attached to impeller, and casing ring shall be securely locked in the casing.

SHAFT SLEEVES: Shaft sleeves shall be of bronze and extend through stuffing boxes to protect the shaft from corrosion and wear from the packing.

BEARINGS: Bearing brackets shall be of the best grade of close grained cast iron and securely bolted to the lower half of the casing.

Bearing brackets shall contain cast iron bearings lined with high grade babbitt and shall be removable. Each bearing shall be equipped with two oil rings to insure proper lubrication.

COUPLING: Coupling shall be of best grade cast iron finished all over and keyed to shaft. The two halves shall be connected by coupling pins, transmitting power through rubber bushings, vulcanized on steel sleeves.

STUFFING BOXES: Stuffing boxes shall be of sufficient depth to prevent excessive leakage and shall contain water seal rings of bronze.

PACKING: Packing shall be held in place by bronze glands horizontally split and bolted together.

BED PLATE: Bed plate shall be of cast iron of heavy box type and provided with finished pads to which the pump is bolted and doweled. Foundation bolt rings shall be drilled for foundation bolts. Jack-screw pads to be cast with bed and jack-screws furnished to assist in aligning. Bed plate shall be provided with ample drip rims, drilled and tapped for piping connections on both ends.

PAINTING: Pumps shall be painted, filled, rubbed down to an even surface and finished with a drab steel-color machine paint, and the inside of the oil reservoirs in the bearing brackets to be painted white with a special oil-resisting paint.

TESTING: Pumps shall be tested at the plant of manufacturer to prove that they can fulfill requirements of specifications and guarantees made.

Rule 48. SPECIFICATIONS FOR ELECTRICAL CONTROL AND OPERATION OF FIRE PUMPS.

MOTOR: (a) Direct-current motors must be of the shunt or cumulative compound wound types. The speed of the motor at no load must not exceed the speed at full load by more than 10%.

Alternating current motors shall be of a slip ring type that will surely start and attain full speed under the current supply conditions where pump is to be installed. Approval of fire pump installations will be contingent on proper attention being given to the features mentioned herein.

(b) With a room temperature not exceeding 40 deg. C., motors shall be designed for a temperature rise not exceeding 40 deg. C. when carrying their rated full load continuously and shall also be able to run continuously with an overload of 15% without stress and without injurious rise in the temperature. Motors shall be able to withstand under the above room temperature an overload of 25% for 2 hours or a momentary overload of 50% without injury. No electrical or mechanical weakness should develop during these tests. The rise in temperature shall be measured in accordance with the Standardization Rules of the American Institute of Electrical Engineers.

Motors shall be of such capacity that at rated voltage 115% of its full load ampere rating will not be exceeded under any conditions of pump load.

(c) Motor and control apparatus must be protected from water coming from possible leakage, or breakage of any connection at the pump or other piping in its vicinity, including hose lines which may be connected to the pump.

(d) Motor windings shall be thoroughly impregnated with an insulating compound suitable for resisting moisture.

(e) Bearing shells and caps for motors shall be of the split type on at least the driving end, to permit removal and replacement without disturbing the motor or shaft after installment.

VARIABLE SPEED CONTROL OF MOTORS shall be provided except for fire pumps in theatres as required under Rule 86. Not less than five stages of speed variation will be permitted.

RULES

AUTOMATIC STARTERS will not be permitted except as provided for under Rule 86 (Theatres, etc.) of Standpipe Fire Line Rules.

CONTROLLING EQUIPMENT: The following specifications cover the construction and installation of controlling equipments of manually operated devices for the control of electric motors driving fire pumps.

In materials, details of construction, test and installation, except as modified or supplemented by these requirements, all parts of the equipment shall comply with Chapter 9 of the Code of Ordinances.

All equipments shall be specifically approved for fire pump controlling purposes.

DESIGN: (a) The design of all parts must be such as to secure simplicity, strength, durability and ease of operation.

(b) All parts must be mounted on one or more panels of slate, marble or other approved material, supported in a substantial manner on an iron frame, and the entire equipment must comply with the requirements for switchboards in Chapter 9 of the Code of Ordinances.

(c) All parts, such as bearings, cams and latches, the operation of which is liable to be interfered with by corrosion, must be made of phosphor bronze or similar metal, except where magnetic qualities are essential. Springs must be of phosphor bronze or similar metal, or protected against corrosion in an approved manner.

OPERATING MECHANISM: (a) The operation shall be such that the motor is directly started by a single lever, which shall be arranged to move in one direction from the initial to the final position.

(b) Electrical actuating devices will not be approved.

(c) Where direct current is used, an auxiliary field resistance shall be provided which can be used to increase the motor speed 10 per cent.

RESISTANCES: Starting resistances must be, unless inside of the motor, of the grid type, and comply with the requirements of starting duty rheostats as given in Chapter 9 of the Code of Ordinances.

OVERLOAD PROTECTION: (a) Each motor lead must be protected by a circuit-breaker. With direct current motors, leads must be protected by a single-pole circuit-breaker in each lead, or by an approved double coil, double pole circuit-breaker so designed that each pole must be closed independently of the other.

(b) Circuit-breakers to be calibrated to 400 per cent. of normal motor current.

(c) No fuses nor other overload release devices except circuit-breakers are permitted, except in instrument and pilot light leads.

WIRING: All wiring shall be installed in rigid iron conduit.

SWITCH: An approved knife switch for independent sources of supply must be provided, having one pole for each supply wire in circuit.

PILOT LAMP AND INSTRUMENTS: (a) A pilot lamp connected on the motor side of the circuit-breaker must be provided to indicate the presence of voltage on the line.

(b) A voltmeter and ammeter must be provided and suitably mounted and connected as a part of the control equipment.

MARKING: (a) A name plate must be provided giving the name of the manufacturer and the rating of the equipment in volts and amperes.

(b) All line and motor terminal connections must be suitably marked so that they can be readily identified.

CONTROL PANEL: The control panel shall be constructed of a high grade of electrical slate or marble or other approved material.

The supporting frame shall be so arranged that the bottom of the panel will not be less than 24 inches above the floor.

INSTALLATION OF APPARATUS: The control panel shall be located close to and within sight of the motor. If a pump room used for no other purpose and containing no other apparatus except the fire pump, its motor and its accessory appliances is provided, the controlling equipment shall be placed in this room.

The control panel shall be so protected that it will not be injured by water escaping from pump or connections.

Except where special permission is granted by the Fire Commissioner the controlling equipment shall be protected from mechanical injury by one of the following methods:

(a) Grille or lattice partitions so placed as to completely enclose the control panel and starter.

(b) The entire equipment of the panel and starter may be enclosed at the sides, front, back and top in a thoroughly substantial, ventilated sheet iron or steel cabinet of not less than No. 12 U. S. metal gauge in thickness with hinged doors with glass panel in front of pilot light. When panel is in a fireproof room and not subject to mechanical injury an enclosing cabinet shall not be required.

TEST OF EQUIPMENT: The entire equipment shall be subject to test and inspection by representatives of the Fire Commissioner.

POWER SUPPLY: Where the power supply can be obtained from two separate street feeders, two separate and distinct services shall be installed.

Where current is taken from an underground Edison three-wire system and the power lines are protected by approved conduit from a point where they enter the building to the control panel in the pump room, it will be considered an acceptable source of power supply.

Isolated Plant: Where the source of supply is an isolated plant located in the building an auxiliary service of sufficient capacity shall be obtained from some outside source.

Transmission Lines: (a) The lines between the power plants and the pump room must be of such number, so arranged and so located that there will be small chance of an interruption of service to the motor, due to accident to the lines. All wiring in the pump room must be in approved conduit.

Where the valves involved are large and the crippling of this pump service would seriously affect the protection of the property, at least two separate lines from the power plant or plants to the pump installation shall be provided. The lines must be run by separate routes or in such manner that a failure of both at the same time will be only a remote possibility.

(b) Each line between the power plant and pump room shall be of such size that its safe carrying capacity as given in Chapter 9 of the Code of Ordinances will not be exceeded by the load carried.

Where direct current motors are used, the voltage at the motors must not drop more than 5 per cent. below the voltage rating of the motors when the pumps are being driven at rated output, pressure and speed, and the lines between motors and power stations are carrying their peak loads.

When alternating current motors are used, the voltage at the motors under these same conditions must not drop more than 8 per cent. below the voltage rating of the motors.

(c) The overload protective devices at the power plants, and where provided at various points on the lines, must be of such rating and so set that they will open the circuit only under short circuit conditions.

Approved fuses may be used, if desired, except for the protection of the pump motor where circuit breakers are required. The fuses, however, must be of such size that an overload or short circuit at the motor or its control apparatus will not cause them to open the circuit, but instead, the circuit breaker protecting the motor.

TRANSFORMERS: Where it is necessary to install transformers they shall be installed in accordance with Chapter 9 of the Code of Ordinances.

RULES

Rule 49. **SIGNALLING DEVICES.** All buildings where variable speed control of fire pump motors is required shall be equipped with an approved coded closed circuit signalling system. The signalling stations shall be located one on each floor at main riser. This system shall be so arranged that a coded signal can be transmitted to the pump rooms. An eight-inch gong shall be provided in all pump rooms and at such other locations as the Fire Commissioner may direct. All apparatus used in connection with the signalling system shall be of an approved type and installed as outlined in rules governing the installation of interior fire alarm systems.

At alternate signal sending stations there shall be provided an approved closed circuit strap key enclosed in a sheet metal box equipped with a paracentric Fire Department lock and approved hinges.

The strap key shall be connected in series with the box circuit of the signal sending station.

A card of instructions shall be placed in the pump room giving code numbers of signalling stations, the pressures obtainable at different speeds of the motor and such other information the Fire Commissioner may direct.

Rule 50. **RELAY STANDPIPE SYSTEM.** All buildings hereafter erected exceeding 400 ft. from grade to highest hose outlet shall be provided with an intermediate combination gravity and suction standpipe supply tank and a fire pump as required under Schedule A.

Each tank shall have at least 5,000 gallons of water reserved for the fire lines and shall be connected to fire line system as described in Rule 30 for intermediate tanks except that in addition to the requirements of Rule 30, there shall be provided a long turn by-pass 8 inches in diameter around the tank check valve and the O. S. & Y. gate valves. An 8-inch O. S. & Y. gate valve SEALED CLOSED shall be provided in the by-pass line.

Each tank shall be provided with overflow and emergency drain lines as required in Rules 19 and 20, except that such lines shall drain to roofs of set backs on building, or into house drain lines providing the house drain line or lines are equal in sum total to the sum total in diameter of the drain lines.

The fire pump shall have a capacity of not less than 750 gallons of water per minute and shall deliver through the standpipe main feed riser at a pressure not less than 50 lbs. to the square inch at the highest hose outlet fed by said pump.

All fire pumps shall be located on a raised base at least 24 inches above the floor and on the floor below the supply tank, with the suction line as direct as practicable.

The pump discharge line shall be connected to the main feed riser feeding up, and outside the horizontal tank check valve line, and the upward swinging check valve in the main riser. An O. S. & Y. gate valve shall be provided at a point between the pump discharge connection and the upward swinging check valve SEALED OPEN.

The fire pump and motor shall be located in a watertight room as close to fire tower as practicable, properly drained by a 3-inch line to house drain or scuppers in exterior wall. The electric switch controlling the motor shall be marked on panel "FIRE PUMP SWITCH" in 1 inch white letters on a red background.

Rule 51. **NUMBERING ON VALVES.** All gate valves on tanks, fire lines and pumps shall be numbered by 3-inch red metal disc with white numbers 2 inches high secured to wheel of valves.

Rule 52. **PUMP ROOM DIAGRAM.** A white and black print drawn to a scale of one-quarter inch to the foot shall be provided in a glass frame showing the tank, fire pump, all pipe lines and valves. The number of each valve shall be shown in addition to purpose of each water line.

The print shall include instructions as to method of

starting and operating pump, closing main line, gate valve and opening by-pass valve.

Rule 53. **FIRE LINE TELEPHONE.** In all buildings where a variable speed control of fire pump motors is required there shall be provided a multiple telephone system with a master telephone in each pump room, and in the main lobby and individual telephones located on alternate floors near the main fire line riser.

The operation of the system shall be such that any individual telephone may call and converse directly with any master telephone. The master telephones may call and converse directly with each master telephone.

A six-inch vibrating call bell shall be located at the master telephones.

The master telephones in pump room below grade level shall be equipped with a loud speaking receiver so that the voice can be clearly and audibly heard at a distance of not less than fifteen feet from the receiver.

WIRING: The wiring for the telephone system shall not be smaller than No. 18 rubber covered wire installed in rigid iron conduit. The conduit system shall contain no conductors other than fire line telephone conductors.

The fire line telephone system shall be properly maintained and ready for use by the Fire Department at all times.

Rule 54. **MAIN LINE EMERGENCY CONTROL VALVES IN BUILDINGS OVER 400 FEET IN HEIGHT** (per Schedule A). At the base of the main feed riser or below the hose outlet valves on the first story; at each pump room elevation, and at each approximate one-third the height above the fire pump elevations and the pump or roof tank next above, there shall be provided O. S. & Y. emergency control valves in the main feed riser properly numbered and shown on the fire pump blue print heretofore described.

Rule 55. **EMERGENCY TOOL BOX.** Where fire pumps are required under these rules there shall be provided in each pump room an emergency fire department tool box, painted a fire department red, with 3-inch white letters reading, "Emergency fire line tool box." The box shall be secured to the wall and be fitted with a fire department lock and contain the following:

- 1—3-foot Stillson wrench.
- 4—2½-inch plugs with pipe threads.
- 4—2½-inch caps with hose threads.
- 2—Spanner wrenches of Fire Department pattern.
- 4—2½-inch double female hose connections, with Fire Department threads.

Rule 56. **EMERGENCY AND TESTING HOSE.** Where fire pumps are required under these rules there shall be provided in each pump room not less than two 50-foot lengths of rubber lined 2½-inch hose, of Fire Department quality, and one 1½-inch nozzle of controlling type. All couplings to be of Fire Department pattern and threads. Hose shall be supported by hooks secured to enclosure walls of pump room.

Rule 57. **LOCATION OF LOWER FIRE PUMP IN RELATION TO HORIZONTAL LINE CONTROL VALVES.** In a single main riser system the fire pump discharge line to riser shall be as short as practicable.

In a two (2) main riser system the pump discharge line to cross connection shall be located between the two risers. An emergency gate valve of the O. S. & Y. type, sealed open, shall be provided in the cross-connection on each side of the discharge line connection.

In a three (3) main riser system the pump discharge line shall be connected to the cross-connection on each side of the central riser. Three (3) emergency gate valves as above shall be provided as follows: One (1) at the base of the central main riser and one (1) on each side of the discharge line connection on the riser side.

In a four (4) main riser system the pump discharge line to the cross-connection shall be centrally located so as to

RULES

provide two risers on each side of pump connection. An emergency gate valve shall be provided in the cross-connection on each side of the discharge connection.

In a five (5) main riser system the pump discharge line shall be connected on each side of the third, or central riser, and shall be provided with gate valves located as described in a 3 riser system.

In a six (6) main riser system the pump discharge line shall be centrally located so as to provide three risers on each side of pump connection and shall be provided with gate valves located as described in a two and four riser system.

For the purpose of this rule a main riser is any vertical riser other than a branch riser with not more than three (3) hose outlets above the cross-connection.

Rule 58. EMERGENCY SAFEGUARDS. For the purpose of prolonging the use of the standpipe fire lines in case of failure or break, it is necessary to provide and properly locate emergency gate valves of the O. S. & Y. type as follows:

Rule 59. EMERGENCY VERTICAL LINE CONTROL VALVES. All standpipe fire line systems hereafter installed in buildings over four (4) stories or 50 ft. in height, and up to 400 ft., as described in Schedule B, shall be provided for as follows: In each riser an O. S. & Y. gate valve shall be provided below the first story hose outlet. If the interior stairway extends from hallway on first story to cellar the gate valve shall be located within the stairway enclosure below the first story level.

A two-way 2½-inch hose outlet tee with two 2½-inch approved valves, one of which may be capped, shall be provided in all main risers 6 ft. to 7 ft. above floor or stair landing level of first story with the O. S. & Y. control valve below the outlet tee.

Where a single main riser system or a main riser feed system is installed and the uppermost hose outlet exceeds 150 ft. above grade level there shall be provided in each riser O. S. & Y. gate valves, in addition to the gate valve below the first story hose outlet at approximately the level above grade hereafter specified.

SCHEDULE B

Height from Uppermost Hose Outlet to Grade	Total Number of Valves Required	Approximate Location of Valves Above Grade					
		1st Valve	2nd Valve	3rd Valve	4th Valve	5th Valve	6th Valve
150' to 200'	2 to 3	Below the 1 st sty. outlet	75'	150'			
200' to 250'	2 to 3	"	75'	150'			
250' to 300'	3 to 4	"	75'	150'	225'		
300' to 400'	4 to 5	"	75'	150'	225'	300'	

Rule 60. UPPER CROSS-CONNECTION EMERGENCY CONTROL VALVES. When a two (2) main riser system is installed there shall be provided O. S. & Y. emergency gate valves between the risers in each cross-section, located within the stairway enclosure when practicable, or as near the door to main stairway of fire tower as practicable, and where the uppermost hose outlet exceeds 150 ft. above grade, the risers shall be provided with O. S. & Y. gate valves as described in Schedule B.

Where a three (3) main riser system is installed there shall be provided O. S. & Y. gate valves between any two of the risers in each cross-connection and one in the central riser at each cross-connection.

Where a four (4) main riser system is installed there shall be provided O. S. & Y. gate valves in each cross-connection between the 2 central risers, so as to provide 2 risers on each side of control valves.

Where a five (5) main riser system is installed there shall be provided O. S. & Y. gate valves between the second and third central riser in each cross-connection and one in the central riser at each cross-connection as described in a 3 riser system.

Where a six (6) main riser system is installed there shall be provided O. S. & Y. gate valves centrally located in each cross-connection so as to provide 3 risers on each side of gate valve—as described in a two and four riser system.

Rule 61. LOWEST CROSS-CONNECTION CONTROL VALVES. When the building is provided with a fire pump as required by the Rules the gate valves required in the lowest cross-connection shall be located as described under location of Fire Pumps and Horizontal Line control valves.

Rule 62. FIRE TOWER RISER. Where the building is provided with an exterior enclosed fireproof stairway or fire tower the main riser shall be installed in such stairway and properly protected from freezing in accordance with these rules unless stairway is adequately heated.

Rule 63. VALVE SEALED OPEN. All O. S. & Y. gate valves shall be located in an accessible position and be sealed open in an approved manner.

Rule 64. LADDERS TO VALVES. Where the gate valve is more than 7 ft. above any floor or stair landing a single rung iron ladder with ½-inch rungs and not less than 10 inches between strings shall be provided at each gate valve properly secured at top and bottom.

Rule 65. VALVE SIGNS. Where the gate valves on the upper cross-connections are not located in the stair enclosure, a sign with red background and white letters not less than 3 inches high shall be painted on the face of the wall within the stairway enclosure on the story where the gate valve is located, which shall read as follows: "STANDPIPE CONTROL VALVE NO. 0 IN LOFT."

Where a standpipe riser is located in a fire tower a sign with red background and 3-inch letters as above shall be painted on the wall at fire tower exit door, which shall read: "STANDPIPE IN TOWER," except on that story on which the emergency control valve is located, there the sign shall read: "STANDPIPE CONTROL VALVE NO. 0 IN TOWER."

Rule 66. VALVES NUMBERED. All emergency control valves shall be numbered by means of a metal disc not less than 3 inches in diameter painted red with a white number not less than 2 inches high and shall be secured to wheel of valve by chain or metal clamp.

Rule 67. FIRE LINES PAINTED. All standpipe lines not located within a stairway enclosure or public corridor and including the siamese connection street riser wall collars and caps shall be painted a Fire Department red.

Rule 68. SIAMESE CONNECTIONS FOR FIRE DEPARTMENT USE. Each standpipe system shall be provided with one or more approved type 3 inch x 3 inch inlet siamese connections for use by the Fire Department as hereinafter set forth. When a building faces on but one street and has a frontage of less than 250 ft. and requires but one four (4) inch diameter standpipe riser one siamese connection shall be provided; where the street frontage exceeds 200 ft. in length and requires but two four (4) inch diameter standpipe risers two siamese connections shall be provided for each 200 ft. of street frontage or fraction thereof. Buildings exceeding 250 ft. in height shall have not less than two siamese steamer connections for each riser and buildings not more than 250 ft. in height shall have at least one siamese connection for each 6 inch riser. Buildings having frontages on more than one street shall have a siamese connection on each street front when the frontage is not continuous but in all cases where more than one siamese connection is required they shall be properly distributed, and not grouped, as the Fire Commissioner may direct.

Rule 69. SIAMESE HEADERS. Siamese headers shall be independent of each other and lead, as direct as

RULES

practicable, to riser or cross-connection header. There shall be at least 2 siamese for every 8-inch riser and at least 1 siamese for every 4 or 6 inch riser. Where there are more than one riser, the siamese headers shall divide on each side of any emergency control valve in the cross-connection, and such headers shall be equal in sum total to the sum total of all risers on either side of the emergency control valves.

No siamese header shall be larger than 6 inches. Siamese risers, when extending through sidewalk, shall be of bronze or fitted with a brass sleeve, packed with a waterproof compound between sleeve and riser.

Rule 70. SIAMESE OMITTED. Any building, other than theatre with stage, not over 45 feet in height shall not be required to have a siamese connection except when such building is on a water-front or when it is one of a group of buildings and has a cross-connection to the standpipe equipment in one or more of the other buildings.

Rule 71. LOCATION. Each siamese connection placed on the street front of a building shall be located not less than 18 inches and not more than 36 inches above the sidewalk level and shall be set in a horizontal position and shall be readily accessible for Fire Department use. Each siamese shall have cast in the body on top or on wall plate, in letters at least 1 inch in length and not less than $\frac{1}{8}$ inch in depth, the word "STANDPIPE."

The piping connecting the siamese with the standpipe equipment proper shall be not less than 5 in. in diameter where there are two or more 4 in. risers and not less than 6 in. in diameter for risers of 6 and 8 in. diameter. When there is but one 4 in. riser, connection from siamese may be 4 in. in diameter.

Rule 72. SIAMESE CHECK AND DRIP. In each line between the siamese connection and the standpipe system there shall be placed an approved type swing check valve located where practicable within 10 feet from the building wall. Between the siamese and its check valve there shall be placed a $\frac{3}{4}$ -inch automatic ball drip of an approved type which will close under a pressure of not more than 7 lbs. per square inch.

Rule 73. SIAMESE CONNECTIONS FOR FIRE-BOAT USE, EXCEPT WHERE THE SOURCE OF SUPPLY IS FROM THE STREET MAIN DIRECT. Siamese connection on piers or warehouses, etc., intended for fireboat use exclusively shall be $3\frac{1}{2}$ in. x $3\frac{1}{2}$ in. at inlets with Fire Department female thread. Between siamese and the system proper there shall be an approved type swing check valve, and between the check valve and the siamese either a $\frac{1}{2}$ -in. open drip without valve or cock, or a $\frac{3}{4}$ -in. automatic ball drip of approved type closing under a pressure of not more than 7 lbs. per sq. inch. Where systems have both fireboat and shore siamese the shore siamese shall have male connections and shall be without clappers, but shall have on each inlet a 3 in. gate valve with Fire Department male thread for hose connection. Check valve shall not be provided for the land end siamese.

Rule 74. HOSE OUTLETS. When practicable all hose outlets shall be placed within a stair enclosure. They shall be $2\frac{1}{2}$ in. in diameter, set not less than 5 ft. nor more than 6 ft. above the floor or landing as the case may be. Outlets and racks shall be located above the floor or landing and shall not be over a run of stairs or in a stair well. When impracticable to place hose outlets within the stair enclosure, the Fire Commissioner may permit them to be located immediately adjacent to a stair enclosure, in a conspicuous place, in which case there shall be painted upon the stair side of the wall of the stair enclosure a conspicuous sign in letters not less than 8 in. in height indicating the location of the outlet. Where there is a 4-in. riser system its termination above roof shall be a $2\frac{1}{2}$ -in. outlet hose valve properly capped.

Rule 75. MAIN ROOF OUTLETS. All 6 and 8-inch main riser systems which extend to intermediate or the highest roof level shall be provided with not less than three $2\frac{1}{2}$ -inch hose valve manifolds with male threads. Roof outlets shall be located not less than 24 in. nor more than 5 ft. above the roof and each valve shall be provided with regulation $2\frac{1}{2}$ -in. Fire Department caps. Where roof outlets cannot be located within a heated stair enclosure, the control valve shall be located below the roof and shall have a long stem extending above the roof with a wheel handle at the upper end. Between the long stem valve and the roof outlet there shall be a $\frac{1}{2}$ in. open drip extending to a sink or a $\frac{3}{4}$ in. automatic ball drip of approved type.

In buildings not exceeding 40 ft. in height hose outlets above roof shall not be required.

Rule 76. SPANNER WRENCH. A spanner wrench may be provided at each hose outlet valve, such wrench shall be of the gooseneck Fire Department pattern.

Rule 77. BRANCH LINE SIZE. No branch line may be less than 4 in. in diameter, except that any branch from a riser or cross-connection to but one hose outlet may be $2\frac{1}{2}$ in. if not over four (4) feet in length, and may be 3 in. in diameter if not more than twenty-five (25) feet in length.

Rule 78. NOZZLES. All $2\frac{1}{2}$ -in. fire hose shall be provided with approved smooth bore nozzles 15 in. in length, the outlet at the tip to be not less than 1 in. nor more than $1\frac{1}{8}$ in. in diameter.

Rule 79. HOSE. Each outlet other than the roof outlet shall have attached thereto $2\frac{1}{2}$ in. unlined linen hose, except that in buildings or premises that do not contain occupancies storing, handling or using inflammable motion picture films or nitro cellulose products, and which are not classified as hazardous, the Fire Commissioner may permit in addition to the $2\frac{1}{2}$ -inch outlet and hose the installation of $1\frac{1}{2}$ in. unlined linen hose and valve. Hose shall be approved unlined linen. There shall not be more than 100 ft. of hose at any outlet, as required by Section 581, Chapter 5, Code of Ordinances. No single length of hose shall be less than 50 ft.

All hose used in connection with the standpipe fire line system shall be at least equal in material and construction to the type of hose bearing the approval label of the National Board of Fire Underwriters.

Rule 80. COUPLINGS. Hose couplings for standpipe shall be equal to hose couplings of the regular Fire Department pattern and thread.

Rule 81. RACKS. All standpipe hose shall be suspended from racks of stamped steel, malleable iron or other metal equal thereto, of approved swing type, so designed and constructed that they will permit of ready and easy release of hose for use. The racks shall be supported securely and substantially from standpipe risers or wall, except that where a cast nipple of non-corroding material is screwed into the hose outlet valve the rack may be suspended from said nipple. The minimum thickness of nipple to be $\frac{5}{16}$ in. In no case will automatic racks be permitted.

Racks shall be not more than 7 feet 6 inches above the floor.

Rule 82. HOSE CABINETS. Hose racks may be installed in cabinets, provided the cabinets are conspicuously located within a stair enclosure, and are of a size sufficient to accommodate the entire equipment and permit of easy handling of hose and operation of valve.

In theatres cabinets may be permitted outside of stair enclosures, provided they are conspicuous, and that during performances the cabinets are illuminated by means of an electric lamp placed inside. Each cabinet shall have a clear

RULES

glass door (one panel only) without lock and shall have the words "FIRE HOSE" painted on the glass in letters not less than 2½ inches in height.

Rule 83. REGULATION AND REDUCTION OF PRESSURES. All buildings hereafter erected over 250 ft. in height and which do not exceed 400 ft. in height from the grade to highest hose outlet shall be provided with a roof gravity tank of not less than 5,000 gallons.

Where the above described height exceeds 400 feet, fire pump and suction tanks shall be provided as described under Schedule A.

Where the pressure on any hose outlet valve exceeds 50 lbs. either approved outlet pressure reducers, set as prescribed by the Chief of the Fire Department, or the Board of Standards and Appeals, shall be provided at such outlets.

Rule 84. BUILDINGS IN COURSE OF ERECTION. In buildings in course of erection standpipe fire lines shall be carried up with each story after the structure reaches the 7th story or a height of 85 ft., and there shall be provided an outside siamese pumper connection in a proper and accessible place. Regulation hose outlets on each story above the 2nd shall be provided as the work progresses. Hose outlets shall be provided with male threads of Fire Department pattern, with hose and nozzle attached, to at least every second outlet. The top and bottom of each riser and all cross connections shall be securely capped at all times during the progress of the work except when work on the standpipe fire line is in progress at that point. Temporary standpipe risers used in construction work and not less than 3 inches in diameter for buildings, not exceeding 400 ft. in height, and of larger diameter, in buildings exceeding 400 ft. in height, when maintained to supply water at all times, may be accepted in lieu of the regulation standpipe, provided it is equipped with hose outlets, hose and siamese as required above.

Elevators or hoists shall be provided as required in Rule 6.

Rule 85. PLACES COVERING LARGE AREAS. Ship yards, oil storage plants, amusement or exhibition parks or other enclosures when deemed necessary by the Fire Commissioner shall have one yard hydrant and hose for each 20,000 sq. ft. of area, but in no case shall there be more than 250 ft. distance between hydrants. Hydrants and sufficient approved hose and a smooth bore 1½-inch Underwriters playpipe shall be placed in an approved hose house, painted red, with words "FIRE HOSE" in 6-inch white letters on door. Where the area exceeds 20,000 sq. ft. and not exceeding 40,000 sq. ft. in area, a gravity tank of at least 20,000 gallons capacity, elevated 50 ft. above the yard, or 25 ft. above the highest structure in the yard, or a fire pump of at least 1,000 gallons a minute capacity, with a suction tank of at least 25,000 gallons capacity, or river suction supply shall be provided. Plants exceeding 40,000 sq. ft. in area shall be provided with a fire pump of not less than 1,000 gallons per minute capacity, suctioning from a tank or sump of at least 30,000 gallons capacity. The Fire Commissioner may permit suction from a river or well if in his opinion the required quantity of reasonably clean water may be obtained thereby, except that where river suction is proposed and standpipe primary water supply is taken from street main, approval of the proposition shall be obtained also from the Department of Water Supply, Gas and Electricity. In addition to yard hydrants, the Fire Commissioner may require one Monitor nozzle with remote control for each 40,000 sq. ft. of area or fraction thereof when in his opinion an unusual hazard exists or may exist. Monitor nozzles shall be located as ordered by the Fire Commissioner.

Standpipe risers may be connected to yard hydrant systems when such systems are provided with gravity tanks in accordance with this rule, or when same conforms with Rule 1, Subdivision A (city main connection).

Yard hydrant systems connected to city main shall be provided with Post Indicator valve located in an accessible posi-

tion. The Post Indicator valve shall be sealed or locked open and be painted a Fire Department red.

Yard hydrant systems with more than one hydrant shall not be connected to City mains outside of the high pressure fire service area, unless approved by the Board of Standards and Appeals.

Provision for steamer connections, fireboat connections, pressure reliefs and general layout of plant standpipe systems shall be made by the Fire Commissioner as his judgment may dictate for each individual case.

Fire extinguishing equipments in addition to the foregoing shall be prescribed by the Fire Commissioner for all oil storage plants, oil refineries, fire work plants and other plants when deemed by the Fire Commissioner as presenting unusual fire hazards.

Rule 86. THEATRES, ETC. In every theatre or opera house or other building used for theatrical or operatic purposes or amusement purposes as per Section 520, Chapter 5, of the Code of Ordinances, the standpipe fire line equipments in addition to the tank shall also be supplied by approved electric pump or pumps having a capacity of at least 250 gals. per minute at 100 lbs. per square inch in buildings without occupancy above the roof and at 125 lbs. per square inch pressure in buildings having any occupancy above the auditorium roof. Power for pumps shall be supplied by electric motors of sufficient horsepower to drive pump without sign of overload. Pumps shall be bypassed to suction tanks, as provided for elsewhere in these rules under FIRE PUMPS. Pumps shall suction from steel or reinforced concrete tanks of not less than 5,000 gallons water capacity. Pumps shall deliver initial supply of water and shall be connected to an approved electric device which, upon a reduction of pressure below the allowable minimum, will automatically start the pump and, upon a restoration of the required pressure, will automatically shut off the pump. The automatic starting device shall be set to cut in at 60 lbs. pressure and to cut out at 80 lbs. pressure. In addition to the automatic starting device there shall be provided a hand starter for emergency use and there shall also be provided a pressure gauge on the panel board.

Rule 87. STREET MAIN CONNECTIONS. Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each standpipe connection to a street main shall be not less than 4 in. in diameter and shall have a conveniently accessible control valve in the line at or near the curb or when practicable in a more remote location. The control valve shall be fitted with a frost and waterproof box not less than 4 ft. nor more than 6 ft. below the curb with a fixed stem extending to a compartment at the level of the sidewalk. The cover shall be bolted to the casing, and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be of an indicating pattern, operating by a special socket wrench approved by the Department of Water Supply, Gas and Electricity. The water meters used in standpipe fire line supplies shall be of approved type allowing free flow of water. Supply through the meter shall be checked against the Fire Department Siamese Supply and against tank supply.

Where, due to the presence of a vault under the sidewalk and extending to within 18 in. of the curb, it is impracticable to install a control valve box at the curb, there shall be placed in the feed line from the main a control valve located not more than two ft. from the point of entry.

Rule 88. HIGH AND LOW WATER ELECTRIC ALARMS. The high and low water electric alarm for gravity tanks shall be so constructed and arranged that a decrease in the quantity of water below the required fire line reserve shall cause an alarm to be given in either the pump room or engineer's room. An annunciator shall be provided in connection with the alarm system. The high

RULES

and low tell tale electric devices for gravity tanks shall be so constructed that they will not be affected by moisture and the parts shall be heavy and rugged. The level of the water in the gravity tank shall be indicated by an approved device.

The audible signalling device for high and low water electric alarm shall consist of vibrating gong of at least 6 inches diameter of the enclosed type and arranged for conduit installation, the same to be operated automatically. The control cabinet shall be arranged for conduit installation and shall be located in the engineer's room or pump room where it will be under supervision of the person in charge of the standpipe supply.

All wiring shall be installed in rigid conduits and the installation shall be in accordance with the provisions of Chapter 9 of the Code of Ordinances. Control panels must be approved by the Board of Standards and Appeals.

The following sources of energy may be employed and are given in their order of preference:

1. Public utility electric light and power systems.
2. Independent electric generating plants.
3. Storage batteries in duplicate.
4. Primary batteries of closed circuit type.

When the system is connected to a 110 volt lighting service a suitable cut-out is to be provided and it shall be enclosed in a locked or sealed metal cabinet. The connection to system shall be the first connection on the house side of and as near as practicable to the meter. When batteries are used to operate the system they shall be placed in an approved cabinet provided with a lock and key.

Rule 89. DRY PIPE VALVE. A dry pipe valve shall be taken to mean a valve automatically controlling the water supply of the standpipe system in such a manner that under normal conditions its piping system will be maintained dry, but in the event of a hose valve being opened, the dry pipe valve automatically releases the water into the standpipe system.

In refrigerating plants or in unheated buildings, piers or warehouses where wet lines are impracticable, dry pipe valves may be installed.

Type A, in which the valve is actuated by the release of compressed air in the standpipe system due to the opening of a hose valve; and Type B, in which the valve is actuated by an approved trip under electrical control of an approved non-coded or coded closed circuit system operated from the control station at each hose outlet. Dry pipe valve shall be located as near as practicable to the standpipe system, in an enclosed place, protected from mechanical injury and freezing.

When Type A valve is installed the air pressure in the standpipe system under such dry pipe valve control shall not exceed 40 lbs. per sq. in. nor be permitted to fall below 25 lbs. per sq. in. nor shall it be less than one-sixth of the water pressure in any case. Not more than 16 hose outlets shall be supplied through one dry pipe valve. The air compressor shall have a capacity of not less than 11 cu. ft. per minute, and the air supply for the pump shall be taken, if possible from a room containing dry air, or it shall pass through a drying chamber containing calcium chloride in order to avoid the introduction of moisture into the system.

A closed circuit alarm shall be provided in connection with each dry pipe valve installation; the electrical layout shall be approved by the Fire Commissioner.

Rule 90. MONITOR NOZZLE. Monitor nozzles shall be so constructed and designed that they may be moved in both vertical and horizontal arcs, and shall be so located that streams may be brought to bear on all portions of the plant or building within the effective radius of stream play and such other exposing properties as may be within this radius. They shall be supplied from connections to the standpipe system not less than 4 in. in diameter with remote control.

Rule 90a. ROOF SETBACK HOSE OUTLETS. A

two-way hose outlet tee, with one outlet properly capped, shall be provided in the standpipe risers on floor level of any intermediate roof setbacks on all buildings exceeding one hundred feet in height when the following conditions exist:

1. When the building has a frontage of fifty feet or over.
2. And there are adjoining roofs, window openings or other exterior exposures within fifty feet of the roof parapet.
3. And the depth of the setback exceeds ten feet.
4. And the setback exceeds one hundred feet above grade level.

Rule 91. EXISTING STANDPIPES. Standpipe fire line equipments which were approved by the Fire Commissioner as conforming to the rules and regulations then being enforced, shall not be required to be altered to conform to the provisions of these rules, except where substantial additions or extension in height or area is made to the building, when these rules shall apply if deemed advisable or necessary by the Fire Commissioner, and except that all such fire line systems shall have or be provided with the following:

1. Roof gravity tank shall have a reserve of approximately 3,500 gallons of water for fire line.
2. The bottom of the gravity tank shall be not less than 20 feet above the hose outlet in the highest story.
3. A 4-inch emergency drain with gate valve.
4. House lines taken from outside of tank.
5. Tank properly heated and provided with overflow line.
6. Tank shall not be fed through fire line.
7. Tank to be fed at not less than 65 gallons a minute by pump or direct city connection.
8. An iron ladder of substantial construction, properly braced, extending to top of tank.
9. At least one gate valve at the downstream side of tank check unless a gate valve has been installed on either side of check.
10. Hose valves and hose not less than 2½ inches in good serviceable condition. No automatic hose valves permitted.
11. Wheel of hose valve within 6 ft. 6 in. of stair landing or of steps within 2 ft.
12. An open or automatic ball drip between the siamese check and siamese.
13. Approved 3 in. x 3 in. siamese, with approved caps.
14. The words "STANDPIPE" cast in the body of the valve, or on metal plates secured to siamese riser, or secured to face of building behind the siamese.
15. The siamese street riser, wall collars and caps painted a Fire Department red.
16. Outlet pressure reducers on all hose outlet valves where the pressure exceeds 50 lbs. per square inch.
17. In factory or other buildings of hazardous use, where the fire lines are not within a protected stair enclosure and may be subjected to fire exposure because of such location, they shall be protected by asbestos covering, wire lath and cement, or terra cotta blocks as described in these rules.
18. Fire lines shall be protected from freezing as specified in these rules.
19. The tank shall be provided with a high and low water electric alarm, except where there is an automatic filling pump installed.
20. The bonnets or caps of all siamese or tank check valves which have been in the fire lines for at least ten years, where practicable, shall be removed and the interior of valve cleaned of all rust or other accumulations. The body of the valve shall then be given a good coat of red lead and linseed oil.

Rule 92. HOSE OUTLET VALVE. Hose outlet valves shall be 2½ in.

A—All hose outlet valves hereafter installed in buildings not exceeding 300 feet in height, or for the uppermost 300 feet in any building, shall conform to the following specifications:

RULES

1. Valves shall have a clear waterway of at least 5 sq. in. in area.
2. They shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute.
3. They shall close tightly against 300 lbs. hydraulic pressure under normal working conditions.
4. They shall stand a hydrostatic pressure test of 750 lbs. per sq. in. for 30 minutes and not distort.
5. They shall stand the operation of full opening and closing 300 times under 150 lbs. pressure without leaking at stuffing box or seat.
6. They shall not be of cast or malleable iron.
7. Only angle globe valves shall be permitted.

B—Hose outlet valves hereafter installed in buildings exceeding 300 feet in height, except as provided for in Subdivision A, shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute; they shall close tightly against 500 lbs. hydraulic pressure under normal working conditions; they shall stand a hydrostatic test of 1,250 lbs. per square inch for 30 minutes and not distort; they shall stand the operation of full opening and closing 300 times under 250 lbs. hydraulic pressure without leaking at stuffing box or seat. They shall be of brass or best grade of valve bronze.

Straight-way gate valves may be submitted for test.

All hose outlet valves hereafter installed shall have cast in the body of the valve:

1. The manufacturer's name or trade-mark.
2. The working pressure of the valve.
3. The approval number of the Board of Standards and Appeals.

Not less than 2 approved hose valves shall be delivered to the office of the Board of Standards and Appeals, the weight and other general matter noted, and valves certified. One of the valves shall then be delivered to the office of the Fire Commissioner, with certified specifications.

Rule 93. SPECIFICATIONS. Siamese Connections.

Fire Department siamese connection shall be as hereinafter stated in this rule.

1. The body of the siamese may be of cast iron, cast steel, brass or any other suitable metals of sufficient strength to comply with Item 8 of this specification. All movable parts, clappers, swivels and all bolts, washers, nuts, screws and pin bearings and all swivel bearings shall be of non-corrodible metal.

2. Clapper valve seats shall be made of non-corrodible metal and shall be machined to insure a tight seat for clapper valves.

3. Each inlet to siamese shall be provided with a clapper valve machined to a true face. Single clapper siamese connections shall not be permitted.

4. The inside diameter of valve seats shall not be less than the inside diameter of the hose couplings. The area of the waterway beyond the valve seats shall not be less than the combined areas of the waterways through the two valve seats. The area of the waterway of each inlet shall not be reduced by the clapper when in a position of maximum opening.

5. Clappers shall be so hung that when siamese connection is placed in a horizontal position the clappers will be seated.

6. Swivels, attached to the body of the siamese by means of a collar expanded cold or screwed into the body of the siamese, or with other bearing surface extending entirely around the opening and exerting uniform shear, will be approved if giving a strength sufficient to meet item 8.

7. Clapper valves must be of such design and area that a pressure of 100 lbs. per sq. in. on the standpipe side will not prevent their opening when the pressure on the steamer side is 150 lbs. They must be so hung that with a discontinuance of flow into the siamese through that inlet the valve will close, and that it will not close where there is an inward flow and the pressure on the inlet is 5 lbs. or more greater than the standpipe pressure.

8. Siamese connections must stand a hydraulic pressure test of 500 lbs. for 30 minutes under normal working conditions.

9. Clapper valves shall be tight for any pressure on standpipe side up to 300 lbs.

10. Approved caps or plugs must be provided to protect the threads of the inlets.

11. The inlet swivels to siamese connection shall be provided with threads to fit the Fire Department hose.

12. The word "STANDPIPE" shall be cast into the top of the body of the siamese or on wall plate, in 1 in. letters not less than $\frac{1}{8}$ of an inch in depth.

13. Where there is a fire boat siamese connection in the same system with a land end siamese connection, clapper valves shall be omitted from the land end siamese.

Saving Clause. All rules and regulations previously adopted and conflicting with these rules are hereby rescinded.

WILLIAM E. WALSH, *Chairman.*

WILLIAM J. O'GORMAN, *Secretary.*

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

Amended Resolution Adopted by the Board of Appeals,

March 16, 1920, Under Cal. No. 549-17-BZ

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, May 29, 1928, 10 a. m.

Minutes of Regular Meeting, May 29, 1928, 2 p. m.

Hatchway Protection, Rules.

"Standpipe"—"Fireline" Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, June 5, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, June 12, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR

TUESDAY, JUNE 5, 1928, 2 P. M.

Building Zone Cases.

1283-27-BZ.
APPLICANT—Robert W. Maloney, for Edlar Realty Corp., owner.
PREMISES—1164 Intervale avenue and 1155 Tiffany street, southeast corner, The Bronx.

APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a business district the erection and maintenance of a gasoline service station.

1298-27-BZ.

APPLICANT—W. D. J. McCarthy, for Charles H. Hallock, owner.

PREMISES—Southeast corner of Roosevelt avenue (Greenpoint avenue) and 51st street (Stone street), Woodside, Borough of Queens.

APPLICATION, under sections 7b and 21 of the building zone resolution,

TO PERMIT the extension, from an unrestricted district into a business district, of a proposed building to be used as a gasoline service station and as a garage for the storage of more than five (5) motor vehicles.

1320-27-BZ.

APPLICANT—Kleinert & Klie, for Julia A. Flanagan, owner.

PREMISES—665-675 73rd street, north side of 73rd street, 103 ft. 8 in. west of Seventh avenue, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

1325-27-BZ.

APPLICANT—AWK Realty Corp., owner.

PREMISES—1800 Bronxdale avenue, northwest corner of Bronxdale avenue and Morris Park avenue, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

47-28-BZ.

APPLICANT—John J. Dunnigan, for Adolph Weg, owner.

PREMISES—Northeast intersection of Bailey avenue and Bailey place, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

53-28-BZ.

APPLICANT—McCooey & Conroy, for Eleanor J. Garrett, owner.

PREMISES—8708-8712 18th avenue, northwest corner of Rutherford place, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

207-28-BZ.

APPLICANT—John J. Hefferman, owner.

PREMISES—329 Washington avenue, northeast corner of Harbor road, Mariner's Harbor, Borough of Richmond.

APPLICATION, under section 7g of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

JUNE 5, 1928, 10 A. M.

Appeals from Administrative Orders.

1331-27-A—389-393 Avenue A, Manhattan.

CALENDAR

- 17-28-A—100 West 21st street, Manhattan.
 21-28-A—1-33 Queens street and 332-346 Jackson avenue,
 Long Island City, Borough of Queens.
 24-28-A—2-12 West 34th street, Manhattan.
 34-28-A—167 West 22nd street, Manhattan.
 52-28-A—318-28 Sixth avenue (now 34-22 35th street),
 Astoria, Borough of Queens.

 ough of Queens.
 260-26-A—156-158 East 85th street, Manhattan.

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of stand-
 ards and appeals of a public hearing under the provisions
 of the building zone resolution, *Tuesday morning, June 5,*
 1928, at 10 o'clock, in Room 1013, Municipal Building, on
 the following matters:

CAL. NO. 1237-27-BZ—Application, November 22, 1927, under
 section 21 of the building zone resolu-
 tion, of Kate Ruchlis and Israel Berken-
 feld, applicants and owners, to permit
 in a business district the erection and
 maintenance of a gasoline service sta-
 tion; premises 897-901 Bedford avenue,
 northeast corner of Willoughby avenue,
 Brooklyn.

CAL. NO. 1171-27-BZ—Application, November 1, 1927, under
 section 21 of the building zone resolu-
 tion, of Gardiner Conroy, applicant, on
 behalf of Sinking Fund Corp., owner,
 to permit in a business district the erec-
 tion and maintenance of a garage for
 the storage of more than five (5)
 motor vehicles; premises 8414-8448 New
 Utrecht avenue, west side of New
 Utrecht avenue, 7 ft. 9 $\frac{3}{4}$ in. north of
 18th avenue, Brooklyn.

CAL. NO. 1297-27-BZ—Application, December 13, 1927, under
 section 21 of the building zone resolu-
 tion, of Daniel McNamara, Jr., appli-
 cant, on behalf of Cordovian Realty
 Corp., owner, to permit in a residence
 district the erection and maintenance
 of a garage for the storage of four (4)
 motor vehicles (moving vans); premises
 392 14th street, south side of 14th
 street, 122 ft. 10 $\frac{1}{2}$ in. east of Seventh
 avenue, Brooklyn.

CAL. NO. 1315-27-BZ—Application, December 20, 1927, under
 sections 7c and 21 of the building zone
 resolution, of John P. Walther, appli-
 cant, on behalf of Fannie Gordon,
 owner, to permit in a residence district
 the alteration and change of occupancy
 from residence use to a business use;
 premises 856 St. Nicholas avenue, 59
 St. Nicholas place and 400 West 153rd
 street, Manhattan.

CAL. NO. 1348-27-BZ—Application, December 29, 1927, under
 section 21 of the building zone resolu-
 tion, of Edward P. Doyle, applicant, on
 behalf of Joseph Friedman, owner, to
 permit in a business district the erection
 and maintenance of a gasoline service
 station; premises 2753-2761 Coney Island
 avenue, southeast corner of Avenue Y,
 Brooklyn.

CAL. NO. 1-28-BZ—Application, January 3, 1928, under sec-
 tion 21 of the building zone resolution,
 of John J. Ryan, applicant, on behalf of
 Florence M. Steinberg, owner, to permit
 in a business district the erection and
 maintenance of a gasoline service sta-
 tion; premises 3401 Kingsland avenue,
 northwest corner of Boston road, The
 Bronx.

CAL. NO. 1293-27-BZ—Application, December 13, 1927, under
 section 21 of the building zone resolu-
 tion of McCooey & Conroy, applicants,
 on behalf of Daniel Halpern, owner, to
 permit in a business district the erection
 and maintenance of a gasoline service
 station; premises southeast corner of
 Rockaway boulevard and South 2nd
 street (83rd street), South Ozone Park,
 Borough of Queens.

CAL. NO. 925-27-BZ—Application, August 17, 1927, under
 section 21 of the building zone resolu-
 tion, of John J. Dunnigan, applicant, on
 behalf of Towruss Realty Corp., owner,
 to permit in a business district the
 alteration and change of occupancy to
 a gasoline service station of part of
 an existing building occupied as a garage
 for the storage of more than five (5)
 motor vehicles; premises 2100 Webster
 avenue and 401-409 East 180th street,

APPELLANT—D. MacFarlane, for John Vanneck, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—420-428 East 31st street, Manhattan.

APPEARANCES—

For Appellant: D. MacFarlane.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland, Guilfoyle and Chief Kenlon.....	4
Negative: Commissioner Connell.....	1
Absent	0

THE RESOLUTION—

(912-27-A)

WHEREAS, D. MacFarlane, for John Vanneck, owner, filed, August 12, 1927, an appeal from an order of the fire commissioner, affecting premises 420-428 East 31st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 17, 1927, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is non-fireproof, three stories (36 ft. 2 in.) in height, 130 ft. 8 in. by 98 ft. 9 in., about 12,250 sq. ft. floor area; OCCUPIED for the manufacture of hydroplanes, 30 persons on each of first and second stories, 20 persons on third story; and

WHEREAS, the appellant claims that the building is equipped with a sprinkler system fed from a 20,000-gallon gravity tank which is supplied through a 6-inch connection to the city water main; furthermore, the appellant contends that the occupancy of the building is non-hazardous.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall not be increased in height and that the premises throughout shall be equipped with an approved sprinkler system, and granted only as long as conditions as to occupancy and use remain substantially unchanged.

826-27-A.

APPELLANT—Rosenthal Bros. Amusements, Inc., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—Bulkhead at City Pier, Canarsie Shore, Brooklyn.

APPEARANCES—

For Appellant: Jacob Rosenthal.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Absent	0

THE RESOLUTION—

(826-27-A)

WHEREAS, Rosenthal Brothers Amusements, Inc., owner, filed, July 19, 1927, an appeal from a decision of the fire commissioner, affecting the bulkhead of a city pier located at foot of Rockaway Parkway, Canarsie Shore, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated April 21, 1928, reads:

"With reference to your application dated March 1st, 1928, for a permit to display Fireworks on Thursday Evening of each week from Thursday, June 21st to Sept. 8th, 1928, inclusive, on the bulkhead of a City Pier located at Canarsie shore, Brooklyn, N. Y., I regret to inform you that I am without power to grant such a permit in view of the fact that the interests of public safety demand that no permits shall be issued for the display of fireworks on the mainland or on the end of a City pier."

and

WHEREAS, the original appeal was withdrawn January 10, 1928; reopened May 15, 1928, for the purpose of considering a later decision of the fire commissioner; and

WHEREAS, the appellant proposes to display fireworks for the season from June 21 to September 8, 1928, inclusive, on the end of a municipal pier, 1,000 ft. by 500 ft. in width, located at Canarsie Shore, Brooklyn, within an undetermined use district; licensed men have full charge of the shooting and fire protection will be provided in accordance with the requirements of the fire commissioner; furthermore, the appellant contends that there is no possible chance of an accident and, also, permission has been secured from the commissioner of docks to use the pier for the staging of fireworks.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1334-27-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Far Eastern Mfg. Co., lessee.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—7-15 Richards street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(1334-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Far Eastern Manufacturing Co., lessee, filed, December 23, 1927, an appeal from an order of the fire commissioner, affecting premises 7-15 Richards street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 5, 1927 (Order No. 24142-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other

MINUTES

building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at north side of building, or other approved protection, as per Section 375, Article 18, Chapter 5, of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, four stories in height, 100 ft. by 80 ft. in area at first story and 100 ft. by 38 ft. in area above; OCCUPIED by one concern for dessicating coconut: 1st story, 5 persons; 2nd story, 1 person; 3rd story, 2 persons; 4th story, 16 persons; and

WHEREAS, there are five windows in the northerly wall of the building, on each story above the first story, within 50 ft. of the roof of a neighboring building to the north; and

WHEREAS, appellant contends that the exposure at the north side is from the roof of a vacant one-story building; that there is no opening in this roof and that it is covered with Barrett's slag roofing.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

1355-27-A.

APPELLANT—Samuel Rosenblum, for Anna Fagan, owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—351 South 3rd street, Brooklyn. APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Absent	0

THE RESOLUTION—

(1355-27-A)

WHEREAS, Samuel Rosenblum, for Anna Fagen, owner, filed, December 31, 1927, an appeal from an order of the fire commissioner, affecting premises 351 South 3rd street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 21, 1927 (Order No. 8557-LC), reads:

"You are hereby notified that an inspection of the above premises, used as a non-storage garage, shows that the following must be done before the permit requested by you can be issued:

FORTHWITH

"4. Separate boiler from remainder of building by enclosure of solid masonry at least 8 inches in thickness. Entrance to boiler room to be from exterior of building only. Sec. 159-1, Ch. 10, C. of O.";

and

WHEREAS, the building is non-fireproof, three stories in height, 25 ft. by 80 ft. 4 in. in area at first story and 25 ft. by 55 ft. in area above; OCCUPIED: 1st story, boiler room, a non-storage garage for four motor vehicles and an iron shop, 5 persons; upper stories, dwellings; and

WHEREAS, appellant contends that the boiler is but a small heating unit; that it is enclosed by fireproof partitions with a (proposed) fireproof door at the opening therein; that the ceiling of the entire first story is fire-retarded; that the stairway is separated from the rest of the first story by fire-retarding partitions and requests the acceptance of the existing conditions; note—building is located in a business use district.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

1332-27-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Mary Zicha, owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—3501-3507 Vernon avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition. THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle..... 4

Negative

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1332-27-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Mary Zicha, owner, filed, December 23, 1927, an appeal from an order of the fire commissioner, affecting premises 3501-3507 Vernon avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 14, 1927, reads:

"Order No. 12386-F:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets on each story (including basements, cellar and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½-inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, one story (22 ft. 8 in.) in height for the greater portion of the premises, there being a two-story (22 ft. 8 in. high) section at the Vernon avenue end; the building having a frontage of 74 ft. 6 in. on Vernon avenue, 200 ft. on Pierce avenue and 74 ft. 6 in. on Hamilton avenue, a total area of 14,900 sq. ft.; OCCUPIED for cutting and polishing marble and as offices, 65 persons in the entire premises; and

WHEREAS, appellant contends that the materials used in the building are of an incombustible nature; that the building is low in height, faces on three streets, with an open driveway on the fourth side; that there are windows on all sides of the building; that there are city fire hydrants in the immediate vicinity, and requests the omission of the required standpipe system; and

WHEREAS, the order is predicated on the requirement as to floor area only; and

WHEREAS, the premises are used as a marble works shop.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension, and granted only as long as conditions as to occupancy, use and operation remain unchanged.

1269-27-A.

APPELLANT—Samuel Rosenblum, for William Lee, lessee.

THE RESOLUTION—

(1269-27-A)

WHEREAS, Samuel Rosenblum, for William Lee, lessee, filed, December 3, 1927, an appeal from a decision of the fire commissioner, affecting premises 549-559 West 180th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated December 3, 1927 (No. 902), reads:

"To obtain the approval of this Department on your application for license immediate compliance with the following requirements is necessary:

"5. Provide standpipe system in compliance with Chapter 5, Article 28, Code of Ordinances.";

and

WHEREAS, premises consist of a non-fireproof building, facing on two street fronts, having a frontage of 150 ft. on West 180th street and a depth of 100 ft. with an extension, 25 ft. front by 119 ft. 6 in. deep, running through to West 181st street; the West 180th street section having an area of approximately 15,000 sq. ft. and the West 181st street extension having an area of approximately 3,000 sq. ft., a total area of approximately 18,000 sq. ft.; the West 181st street extension and a portion at the easterly side of West 180th street front of the building (31 ft. front by 100 ft. in depth) being two stories in height, the remainder of the building being one clere story (41 ft.) in height; OCCUPIED: 1st story, store and restaurant and dancing (cabaret) accommodating 300 persons; 2nd story, offices and storage (in the West 180th street section), 5 persons; and

WHEREAS, appellant contends that the building is practically one story in height, the second story occupying but a small portion; that the building was erected prior to the adoption of the rules regarding standpipes for area and has been used heretofore as a skating rink; that it faces on two street fronts and requests the omission of the required standpipe system.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension; that there shall be distributed throughout the premises such portable auxiliary fire fighting appliances as shall be directed by the fire department, and granted only as long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION—

(1347-27-A)

WHEREAS, Daniel J. McParland, for B. L. Haskins, owner, filed, December 28, 1927, an appeal from an order of the fire commissioner, affecting premises 310-322 Vernon avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated November 23, 1927 (Order No. 3271-LC), reads:

"6. Install standpipe 4" in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets, etc. Sec. 581, Ch. 5, Code of Ordinances.";

and

WHEREAS, the building, facing on two street fronts, is non-fireproof, one story in height, with a small two-story portion at the southwest corner of the building, 200 ft. by 162 ft., irregular (approximately 29,000 sq. ft.) in area; subdivided into five sub-areas by brick walls having the openings therein protected on both sides by automatic fire doors; the area of the maximum sub-area being 14,000 sq. ft.; OCCUPIED for the manufacture of spring bumpers for automobiles, 129 persons in entire premises; and

WHEREAS, appellant contends that the materials used in the building are incombustible; that the building is provided with a 2½-inch standpipe system with two outlets, each provided with 100 ft. of 1½-inch hose; that the standpipe system has a siamese connection on the Vernon avenue front of the building, but no connection to the city water main; that the two-story portion of the building is used solely for offices and is provided with a 32-inch wide wooden stairway extending from the first story to second story; that the building is low in height and accessible from two street fronts; and

WHEREAS, the ground area is subdivided by walls of recognized fireproof construction.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that all horizontal openings shall be equipped with approved automatic fire doors; that the building shall not be increased in height, area or dimension; that there shall be installed and distributed throughout the premises such auxiliary fire extinguishing appliances as shall be directed by the fire commissioner, and granted only as long as conditions as to operation and occupancy remain unchanged.

411-28-A.

APPELLANT—The New York Central Railroad Co., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—615-633 West 59th street, Manhattan.

THE RESOLUTION—

(411-28-A)

WHEREAS, The New York Central Railroad Co., owner, filed, April 30, 1928, an appeal from a decision of the fire commissioner, affecting premises 615-633 West 59th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered April 11, 1928 (No. 716-28), reads:

"1. As plans indicate the area of building exceeds 20,000 square feet a 4" standpipe system with a 3,500 gallon gravity tank located at least 20' above roof as source of supply will be required. Rule No. 12, Ch. 5, Sec. 581, Code of Ordinances.

"2. Provide a filling pump of at least 65 gallons per minute capacity at tank or a letter from the Department of Water Supply, Gas and Electricity showing minimum pressure at curb is sufficient to fill tank at the above rate. Rule No. 12.";

and

MINUTES

WHEREAS, the building is non-fireproof, basement, one and two stories (35 ft.) in height, 370 ft. by 200 ft., about 74,000 sq. ft. in area; OCCUPIED for the dead storage of automobiles: basement, 1 person; 1st story, 30 persons; 2nd story, 1 person; and

WHEREAS, the appellant has filed outlined sketch plans showing the building divided into three sections with communicating doorways leading to building adjoining at east (which building is not shown on plans), also with a standpipe system, consisting of 3-inch headers, six 2-inch risers and 1½-inch outlets at each story fed through a direct 4-inch connection to the 6-inch city water main; and

WHEREAS, the appellant claims that a portion of the building, 135 ft. by 200 ft., was damaged by fire, rebuilt and divided into two floor areas, each area about 27,000 sq. ft., which are also equipped with an approved sprinkler system; furthermore, the appellant contends that the building will probably be removed within a few years due to the removal of tracks from the city streets.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the floor area shall be subdivided longitudinally by a fire wall of approved masonry; that there shall be no gasoline stored on the premises other than that permitted under an existing permit now in force; that the building shall not be increased in height, area or dimension and that the use and occupancy shall be restricted to that of temporary railroad terminal storage warehouse use.

THE RESOLUTION—

(7-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for San Jacinto Hotel, Inc., owner, filed, January 5, 1928, an appeal from an order of the fire commissioner, affecting premises 18 East 60th street and 649 Madison avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 26, 1927 (Order No. 25689-F), reads:

"1. Provide a tank on roof of at least 3,500 gallons capacity, for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 feet above the roof level. Section 20, Ch. 12, Code of Ordinances."

and

WHEREAS, the building, facing on two street fronts, is fireproof, eight stories (95 ft. to main roof) and pent house in height, 50 ft. 5 in. by 90 ft. in area; OCCUPIED: 1st story, stores and hotel office; 2nd to 8th stories, inclusive, apartment hotel, approximately 15 persons per story; pent house, servants' rooms, 10 persons; and

WHEREAS, the bottom of the 3,000-gallon capacity tank supplying the standpipe system and the house supply is located 6 ft. above the roof and 12 ft. 6 in. above the outlet on the eighth story; the tank is fed by two automatic electric pumps located in the cellar; and

WHEREAS, appellant contends that the building was erected in 1902 and that the existing conditions as to the standpipe were accepted by the authorities having jurisdiction and that this condition comes within the purview of rule 44 of the

standpipe rules as to standpipes previously accepted; that the premises are protected by an interior fire alarm system, also central office fire alarm box in first story and watchmen's stations are visited hourly during the night; that there is no boiler room in the building, steam being supplied from outside sources and proposes to rearrange the house supply lines at the tank so that there will be a reserve of 2,500 gallons for the standpipe supply; and

WHEREAS, there now exists a roof gravity tank of 3,000 gallon capacity.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that there shall be reserved for the use of the existing standpipe system not less than 2,500 gallons of water at all times, and that the standpipe system shall comply with the rules in all other respects; that there shall be provided and maintained in each room of the roof structure an approved one-quart fire extinguisher, and that there shall be provided at each end of the corridor of the roof structure a 2½-gallon fire extinguisher; that the building shall not be increased in height, area or dimension, and granted only as long as conditions as to occupancy and use remain unchanged.

BUILDING ZONE CASES.

THE RESOLUTION—

(1236-27-BZ)

WHEREAS, Theodore Smith, owner, filed, November 22, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southeast corner of Woodhaven boulevard and 163rd avenue (Sheridan avenue), Aqueduct, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 29, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Woodhaven boulevard is in a business district; 163rd avenue, east of Woodhaven boulevard, is in a business district; 163rd avenue, from Woodhaven boulevard to a point 100 ft. west, is in a business district, and 163rd avenue, west of a point 100 ft. west of Woodhaven boulevard, is in an undetermined district; and

WHEREAS, the decision of the fire department, rendered September 21, 1927 (re Plan No. 2963-1927), reads:

"1. A gasoline service station may not be permitted in a business district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 30 ft. on Woodhaven boulevard and 84.37 ft. on 163rd avenue, upon which it is proposed to erect a small office, 10 ft. by 15 ft. in area, and to install four gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the property lies on a corner formed by the intersection of Woodhaven boulevard and the easterly termination of 163rd avenue, which is dead ended at this property line; and

WHEREAS, the applicant has filed 87 per cent. consents of an area fixed by this board and deemed affected, complying with rule 7, subdivision g, in principle as to spirit and intent.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be installed a concrete curbing 12 inches in height above grade by 12 inches in depth along the building line, with not more than two driveway entrances on the boulevard front not exceeding 10 ft. in width; that no gasoline pump shall be erected within 10 ft. of the building line on the Woodhaven boulevard frontage; that any building erected thereon shall not exceed a height of one story, the exterior of which shall be finished with light-colored face brick with Spanish tile type roof; that all permits required shall be obtained within six months and all work involved completed within one year from the date of this action.

THE RESOLUTION—

(10-28-BZ)

WHEREAS, John M. Montfort, for Louis Adler Realty Corp., owner, filed, January 6, 1928, an application, under the building zone resolution, to permit in a one and one-half times height district the erection and maintenance of the street walls in excess of the height permitted under the zone resolution; premises 63-91 King street, 189-205 Varick street, 243-267 West Houston street and 366-384 Hudson street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 29, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that the area east of a north and south line located 100 ft. east of Hudson street is in a one and one-half times height district and that the area west of this line is in a two times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 6, 1927 (re N. B. App. No. 377-1927), reads:

"10. Walls on King Street and West Houston Street are of excessive height. Zone Resolution, Section 8.";

and

WHEREAS, the proposed building is to be of fireproof construction, twelve stories in height, with a frontage of 200 ft. 7¼ in. and a depth of 400 ft. 9½ in.; to be occupied as a storage building (United States appraiser stores); and

WHEREAS, it is proposed to erect the street walls to a height of 165 ft. 1 in. without a setback; and

WHEREAS, the square area of the wall in excess of height regulation at the street front on King street and West Houston street involves a triangular bulk of structure 85 ft. above the sidewalk and for a height therefrom of not more than 15 ft. with an average depth of 2½ ft.; and

WHEREAS, the applicant proposes in lieu of this small additional height at street front to provide two outer courts, 136 ft. long by 21 ft. in depth on street fronts immediately contiguous; and

WHEREAS, the board deems the substitution a reasonable variation as an adjustment within the purview of the regulations; and

WHEREAS, this property is under contract for acquisition by the United States Government upon completion.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the height district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be erected strictly in accordance with plans and designs of record as filed in this application, providing and maintaining all outer courts as indicated on plans; that the building otherwise shall be erected strictly in accordance with the zoning regulations in all other respects, and that all permits shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

THE RESOLUTION—

(1067-27-BZ)

WHEREAS, Philip J. Sinnott, for Glenhall Realty Co., Inc., owner, filed, October 3, 1927; amended April 24, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises northwest corner of Kossuth place and Shaler street, Ridgewood, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 29, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Shaler street, west side, is in a business district; Shaler street, east side, is in an unrestricted district; Kossuth place, east of Shaler street and Van Cortlandt avenue, is in an unrestricted district; Kossuth place, west of Shaler street and Van Cortlandt avenue, is in a business district; Van Cortlandt avenue, west side, is in a business district; Van Cortlandt avenue, east side, is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 11, 1928 (re N. B. 2744-1928), reads:

"1. The erection of a gasoline station in a business district is contrary to the Zone Law."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 170 ft. 8 in. on Kossuth place and 86.4 ft. on Shaler street; it is proposed to erect (at the southeast corner) on a portion of the plot having a frontage of 45 ft. on Shaler street and 80 ft. on Kossuth place, a small accessory store and to install four gasoline storage tanks and the necessary pumps and piping for a gasoline service station; and

WHEREAS, this plot is of irregular shape, formed approximately by two triangular sections and facing on two street fronts, the opposite side of each front being in an unrestricted use district designation, and on the easterly side the property faces and is contiguous to a railroad embankment of considerable height; and

WHEREAS, the adjoining extensive contiguous area immediately affected gives consent; and

WHEREAS, there is a private right-of-way from this contiguous property, the use of which is established for the egress and ingress of automobiles of the dwellings lying to the north of the premises under appeal; and

WHEREAS, the board deems an adjustment under section 21 would be justifiable.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected throughout the interior of the property line a wall of masonry construction, not less than 10 ft. in height, faced on the interior of the premises under appeal with enamel brick, coped with architectural terra cotta; that there shall be incorporated in the wall erected at the rear of this property line two openings for the accommodation of the automobiles from and to the private right-of-way; that there shall be erected on the building line of the premises a concrete curbing not less than 12 inches in height above grade and 12 inches in depth, with

not more than one driveway on Shaler street and not more than two driveways on Kossuth place; that no gasoline pump shall be erected within 10 ft. of the building line; that any building erected thereon shall be restricted in height to a one-story structure, finished on the exterior with enamel brick and roofed with vitrified Spanish tile or variegated slate, and that all permits shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

THE RESOLUTION—

(937-27-BZ)

WHEREAS, Philip J. Sinnott, for Abraham Linsky, owner, filed, August 19, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 5338-5342 Kings Highway, northwest corner of Farragut road, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 13, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kings Highway is in a business district, Farragut road is in an unrestricted district and East 52nd street is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 11, 1927 (re App. No. 3956-1927), reads:

"Application denied, contrary to Art. 2, Sec. 4-a-46 of Zone Resolution.

"Erection of gasoline station in business district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 54.09 ft. on Kings Highway and 114.4 ft. on Farragut road, upon which is located a one-story frame, cement block factory; it is proposed to erect upon the plot a one-story brick office and accessory store, four gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, this plot faces on Farragut road directly in front of the railroad embankment and projects on its westerly line into an unrestricted district; and

WHEREAS, this application was granted by the board at its meeting, March 13, 1928, on certain conditions, and applicant requested a modification of these conditions as to the height of the brick wall required and the board granted this variation.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected on the northerly property line a brick

MINUTES

wall, not less than 8 ft. in height above grade, with return abutment on the westerly property line, said wall to be finished on both sides with light-colored face brick; that any existing non-fireproof structure shall be demolished and removed; that the premises shall be occupied by not more than one building not exceeding 15 ft. by 20 ft. in area, for the use and convenience of patrons and as an office of business conducted on the premises; that this one-story building shall be finished on the exterior with light-colored face brick or enameled brick, the roof finished with variegated slate or vitrified tile of Spanish type; that there shall be constructed on the building line of this plot on the Kings Highway and Farragut road sides a concrete curb not less than 18 in. in height and 12 in. in width, with not more than one driveway to the Kings Highway front; that the gasoline pumps shall be installed not less than 10 ft. inside the building line on the Kings Highway front; that there shall be no portable gasoline tanks maintained or operated on these premises; any advertising display shall be restricted to the walls on the interior of the lot and the glass globes of the gasoline pumps; that all permits required shall be obtained within six months and all work involved completed within one year from the date of this action.

APPROVAL OF PLANS.

482-27-BZ.

APPLICANT—William F. Doyle, for Henry Meyer and Levander Nelson, owners.

SUBJECT—Application for approval of plans in accordance with resolution adopted by the board on November 18, 1927.

PREMISES AFFECTED—West side of Forest Parkway, 377.35 ft. north of Jamaica avenue, Woodhaven, Borough of Queens.

APPEARANCES—None.

ACTION OF BOARD—Chairman read engineer's report. Engineer's report adopted; plans approved in accordance therewith.

THE VOTE TO ADOPT REPORT AND APPROVE PLANS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative	0
Absent: Chief Kenlon.....	1

AREAS FIXED.

(454-28-BZ)

The chairman presented and read a communication from Robert Tappan, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a residence district the erection and maintenance of a colony of forty-seven one-car garages as an accessory use to proposed adjoining private dwellings; premises east side of Martel street, 100 ft. south of Queens boulevard, Forest Hills, Borough of Queens.

The following area was approved by the board:

Both sides of Martel place and also Payne place from Queens boulevard to Austin street; also the south side of Queens boulevard from Martel place to Payne place.

(455-28-BZ)

The chairman presented and read a communication from Alfred J. Boulton, requesting the board to fix an area deemed affected and within which to obtain consents to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 867-879 Gravesend avenue, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Gravesend avenue from a point 100 ft. north of Avenue F to 18th avenue; the south side of Avenue F from Gravesend avenue to East 2nd street; the west side of East 2nd street from Avenue F to a point 250 ft. south of Avenue F.

Adjourned 1.15 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION—

(1240-27-S)

WHEREAS, Kaufman & Weinberg, for Franciskay Corp., filed, November 25, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 224-232 West 35th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 29, 1927 (Order No. 9946-LD), reads:

"1. Remove all partitions not constructed of combustible material on all stories as per Sec. 270 of the Labor Law."

and

WHEREAS, the building is fireproof, seventeen stories in height, 100 ft. by 98 ft. 9 in. in area at first story and 100 ft. by 88 ft. 9 in. in area above; OCCUPIED: 1st story, store; upper stories, offices, showrooms and 25 per cent. manufacturing (mostly women's garments), 80 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, partitions not constructed of incombustible materials have been erected on the second story, 3rd story (rear), fourth story, fifth story, sixth story (rear) and on the seventh to 17th stories, inclusive; and

WHEREAS, petitioner contends that the partitions do not interfere with the sprinkler system or with the means of egress from the building.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the petition be and it hereby is denied.

1333-27-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Far Eastern Manufacturing Co., lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—7-15 Richards street, Brooklyn.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

THE RESOLUTION—

(1333-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for William Rich, owner, filed, December 23, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 7-15 Richard street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 5, 1927 (Order No. 24146-LD), reads:

"2. Extend the interior stairway at the E.S. of building to the roof, as per Section 271 Labor Law;"

and

WHEREAS, the building is non-fireproof, four stories in height, 100 ft. by 80 ft. in area at first story and 100 ft. by 38 ft. in area above; OCCUPIED by one concern for dessicating coconut: 1st story, 5 persons; 2nd story, 1 person; 3rd story, 2 persons; 4th story, 16 persons; EXITS: an interior iron stairway, extending from the first story to top story, enclosed in angle iron and corrugated iron partitions with fireproof doors at openings; ROOFS of adjoining buildings: to south, same level; to north, three stories lower; and

WHEREAS, petitioner proposes to erect a standard fire escape on the front of the building, having a stairway from the fourth (top) story balcony to the roof and requests the acceptance of this stairway as a compliance with the order.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that a fixed double-rung iron ladder shall be provided within the top story to the scuttle in the roof; that a standard labor law fire escape shall be erected on the front of the building at the southerly end of structure; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

MINUTES

1337-27-S.

PETITIONER—William F. Doyle, for Courtlef Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—158-162 West 26th street, 263-281 Seventh avenue and 165-167 West 25th street, Manhattan.

THE RESOLUTION—

(1337-27-S)

WHEREAS, William F. Doyle, for Courtlef Realty Corp., filed, December 23, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 158-162 West 26th street, 263-281 Seventh avenue and 165-167 West 25th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated December 14, 1927 (N. B. Applic. No. 540-1927), reads:

"1. All windows must comply with the requirements as set forth in Sections 264, subdivision 7, of the Labor Law.";

and

WHEREAS, the building, facing on three street fronts, is fireproof, twenty-six stories in height, 197 ft. 6 in. by 115 ft. 2 in. in area; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent. manufacturing, 280 persons per story; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are windows in each of the three street walls on the first, second, third and fourth stories of the building glazed with $\frac{1}{4}$ -inch plate glass; the maximum area of the glass on the first story being 9 ft. by 19 ft. (171 sq. ft.) in area and on the second, third and fourth stories being 6 ft. by 10 ft. (60 sq. ft.) in area; and

WHEREAS, petitioner contends that the frames of the windows in question are constructed of cast iron and that only the alternate transoms above the show windows on the first story will be pivoted and contends, further, that a strict compliance with the labor law requirements as to windows would destroy the intended use of the lower four stories and also would detract from the architectural features of the building.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, so far as it affects the windows on the street front of the first, second and third stories only, *on condition* that the center light in each triple mullion window shall be glazed with wire glass in fixed sash; that the sash, other than the center opening throughout on the second and third stories shall be of the double-hung type; that all these window openings shall be equipped with approved metal frames and sash; the double-hung sash, if not glazed with wire glass, shall be glazed with $\frac{1}{4}$ -inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

1204-27-S.

PETITIONER—Ludwig Hanauer, for Josberg Realty Co., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—361 East 182nd street, northwest corner of Webster avenue, The Bronx.

APPEARANCES—

For Petitioner: Ludwig Hanauer.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

THE RESOLUTION—

(1204-27-S)

WHEREAS, Ludwig Hanauer, for Josberg Realty Co., owner, filed, November 14, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 361 East 182nd street, Borough of The Bronx; and

WHEREAS, the decision of the superintendent of buildings, dated April 14, 1928 (N. B. 2347-21), reads:

"Your request for a certificate of occupancy for stores and factory in the existing building, No. 361 East 182nd Street, northwest corner of Webster Avenue, Bronx, to be occupied as stores and factory is hereby denied as the building is a two-story brick building erected under plans and applications N. B. 2347 of 1921, to be occupied as stores and offices. The premises are located in a business district as established by the Building Zone resolution, and the exits do not comply with the requirements of the State Labor Law for factory purposes as the building is not provided with two fireproof stairs 3' 8" in width enclosed with fireproof material as required by the Labor Law.";

and

WHEREAS, the building, facing on two street fronts, is non-fireproof, two stories (25 ft.) in height, 25 ft. by 100 ft. in area at first story and 25 ft. by 90 ft. in area above; OCCUPIED: 1st story, stores; 2nd story, manufacture of dresses, 25 persons; EXITS: an interior iron stairway, extending from the first story to second (top) story, enclosed in 8-inch brick and 4-inch terra cotta block partitions with fireproof doors at openings, there being two gooseneck ladders leading from the one-story extension roof at westerly portion of premises to main roof of building in question and to the roof of premises to the west; ROOFS of adjoining buildings are at same elevation; and

WHEREAS, the petitioner proposes to provide on the second story of the 182nd street front of the building a standard fire escape consisting of an iron balcony with counterbalanced stairway leading to street and proposes to limit the occupancy of the building above the first story to twenty-five persons.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the petition be and it hereby is *denied*.

3-28-S.

PETITIONER—Gronenberg & Leuchtag, for Roher Real Estate Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—494-496 Eighth avenue and 264-266 West 35th street, southeast corner, Manhattan.

THE RESOLUTION—

(3-28-S)

WHEREAS, Gronenberg & Leuchtag, for Roher Real Estate Co., Inc., owner, filed, January 3, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 494-496 Eighth avenue and 264-266 West 35th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated December 19, 1927, reads:

"10. Exterior openings including store and show windows should comply with Section 264 Labor Law and Rule 503 Industrial Code.";

and

WHEREAS, the building, facing on two street fronts, is fireproof, twenty-three stories in height, 48 ft. 4½ in. by 100 ft. in area; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent. manufacturing, 70 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are windows in both street walls of the building on the first, second and third stories glazed with ¼-inch thick plate glass; the maximum area of the glass on the first story being 120¼ sq. ft. on the West 35th street front and 90 sq. ft. on the Eighth avenue front; the maximum area of the glass on the second and third stories being 21.65 sq. ft.; and

WHEREAS, petitioner contends that strict compliance with the labor law as to the area of the glass would destroy the intended use of the three stories in question; and

WHEREAS, the window openings on the second and third stories are triple mullion windows, no light exceeding an area of 4 ft. 4 in. by 5 ft.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows of the three lower stories, street front, *on condition* that all openings shall be equipped with approved metal frames and sash, glazed with ¼-inch polished plate glass, and that the total area of glass of any opening shall not exceed a square area of 4 ft. 4 in. by 5 ft., and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION—

(1342-27-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Fred Pflueger, Inc., owner, filed, December 24, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 3648 Park avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated June 14, 1927 (Order No. 22680-LD), reads:

"1. Arrange iron bars on windows on north, south and east sides on first story so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purpose of egress, as per Section 272 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, one clere story in height (with a two-story section at front and rear), 25 ft. by 150 ft. in area; OCCUPIED: 1st story, silk washing and dyeing; 2nd story, drying room, 7 persons in entire premises; EXITS: two interior wooden stairways, extending from the first story to top story, enclosed in wood partitions with wood doors at openings; and

WHEREAS, on the first story of the building there are fifteen windows in the south wall, two in the east wall and twelve windows in the north wall covered with iron bars; and

WHEREAS, petitioner contends that the contents of the building are very valuable; that the brick floors of the first story are continually wet; that the three means of exit are adequate and requests the acceptance of the existing conditions; and

WHEREAS, this is a one-story building with an extensive open yard immediately to the north in the same and single ownership and a three-foot strip to be maintained as a passageway throughout the southerly gable of the premises leading direct to street in the same and single ownership.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that an exit approximately in the center of the building shall be provided on the southerly side of the premises to open, unobstructed passageway extending directly to the street shall be maintained; that an exit door shall be provided in the northerly gable, opening into an open yard of extensive area in the same ownership with egress therefrom to the street; that the existing iron bars to each third window throughout each gable shall be made movable or removable; that the building shall be not increased in height or area, and this variation is granted only as long as conditions as to exits, uses and occupancy remain unchanged.

(1338-27-S)

WHEREAS, William F. Doyle, for Shaw & Sanford, owner, filed, December 23, 1927; amended May 29, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner and a decision of the superintendent of buildings, affecting premises 1985-1993 Jerome avenue, Borough of The Bronx; and

WHEREAS, the orders of fire commissioner, dated November 29, 1927, read:

MINUTES

"Order No. 29021-LD:

"1. Extend the interior stairway at north side of building to roof as per Sec. 270 of the Labor Law."; and

"Order No. 29022-LD:

"1. Arrange all exit doors to interior stairways to open outwardly. Sec. 270 of the Labor Law."; and

WHEREAS, the decision of the superintendent of buildings, dated January 5, 1928, reads:

"A certificate of occupancy for the building at above mentioned location for occupancy as stores on first floor and factory on second floor is hereby denied as exits do not comply with the Labor Law and a factory use in a business district would be contrary to the Building Zone Resolution."; and

WHEREAS, the building is non-fireproof, two stories (24 ft. 6 in.) in height, 108 ft. 4 in. by 75 ft. in area; OCCUPIED: 1st story, stores, 10 persons; 2nd story, offices, billiard room and factory (manufacturing dresses), 37 persons, 12 persons being engaged at factory work; EXITS: two interior fireproof stairways, the southerly stairway extending from the first story to roof, and the northerly stairway extending from the first to second (top) story, enclosed in fireproof partitions with fireproof doors at openings; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner contends that the south stairway extends to the roof and requests the acceptance of the existing stairway at the north end of the premises; and contends, further, that the fireproof doors leading to the two enclosed stairs do open outwardly and, in view of the light occupancy of the building, requests that the doors, opening in, on the corridor on the second story be permitted to remain as they are.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 29021-LD, Item 1, *on condition* that a fixed double-rung iron ladder shall be installed in the jog of the stair hall enclosure at the northerly end of public corridor, second story; *granted*, as to Order No. 29022-LD, Item 1, *on condition* that all doorways to stair hall enclosures shall be in accordance with the requirements of the labor law, and *granted*, as to the decision of the superintendent of buildings, re N. B. 1178-1925, of January 5, 1928, *on condition* that the building shall be not increased in height or area; that the factory occupancy shall be limited to one room at the northwesterly front of building, restricted to the conduct of light needlework industry, with the factory occupancy limited to fifteen persons, under single tenancy; that the factory occupancy of these premises shall at no time exceed twenty-five per cent. of the area of the building.

THE RESOLUTION—

(22-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Abrast Realty Corp., owner, filed, January 11, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 408-412 Fulton street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 1, 1927 (Order No. 25173-LD), reads:

"1. Arrange the fire escape on the southwest end of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.

"Among the defects noted are the following:

"1. Connecting stairs not 60 degree.

"2. No counterbalanced stairway from lowest balcony.

"3. Windows on course not fireproof, self-closing.

"2. Provide a means of egress from workroom on 2nd story to interior stairway located at east side of building. Sec. 271 of the Labor Law.

"3. Enclose the interior stairway at the east side of the building serving as a required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fire-resisting material extending from 1st story to the underside of roof beams as per Sec. 271 of the Labor Law and rule 6, Board of Standards and Appeals, adopted Feb. 23, 1927."; and

and

WHEREAS, the building is non-fireproof, three stories in height, 45 ft. by 90 ft. in area; OCCUPIED: cellar, shipping department (clothing), 5 persons; 1st story, clothing store, 10 persons; 2nd story, workroom, 9 persons; 3rd story, offices and salesroom of dental supplies, 43 persons; 52 persons above the first story; EQUIPPED with a fire alarm signal system; EXITS: an interior stairway, extending from the first story to third story, having steel risers and marble treads from the first to second story and wood on the second to third story, enclosed in wood stud, lath and plaster partitions with wood doors at openings; a fire escape on the southwest end of the building, having fireproof and, also, some non-fireproof openings along the course thereof, consisting of a balcony at the third story with a stairway connecting to the balcony at the second story from which there is a drop ladder in guides leading to street; also, at the second story there is another iron platform and drop ladder leading to the street; ROOFS of adjoining buildings: to south, same level; to east, three stories higher; and

WHEREAS, petitioner, as to Item 1, proposes to fireproof all openings along the course of the fire escape; as to Item 2, contends that there is now provided on the second story an accommodation stairway (near the south wall of the building) and proposes to cut a doorway in the easterly dividing partition of the workroom, and as to Item 3, contends that this order was based on the small factory occupancy in the alteration department and requests the acceptance of the existing interior stairway.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 25173-LD, Item 1, only so far as it affects the egress from the lowest balcony of the fire escape, *on condition* that two counterbalanced drop ladders in guides shall be provided from the lowest balcony to the ground, and that the fire escape shall comply with the labor law in all other respects; *granted*, as to Item 2, *on condition* that there

MINUTES

shall be provided a doorway in the northerly partition from the "workshop" of the second story to open loft, the opening to be provided with a fireproof, self-closing door, not less than 44 inches in width, and *granted*, as to Item 3, *on condition* that the building shall be not increased in height or area; that the industrial occupancy of these premises shall be confined to a single "workshop" on the second story, southwesterly portion, and that the number of persons employed therein shall at no time exceed ten, limited to the minor adjustments, alterations and repairs of merchandise purchased on the premises.

APPLIANCES SUBMITTED FOR APPROVAL.

328-27-SA.

PETITIONER—Frank A. Holby Corp.

SUBJECT—Application for reopening,—modification—re approval of Holby Oil Burner.

APPEARANCES—

For Petitioner: W. H. Holby.

ACTION OF BOARD—Petition placed on reserve calendar, subject to inspection by a committee of the board.

167-26-SA.

PETITIONER—James Kearney.

SUBJECT—Approval of Johnson Automatic Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Petition withdrawn on written request.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Deputy
Chief Martin..... 5

Negative 0
Absent 0

1290-27-SA.

PETITIONER—Edwards & Co., Inc.

SUBJECT—Edwards Tank Sentinel, approval of.

APPEARANCES—

For Petitioner: Frederick Smith.

For Administration: Inspector Maher.

ACTION OF BOARD—Petition approved.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Deputy

THE RESOLUTION—

(1290-27-SA)

WHEREAS, Edwards & Co. filed, December 13, 1927, a petition with the board of standards and appeals for approval of their device known as the Edwards Standpipe and Sprinkler Closed Circuit Alarm System, 110 Volt A.C. and D.C. (Edwards' Tank Sentinel); and

WHEREAS, the fire department, under date of May 18, 1928, has recommended the approval of this device in accordance with the report of the electrical division.

Resolved, that the board of standards and appeals does hereby approve the device known as the Edwards' Tank Sentinel in accordance with the report of the electrical division of the bureau of fire prevention of the fire department.

Adjourned 4.30 p. m.

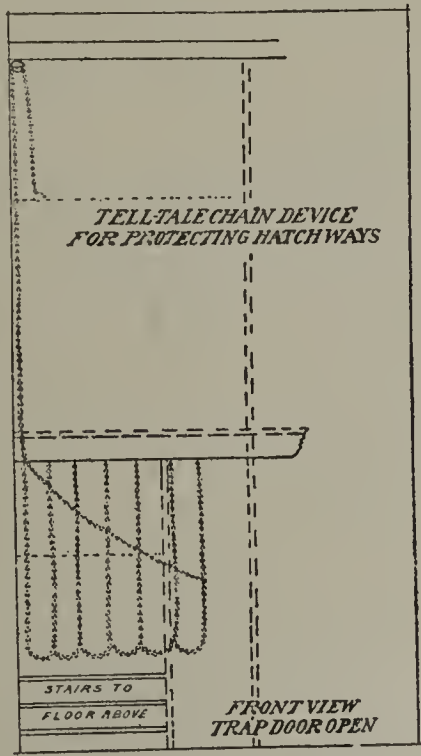

WILLIAM J. O'GORMAN, Secretary.

RULES

HATCHWAY PROTECTION.

The board of appeals, in acting on Cal. 1690-18-A, adopted a resolution in relation to the protection of hoistways over the entrance to stairways. This resolution permitted tell-tale chains to be provided instead of the customary bulkhead or platform. The accompanying diagrams show the method of operating the tell-tale chains. These chains have links

$\frac{5}{8}$ in. in width and a bar diameter of $\frac{1}{8}$ in. The normal position of the chains when the trap door is closed is pulled up against the ceiling and side wall. When the trap door is opened, the loop ropes sustaining the chain drop down and the chains form a curtain across the entrance doorway and across the foot of the stairs.

RULES

"STANDPIPE"- "FIRELINE" RULES ADOPTED JUNE 27, 1922

AMENDED MAY 18, 1928

[281-22-SR]

Rule 1. PLANS. A preliminary set of paper plans and cross sections, drawn clearly and distinctly, to a scale of $\frac{1}{4}$ -inch or, by permission of the Fire Commissioner, $\frac{1}{8}$ -inch to the foot, for each proposed standpipe (fire line) installation or alteration, shall be submitted to and approved by the Fire Commissioner before the work in connection with the installation is started. Such preliminary plans shall show the size and location of the standpipe (fire line) risers, size and location of siamese and cross-connections, valves, tanks and connections, pumps, hose stations, lengths of hose, etc., and the location of stairways and enclosing partitions in relation to the standpipe risers and hose stations. From these approved preliminary plans, three sets of plans on cloth, in clean and clear detail, shall be filed for final approval by the Fire Commissioner. A certified copy of approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If an automatic sprinkler system is provided throughout the building or in any portion of the building, the plans shall include a note to that effect.

Rule 2. APPROVAL. Before acceptance all standpipe (fire lines) shall be tested, for at least one hour, under a hydrostatic pressure of not less than 300 pounds per square inch at the street siamese, and at each pump supply level, or such additional pressures as may be required to give 100 pounds at the highest hose outlet supplied by such pump, except that when a change is made in a source of supply, or minor changes are made in an existing equipment previously approved, the system shall be tested to a pressure sufficient to give 50 lbs. per sq. in. at the highest story hose outlet. These tests to be made in the presence of a representative of the Fire Prevention Bureau.

No valves, risers, or other material portions of any standpipe (fire lines) equipment shall be covered or permanently concealed until tested and approved, in writing, by the Bureau of Fire Prevention.

When entirely completed in accordance with the approved plans, and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the standpipe equipment is approved, the applicant will be so advised, in writing, by the Bureau of Fire Prevention.

When deemed necessary by the Fire Commissioner, sectional diagrams of the standpipe (fire line) equipment in buildings of large area or height, not more than three in number and printed on cloth in size not less than $8\frac{1}{2} \times 11$ in., shall be filed by the applicant for the use of fire companies in the district in which the premises are located.

Rule 3. STANDPIPE-FIRE LINE CERTIFICATE. The engineer, superintendent or persons in charge of the standpipe-fire line system in all buildings exceeding eighty-five feet in height shall be registered, and submit to an examination in the Fire Department. Upon evidence of fitness to properly operate and maintain the standpipe system he shall be granted a Certificate to that effect. The certificate shall contain the full name and a small photograph of the holder.

Day and night service shall be maintained in all buildings exceeding 250 ft. in height in which there is a fire pump.

Theatre buildings provided with fire pumps shall have at least one certified operator on duty during every performance. Buildings of large areas, industrial plants, amuse-

ment parks, etc., shall have at least one certified operator on duty when deemed necessary by the fire commissioner.

Rule 4. MONTHLY INSPECTION. All valves, hose, tools and other auxiliary fire appliances shall be kept in perfect working order, and at least once a month the person holding certificate of fitness shall make a thorough inspection of all the fire appliances to see that they are in perfect working order and ready for immediate use by the Fire Department. Fire pumps shall be tested every 30 days by the person holding the certificate of fitness.

He shall also instruct all employees under his charge in the use and practice of all auxiliary fire appliances. A detailed record of each inspection shall be kept on the premises for examination by a representative of the Fire Department.

All standpipe equipment in buildings exceeding 85 ft. in height shall be subject to a flow test with a pressure of not less than 50 lbs. at the top floor outlet, at least once in every two years, test to be conducted in the presence of a representative of the Fire Department.

Rule 5. APPROVED DEVICES. All devices approved for use in new standpipe fire line equipments shall bear the manufacturer's name and the date of and the number of the approval. Certified copies of the approval, working drawings and photographs of the device approved, shall be submitted to the administrative authority having jurisdiction for preservation as records and reference data.

Rule 6. ELEVATOR IN READINESS. In every building exceeding 150 feet in height at least one passenger elevator and in buildings in course of construction a hoist or elevator shall be kept in readiness for immediate use by the Fire Department during all hours of the night and day, including holidays and Sundays, and a man competent to operate the elevator shall be present at all times.

Rule 7. AREA OF BUILDINGS. For the application of Section 581 of Chapter 5 of the Code of Ordinances the area of a building shall be taken as the area within the exterior walls, or the area between fire walls.

When the fire walls are constructed in accordance with Section 371, Chapter 5 of the Code of Ordinances, and all openings are protected on both sides of fire wall or walls with automatic fireproof self-closing doors, the area within such fire walls or exterior walls and a fire wall, shall be considered a separate building.

Rule 8. HEIGHT. The term "height" as applied to a building or structure, as described in Chapter 5, Code of Ordinances, means the vertical distance measured in a straight line from the curb level, to the highest point of the roof beams in the case of flat roofs, and to the average height of gable in case of roofs having a pitch of more than 20 degrees with a horizontal plane.

Rule 9. STANDPIPE EQUIPMENT shall consist of a system of piping connected to one or more approved sources of water supply and provided with sufficient number of hose outlets and hose located as hereinafter set forth, to make possible the covering of every portion of each floor area with a standpipe hose stream, except that where the 1st story or basement or both are occupied as stores without connection or communication with the entrance hall or stair enclosure to upper stories, the Fire Commissioner may permit the omission of standpipe protection in such stores and, if so omitted, may prescribe such portable protection as he may deem necessary. Cellars, sub-cellars, basements, etc., shall be protected in the same manner as the stories above.

RULES

Every standpipe (fire line) equipment shall be a Standard Wet System, except as hereinafter provided for:

(a) In any building not exceeding 40 feet in height, and 20,000 sq. ft. in area, a four-inch street supply system having one four (4) inch direct connection to a street main fed two ways or having one 4-in. direct connection to each of the two street mains on two street fronts, each main so fed that the shutting off of one main will not interfere with the supply of the other main, may be installed, provided there is a sufficient pressure in the street main or mains to maintain a minimum of twenty-five (25) pounds per square inch static pressure at the highest hose outlet.

Evidence establishing the fact that water main conditions and pressures are as required shall be submitted to the Fire Department.

Rule 10. CLASSIFICATION OF STANDPIPE-FIRE LINE EQUIPMENTS. For the purpose of these rules standpipe equipments shall be classified as:

(a) Standard Wet System in which the pipes are of sizes as specified in Section 581 of the Building Code, and in which the system is at all times filled with water from at least one standard source of supply.

(b) Four-inch street connection system, in which the pipes are of sizes as specified in Section 581 of the Building Code and the system is at all times filled with water from one or more 4-in. diameter direct connections to public water mains in the street.

(c) Automatic dry systems, in which the pipes are of sizes as specified in Section 581 of the Building Code, and are normally dry, the system being connected to a source of water supply controlled by an automatic dry pipe valve as defined elsewhere in these rules.

Rule 11. TANKS ABOVE ROOF. Construction shall be as per Section 428 of the Building Code and tank structure and supports shall be approved by the Superintendent of Buildings. The covers of all unenclosed standpipe tanks shall be conical in shape and protected with a type of roofing approved by the Superintendent of Buildings.

Rule 12. RESERVE FOR STANDPIPE. Gravity roof tanks, except as otherwise required by Rule 83, shall contain not less than 3,500 gallons of water at all times, reserved solely for standpipe fire line purposes.

When a gravity tank is to be used for both standpipe and house supply, the connection for the latter shall be made through the side of the tank above the level of the required standpipe reserve. This type of house and standpipe supply tank is preferred and recommended.

When two gravity tanks are used, one for standpipe fire line service and the other for the house supply, the house supply tank may be so arranged that it can only be filled by an overflow from the tank used for standpipe fire line purposes.

Rule 13. STANDPIPE AND SPRINKLER SUPPLIES. Standpipe and sprinkler supply shall not be taken from one tank unless there is available 5,000 gallons of water for the standpipe system which shall be in excess of the amount of water required for the sprinkler system. Standpipe supply shall be taken from the uppermost portion, and through the side of the tank, or through the bottom, provided that portion of the pipe within the tank is of brass or other non-corroding material.

Rule 14. BUILDINGS IN GROUP UNDER THE SAME OWNERSHIP AND OPERATION:

One gravity tank of at least 5,000 gallons water capacity to supply the largest unit of a group of separate and distinct buildings operating under one ownership, and located at such elevation that the bottom of the tank will be at least 20 feet above the roof of the highest building of the group, will be accepted as an adequate tank supply for the entire standpipe equipment, provided a dead riser is carried down from the bottom of the tank to an underground header system having a Post Indicator control valve for each building

unit, the P. I. valves to be located as the Fire Commissioner may direct.

Rule 15. UNDERGROUND PIPING. All underground piping shall be extra heavy cast iron installed in accordance with the standard specifications of the American Water Works Association: for 4-inch lines Class C requirements shall be used, 6-inch Class D, 8-inch Class E.

Rule 16. ADDITIONAL TANKS. When, in his opinion, the area covered is excessive or the occupancy is such that an unusual fire hazard is introduced, the Fire Commissioner may require additional protection in the nature of additional tank or tanks located remote from any other standpipe tank, or additional water supply in the main gravity tank, or a fire pump and suction tank of size and capacity to be determined by the Fire Commissioner or the Board of Standards and Appeals, or a combination of any of the foregoing supplies.

Rule 17. STANDARD SOURCE OF SUPPLY. Gravity tank located so that the bottom of same will be not less than 20 feet above the roof level and of a capacity as stated elsewhere in these rules and directly connected with the standpipe equipment by pipes of the same diameter as that of the largest riser.

Rule 18. TANK FEED. Tanks shall not be fed through the standpipe fire line, but shall be fed through a separate line at least 2 inches in diameter, discharging into the top of each tank above the overflow level through the side or through the bottom, that portion of the pipe within the tank to be of brass or bronze. An electric or steam pump of sufficient capacity to deliver at least 65 gallons of water per minute at the tank shall be provided, or if the pressure in the service line is sufficient and the plumbing is such that a minimum of 65 gallons of water per minute may be delivered to the tank, connection to the house water service main in the basement, cellar or lowest story may be used instead of pump.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, when a ball (float) valve is provided for each tank. Floats shall be of copper.

Rule 19. OVERFLOW. An overflow of diameter at least as large as that of the fill line shall be provided for each roof standpipe tank. The overflow line from all intermediate tanks shall be at least 6 inches in diameter. It may be run through the bottom of the tank, provided it is of brass or bronze and has no joint inside of the tank, otherwise it must be brought through the side of the tank, 3 inches below the top (of sides). Overflows shall terminate in a 90 degree elbow not more than 24 inches above the roof.

Rule 20. EMERGENCY DRAIN. There shall be provided for each tank an emergency drain not less than 4 inches in diameter connected directly to the bottom of the tank or to the standpipe supply line above the tank check, and terminating not less than 30 inches nor more than 4 feet above the roof in a horizontal run. Emergency drain shall be provided with a 4-inch O. S. & Y. gate valve located in a readily accessible position not more than 4 feet above the roof.

Rule 21. ELEVATION OF TANK. The bottom of each gravity tank used for standpipe fire line supply shall be at least 20 feet above the level of the roof. When the area of a pent house exceeds 50% of the roof area or when it exceeds an area of 2,500 sq. ft., the bottom of the tank shall be required to be not less than 20 ft. above the level of the pent house roof. In existing standpipe equipment the bottom of the gravity standpipe tank shall not be required to be more than 20 feet above the outlet in the highest story.

Rule 22. PYRAMID OR TOWER ROOFS. Where the roof of the building is designed so as to finish in a

RULES

pyramid or tower form, the gravity tank shall be elevated as high as practicable, within the pyramid or tower. Provided, however, that in all cases, the gravity tank is not less than twenty (20) feet above the hose outlet in any room or space occupied other than for tank houses, elevator machinery or machine shop for repairing elevator machinery. Fire appliances, as may be required by the Fire Commissioner, shall be provided in such tank houses, elevator machine rooms, etc.

Rule 23. ACCESS TO TANK. Access to the top of each standpipe tank shall be provided by means of an iron gooseneck ladder of substantial construction and rigidly braced. Access to the tanks on theatre building shall be from the stage level to the roof by means of double-rung ladders set at an angle of not more than 70°, with intermediate landings every 12 ft. or less.

Rule 24. HIGH AND LOW WATER ALARM. Every gravity tank hereafter installed for standpipe fire line purposes shall be equipped with an electric closed circuit high and low alarm as provided under Rule 88, in order that it may be determined at any time whether or not the required standpipe reserve is in the tank, except when the house supply is taken from the tank, or where the house supply tank can only be filled from an overflow of the standpipe fire line reserve tank, a high and low alarm need not be provided when an automatic tank filling pump is installed.

Rule 25. CHECK VALVE. There shall be provided in a horizontal run of pipe in the top story stair enclosure or in a heated enclosure on the main roof, in the line connecting the standpipe tank with the standpipe riser, an approved type swing check valve opening downstream toward riser, except that where a siamese connection has been omitted, under these rules, no check valve shall be required. An O. S. & Y. gate valve shall be provided on each side of the check valve and shall be sealed open in an approved manner.

Rule 26. HEATING OF TANKS. All tanks used for standpipe supply purposes shall be heated by means of steam supplied through a brass coil with brass fittings and of a type and radiating surface as prescribed by the Board of Standards and Appeals. The heater shall be fed through a 1¼-inch steam line with a 1-inch return, separately trapped. The water in the tank shall be maintained at a temperature above 40° F.

Tanks in hotels, hospitals, institutes or similar buildings using the tank supply seven days a week supplying both standpipe and house service lines shall not require heating. If in an adequately heated enclosure, interior heating of tanks shall not be required.

Rule 27. LOWEST SUCTION TANKS. Tanks shall have at least 10,000 gallon effective water capacity as specified in Schedule A, reserved for the lowest fire pump use exclusively and shall be constructed of steel or reinforced concrete, located below the grade, or lowest story, if there is no cellar under the building. The Fire Commissioner may permit suction tanks to be located in a separate enclosure or building provided they are accessible and when, in his judgment, such location will be more practicable. House supply tanks may be connected to the fire pump suction line, provided an O. S. & Y. gate valve, sealed closed, shall be provided on such house supply lines.

Rule 28. LOWEST TANK SUPPLY. The lowest suction tanks shall be fed by a connection at least 4 inches in diameter taken directly and independently from the public street main. The supply shall be not less than 750 gallons a minute, and shall enter the suction tank above the top or through the side near the top of the tank and shall be controlled by suitable bronze ball cock and copper float.

Rule 29. SUPPORT FOR TANKS. Tanks of more than 500 gallons capacity hereafter placed in or on any building shall be supported on masonry, reinforced concrete or steel construction of sufficient strength and carried to a proper foundation as provided for in section 428, Chapter 5 of the Code of Ordinances.

Rule 30. INTERMEDIATE TANKS. The location of intermediate tanks hereafter installed shall be determined

and directed by the Fire Commissioner and as prescribed in Schedule A. Each such tank shall have at least 5,000 gallons of water reserved exclusively for fire line and pump purposes. The bottom of each tank shall be at least 20 feet above the highest outlet supplied therefrom. The method of water supply to tanks, the overflow, the high and low water alarm, the emergency drain, etc., shall be as prescribed for tanks above the roof except that the overflow and emergency drain shall be connected to the drainage system of the building or discharge on intermediate levels.

The connection of the tank to the system shall be as hereinafter set forth:

Piping of the same diameter as the riser shall connect the tank with the riser of the portion of equipment supplied from that tank and in this connecting line in a horizontal run there shall be placed an approved swing check valve opening downward, and two O. S. & Y. gate valves, one at each side of the check valve. Each tank section shall be directly connected to the tank section above by means of piping of the same diameter as that of the largest riser and in a horizontal connecting line shall be provided an approved swing check valve opening upward, with an O. S. & Y. gate valve, at each side of the check valve, in order that water pumped into the siamese connection may enter the entire equipment of the building, and that each tank will supply only its portion of the system.

Rule 31. VALVES. All valves controlling standpipe water supply except valves at hose outlets shall be iron body brass mounted, or cast steel designed in accordance with specifications of the American Society of Mechanical Engineers, gate valves shall be of Outside Stem & Yoke type, and shall be located in an accessible position. All emergency control valves 6 inch and larger shall be of the by-pass type.

Rule 32. PIPING. Materials of Construction. All new piping for standpipe fire lines shall be of genuine full weight wrought iron or steel and properly tested by the manufacturer to withstand the required water working pressures. All pipes shall be lapwelded. Where working pressures are in excess of 150 lbs. to the square inch extra heavy cast iron, malleable iron or cast steel valves, and fittings constructed in accordance with the specifications of the American Society of Mechanical Engineers, able to withstand the required water working pressure shall be provided. The standard weight fittings and valves may be used where the pressure is not more than 150 lbs. per sq. in. Fittings in horizontal runs shall have long turns. All underground piping shall be of extra heavy cast iron as required by Rule 15.

The water working pressure on piping, valves and fittings shall be determined by the total head of water plus 50 pounds at the top floor hose outlet plus a factor of safety of at least 50 per cent. Specifications as to the construction and water working pressure of all piping, valves and fittings shall be marked on plans filed with fire commissioner.

Rule 33. CONSTRUCTION. Each standpipe fire line riser shall be supported at the bottom and at every other (alternate) story, and shall be properly braced. Horizontal lines shall be supported by standard heavy wrought or malleable iron hangers attached to or extending around and over floor beams at intervals of not more than 8 ft., and at more frequent intervals if deemed necessary by the Fire Commissioner and shall be securely braced to withstand vibration. Hangers may be supported by straps or bars extending over and around bars of at least 1 in. in diameter and 12 in. in length embedded in concrete floors parallel to and at least 2 in. from the undersurface or by approved malleable iron concrete inserts. The arrangement of lines must be straight and as direct as practicable. Offsets will be permitted only when unavoidable or where necessary to install horizontal check valves. Except where flange fittings and pipes are permitted elsewhere in this rule, all joints shall be screwed joints made up thoroughly water tight with red lead, litharge and glycerine, or compressed graphite lead and boiled linseed oil, or any joint compound that shall be approved by the Board of Standards and Appeals.

RULES

In horizontal runs of piping of standpipe fire line systems, if larger than 4 in. in diameter, fittings and valves may be of the flange type, provided flange faces are machined true and smooth and do not show rings, sand holes or other imperfections. All joints shall be provided with proper copper gaskets.

All standpipe (fire line) equipments shall be installed in a workmanlike manner.

Rule 34. PROTECTION OF FIRE LINES. Standpipe lines when not located within a fire protected stair enclosure shall be protected against interior fire damage by means of at least one inch asbestos covering, or a covering of expanded metal lath and three-quarters inch Portland cement plaster or by a 2 in. terra cotta block encasement.

Rule 35. FROST PROTECTION. Standpipe lines shall be properly protected from freezing in the following manner:

One wrapping of tar paper equivalent to Asphalt Saturated Wool Felt paper weighing 12 lbs. per 100 sq. ft.

Three (3) layers of standard 1 in. high grade "long cows' hair" felt interposed and covered with one (1) layer of builders' paper equivalent to red rosin sized sheathing paper weighing 40 lbs. per 500 sq. ft.

One (1) covering of 8 oz. canvas, painted with two (2) coats of waterproof paint.

All wrappings to be independently applied and securely fastened in place with heavy jute twine. Circumferential and longitudinal joints to have at least a 2 in. lap staggered with adjacent layers and opposing leakage to the hair felt.

In groups of pipes each water pipe is to be wrapped separately with the tar paper, but subsequent layers of felt and paper may be applied collectively if space does not permit of individual wrapping.

Where a heating pipe is one of the group, the wrapping should be applied so that the hot line would serve all pipes in the enclosure. The initial wrapping of tar paper around each water pipe should be applied with laps down and the whole group wrapped with tar paper with laps up. If due to the position of the hot line sufficient air space would not insulate the hair felt, then protection to be effected by suitable separators, or a wrapping of asbestos paper instead of the tar paper around the group.

On vertical pipes particular provision to be made to prevent slipping and tearing of insulation due to its weight.

To prevent slipping away of insulation at point of entrance of pipes into a tank, and to shed leakage from slip joints, a 16 oz. duck to be provided, doubled and securely fastened to bottom of the tank overlapping inside and outside the insulation of the group for a distance of 18 in. below the tank. This duck to be well coated with paint. Loose hair felt to be packed about connection at tank bottom to safeguard against settling.

Rule 36. NUMBER OF RISERS. Each building fronting on more than one street shall have at least one riser for each street front. For the application of this rule a corner building shall not be considered as facing on more than one street when it is on but one corner. In all cases regardless of area or location there shall be a sufficient number of risers, so that any portion of each floor area may be covered by the stream from a standpipe hose not exceeding 100 ft. in length.

Rule 37. FIRE TOWER RISER. Each standpipe riser shall be located within a stair enclosure and one riser must be located in main stairway or fire tower.

Where impracticable to locate a riser within the stair enclosure, the Fire Commissioner may permit it to be located immediately adjacent to a stair enclosure, public corridor or other suitable place.

Rule 38. HOSE STREAM ALLOWANCE. Not more than 10 feet will be allowed for the throw of hose stream, except where the static pressure at the hose outlet is 15 lbs. or more, when 20 ft. will be allowed.

Rule 39. SIZE OF CROSS-CONNECTION. Where there are two or more risers in a standpipe (fire line) equipment, all risers shall be cross-connected by piping of a diameter at least equal to the diameter of the largest riser, but in no case shall the cross-connection be less than five inches.

Rule 40. FIRE PUMPS. Where Required:

(a) In every building hereafter erected exceeding 250 ft. in height, as described in Schedule A, an electric centrifugal fire pump shall be kept in readiness for immediate use of the Fire Department during all hours of the night and day, including Sundays and holidays.

Rule 41. ARRANGEMENT AND SUPPLY OF FIRE PUMPS. Fire pumps shall be connected to the standpipe systems and have a capacity of 750 gallons of water per minute at a pressure of from 50 to 80 lbs. at uppermost hose outlet, fed from such pumps. Fire pumps shall draw from steel or reinforced concrete suction tanks. For the purpose of testing fire pumps a 4 in. diameter branch shall be taken from the discharge line at the pump side of the check valve and run to the suction tank over the side or through the side above the overflow level. From this branch there shall be taken a 4 in. line with an approved type pressure relief valve, extending to the tank in a manner similar to that of the 4 in. test line. In the 4 in. test line between the 4 in. relief branch and the tank there shall be placed an O. S. & Y. gate valve, which shall be kept closed except during a test of the fire pump. In the line from the fire pump to the standpipe risers and beyond the test branch there shall be placed an approved type check valve in a horizontal position and also an O. S. & Y. gate valve, the latter to be open except when the fire pump is undergoing test. A pressure gauge shall be provided and connected to the discharge line of the pump.

The piping connecting discharge from fire pumps shall be of same diameter as the main riser.

Rule 42. NUMBER AND LOCATION OF FIRE PUMPS.

SCHEDULE A

Height from Uppermost Hose Outlet to grade*	Total No. of Pumps Required	Approximate Location of Pumps			
		1st Pump	2nd Pump	3rd Pump	4th Pump
250' to 400'	1	Below grade level	Above level of First Pump	Above level of First Pump	Above level of First Pump
401' to 500'	2	Below grade level	200' to 250'		
501' to 600'	2	Below grade level	250' to 300'		
601' to 700'	3	Below grade level	200' to 250'	400' to 500'	
701' to 800'	3	Below grade level	250' to 300'	500' to 600'	
801' to 900'	4	Below grade level	200' to 250'	400' to 500'	600' to 750'
901' to 1000'	4	Below grade level	250'	500'	750'

*The uppermost hose outlet shall not include pent house outlet.

Rule 43. FIRE PUMPS IN BUILDINGS EXCEEDING 1,000 FEET. All buildings exceeding 1,000 feet from grade level to uppermost hose outlet shall be provided with a fire pump for every 250 feet of elevation above the centre line of the lowest pump.

Rule 44. TANK CAPACITIES. Suction tanks supplying the first or lowest pump shall contain not less than 10,000 gallons reserved for fire pump. Intermediate tanks and uppermost supply tanks for buildings between 250 and 400 ft. as described in above schedule shall contain not less than 5,000 gallons reserved for fire pump. Uppermost supply tanks on all other buildings shall contain not less than 3,500 gallons reserve for standpipe fire line. Suction tanks shall be of the open type.

RULES

Rule 45. TANK STRAINERS. All supply tanks shall be provided with bronze strainers at pump and riser intake lines.

Rule 46. CENTRIFUGAL FIRE PUMPS. Fire pumps installed under these rules shall have a capacity of 750 G. P. M. and shall be of the multi-stage motor driven Centrifugal type designed, constructed and installed to render the highest possible efficient and reliable fire service.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

The pumping equipment shall be adaptable for heavy duty service having all parts of ample strength with liberal water passage and all working parts exposed to corrosion of phosphor bronze.

The pumps shall be fitted with fire fittings consisting of capacity name plate, pressure gauges, relief valves, hose manifold and three (3) approved 2½ in. hose valves with Standard Fire Department male threads. Fire pumps shall take suction supply under a head of water and in no case shall there be less than six (6) feet between water level in tank and centre line of pump.

The pump specifications shall be within the uniform requirements of "The National Standard" as adopted by the following associations:

Associated Factory Mutual Companies,
National Board of Fire Underwriters,

or as approved by the Board of Standards and Appeals.

Fire pumps to be designed to operate at not less than five (5) pre-determined speeds to give five (5) pre-determined pressures which will insure a maximum pressure of 80 lbs. and a minimum pressure of 50 lbs. throughout the building.

Fire pump equipment shall be so designed that it will operate normally at least five (5) speeds to provide a minimum of 50 lbs. pressure, and where more than one pump is required it shall be capable of pumping to the level of the next highest pump station in case of breakdown of intermediate pumping unit.

To provide for this standby service the fire pump shall run at nine (9) pre-determined speeds, namely, five (5) for continuous service and four (4) for standby service.

Rule 47. GENERAL SPECIFICATIONS. Pumping equipment shall be free from defects in design, workmanship and material and shall give proper and continuous operation under the conditions of service specified and shall be subject to approval of the Board of Standards and Appeals.

Materials entering into construction of this equipment shall be the best quality of their respective kinds and all parts shall be amply proportioned so as to be adaptable for heavy duty service.

CASING: Casing shall be of close grained cast iron and divided horizontally, and having suction and discharge connections in the lower half, so that the top casing can be removed without breaking water connections. Casing shall have in addition to flange bolts, additional heavy bolts inside of flange to prevent leakage between stages. Casing shall be tested and guaranteed to withstand pressure 50% in excess of working pressure.

SHAFT: Shaft shall be made of best grade nickel steel and shall be ground all over to close limits and a high finish.

IMPELLERS: Impellers shall be of the enclosed type of best grade of phosphor bronze finished all over.

WEARING RINGS: Shall be of phosphor bronze and of renewable labyrinth or other equal type. Impeller wearing rings shall be securely attached to impeller, and casing ring shall be securely locked in the casing.

SHAFT SLEEVES: Shaft sleeves shall be of bronze and extend through stuffing boxes to protect the shaft from corrosion and wear from the packing.

BEARINGS: Bearing brackets shall be of the best grade of close grained cast iron and securely bolted to the lower half of the casing.

Bearing brackets shall contain cast iron bearings lined with high grade babbitt and shall be removable. Each bearing shall be equipped with two oil rings to insure proper lubrication.

COUPLING: Coupling shall be of best grade cast iron finished all over and keyed to shaft. The two halves shall be connected by coupling pins, transmitting power through rubber bushings, vulcanized on steel sleeves.

STUFFING BOXES: Stuffing boxes shall be of sufficient depth to prevent excessive leakage and shall contain water seal rings of bronze.

PACKING: Packing shall be held in place by bronze glands horizontally split and bolted together.

BED PLATE: Bed plate shall be of cast iron of heavy box type and provided with finished pads to which the pump is bolted and doweled. Foundation bolt rings shall be drilled for foundation bolts. Jack-screw pads to be cast with bed and jack-screws furnished to assist in aligning. Bed plate shall be provided with ample drip rims, drilled and tapped for piping connections on both ends.

PAINTING: Pumps shall be painted, filled, rubbed down to an even surface and finished with a drab steel-color machine paint, and the inside of the oil reservoirs in the bearing brackets to be painted white with a special oil-resisting paint.

TESTING: Pumps shall be tested at the plant of manufacturer to prove that they can fulfill requirements of specifications and guarantees made.

Rule 48. SPECIFICATIONS FOR ELECTRICAL CONTROL AND OPERATION OF FIRE PUMPS.

MOTOR: (a) Direct-current motors must be of the shunt or cumulative compound wound types. The speed of the motor at no load must not exceed the speed at full load by more than 10%.

Alternating current motors shall be of a slip ring type that will surely start and attain full speed under the current supply conditions where pump is to be installed. Approval of fire pump installations will be contingent on proper attention being given to the features mentioned herein.

(b) With a room temperature not exceeding 40 deg. C., motors shall be designed for a temperature rise not exceeding 40 deg. C. when carrying their rated full load continuously and shall also be able to run continuously with an overload of 15% without stress and without injurious rise in the temperature. Motors shall be able to withstand under the above room temperature an overload of 25% for 2 hours or a momentary overload of 50% without injury. No electrical or mechanical weakness should develop during these tests. The rise in temperature shall be measured in accordance with the Standardization Rules of the American Institute of Electrical Engineers.

Motors shall be of such capacity that at rated voltage 115% of its full load ampere rating will not be exceeded under any conditions of pump load.

(c) Motor and control apparatus must be protected from water coming from possible leakage, or breakage of any connection at the pump or other piping in its vicinity, including hose lines which may be connected to the pump.

(d) Motor windings shall be thoroughly impregnated with an insulating compound suitable for resisting moisture.

(e) Bearing shells and caps for motors shall be of the split type on at least the driving end, to permit removal and replacement without disturbing the motor or shaft after installment.

VARIABLE SPEED CONTROL OF MOTORS shall be provided except for fire pumps in theatres as required under Rule 86. Not less than five stages of speed variation will be permitted.

RULES

AUTOMATIC STARTERS will not be permitted except as provided for under Rule 86 (Theatres, etc.) of Standpipe Fire Line Rules.

CONTROLLING EQUIPMENT: The following specifications cover the construction and installation of controlling equipments of manually operated devices for the control of electric motors driving fire pumps.

In materials, details of construction, test and installation, except as modified or supplemented by these requirements, all parts of the equipment shall comply with Chapter 9 of the Code of Ordinances.

All equipments shall be specifically approved for fire pump controlling purposes.

DESIGN: (a) The design of all parts must be such as to secure simplicity, strength, durability and ease of operation.

(b) All parts must be mounted on one or more panels of slate, marble or other approved material, supported in a substantial manner on an iron frame, and the entire equipment must comply with the requirements for switchboards in Chapter 9 of the Code of Ordinances.

(c) All parts, such as bearings, cams and latches, the operation of which is liable to be interfered with by corrosion, must be made of phosphor bronze or similar metal, except where magnetic qualities are essential. Springs must be of phosphor bronze or similar metal, or protected against corrosion in an approved manner.

OPERATING MECHANISM: (a) The operation shall be such that the motor is directly started by a single lever, which shall be arranged to move in one direction from the initial to the final position.

(b) Electrical actuating devices will not be approved.

(c) Where direct current is used, an auxiliary field resistance shall be provided which can be used to increase the motor speed 10 per cent.

RESISTANCES: Starting resistances must be, unless inside of the motor, of the grid type, and comply with the requirements of starting duty rheostats as given in Chapter 9 of the Code of Ordinances.

OVERLOAD PROTECTION: (a) Each motor lead must be protected by a circuit-breaker. With direct current motors, leads must be protected by a single-pole circuit-breaker in each lead, or by an approved double coil, double pole circuit-breaker so designed that each pole must be closed independently of the other.

(b) Circuit-breakers to be calibrated to 400 per cent. of normal motor current.

(c) No fuses nor other overload release devices except circuit-breakers are permitted, except in instrument and pilot light leads.

WIRING: All wiring shall be installed in rigid iron conduit.

SWITCH: An approved knife switch for independent sources of supply must be provided, having one pole for each supply wire in circuit.

PILOT LAMP AND INSTRUMENTS: (a) A pilot lamp connected on the motor side of the circuit-breaker must be provided to indicate the presence of voltage on the line.

(b) A voltmeter and ammeter must be provided and suitably mounted and connected as a part of the control equipment.

MARKING: (a) A name plate must be provided giving the name of the manufacturer and the rating of the equipment in volts and amperes.

(b) All line and motor terminal connections must be suitably marked so that they can be readily identified.

CONTROL PANEL: The control panel shall be constructed of a high grade of electrical slate or marble or other approved material.

The supporting frame shall be so arranged that the bottom of the panel will not be less than 24 inches above the floor.

INSTALLATION OF APPARATUS: The control panel shall be located close to and within sight of the motor. If a pump room used for no other purpose and containing no other apparatus except the fire pump, its motor and its accessory appliances is provided, the controlling equipment shall be placed in this room.

The control panel shall be so protected that it will not be injured by water escaping from pump or connections.

Except where special permission is granted by the Fire Commissioner the controlling equipment shall be protected from mechanical injury by one of the following methods:

(a) Grille or lattice partitions so placed as to completely enclose the control panel and starter.

(b) The entire equipment of the panel and starter may be enclosed at the sides, front, back and top in a thoroughly substantial, ventilated sheet iron or steel cabinet of not less than No. 12 U. S. metal gauge in thickness with hinged doors with glass panel in front of pilot light. When panel is in a fireproof room and not subject to mechanical injury an enclosing cabinet shall not be required.

TEST OF EQUIPMENT: The entire equipment shall be subject to test and inspection by representatives of the Fire Commissioner.

POWER SUPPLY: Where the power supply can be obtained from two separate street feeders, two separate and distinct services shall be installed.

Where current is taken from an underground Edison three-wire system and the power lines are protected by approved conduit from a point where they enter the building to the control panel in the pump room, it will be considered an acceptable source of power supply.

Isolated Plant: Where the source of supply is an isolated plant located in the building an auxiliary service of sufficient capacity shall be obtained from some outside source.

Transmission Lines: (a) The lines between the power plants and the pump room must be of such number, so arranged and so located that there will be small chance of an interruption of service to the motor, due to accident to the lines. All wiring in the pump room must be in approved conduit.

Where the valves involved are large and the crippling of this pump service would seriously affect the protection of the property, at least two separate lines from the power plant or plants to the pump installation shall be provided. The lines must be run by separate routes or in such manner that a failure of both at the same time will be only a remote possibility.

(b) Each line between the power plant and pump room shall be of such size that its safe carrying capacity as given in Chapter 9 of the Code of Ordinances will not be exceeded by the load carried.

Where direct current motors are used, the voltage at the motors must not drop more than 5 per cent. below the voltage rating of the motors when the pumps are being driven at rated output, pressure and speed, and the lines between motors and power stations are carrying their peak loads.

When alternating current motors are used, the voltage at the motors under these same conditions must not drop more than 8 per cent. below the voltage rating of the motors.

(c) The overload protective devices at the power plants, and where provided at various points on the lines, must be of such rating and so set that they will open the circuit only under short circuit conditions.

Approved fuses may be used, if desired, except for the protection of the pump motor where circuit breakers are required. The fuses, however, must be of such size that an overload or short circuit at the motor or its control apparatus will not cause them to open the circuit, but instead, the circuit breaker protecting the motor.

TRANSFORMERS: Where it is necessary to install transformers they shall be installed in accordance with Chapter 9 of the Code of Ordinances.

RULES

Rule 49. **SIGNALLING DEVICES.** All buildings where variable speed control of fire pump motors is required shall be equipped with an approved coded closed circuit signalling system. The signalling stations shall be located one on each floor at main riser. This system shall be so arranged that a coded signal can be transmitted to the pump rooms. An eight-inch gong shall be provided in all pump rooms and at such other locations as the Fire Commissioner may direct. All apparatus used in connection with the signalling system shall be of an approved type and installed as outlined in rules governing the installation of interior fire alarm systems.

At alternate signal sending stations there shall be provided an approved closed circuit strap key enclosed in a sheet metal box equipped with a paracentric Fire Department lock and approved hinges.

The strap key shall be connected in series with the box circuit of the signal sending station.

A card of instructions shall be placed in the pump room giving code numbers of signalling stations, the pressures obtainable at different speeds of the motor and such other information the Fire Commissioner may direct.

Rule 50. **RELAY STANDPIPE SYSTEM.** All buildings hereafter erected exceeding 400 ft. from grade to highest hose outlet shall be provided with an intermediate combination gravity and suction standpipe supply tank and a fire pump as required under Schedule A.

Each tank shall have at least 5,000 gallons of water reserved for the fire lines and shall be connected to fire line system as described in Rule 30 for intermediate tanks except that in addition to the requirements of Rule 30, there shall be provided a long turn by-pass 8 inches in diameter around the tank check valve and the O. S. & Y. gate valves. An 8-inch O. S. & Y. gate valve SEALED CLOSED shall be provided in the by-pass line.

Each tank shall be provided with overflow and emergency drain lines as required in Rules 19 and 20, except that such lines shall drain to roofs of set backs on building, or into house drain lines providing the house drain line or lines are equal in sum total to the sum total in diameter of the drain lines.

The fire pump shall have a capacity of not less than 750 gallons of water per minute and shall deliver through the standpipe main feed riser at a pressure not less than 50 lbs. to the square inch at the highest hose outlet fed by said pump.

All fire pumps shall be located on a raised base at least 24 inches above the floor and on the floor below the supply tank, with the suction line as direct as practicable.

The pump discharge line shall be connected to the main feed riser feeding up, and outside the horizontal tank check valve line, and the upward swinging check valve in the main riser. An O. S. & Y. gate valve shall be provided at a point between the pump discharge connection and the upward swinging check valve SEALED OPEN.

The fire pump and motor shall be located in a watertight room as close to fire tower as practicable, properly drained by a 3-inch line to house drain or scuppers in exterior wall. The electric switch controlling the motor shall be marked on panel "FIRE PUMP SWITCH" in 1 inch white letters on a red background.

Rule 51. **NUMBERING ON VALVES.** All gate valves on tanks, fire lines and pumps shall be numbered by 3-inch red metal disc with white numbers 2 inches high secured to wheel of valves.

Rule 52. **PUMP ROOM DIAGRAM.** A white and black print drawn to a scale of one-quarter inch to the foot shall be provided in a glass frame showing the tank, fire pump, all pipe lines and valves. The number of each valve shall be shown in addition to purpose of each water line.

The print shall include instructions as to method of

starting and operating pump, closing main line, gate valve and opening by-pass valve.

Rule 53. **FIRE LINE TELEPHONE.** In all buildings where a variable speed control of fire pump motors is required there shall be provided a multiple telephone system with a master telephone in each pump room, and in the main lobby and individual telephones located on alternate floors near the main fire line riser.

The operation of the system shall be such that any individual telephone may call and converse directly with any master telephone. The master telephones may call and converse directly with each master telephone.

A six-inch vibrating call bell shall be located at the master telephones.

The master telephones in pump room below grade level shall be equipped with a loud speaking receiver so that the voice can be clearly and audibly heard at a distance of not less than fifteen feet from the receiver.

WIRING: The wiring for the telephone system shall not be smaller than No. 18 rubber covered wire installed in rigid iron conduit. The conduit system shall contain no conductors other than fire line telephone conductors.

The fire line telephone system shall be properly maintained and ready for use by the Fire Department at all times.

Rule 54. **MAIN LINE EMERGENCY CONTROL VALVES IN BUILDINGS OVER 400 FEET IN HEIGHT** (per Schedule A). At the base of the main feed riser or below the hose outlet valves on the first story; at each pump room elevation, and at each approximate one-third the height above the fire pump elevations and the pump or roof tank next above, there shall be provided O. S. & Y. emergency control valves in the main feed riser properly numbered and shown on the fire pump blue print heretofore described.

Rule 55. **EMERGENCY TOOL BOX.** Where fire pumps are required under these rules there shall be provided in each pump room an emergency fire department tool box, painted a fire department red, with 3-inch white letters reading, "Emergency fire line tool box." The box shall be secured to the wall and be fitted with a fire department lock and contain the following:

- 1—3-foot Stillson wrench.
- 4—2½-inch plugs with pipe threads.
- 4—2½-inch caps with hose threads.
- 2—Spanner wrenches of Fire Department pattern.
- 4—2½-inch double female hose connections, with Fire Department threads.

Rule 56. **EMERGENCY AND TESTING HOSE.** Where fire pumps are required under these rules there shall be provided in each pump room not less than two 50-foot lengths of rubber lined 2½-inch hose, of Fire Department quality, and one 1½-inch nozzle of controlling type. All couplings to be of Fire Department pattern and threads. Hose shall be supported by hooks secured to enclosure walls of pump room.

Rule 57. **LOCATION OF LOWER FIRE PUMP IN RELATION TO HORIZONTAL LINE CONTROL VALVES.** In a single main riser system the fire pump discharge line to riser shall be as short as practicable.

In a two (2) main riser system the pump discharge line to cross connection shall be located between the two risers. An emergency gate valve of the O. S. & Y. type, sealed open, shall be provided in the cross-connection on each side of the discharge line connection.

In a three (3) main riser system the pump discharge line shall be connected to the cross-connection on each side of the central riser. Three (3) emergency gate valves as above shall be provided as follows: One (1) at the base of the central main riser and one (1) on each side of the discharge line connection on the riser side.

In a four (4) main riser system the pump discharge line to the cross-connection shall be centrally located so as to

RULES

provide two risers on each side of pump connection. An emergency gate valve shall be provided in the cross-connection on each side of the discharge connection.

In a five (5) main riser system the pump discharge line shall be connected on each side of the third, or central riser, and shall be provided with gate valves located as described in a 3 riser system.

In a six (6) main riser system the pump discharge line shall be centrally located so as to provide three risers on each side of pump connection and shall be provided with gate valves located as described in a two and four riser system.

For the purpose of this rule a main riser is any vertical riser other than a branch riser with not more than three (3) hose outlets above the cross-connection.

Rule 58. EMERGENCY SAFEGUARDS. For the purpose of prolonging the use of the standpipe fire lines in case of failure or break, it is necessary to provide and properly locate emergency gate valves of the O. S. & Y. type as follows:

Rule 59. EMERGENCY VERTICAL LINE CONTROL VALVES. All standpipe fire line systems hereafter installed in buildings over four (4) stories or 50 ft. in height, and up to 400 ft., as described in Schedule B, shall be provided for as follows: In each riser an O. S. & Y. gate valve shall be provided below the first story hose outlet. If the interior stairway extends from hallway on first story to cellar the gate valve shall be located within the stairway enclosure below the first story level.

A two-way 2½-inch hose outlet tee with two 2½-inch approved valves, one of which may be capped, shall be provided in all main risers 6 ft. to 7 ft. above floor or stair landing level of first story with the O. S. & Y. control valve below the outlet tee.

Where a single main riser system or a main riser feed system is installed and the uppermost hose outlet exceeds 150 ft. above grade level there shall be provided in each riser O. S. & Y. gate valves, in addition to the gate valve below the first story hose outlet at approximately the level above grade hereafter specified.

SCHEDULE B

Height from Uppermost Hose Outlet to Grade	Total Number of Valves Required	Approximate Location of Valves Above Grade					
		1st Valve	2nd Valve	3rd Valve	4th Valve	5th Valve	6th Valve
150' to 200'	2 to 3	Below the 1st outlet	75'	150'			
200' to 250'	2 to 3	"	75'	150'			
250' to 300'	3 to 4	"	75'	150'	225'		
300' to 400'	4 to 5	"	75'	150'	225'	300'	

Rule 60. UPPER CROSS-CONNECTION EMERGENCY CONTROL VALVES. When a two (2) main riser system is installed there shall be provided O. S. & Y. emergency gate valves between the risers in each cross-section, located within the stairway enclosure when practicable, or as near the door to main stairway of fire tower as practicable, and where the uppermost hose outlet exceeds 150 ft. above grade, the risers shall be provided with O. S. & Y. gate valves as described in Schedule B.

Where a three (3) main riser system is installed there shall be provided O. S. & Y. gate valves between any two of the risers in each cross-connection and one in the central riser at each cross-connection.

Where a four (4) main riser system is installed there shall be provided O. S. & Y. gate valves in each cross-connection between the 2 central risers, so as to provide 2 risers on each side of control valves.

Where a five (5) main riser system is installed there shall be provided O. S. & Y. gate valves between the second and third central riser in each cross-connection and one in the central riser at each cross-connection as described in a 3 riser system.

Where a six (6) main riser system is installed there shall be provided O. S. & Y. gate valves centrally located in each cross-connection so as to provide 3 risers on each side of gate valve—as described in a two and four riser system.

Rule 61. LOWEST CROSS-CONNECTION CONTROL VALVES. When the building is provided with a fire pump as required by the Rules the gate valves required in the lowest cross-connection shall be located as described under location of Fire Pumps and Horizontal Line control valves.

Rule 62. FIRE TOWER RISER. Where the building is provided with an exterior enclosed fireproof stairway or fire tower the main riser shall be installed in such stairway and properly protected from freezing in accordance with these rules unless stairway is adequately heated.

Rule 63. VALVE SEALED OPEN. All O. S. & Y. gate valves shall be located in an accessible position and be sealed open in an approved manner.

Rule 64. LADDERS TO VALVES. Where the gate valve is more than 7 ft. above any floor or stair landing a single rung iron ladder with ½-inch rungs and not less than 10 inches between strings shall be provided at each gate valve properly secured at top and bottom.

Rule 65. VALVE SIGNS. Where the gate valves on the upper cross-connections are not located in the stair enclosure, a sign with red background and white letters not less than 3 inches high shall be painted on the face of the wall within the stairway enclosure on the story where the gate valve is located, which shall read as follows: "STANDPIPE CONTROL VALVE NO. 0 IN LOFT."

Where a standpipe riser is located in a fire tower a sign with red background and 3-inch letters as above shall be painted on the wall at fire tower exit door, which shall read: "STANDPIPE IN TOWER," except on that story on which the emergency control valve is located, there the sign shall read: "STANDPIPE CONTROL VALVE NO. 0 IN TOWER."

Rule 66. VALVES NUMBERED. All emergency control valves shall be numbered by means of a metal disc not less than 3 inches in diameter painted red with a white number not less than 2 inches high and shall be secured to wheel of valve by chain or metal clamp.

Rule 67. FIRE LINES PAINTED. All standpipe lines not located within a stairway enclosure or public corridor and including the siamese connection street riser wall collars and caps shall be painted a Fire Department red.

Rule 68. SIAMESE CONNECTIONS FOR FIRE DEPARTMENT USE. Each standpipe system shall be provided with one or more approved type 3 inch x 3 inch inlet siamese connections for use by the Fire Department as hereinafter set forth. When a building faces on but one street and has a frontage of less than 250 ft. and requires but one four (4) inch diameter standpipe riser one siamese connection shall be provided; where the street frontage exceeds 200 ft. in length and requires but two four (4) inch diameter standpipe risers two siamese connections shall be provided for each 200 ft. of street frontage or fraction thereof. Buildings exceeding 250 ft. in height shall have not less than two siamese steamer connections for each riser and buildings not more than 250 ft. in height shall have at least one siamese connection for each 6 inch riser. Buildings having frontages on more than one street shall have a siamese connection on each street front when the frontage is not continuous but in all cases where more than one siamese connection is required they shall be properly distributed, and not grouped, as the Fire Commissioner may direct.

Rule 69. SIAMESE HEADERS. Siamese headers shall be independent of each other and lead, as direct as

RULES

practicable, to riser or cross-connection header. There shall be at least 2 siamese for every 8-inch riser and at least 1 siamese for every 4 or 6 inch riser. Where there are more than one riser, the siamese headers shall divide on each side of any emergency control valve in the cross-connection, and such headers shall be equal in sum total to the sum total of all risers on either side of the emergency control valves.

No siamese header shall be larger than 6 inches. Siamese risers, when extending through sidewalk, shall be of bronze or fitted with a brass sleeve, packed with a waterproof compound between sleeve and riser.

Rule 70. SIAMESE OMITTED. Any building, other than theatre with stage, not over 45 feet in height shall not be required to have a siamese connection except when such building is on a water-front or when it is one of a group of buildings and has a cross-connection to the standpipe equipment in one or more of the other buildings.

Rule 71. LOCATION. Each siamese connection placed on the street front of a building shall be located not less than 18 inches and not more than 36 inches above the sidewalk level and shall be set in a horizontal position and shall be readily accessible for Fire Department use. Each siamese shall have cast in the body on top or on wall plate, in letters at least 1 inch in length and not less than $\frac{1}{8}$ inch in depth, the word "STANDPIPE."

The piping connecting the siamese with the standpipe equipment proper shall be not less than 5 in. in diameter where there are two or more 4 in. risers and not less than 6 in. in diameter for risers of 6 and 8 in. diameter. When there is but one 4 in. riser, connection from siamese may be 4 in. in diameter.

Rule 72. SIAMESE CHECK AND DRIP. In each line between the siamese connection and the standpipe system there shall be placed an approved type swing check valve located where practicable within 10 feet from the building wall. Between the siamese and its check valve there shall be placed a $\frac{3}{4}$ -inch automatic ball drip of an approved type which will close under a pressure of not more than 7 lbs. per square inch.

Rule 73. SIAMESE CONNECTIONS FOR FIRE-BOAT USE, EXCEPT WHERE THE SOURCE OF SUPPLY IS FROM THE STREET MAIN DIRECT. Siamese connection on piers or warehouses, etc., intended for fireboat use exclusively shall be $3\frac{1}{2}$ in. x $3\frac{1}{2}$ in. at inlets with Fire Department female thread. Between siamese and the system proper there shall be an approved type swing check valve, and between the check valve and the siamese either a $\frac{1}{2}$ -in. open drip without valve or cock, or a $\frac{3}{4}$ -in. automatic ball drip of approved type closing under a pressure of not more than 7 lbs. per sq. inch. Where systems have both fireboat and shore siamese the shore siamese shall have male connections and shall be without clappers, but shall have on each inlet a 3 in. gate valve with Fire Department male thread for hose connection. Check valve shall not be provided for the land end siamese.

Rule 74. HOSE OUTLETS. When practicable all hose outlets shall be placed within a stair enclosure. They shall be $2\frac{1}{2}$ in. in diameter, set not less than 5 ft. nor more than 6 ft. above the floor or landing as the case may be. Outlets and racks shall be located above the floor or landing and shall not be over a run of stairs or in a stair well. When impracticable to place hose outlets within the stair enclosure, the Fire Commissioner may permit them to be located immediately adjacent to a stair enclosure, in a conspicuous place, in which case there shall be painted upon the stair side of the wall of the stair enclosure a conspicuous sign in letters not less than 8 in. in height indicating the location of the outlet. Where there is a 4-in. riser system its termination above roof shall be a $2\frac{1}{2}$ -in. outlet hose valve properly capped.

Rule 75. MAIN ROOF OUTLETS. All 6 and 8-inch main riser systems which extend to intermediate or the highest roof level shall be provided with not less than three $2\frac{1}{2}$ -inch hose valve manifolds with male threads. Roof outlets shall be located not less than 24 in. nor more than 5 ft. above the roof and each valve shall be provided with regulation $2\frac{1}{2}$ -in. Fire Department caps. Where roof outlets cannot be located within a heated stair enclosure, the control valve shall be located below the roof and shall have a long stem extending above the roof with a wheel handle at the upper end. Between the long stem valve and the roof outlet there shall be a $\frac{1}{2}$ in. open drip extending to a sink or a $\frac{3}{4}$ in. automatic ball drip of approved type.

In buildings not exceeding 40 ft. in height hose outlets above roof shall not be required.

Rule 76. SPANNER WRENCH. A spanner wrench may be provided at each hose outlet valve, such wrench shall be of the gooseneck Fire Department pattern.

Rule 77. BRANCH LINE SIZE. No branch line may be less than 4 in. in diameter, except that any branch from a riser or cross-connection to but one hose outlet may be $2\frac{1}{2}$ in. if not over four (4) feet in length, and may be 3 in. in diameter if not more than twenty-five (25) feet in length.

Rule 78. NOZZLES. All $2\frac{1}{2}$ -in. fire hose shall be provided with approved smooth bore nozzles 15 in. in length, the outlet at the tip to be not less than 1 in. nor more than $1\frac{1}{8}$ in. in diameter.

Rule 79. HOSE. Each outlet other than the roof outlet shall have attached thereto $2\frac{1}{2}$ in. unlined linen hose, except that in buildings or premises that do not contain occupancies storing, handling or using inflammable motion picture films or nitro cellulose products, and which are not classified as hazardous, the Fire Commissioner may permit in addition to the $2\frac{1}{2}$ -inch outlet and hose the installation of $1\frac{1}{2}$ in. unlined linen hose and valve. There shall not be more than 100 ft. of hose at any outlet, as required by Section 581, Chapter 5, Code of Ordinances. No single length of hose shall be less than 50 ft.

All hose used in connection with the standpipe fire line system shall be at least equal in material and construction to the type of hose bearing the approval label of the National Board of Fire Underwriters.

Rule 80. COUPLINGS. Hose couplings for standpipe shall be equal to hose couplings of the regular Fire Department pattern and thread.

Rule 81. RACKS. All standpipe hose shall be suspended from racks of stamped steel, malleable iron or other metal equal thereto, of approved swing type, so designed and constructed that they will permit of ready and easy release of hose for use. The racks shall be supported securely and substantially from standpipe risers or wall, except that where a cast nipple of non-corroding material is screwed into the hose outlet valve the rack may be suspended from said nipple. The minimum thickness of nipple to be $\frac{5}{16}$ in. In no case will automatic racks be permitted.

Racks shall be not more than 7 feet 6 inches above the floor.

Rule 82. HOSE CABINETS. Hose racks may be installed in cabinets, provided the cabinets are conspicuously located within a stair enclosure, and are of a size sufficient to accommodate the entire equipment and permit of easy handling of hose and operation of valve.

In theatres cabinets may be permitted outside of stair enclosures, provided they are conspicuous, and that during performances the cabinets are illuminated by means of an electric lamp placed inside. Each cabinet shall have a clear

RULES

glass door (one panel only) without lock and shall have the words "FIRE HOSE" painted on the glass in letters not less than 2½ inches in height.

Rule 83. REGULATION AND REDUCTION OF PRESSURES. All buildings hereafter erected over 250 ft. in height and which do not exceed 400 ft. in height from the grade to highest hose outlet shall be provided with a roof gravity tank of not less than 5,000 gallons.

Where the above described height exceeds 400 feet, fire pump and suction tanks shall be provided as described under Schedule A.

Where the pressure on any hose outlet valve exceeds 50 lbs. either approved outlet pressure reducers, set as prescribed by the Chief of the Fire Department, or the Board of Standards and Appeals, shall be provided at such outlets.

Rule 84. BUILDINGS IN COURSE OF ERECTION. In buildings in course of erection standpipe fire lines shall be carried up with each story after the structure reaches the 7th story or a height of 85 ft., and there shall be provided an outside siamese pumper connection in a proper and accessible place. Regulation hose outlets on each story above the 2nd shall be provided as the work progresses. Hose outlets shall be provided with male threads of Fire Department pattern, with hose and nozzle attached, to at least every second outlet. The top and bottom of each riser and all cross connections shall be securely capped at all times during the progress of the work except when work on the standpipe fire line is in progress at that point. Temporary standpipe risers used in construction work and not less than 3 inches in diameter for buildings, not exceeding 400 ft. in height, and of larger diameter, in buildings exceeding 400 ft. in height, when maintained to supply water at all times, may be accepted in lieu of the regulation standpipe, provided it is equipped with hose outlets, hose and siamese as required above.

Elevators or hoists shall be provided as required in Rule 6.

Rule 85. PLACES COVERING LARGE AREAS. Ship yards, oil storage plants, amusement or exhibition parks or other enclosures when deemed necessary by the Fire Commissioner shall have one yard hydrant and hose for each 20,000 sq. ft. of area, but in no case shall there be more than 250 ft. distance between hydrants. Hydrants and sufficient approved hose and a smooth bore 1½-inch Underwriters playpipe shall be placed in an approved hose house, painted red, with words "FIRE HOSE" in 6-inch white letters on door. Where the area exceeds 20,000 sq. ft. and not exceeding 40,000 sq. ft. in area, a gravity tank of at least 20,000 gallons capacity, elevated 50 ft. above the yard, or 25 ft. above the highest structure in the yard, or a fire pump of at least 1,000 gallons a minute capacity, with a suction tank of at least 25,000 gallons capacity, or river suction supply shall be provided. Plants exceeding 40,000 sq. ft. in area shall be provided with a fire pump of not less than 1,000 gallons per minute capacity, suctioning from a tank or sump of at least 30,000 gallons capacity. The Fire Commissioner may permit suction from a river or well if in his opinion the required quantity of reasonably clean water may be obtained thereby, except that where river suction is proposed and standpipe primary water supply is taken from street main, approval of the proposition shall be obtained also from the Department of Water Supply, Gas and Electricity. In addition to yard hydrants, the Fire Commissioner may require one Monitor nozzle with remote control for each 40,000 sq. ft. of area or fraction thereof when in his opinion an unusual hazard exists or may exist. Monitor nozzles shall be located as ordered by the Fire Commissioner.

Standpipe risers may be connected to yard hydrant systems when such systems are provided with gravity tanks in accordance with this rule, or when same conforms with Rule 9. Subdivision A (city main connection).

Yard hydrant systems connected to city main shall be provided with Post Indicator valve located in an accessible posi-

tion. The Post Indicator valve shall be sealed or locked open and be painted a Fire Department red.

Yard hydrant systems with more than one hydrant shall not be connected to City mains outside of the high pressure fire service area, unless approved by the Board of Standards and Appeals.

Provision for steamer connections, fireboat connections, pressure reliefs and general layout of plant standpipe systems shall be made by the Fire Commissioner as his judgment may dictate for each individual case.

Fire extinguishing equipments in addition to the foregoing shall be prescribed by the Fire Commissioner for all oil storage plants, oil refineries, fire work plants and other plants when deemed by the Fire Commissioner as presenting unusual fire hazards.

Rule 86. THEATRES, ETC. In every theatre or opera house or other building used for theatrical or operatic purposes or amusement purposes as per Section 520, Chapter 5, of the Code of Ordinances, the standpipe fire line equipments in addition to the tank shall also be supplied by approved electric pump or pumps having a capacity of at least 250 gals. per minute at 100 lbs. per square inch in buildings without occupancy above the roof and at 125 lbs. per square inch pressure in buildings having any occupancy above the auditorium roof. Power for pumps shall be supplied by electric motors of sufficient horsepower to drive pump without sign of overload. Pumps shall be bypassed to suction tanks, as provided for elsewhere in these rules under FIRE PUMPS. Pumps shall suction from steel or reinforced concrete tanks of not less than 5,000 gallons water capacity. Pumps shall deliver initial supply of water and shall be connected to an approved electric device which, upon a reduction of pressure below the allowable minimum, will automatically start the pump and, upon a restoration of the required pressure, will automatically shut off the pump. The automatic starting device shall be set to cut in at 60 lbs. pressure and to cut out at 80 lbs. pressure. In addition to the automatic starting device there shall be provided a hand starter for emergency use and there shall also be provided a pressure gauge on the panel board.

Rule 87. STREET MAIN CONNECTIONS. Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each standpipe connection to a street main shall be not less than 4 in. in diameter and shall have a conveniently accessible control valve in the line at or near the curb or when practicable in a more remote location. The control valve shall be fitted with a frost and waterproof box not less than 4 ft. nor more than 6 ft. below the curb with a fixed stem extending to a compartment at the level of the sidewalk. The cover shall be bolted to the casing, and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be of an indicating pattern, operating by a special socket wrench approved by the Department of Water Supply, Gas and Electricity. The water meters used in standpipe fire line supplies shall be of approved type allowing free flow of water. Supply through the meter shall be checked against the Fire Department Siamese Supply and against tank supply.

Where, due to the presence of a vault under the sidewalk and extending to within 18 in. of the curb, it is impracticable to install a control valve box at the curb, there shall be placed in the feed line from the main a control valve located not more than two feet from the point of entry.

Rule 88. HIGH AND LOW WATER ELECTRIC ALARMS. The high and low water electric alarm for gravity tanks shall be so constructed and arranged that a decrease in the quantity of water below the required fire line reserve shall cause an alarm to be given in either the pump room or engineer's room. An annunciator shall be provided in connection with the alarm system. The high

RULES

and low tell tale electric devices for gravity tanks shall be so constructed that they will not be affected by moisture and the parts shall be heavy and rugged. The level of the water in the gravity tank shall be indicated by an approved device.

The audible signalling device for high and low water electric alarm shall consist of vibrating gong of at least 6 inches diameter of the enclosed type and arranged for conduit installation, the same to be operated automatically. The control cabinet shall be arranged for conduit installation and shall be located in the engineer's room or pump room where it will be under supervision of the person in charge of the standpipe supply.

All wiring shall be installed in rigid conduits and the installation shall be in accordance with the provisions of Chapter 9 of the Code of Ordinances. Control panels must be approved by the Board of Standards and Appeals.

The following sources of energy may be employed and are given in their order of preference:

1. Public utility electric light and power systems.
2. Independent electric generating plants.
3. Storage batteries in duplicate.
4. Primary batteries of closed circuit type.

When the system is connected to a 110 volt lighting service a suitable cut-out is to be provided and it shall be enclosed in a locked or sealed metal cabinet. The connection to system shall be the first connection on the house side of and as near as practicable to the meter. When batteries are used to operate the system they shall be placed in an approved cabinet provided with a lock and key.

Rule 89. DRY PIPE VALVE. A dry pipe valve shall be taken to mean a valve automatically controlling the water supply of the standpipe system in such a manner that under normal conditions its piping system will be maintained dry, but in the event of a hose valve being opened, the dry pipe valve automatically releases the water into the standpipe system.

In refrigerating plants or in unheated buildings, piers or warehouses where wet lines are impracticable, dry pipe valves may be installed.

Type A, in which the valve is actuated by the release of compressed air in the standpipe system due to the opening of a hose valve; and Type B, in which the valve is actuated by an approved trip under electrical control of an approved non-coded or coded closed circuit system operated from the control station at each hose outlet. Dry pipe valve shall be located as near as practicable to the standpipe system, in an enclosed place, protected from mechanical injury and freezing.

When Type A valve is installed the air pressure in the standpipe system under such dry pipe valve control shall not exceed 40 lbs. per sq. in. nor be permitted to fall below 25 lbs. per sq. in. nor shall it be less than one-sixth of the water pressure in any case. Not more than 16 hose outlets shall be supplied through one dry pipe valve. The air compressor shall have a capacity of not less than 11 cu. ft. per minute, and the air supply for the pump shall be taken, if possible from a room containing dry air, or it shall pass through a drying chamber containing calcium chloride in order to avoid the introduction of moisture into the system.

A closed circuit alarm shall be provided in connection with each dry pipe valve installation; the electrical layout shall be approved by the Fire Commissioner.

Rule 90. MONITOR NOZZLE. Monitor nozzles shall be so constructed and designed that they may be moved in both vertical and horizontal arcs, and shall be so located that streams may be brought to bear on all portions of the plant or building within the effective radius of stream play and such other exposing properties as may be within this radius. They shall be supplied from connections to the standpipe system not less than 4 in. in diameter with remote control.

Rule 90a. ROOF SETBACK HOSE OUTLETS. A

two-way hose outlet tee, with one outlet properly capped, shall be provided in the standpipe risers on floor level of any intermediate roof setbacks on all buildings exceeding one hundred feet in height when the following conditions exist:

1. When the building has a frontage of fifty feet or over.
2. And there are adjoining roofs, window openings or other exterior exposures within fifty feet of the roof parapet.
3. And the depth of the setback exceeds ten feet.
4. And the setback exceeds one hundred feet above grade level.

Rule 91. EXISTING STANDPIPES. Standpipe fire line equipments which were approved by the Fire Commissioner as conforming to the rules and regulations then being enforced, shall not be required to be altered to conform to the provisions of these rules, except where substantial additions or extension in height or area is made to the building, when these rules shall apply if deemed advisable or necessary by the Fire Commissioner, and except that all such fire line systems shall have or be provided with the following:

1. Roof gravity tank shall have a reserve of approximately 3,500 gallons of water for fire line.
2. The bottom of the gravity tank shall be not less than 20 feet above the hose outlet in the highest story.
3. A 4-inch emergency drain with gate valve.
4. House lines taken from outside of tank.
5. Tank properly heated and provided with overflow line.
6. Tank shall not be fed through fire line.
7. Tank to be fed at not less than 65 gallons a minute by pump or direct city connection.
8. An iron ladder of substantial construction, properly braced, extending to top of tank.
9. At least one gate valve at the downstream side of tank check unless a gate valve has been installed on either side of check.
10. Hose valves and hose not less than 2½ inches in good serviceable condition. No automatic hose valves permitted.
11. Wheel of hose valve within 6 ft. 6 in. of stair landing or of steps within 2 ft.
12. An open or automatic ball drip between the siamese check and siamese.
13. Approved 3 in. x 3 in. siamese, with approved caps.
14. The words "STANDPIPE" cast in the body of the valve, or on metal plates secured to siamese riser, or secured to face of building behind the siamese.
15. The siamese street riser, wall collars and caps painted a Fire Department red.
16. Outlet pressure reducers on all hose outlet valves where the pressure exceeds 50 lbs. per square inch.
17. In factory or other buildings of hazardous use, where the fire lines are not within a protected stair enclosure and may be subjected to fire exposure because of such location, they shall be protected by asbestos covering, wire lath and cement, or terra cotta blocks as described in these rules.
18. Fire lines shall be protected from freezing as specified in these rules.
19. The tank shall be provided with a high and low water electric alarm, except where there is an automatic filling pump installed.
20. The bonnets or caps of all siamese or tank check valves which have been in the fire lines for at least ten years, where practicable, shall be removed and the interior of valve cleaned of all rust or other accumulations. The body of the valve shall then be given a good coat of red lead and linseed oil.

Rule 92. HOSE OUTLET VALVE. Hose outlet valves shall be 2½ in.

A—All hose outlet valves hereafter installed in buildings not exceeding 300 feet in height, or for the uppermost 300 feet in any building, shall conform to the following specifications:

RULES

1. Valves shall have a clear waterway of at least 5 sq. in. in area.
2. They shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute.
3. They shall close tightly against 300 lbs. hydraulic pressure under normal working conditions.
4. They shall stand a hydrostatic pressure test of 750 lbs. per sq. in. for 30 minutes and not distort.
5. They shall stand the operation of full opening and closing 300 times under 150 lbs. pressure without leaking at stuffing box or seat.
6. They shall not be of cast or malleable iron.
7. Only angle globe valves shall be permitted.

B—Hose outlet valves hereafter installed in buildings exceeding 300 feet in height, except as provided for in Subdivision A, shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute; they shall close tightly against 500 lbs. hydraulic pressure under normal working conditions; they shall stand a hydrostatic test of 1,250 lbs. per square inch for 30 minutes and not distort; they shall stand the operation of full opening and closing 300 times under 250 lbs. hydraulic pressure without leaking at stuffing box or seat. They shall be of brass or best grade of valve bronze.

Straight-way gate valves may be submitted for test.

All hose outlet valves hereafter installed shall have cast in the body of the valve:

1. The manufacturer's name or trade-mark.
2. The working pressure of the valve.
3. The approval number of the Board of Standards and Appeals.

Not less than 2 approved hose valves shall be delivered to the office of the Board of Standards and Appeals, the weight and other general matter noted, and valves certified. One of the valves shall then be delivered to the office of the Fire Commissioner, with certified specifications.

Rule 93. SPECIFICATIONS. Siamese Connections.

Fire Department siamese connection shall be as herein-after stated in this rule.

1. The body of the siamese may be of cast iron, cast steel, brass or any other suitable metals of sufficient strength to comply with Item 8 of this specification. All movable parts, clappers, swivels and all bolts, washers, nuts, screws and pin bearings and all swivel bearings shall be of non-corrodible metal.

2. Clapper valve seats shall be made of non-corrodible metal and shall be machined to insure a tight seat for clapper valves.

3. Each inlet to siamese shall be provided with a clapper valve machined to a true face. Single clapper siamese connections shall not be permitted.

4. The inside diameter of valve seats shall not be less than the inside diameter of the hose couplings. The area of the waterway beyond the valve seats shall not be less than the combined areas of the waterways through the two valve seats. The area of the waterway of each inlet shall not be reduced by the clapper when in a position of maximum opening.

5. Clappers shall be so hung that when siamese connection is placed in a horizontal position the clappers will be seated.

6. Swivels, attached to the body of the siamese by means of a collar expanded cold or screwed into the body of the siamese, or with other bearing surface extending entirely around the opening and exerting uniform shear, will be approved if giving a strength sufficient to meet Item 8.

7. Clapper valves must of such design and area that a pressure of 100 lbs. per sq. in. on the standpipe side will not prevent their opening when the pressure on the steamer side is 150 lbs. They must be so hung that with a discontinuance of flow into the siamese through that inlet the valve will close, and that it will not close where there is an inward flow and the pressure on the inlet is 5 lbs. or more greater than the standpipe pressure.

8. Siamese connections must stand a hydraulic pressure test of 500 lbs. for 30 minutes under normal working conditions.

9. Clapper valves shall be tight for any pressure on standpipe side up to 300 lbs.

10. Approved caps or plugs must be provided to protect the threads of the inlets.

11. The inlet swivels to siamese connection shall be provided with threads to fit the Fire Department hose.

12. The word "STANDPIPE" shall be cast into the top of the body of the siamese or on wall plate, in 1 in. letters not less than $\frac{1}{8}$ of an inch in depth.

13. Where there is a fire boat siamese connection in the same system with a land end siamese connection, clapper valves shall be omitted from the land end siamese.

Saving Clause. All rules and regulations previously adopted and conflicting with these rules are hereby rescinded.

WILLIAM E. WALSH, *Chairman.*

WILLIAM J. O'GORMAN, *Secretary.*

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, June 5, 1928, 10 a. m.

Minutes of Regular Meeting, June 5, 1928, 2 p. m.

"Standpipe"—"Fireline" Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, June 12, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, June 19, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR

TUESDAY, JUNE 12, 1928, 2 P. M.

Building Zone Cases.

48-28-BZ.	APPLICANT—Schreiber, Collins, Myers & Buchter, for Fort Lee Ferry Garage Co., Inc., owner. PREMISES—228-232 Nagle avenue, Manhattan. APPLICATION, under sections 7g and 21 of the building zone resolution, TO PERMIT, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.
71-28-BZ.	APPLICANT—Max Handel, owner. PREMISES—285-289 Thatford avenue, east side, 100 ft. south of Dumont avenue, Brooklyn. APPLICATION, under sections 7e and 21 of the building zone resolution, TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

THE RESOLUTION—

(17-28-A)

WHEREAS, Popular Watch Crystal Co., for Diomed Realty Corp., owner, filed, January 10, 1928, an appeal from an order of the fire commissioner, affecting premises 100 West 21st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 16, 1927, reads:

"1. Discontinue the storage of nitro-cellulose material, other than finished articles, on these premises."; and

WHEREAS, the building is non-fireproof, five stories in height, 183 ft. by 75 ft. and 149 ft., irregular, in depth; OCCUPIED: 1st story, stores; 2nd, 3rd and 4th stories, printing and dressmaking, 100 persons on each story; 5th story, printing, dressmaking and the manufacture of celluloid watch crystals, 100 persons; and

WHEREAS, the appellant claims that the building is equipped with an automatic sprinkler system; that not more than 25 pounds of nitro-cellulose material will be stored in a fireproof cabinet at the northwesterly corner of fifth story when not in use; furthermore, the appellant contends that the storage and workrooms are provided with concrete floors.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

52-28-A.

APPELLANT—Crocker Natl. Fire Prev. Eng. Co., for Lester Newman, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—34-22 35th street (formerly 318-328 Sixth avenue), Astoria, Borough of Queens.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(52-28-A)

WHEREAS, Crocker National Fire Prevention Engineering Co., for Lester Newman, owner, filed, January 19, 1928, an appeal from a decision of the fire commissioner, affecting premises 34-22 35th street (formerly 318-328 Sixth avenue), Astoria, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated December 22, 1927 (Plan No. 4087-27), reads:

"2. A 4" standpipe must be installed."; and

WHEREAS, the building is non-fireproof, one story (16 ft.) in height, 150 ft. by 100 ft. (15,000 sq. ft.) in area; OCCUPIED as a public garage, 2 persons; and

WHEREAS, appellant contends that the building is equipped with an approved one-source sprinkler system; that 50 per cent of the front of the building is constructed of steel frames and wire glass; that there are sand pails and three 2½-gallon chemical fire extinguishers distributed throughout the premises and that the building is under constant supervision by watchmen.

MINUTES

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension, and that the structure shall be equipped throughout with an approved two-source wet sprinkler system.

260-26-A.

APPELLANT—Charles B. Meyers, for J. Pollak, owner.
SUBJECT—Appeal from order of fire commissioner.
PREMISES AFFECTED—156-158 East 85th street, Manhattan.

APPEARANCES—

For Appellant: George L. Wells.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(260-26-A)

WHEREAS, Charles B. Meyers, for J. Pollak, owner, filed, March 26, 1926, an appeal from an order of the fire commissioner, affecting premises 156-158 East 85th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 17, 1927, reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at south side of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5, of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, four stories (45 ft.) in height, 47 ft. 8 in. by 65 ft. in area; OCCUPIED: 1st story, stores; 2nd and 3rd stories, upholstering, 11 persons on each story; 4th story, storage of furniture, no occupants; and

WHEREAS, the appellant claims that there are only three windows on each of the second, third and fourth stories on south side of the building affected by the order; furthermore, the appellant contends that the building is only four stories in height, with a small area and a non-hazardous occupancy.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only as long as conditions as to exposure remain unchanged and the building is not increased in height, area or dimension and that the occupancy and use remains unchanged.

34-28-A.

APPELLANT—Samuel Rosenblum, for Wachtell & Auslander, lessees.

SUBJECT—Appeal from order of the fire commissioner.
PREMISES AFFECTED—167 West 22nd street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(34-28-A)

WHEREAS, Samuel Rosenblum, for Wachtell & Auslander, lessees, filed, January 16, 1928, an appeal from an order of the fire commissioner, affecting premises 167 West 22nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 31, 1927 (Order No. 27973-F), reads:

"Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at north and west sides of building, or other approved protection as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, four stories (41 ft. 6 in.) in height, 20 ft. by 40 ft. in area; OCCUPIED: 1st story, vacant; 2nd story, passementerie and printer, 3 persons; 3rd story, furriers, 9 persons; 4th story, furriers, 5 persons; and

WHEREAS, the appellant claims that there are only three windows on each of the second, third and fourth stories on north side of the building affected by the order; that there are no openings in the adjoining wall of the two-story building causing exposure at north which is used only for store and office purposes; and

WHEREAS, the appellant contends that the order was issued only on account of the slight (1 ft. 6 in.) excess height of the building above the height which does not require the windows to be protected.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only as long as the existing conditions as to exposure remain unchanged and the building is not increased in height, area or dimension, and that the use and operation of the premises remains substantially unchanged and that the occupancy shall be restricted to that stipulated under Cal. No. 950-24-S.

THE RESOLUTION—

(54-28-A)

WHEREAS, Celler & Kraushaar, for Queens Street Realty Corp., filed, January 19, 1928, an appeal from an order of the fire commissioner, affecting premises 14-40 Orchard street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated December 20, 1927 (Order No. 30236-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½-inch regulation Fire

MINUTES

Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½-inch standard hose attached thereto.”;

and
WHEREAS, the premises consist of three interconnected structures; a five-story (79 ft.) fireproof building, a two-story (25 ft.) fireproof building and a one-story (13 ft. 2 in.) non-fireproof building; the five-story building having a frontage of 255 ft. 4 in. on Orchard street and a depth of 100 ft., approximately 23,000 sq. ft. in area; the two-story building having a frontage of 35 ft. and a depth of 100 ft., 3,500 sq. ft. in area; the one-story building, irregular in area, being 94 ft. 3 in. by 100 ft., approximately 8,300 sq. ft. in area; OCCUPIED: 14 Orchard street (two-story fireproof), offices, 25 persons per story; 16-40 Orchard street (five-story fireproof): 1st story, manufacture of corrugated paper boxes, 30 persons; 2nd story, manufacture of radio parts, 220 persons; 3rd story, office and radio cabinet storage, 50 persons; 4th story, assembling radios, 475 persons; 5th story, assembling radios and speakers, 450 persons; 37-39 Queens street (one-story non-fireproof), shipping radio sets, 10 persons; and

WHEREAS, appellant contends that the premises are equipped throughout by a two-source automatic sprinkler system and also with day and night supervisory watchman service; and

WHEREAS, these premises, together with the adjoining premises, were considered under previous action by this board as one group in single tenancy; and

WHEREAS, this order affects this particular building, which has a frontage of 255 ft. on Orchard street and 100 ft. on Queens street, not exceeding five stories in height.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the floor area as now subdivided and indicated on plans filed in this appeal shall remain substantially unchanged and that these premises shall be equipped throughout with an approved two-source wet sprinkler system and central office connection; that a watchman's service shall be organized and maintained; that all horizontal openings shall be equipped with approved fire door equipment; that any ramps making up the difference in level between intermediate floors shall be constructed of fireproof construction, and granted only as long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION—

(21-28-A)

WHEREAS, Celler & Kraushaar, for Queens Street Realty Corp., owner, filed, January 10, 1928, an appeal from an order of the fire commissioner, affecting premises 332-346 Jackson avenue and 1-33 Queens street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated December 20, 1927 (Order No. 30237-F), reads:

“1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½-inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½-inch standard hose attached thereto.”;

and

WHEREAS, the premises in question consist of two three-story (47 ft.) in height, non-fireproof buildings; 1-33 Queens street and 332-346 Jackson avenue; No. 13 Queens street not being under consideration; 15 to 33 Queens street having a frontage of 160 ft. on Queens street and a depth of 100 ft. 2 in., approximately 16,000 sq. ft. in area; subdivided into two sections by a brick wall with fireproof doors at the openings therein, the maximum section being approximately 12,500 sq. ft. in area; 332-346 Jackson avenue having a frontage of 175 ft. on Jackson avenue and a frontage of 125 ft. on Queens street, approximately 20,000 sq. ft. in area; these two buildings are connected on the third story, only, by an opening having fireproof sliding doors on each side of said opening; OCCUPIED: 15-33 Queens street section: 1st story, manufacture of corrugated paper boxes, 20 persons; 2nd story, manufacture of furniture, 20 persons; 3rd story, storage of furniture, no occupancy; Jackson avenue section: 1st story, office, storage and manufacture of furniture, 25 persons; 2nd story, manufacture of furniture, 50 persons; 3rd story, manufacture of furniture, 35 persons; and

WHEREAS, appellant contends that the Jackson avenue section is equipped with two interior fireproof stairways and the Queens street section is equipped with three interior fireproof stairways; that the entire premises are equipped with an approved two-source sprinkler system and, also, with day and night watchman service; and

WHEREAS, these premises, together with the adjoining premises to the north, were considered under previous action by this board as one group in single tenancy; and

WHEREAS, this order affects this particular building, 175 ft. front on Jackson avenue and 305 ft. on Queens street, not exceeding three stories in height.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the floor area as now subdivided and indicated on plans filed in this appeal shall remain substantially unchanged and that these premises shall be equipped throughout with an approved two-source wet sprinkler system with central office connection; that a watchman's service shall be organized and maintained; that all horizontal openings shall be provided with approved fire door equipment; that any ramps making up the difference in level between intermediate floors shall be constructed of fireproof construction, and granted only as long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION—

(1331-27-A)

WHEREAS, S. R. Guard, for the American Society for the Prevention of Cruelty to Animals, owners, filed, December 22, 1927, an appeal from an order of the fire commissioner, affecting premises 389-393 Avenue A, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 21, 1927 (Order No. 40347-LC), reads:

"Referring to your application for a permit to maintain a storage garage at the above address please be advised that your application for such a permit is disapproved for the following reasons:

"1. Fourth (4th) story may not be used as a dwelling. Sec. 154, Chapter 10, Code of Ordinances.

"2. Garage is not permitted in a building which is used in part as a dwelling and which has a ground floor area in excess of 5,000 sq. ft. Sec. 154, Chapter 10, Code of Ordinances.

"3. Dwelling is not located immediately above the garage. Sec. 154, Chapter 10, Code of Ordinances.

"5. Building is not equipped with a regulation 4" standpipe. Sec. 581, Chapter 5, Code of Ordinances.

"6. Sec. 154, Chapter 10, Code of Ordinances requires all stairways to be protected. (Spiral stairway, 1st floor in garage).";

and

WHEREAS, the building is fireproof, two, three and four stories in height; OCCUPIED: cellar, boiler room, 1 person; 1st story, garage and kennel, 4 persons; 2nd story, hospital for animals, 6 persons; 3rd story, hospital for animals, 4 persons; 4th story, living quarters, 6 persons; means of EGRESS consisting of an interior fireproof enclosed stairway in the three-story section at northerly end, extending from the third story to street, connecting at the second story with the two-story section, an interior fireproof circular stairway, extending from first story to roof, enclosed on the second and third stories but open on the first story (garage); an interior fireproof enclosed stairway, extending from the first story to roof in the four-story section at southwest corner; an interior stairway at northerly side of four-story section, connecting fourth and third stories; a horizontal exit at northerly side on fourth story opening in roof of three-story section and a corridor on second and third stories leading to stairway in three-story section; and

WHEREAS, appellant contends, as to Items 1 and 2, that the garage portion is used for trucks of the S. P. C. A. which open to the hospital and that the living quarters are occupied by the house doctor and kennel man; as to Item 3, it is necessary to maintain hospital portion directly over garage for the handling of the animals; as to Item 5, the location of the building on two street fronts with its subdivided area would render a standpipe unnecessary; as to Item 6, proposes to enclose stairway, but requests permission to maintain it as it is an additional stairway to those required by law.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Order No. 40347-LC, Item 1, *on condition* that the use and occupancy of the living quarters on the fourth story shall be restricted to the exclusive use of the resident doctor and family; that a fireproof stairway shall be provided from this dwelling occupancy leading direct to the ground floor level with exit through open passageway direct to the street; that a door in the northerly gable wall of the fourth story shall be provided to the roof of the three-story extension adjoining to the north, with iron stairs from the roof of the three-story extension to the roof of the two-story section fronting on 24th street, and that a door shall be provided on the roof of the two-story section to dog runway with egress to the stair hall in the center section of the building leading direct to Avenue A, and *granted*, as to Item 2, *on condition* that the use of the garage service shall be restricted to the motor vehicles used

in conjunction with and accessory to the activities of the present incorporated organization operating and conducting these premises; that the gasoline storage on these premises shall be limited to not more than one tank, not exceeding 250 gallons capacity, installed in accordance with the laws and ordinances affecting same, and *granted*, as to Item 3, *on condition* that the conditions as set forth as to Item 1 shall be complied with, and *granted*, as to Item 5, *on condition* that the building shall not be increased in height, area or dimension and that one approved portable 2½-gallon fire extinguisher shall be installed and maintained on each story, located as directed by the fire department, and *granted*, as to Item 6, *on condition* that the spiral stairway from first story to roof in the three-story, center section of the building shall be enclosed on the first story with a self-closing, fireproof door at the opening; that the stairway in three-story section, Avenue A front, at the northerly end, shall be enclosed fireproof throughout connecting through corridor to the roof of the two-story building at the East 24th street front; a sidewalk area shall be provided from the cellar level for secondary means of egress from the boiler room to Avenue A or East 24th street front, with hinged sidewalk grating or bulkhead cover at sidewalk level.

THE RESOLUTION—

(1-28-BZ)

WHEREAS, John J. Ryan, for Florence M. Steinberg, owner, filed, January 3, 1928, an application, under the building zone resolution, to permit in a business district the

erection and maintenance of a gasoline service station; premises 3401 Kingsland avenue, northwest corner of Boston road, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 5, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Boston road is in a business district; Kingsland avenue, north of a point 100 ft. north of Boston road, is in a residence district, and Kingsland avenue, south of a point 100 ft. south of Boston road, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered December 22, 1927 (re Plan No. 4321-1927), reads:

"1. A gasoline service station may not be permitted in a business district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 53.54 ft. on Boston road and a frontage of 54.36 ft. on Kingsland avenue, upon which it is proposed to erect a two-story dwelling of owner (with a four-car garage, space therein to be rented on first story); a grease rack, a small one-story office and accessory store, four gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 on the grounds of hardship and unnecessary difficulties.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the application be and it hereby is denied.

THE RESOLUTION—

(1315-27-BZ)

WHEREAS, John P. Walther, for Fannie Gordon, owner, filed, December 20, 1927, an application, under the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence use to a business use; premises 856 St. Nicholas avenue, 59 St. Nicholas place and 400 West 153rd street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 5, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that St. Nicholas avenue, St. Nicholas place and West 153rd street are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered November 26, 1927 (re Alt. App. No. 2570-1927), reads:

"1. Proposed new stores are contrary to Sec. 3 of the Zoning Resolution.";

and

WHEREAS, the existing building is of non-fireproof construction, five and six stories and basement in height, with a frontage of 164 ft. 10 in. on West 153rd street, 24 ft. 11 in. on St. Nicholas place and 25 ft. 5 in. on St. Nicholas avenue; occupied as a tenement; it is proposed to alter the building in the basement and first story and occupy the first story as stores; and

WHEREAS, the basis of appeal under section 7, subdivision c, does not apply in this application as the site under appeal is wholly within the residential area; and

WHEREAS, the board deemed that applicant was not en-

titled to relief under section 21 on the grounds of hardship or practical difficulties.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

WHEREAS, Daniel W. Wilkes, for Bennett De Beixedon, owner, filed, October 25, 1923, an application, under the building zone resolution, to permit in a business district the maintenance of a parking garage for the storage of more than five (5) motor vehicles; premises 1090-1094 Gates avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, June 10, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Gates avenue and Broadway are business districts and Bushwick avenue is a residence district; and

WHEREAS, the order of the fire commissioner, dated May 16, 1923, reads:

"1. Discontinue the storage of motor vehicles the fuel storage tanks of which are not empty in the unenclosed lots * * *";

and

WHEREAS, it is proposed to maintain a parking space for more than five motor vehicles on these premises; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 80 per cent of the property frontage deemed to be affected; and

WHEREAS, this application was granted by the board June 10, 1924, for a temporary period of two years, and June 28, 1927, for a temporary period of one year, and applicant requests an extension of the time.

Resolved, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* for a temporary permit for a period of one year from June 28, 1928.

729-23-BZ.

APPLICANT—Joseph J. Dalmases, for Conrad Di Christina, owner.

SUBJECT—Application for reopening—extension of permit and reconsideration (re decision of superintendent of buildings) under section 7-g of the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of four (4) motor vehicles, three spaces rented to persons not residing on the premises (previously granted for temporary permit).

MINUTES

PREMISES AFFECTED—733-735 East 235th street, The Bronx.

APPEARANCES—

For Applicant: Joseph J. Dalmases.

For Opposition: None.

ACTION OF BOARD—Application reopened and temporary permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(729-23-BZ)

WHEREAS, John De Hart, for Nicholas Di Gregorio, owner, filed, June 11, 1923, an application, under the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of four (4) motor vehicles, three spaces rented to persons not residing on the premises; premises 733-735 East 235th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, December 18, 1923, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 235th, East 236th street and Byron avenue are residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered June 1, 1923, reads:

"Your request of May 29th for a certificate of occupancy for a garage of four motor vehicles, three of which are to be rented out to persons not residing on the premises 733-35 East 235th Street, Bronx, is hereby denied for the reason that the premises are located within a residence district as established by the Building Zone Resolution and the garage will not be used solely as an accessory to the dwelling upon the premises."

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 35 ft. and a depth of 20 ft.; occupied as a garage for the storage of four motor vehicles, three spaces rented to persons not residing on premises; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 82.3 per cent of the property frontage deemed by the board to be affected; and

WHEREAS, this application was granted by a resolution of the board, December 18, 1923, for a period of two years, reopened April 20, 1926, and June 5, 1928, for the purpose of renewing the permit; and

WHEREAS, Conrad Di Christina, the present owner, through his attorney, Joseph J. Dalmases, has requested an extension of the original permit for a further period of two years; he has filed twenty-one (21) new consents, equivalent to 81.1 per cent of the area affected; and

WHEREAS, applicant has filed in excess of 81 per cent consents of the area deemed affected and fixed by this board.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, for a temporary period of two years from this date, June 5, 1928, under the conditions of the original resolution, which reads that the capacity of the garage be limited to four automobiles of the pleasure-car type, space for three of which may be rented to persons not residing on the premises; that there be no gasoline storage maintained on the premises other than in the tanks of the cars; that there shall be no advertising or signs of any nature or description; no gasoline storage, and that all permits shall be obtained within thirty days.

APPROVAL OF PLANS

411-28-A.

APPELLANT—The New York Central Railroad Company, owner.

SUBJECT—Application for approval of plans.

PREMISES AFFECTED—615-633 West 59th street, Manhattan.

APPEARANCES—

For Appellant: Leo Manville, Allison B. Nelson and Marco C. Smith.

ACTION OF BOARD—Plans approved as being in substantial compliance with resolution adopted May 29, 1928.

THE VOTE TO APPROVE PLANS—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

RESCINDMENT OF GENERAL RESOLUTION

262-16-A.

APPELLANT—Board of Standards and Appeals.

SUBJECT—Rescindment of general resolution adopted as to classification of buildings for doctors' offices, patients' rooms and laboratories.

APPEARANCES—None.

ACTION OF BOARD—Resolution formerly adopted, in connection with the subject case, rescinded as a general resolution.

THE VOTE TO RESCIND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(262-16-A)

WHEREAS, the board under date of December 5, 1916, adopted the general resolution under Cal. No. 262-16-A, affecting a single private residence of a practicing physician, reading:

"Resolved, that in the opinion of the Board of Appeals, a building arranged for and devoted to doctors' offices, patients' rooms and laboratories, used in connection with such doctors' offices, is deemed to be a sanatorium, provided that such a building is not used for other purposes, except the single living apartment for a caretaker."

and

WHEREAS, this resolution was based on the appeal taken from an administrative determination of the question as to the conduct of a doctor's office with professional practice; the question being raised at that time, namely, the outset of the zoning resolution, which had only then been enacted; and

WHEREAS, under misapprehension and unwarranted interpretation between a doctor's personal practice and accessory uses and an office building for doctors (commercial characterization only), permits have been issued by the several bureaus of buildings, the board deems that in harmony with the general administrative integrity of the zoning resolution that the resolution should be rescinded; and

WHEREAS, it was the intention of the board to adopt the resolution only as to the conduct of a doctor's office with accessory practice as being permissive in a residence district, but at no time to embrace, include, recognize or permit an office building for doctors, as there can be no difference between an office building for doctors or a doctors' office building, it is and becomes a business building; therefore, be it

Resolved, that the resolution adopted under Cal. No. 262-16-A be and it hereby is *rescinded* as a general resolution.

Adjourned 1.40 p. m.

WILLIAM J. O'GORMAN, Secretary.

THE RESOLUTION—

(39-28-S)

WHEREAS, De Pace & Juster, for Constanzo Realty Corp., owner, filed, January 16, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 151-153 West 46th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated January 5, 1928 (N. B. App. No. 226-27), reads:

"10. Windows on 1st and 2nd floors should comply with section 264 Labor Law and rule 503 Industrial Code."; and

WHEREAS, the building is fireproof, fourteen stories in height, 50 ft. by 100 ft. 5 in. in area; OCCUPIED: showrooms, offices with 25 per cent manufacturing, about 80 persons on each story; EQUIPPED with a sprinkler system; EXITS: a fire tower; an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use 1/4-inch plate glass in show windows at street front, the maximum size at first story, 10 ft. 6 in. by 10 ft. 10 in.; second story, 7 ft. 6 in. by 10 ft. 10 in.; all windows above the second story will conform to the requirements of the labor law; and

WHEREAS, the petitioner contends that to use smaller size glass would destroy the value and the intended use of the two lowest stories for store and showroom purposes.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front, first and second stories, *on condition* that the openings shall be equipped with approved metal frames and sash, glazed with one-quarter-inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION—
(89-28-S)
WHEREAS, George and Edward Blum, for 347 West 36th Street Corp., owner, filed, January 31, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 347-351 West 36th street, Borough of Manhattan; and
WHEREAS, the decision of the superintendent of buildings, rendered January 26, 1928 (re N. B. App. No. 519-1927), reads:
"9. Windows should comply with Sec. 264 of Labor Law and Rule 503 of the Industrial Code. No light shall exceed 720 sq. inches in area and be not more than 48 inches in any dimension.";

and
WHEREAS, the building is fireproof, sixteen stories in height, 83 ft. 4 in. by 98 ft. 9 in. in area; OCCUPIED: 1st story, stores; upper stories, tenant factories, 70 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and
WHEREAS, there are openings in the street wall of the building on the first and second stories, glazed with one-quarter-inch polished plate glass, set in approved metal frames; the maximum area of the glass on the first story being 5 ft. 10 in. by 7 ft. 7½ in., and on the second story being 6 ft. 6 in. by 9 ft. 2 in. in area; and
WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of these two stores and, also, would detract from the architectural appearance of the building.
Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the street front, first and second stories, on condition that the openings shall be equipped with approved metal frames and sash, glazed with one-quarter-inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION—
(51-28-S)
WHEREAS, Samuel Rosenblum, for Warren & Greenwich Realty Corp., lessee, filed, January 18, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 98-100 Warren street and 278-284 Greenwich street, Borough of Manhattan; and
WHEREAS, the order of the fire commissioner, dated July 6, 1927 (Order No. 24235-LD), reads:
"1. Enclose the interior stairway at the north side of building, also the stairway at west side of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the cellar to 3 feet above the roof, constructed as per Sec. 271 of the Labor Law, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.";

and
WHEREAS, the building is irregular in shape, non-fireproof, six stories (71 ft. 9 in.) in height, having a frontage of 91 ft. 9 in. on Greenwich street, 75 ft. 9 in. on Warren street and 92 ft. 4 in. on Bishops lane; OCCUPIED: 1st story, stores; 2nd story, manufacture of tin edging and pipe bands, 25 persons; 3rd story, printing and offices, 25 persons; 4th story, office and showroom, 10 persons; 5th story, vacant at present; 6th story, newspaper bureau, 75 persons; EXITS: two interior fireproof stairways, extending from the first story to top story (with iron ladders leading to scuttles in roof), enclosed in brick partitions, excepting the entrance hall on the first story which is constructed of wood lath and plaster, with glass paneled doors at openings; two substandard fire escapes on the front of the building, having unprotected openings along the course thereof, extending from the top story balcony to the second story balcony, with drop ladders to street; ROOFS of adjoining buildings: to north, one story lower; and
WHEREAS, petitioner contends that the occupancy of the building is light; that the stairs themselves are fireproof; that the stair enclosures above the first story are fireproof; that there is a substantial lath and plaster enclosure on the first story leading directly to the street, and in view of these conditions and the two available fire escapes, requests the acceptance of the existing stairway enclosures.
Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

WHEREAS, the order of the fire commissioner, dated November 9, 1927, reads:

"Order No. 28455-LD:

"1. Provide an enclosure of fire-resisting material around interior stairway at first story extending from present termination of stairway to street front of building, with all openings in same protected with approved fire doors as per Section 271 of the Labor Law.";

and
WHEREAS, the building is fireproof, six stories (72 ft.) in height, 49 ft. 11 3/8 in. by 100 ft. 8 1/2 in. in area at first story and 49 ft. 11 3/8 in. by 90 ft. in area above; OCCUPIED by one concern for the manufacture of writing inks, mucilage, etc.: 1st story, 7 persons; 2nd story, 1 person; 3rd story, 3 persons; 4th story, 3 persons; 5th story, 1 person; 6th story, 5 persons; a total of 13 persons above the first story; EQUIPPED with a fire alarm signal system; EXITS: an interior steel riser and slate tread stairway, extending from the roof to the open loft on the first story at a point 19 ft. from the street entrance door, enclosed in 4-inch terra cotta block partitions with fireproof doors at openings; an exterior iron stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the rear yard at first story level, with EGRESS from the termination of the fire escape through the first story of the building to street and, also, through adjoining building at west; ROOFS of adjoining buildings: to east, same level; to west, five stories higher; and

WHEREAS, petitioner contends that there is a freight elevator between the termination of the interior stairway and the street; that there is a loading platform directly outside of the entrance door; that it is the custom to bring cases of materials in through the entrance doors to the elevator and that the required work would interfere with this practice and requests the acceptance of the existing termination from the interior stairway, in view of the fact that the open loft on the first story was accepted by the board as a safe means of egress from the termination of the exterior stairway at the rear.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the existing partition in the interior of the building, first story, shall be removed from the entrance stoop to office space; that the space from foot of stairway to the stoop, other than that space marked "office," and the single room at the southwesterly corner of the building at the front shall be maintained open and unobstructed; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy in single tenancy, operation and use throughout remain unchanged.

APPLIANCES SUBMITTED FOR APPROVAL

751-26-SA.

PETITIONER—Jones Oil Burner Company.

SUBJECT—Approval of Jones Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Petition dismissed for lack of prosecution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Chief
Kenlon

Negative

Absent

THE RESOLUTION—

(751-26-SA)

WHEREAS, the Jones Oil Burner Co. filed, September 9,

1926, a petition with the board of standards and appeals for approval of their device known as the Jones Oil Burner and

WHEREAS, the committee of the board visited the premises given as the place of installation of this device and failed to find the device in operation and petitioner has failed to furnish satisfactory information to this board as to proper location.

Resolved, that the petition be and it hereby is dismissed for lack of prosecution.

78-28-SA.

PETITIONER—Petroleum Heat and Power Co.

SUBJECT—Petro Burner, Model "O," approval of.

APPEARANCES—None.

ACTION OF BOARD—Chairman read engineer's report.

Report adopted and appliance approved.

THE VOTE TO ADOPT REPORT AND APPROVE APPLIANCE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Chief
Kenlon

Negative

Absent

THE RESOLUTION—

(78-28-SA)

WHEREAS, Petroleum Heat and Power Co. filed, January 27, 1928, a petition with the board of standards and appeals for approval of their device known as the Petro Burner, Model "O"; and

WHEREAS, a committee of the board inspected this device in operation in premises 2033 66th street, Borough of Brooklyn, and recommended the approval of the device.

Resolved, that the board of standards and appeals do hereby approve the device known as the Petro Burner, Model "O," for use with Grade A and Grade B fuel oil in domestic and commercial installations, when installed in accordance with the fuel oil rules of the board of standards and appeals.

81-20-SA.

PETITIONER—The Fairbanks Company.

SUBJECT—Approval of Fairbanks' Bronze Angle Hose Valve.

APPEARANCES—

For Petitioner: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Chief
Kenlon

Negative

Absent

THE RESOLUTION—

(81-20-SA)

WHEREAS, under date of January 27, 1920, the board of standards and appeals approved the Fairbanks Company 2 1/2-Inch Angle Hose Valve; and

WHEREAS, a further test was made of this valve by a committee of the board and a recommendation made that the approval should be amended.

Resolved, that the board of standards and appeals do hereby approve the Fairbanks Bronze 2 1/2-Inch Angle Hose Valve for use as a type A valve in standpipe installations, on condition that the valve shall be identified with an arrow on the hand wheel pointing in the direction of opening, with the word "open" in 3/8-inch raised letters, and that the calendar number of the board of standards and appeals shall be cast in the body of the valve.

MINUTES

53-21-SA.

PETITIONER—E. J. Phalen, substituted for T. V. Foster, for New York Brass Foundry Co.

SUBJECT—Stillbech 2½-Inch Bronze Angle Hose Valve, approval of.

APPEARANCES—

For Petitioner: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Chairman read engineer's report and that of fire department. Both reports adopted and appliance approved.

THE VOTE TO ADOPT REPORTS AND APPROVE APPLIANCE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

THE RESOLUTION—

(493-24-SA)

WHEREAS, Alfred R. Haase filed, April 7, 1924, a petition for approval of his device known as the Faultless Oil Burner; and

WHEREAS, a committee of the board inspected this device in operation at premises 137 Corona avenue, Corona, Borough of Queens, and recommended the approval of the device; and

WHEREAS, this petition was granted by the board at its meeting, December 2, 1925, approving the burner for use with Grade B fuel oil and petitioner requests its approval for use with Grade A oil also, and on June 5, 1928, requests its approval for use in domestic and commercial installations.

Resolved, that the board of standards and appeals does hereby approve the device known as the Faultless Oil Burner for use with Grade B fuel oil and for use with Grade A fuel oil when equipped with pump feed in domestic and commercial installations in conjunction with fuel oil burning equipment, and when used in commercial installations shall be under the supervision of a certified operator and equipped with safety controls.

Adjourned 3.30 p. m.

WILLIAM J. O'GORMAN, Secretary.

RULES

"STANDPIPE"- "FIRELINE" RULES ADOPTED JUNE 27, 1922 AMENDED MAY 18, 1928

[281-22-SR]

Rule 1. PLANS. A preliminary set of paper plans and cross sections, drawn clearly and distinctly, to a scale of $\frac{1}{4}$ -inch or, by permission of the Fire Commissioner, $\frac{1}{8}$ -inch to the foot, for each proposed standpipe (fire line) installation or alteration, shall be submitted to and approved by the Fire Commissioner before the work in connection with the installation is started. Such preliminary plans shall show the size and location of the standpipe (fire line) risers, size and location of siamese and cross-connections, valves, tanks and connections, pumps, hose stations, lengths of hose, etc., and the location of stairways and enclosing partitions in relation to the standpipe risers and hose stations. From these approved preliminary plans, three sets of plans on cloth, in clean and clear detail, shall be filed for final approval by the Fire Commissioner. A certified copy of approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If an automatic sprinkler system is provided throughout the building or in any portion of the building, the plans shall include a note to that effect.

Rule 2. APPROVAL. Before acceptance all standpipe (fire lines) shall be tested, for at least one hour, under a hydrostatic pressure of not less than 300 pounds per square inch at the street siamese, and at each pump supply level, or such additional pressures as may be required to give 100 pounds at the highest hose outlet supplied by such pump, except that when a change is made in a source of supply, or minor changes are made in an existing equipment previously approved, the system shall be tested to a pressure sufficient to give 50 lbs. per sq. in. at the highest story hose outlet. These tests to be made in the presence of a representative of the Fire Prevention Bureau.

No valves, risers, or other material portions of any standpipe (fire lines) equipment shall be covered or permanently concealed until tested and approved, in writing, by the Bureau of Fire Prevention.

When entirely completed in accordance with the approved plans, and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the standpipe equipment is approved, the applicant will be so advised, in writing, by the Bureau of Fire Prevention.

When deemed necessary by the Fire Commissioner, sectional diagrams of the standpipe (fire line) equipment in buildings of large area or height, not more than three in number and printed on cloth in size not less than $8\frac{1}{2} \times 11$ in., shall be filed by the applicant for the use of fire companies in the district in which the premises are located.

Rule 3. STANDPIPE-FIRE LINE CERTIFICATE. The engineer, superintendent or persons in charge of the standpipe-fire line system in all buildings exceeding eighty-five feet in height shall be registered, and submit to an examination in the Fire Department. Upon evidence of fitness to properly operate and maintain the standpipe system he shall be granted a Certificate to that effect. The certificate shall contain the full name and a small photograph of the holder.

Day and night service shall be maintained in all buildings exceeding 250 ft. in height in which there is a fire pump.

Theatre buildings provided with fire pumps shall have at least one certified operator on duty during every performance. Buildings of large areas, industrial plants, amuse-

ment parks, etc., shall have at least one certified operator on duty when deemed necessary by the fire commissioner.

Rule 4. MONTHLY INSPECTION. All valves, hose, tools and other auxiliary fire appliances shall be kept in perfect working order, and at least once a month a person holding certificate of fitness shall make a thorough inspection of all the fire appliances to see that they are in perfect working order and ready for immediate use by the Fire Department. Fire pumps shall be tested every 30 days by the person holding the certificate of fitness.

He shall also instruct all employees under his charge in the use and practice of all auxiliary fire appliances. A detailed record of each inspection shall be kept on the premises for examination by a representative of the Fire Department.

All standpipe equipment in buildings exceeding 85 ft. height shall be subject to a flow test with a pressure of not less than 50 lbs. at the top floor outlet, at least once in every two years, test to be conducted in the presence of a representative of the Fire Department.

Rule 5. APPROVED DEVICES. All devices approved for use in new standpipe fire line equipments shall bear the manufacturer's name and the date of and the number of the approval. Certified copies of the approval, working drawings and photographs of the device approved, shall be submitted to the administrative authority having jurisdiction for preservation as records and reference data.

Rule 6. ELEVATOR IN READINESS. In every building exceeding 150 feet in height at least one passenger elevator and in buildings in course of construction a hoist or elevator shall be kept in readiness for immediate use by the Fire Department during all hours of the night at all times, including holidays and Sundays, and a man competent to operate the elevator shall be present at all times.

Rule 7. AREA OF BUILDINGS. For the application of Section 581 of Chapter 5 of the Code of Ordinances the area of a building shall be taken as the area within the exterior walls, or the area between fire walls.

When the fire walls are constructed in accordance with Section 371, Chapter 5 of the Code of Ordinances, and all openings are protected on both sides of fire wall or wall with automatic fireproof self-closing doors, the area within such fire walls or exterior walls and a fire wall, shall be considered a separate building.

Rule 8. HEIGHT. The term "height" as applied to a building or structure, as described in Chapter 5, Code of Ordinances, means the vertical distance measured in a straight line from the curb level, to the highest point of the roof beams in the case of flat roofs, and to the average height of gable in case of roofs having a pitch of more than 2 degrees with a horizontal plane.

Rule 9. STANDPIPE EQUIPMENT shall consist of a system of piping connected to one or more approved sources of water supply and provided with sufficient number of hose outlets and hose located as hereinafter set forth, to make possible the covering of every portion of each floor area with a standpipe hose stream, except that where the 1st story or basement or both are occupied as stores without connection or communication with the entrance hall or stair enclosure to upper stories, the Fire Commissioner may permit the omission of standpipe protection in such stores and, if so omitted, may prescribe such portable protection as he may deem necessary. Cellars, sub-cellars, basements, etc., shall be protected in the same manner as the stories above.

RULES

every standpipe (fire line) equipment shall be a Standard System, except as hereinafter provided for:

a) In any building not exceeding 40 feet in height, and 100 sq. ft. in area, a four-inch street supply system having one four (4) inch direct connection to a street main in two ways or having one 4-in. direct connection to each of the two street mains on two street fronts, each main so that the shutting off of one main will not interfere with the supply of the other main, may be installed, provided there is a sufficient pressure in the street main or mains to maintain a minimum of twenty-five (25) pounds per square inch static pressure at the highest hose outlet. Evidence establishing the fact that water main conditions and pressures are as required shall be submitted to the Fire Department.

Rule 10. CLASSIFICATION OF STANDPIPE-FIRE LINE EQUIPMENTS. For the purpose of these rules standpipe equipments shall be classified as:

(a) Standard Wet System in which the pipes are of sizes specified in Section 581 of the Building Code, and in which the system is at all times filled with water from at least one standard source of supply.
(b) Four-inch street connection system, in which the pipes are of sizes as specified in Section 581 of the Building Code and the system is at all times filled with water from one or more 4-in. diameter direct connections to public water mains in the street.
(c) Automatic dry systems, in which the pipes are of sizes specified in Section 581 of the Building Code, and are normally dry, the system being connected to a source of water supply controlled by an automatic dry pipe valve as defined elsewhere in these rules.

Rule 11. TANKS ABOVE ROOF. Construction shall be as per Section 428 of the Building Code and tank structure and supports shall be approved by the Superintendent of Buildings. The covers of all unenclosed standpipe tanks shall be conical in shape and protected with a type of roofing approved by the Superintendent of Buildings.

Rule 12. RESERVE FOR STANDPIPE. Gravity roof tanks, except as otherwise required by Rule 83, shall contain not less than 3,500 gallons of water at all times, reserved solely for standpipe fire line purposes.

When a gravity tank is to be used for both standpipe and house supply, the connection for the latter shall be made through the side of the tank above the level of the required standpipe reserve. This type of house and standpipe supply tank is preferred and recommended.

When two gravity tanks are used, one for standpipe fire line service and the other for the house supply, the house supply tank may be so arranged that it can only be filled by an overflow from the tank used for standpipe fire line purposes.

Rule 13. STANDPIPE AND SPRINKLER SUPPLIES. Standpipe and sprinkler supply shall not be taken from one tank unless there is available 5,000 gallons of water or the standpipe system which shall be in excess of the amount of water required for the sprinkler system. Standpipe supply shall be taken from the uppermost portion, and through the side of the tank, or through the bottom, provided that portion of the pipe within the tank is of brass or other non-corroding material.

Rule 14. BUILDINGS IN GROUP UNDER THE SAME OWNERSHIP AND OPERATION:

One gravity tank of at least 5,000 gallons water capacity to supply the largest unit of a group of separate and distinct buildings operating under one ownership, and located at such elevation that the bottom of the tank will be at least 20 feet above the roof of the highest building of the group, will be accepted as an adequate tank supply for the entire standpipe equipment, provided a dead riser is carried down from the bottom of the tank to an underground header system having a Post Indicator control valve for each building

unit, the P. I. valves to be located as the Fire Commissioner may direct.

Rule 15. UNDERGROUND PIPING. All underground piping shall be extra heavy cast iron installed in accordance with the standard specifications of the American Water Works Association: for 4-inch lines Class C requirements shall be used, 6-inch Class D, 8-inch Class E.

Rule 16. ADDITIONAL TANKS. When, in his opinion, the area covered is excessive or the occupancy is such that an unusual fire hazard is introduced, the Fire Commissioner may require additional protection in the nature of additional tank or tanks located remote from any other standpipe tank, or additional water supply in the main gravity tank, or a fire pump and suction tank of size and capacity to be determined by the Fire Commissioner or the Board of Standards and Appeals, or a combination of any of the foregoing supplies.

Rule 17. STANDARD SOURCE OF SUPPLY. Gravity tank located so that the bottom of same will be not less than 20 feet above the roof level and of a capacity as stated elsewhere in these rules and directly connected with the standpipe equipment by pipes of the same diameter as that of the largest riser.

Rule 18. TANK FEED. Tanks shall not be fed through the standpipe fire line, but shall be fed through a separate line at least 2 inches in diameter, discharging into the top of each tank above the overflow level through the side or through the bottom, that portion of the pipe within the tank to be of brass or bronze. An electric or steam pump of sufficient capacity to deliver at least 65 gallons of water per minute at the tank shall be provided, or if the pressure in the service line is sufficient and the plumbing is such that a minimum of 65 gallons of water per minute may be delivered to the tank, connection to the house water service main in the basement, cellar or lowest story may be used instead of pump.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, when a ball (float) valve is provided for each tank. Floats shall be of copper.

Rule 19. OVERFLOW. An overflow of diameter at least as large as that of the fill line shall be provided for each roof standpipe tank. The overflow line from all intermediate tanks shall be at least 6 inches in diameter. It may be run through the bottom of the tank, provided it is of brass or bronze and has no joint inside of the tank, otherwise it must be brought through the side of the tank, 3 inches below the top (of sides). Overflows shall terminate in a 90 degree elbow not more than 24 inches above the roof.

Rule 20. EMERGENCY DRAIN. There shall be provided for each tank an emergency drain not less than 4 inches in diameter connected directly to the bottom of the tank or to the standpipe supply line above the tank check, and terminating not less than 30 inches nor more than 4 feet above the roof in a horizontal run. Emergency drain shall be provided with a 4-inch O. S. & Y. gate valve located in a readily accessible position not more than 4 feet above the roof.

Rule 21. ELEVATION OF TANK. The bottom of each gravity tank used for standpipe fire line supply shall be at least 20 feet above the level of the roof. When the area of a pent house exceeds 50% of the roof area or when it exceeds an area of 2,500 sq. ft., the bottom of the tank shall be required to be not less than 20 ft. above the level of the pent house roof. In existing standpipe equipment the bottom of the gravity standpipe tank shall not be required to be more than 20 feet above the outlet in the highest story.

Rule 22. PYRAMID OR TOWER ROOFS. Where the roof of the building is designed so as to finish in a

RULES

pyramid or tower form, the gravity tank shall be elevated as high as practicable, within the pyramid or tower. Provided, however, that in all cases, the gravity tank is not less than twenty (20) feet above the hose outlet in any room or space occupied other than for tank houses, elevator machinery or machine shop for repairing elevator machinery. Fire appliances, as may be required by the Fire Commissioner, shall be provided in such tank houses, elevator machine rooms, etc.

Rule 23. ACCESS TO TANK. Access to the top of each standpipe tank shall be provided by means of an iron gooseneck ladder of substantial construction and rigidly braced. Access to the tanks on theatre building shall be from the stage level to the roof by means of double-rung ladders set at an angle of not more than 70°, with intermediate landings every 12 ft. or less.

Rule 24. HIGH AND LOW WATER ALARM. Every gravity tank hereafter installed for standpipe fire line purposes shall be equipped with an electric closed circuit high and low alarm as provided under Rule 88, in order that it may be determined at any time whether or not the required standpipe reserve is in the tank, except when the house supply is taken from the tank, or where the house supply tank can only be filled from an overflow of the standpipe fire line reserve tank, a high and low alarm need not be provided when an automatic tank filling pump is installed.

Rule 25. CHECK VALVE. There shall be provided in a horizontal run of pipe in the top story stair enclosure or in a heated enclosure on the main roof, in the line connecting the standpipe tank with the standpipe riser, an approved type swing check valve opening downstream toward riser, except that where a siamese connection has been omitted, under these rules, no check valve shall be required. An O. S. & Y. gate valve shall be provided on each side of the check valve and shall be sealed open in an approved manner.

Rule 26. HEATING OF TANKS. All tanks used for standpipe supply purposes shall be heated by means of steam supplied through a brass coil with brass fittings and of a type and radiating surface as prescribed by the Board of Standards and Appeals. The heater shall be fed through a 1¼-inch steam line with a 1-inch return, separately trapped. The water in the tank shall be maintained at a temperature above 40° F.

Tanks in hotels, hospitals, institutes or similar buildings using the tank supply seven days a week supplying both standpipe and house service lines shall not require heating. If in an adequately heated enclosure, interior heating of tanks shall not be required.

Rule 27. LOWEST SUCTION TANKS. Tanks shall have at least 10,000 gallon effective water capacity as specified in Schedule A, reserved for the lowest fire pump use exclusively and shall be constructed of steel or reinforced concrete, located below the grade, or lowest story, if there is no cellar under the building. The Fire Commissioner may permit suction tanks to be located in a separate enclosure or building provided they are accessible and when, in his judgment, such location will be more practicable. House supply tanks may be connected to the fire pump suction line, provided an O. S. & Y. gate valve, sealed closed, shall be provided on such house supply lines.

Rule 28. LOWEST TANK SUPPLY. The lowest suction tanks shall be fed by a connection at least 4 inches in diameter taken directly and independently from the public street main. The supply shall be not less than 750 gallons a minute, and shall enter the suction tank above the top or through the side near the top of the tank and shall be controlled by suitable bronze ball cock and copper float.

Rule 29. SUPPORT FOR TANKS. Tanks of more than 500 gallons capacity hereafter placed in or on any building shall be supported on masonry, reinforced concrete or steel construction of sufficient strength and carried to a proper foundation as provided for in section 428, Chapter 5 of the Code of Ordinances.

Rule 30. INTERMEDIATE TANKS. The location of intermediate tanks hereafter installed shall be determined

and directed by the Fire Commissioner and as prescribed in Schedule A. Each such tank shall have at least 5,000 gallons of water reserved exclusively for fire line and pump purposes. The bottom of each tank shall be at least 20 feet above the highest outlet supplied therefrom. The method of water supply to tanks, the overflow, the high and low water alarm, the emergency drain, etc., shall be as prescribed for tanks above the roof except that the overflow and emergency drain shall be connected to the drainage system of the building or discharge on intermediate levels.

The connection of the tank to the system shall be as hereinafter set forth:

Piping of the same diameter as the riser shall connect the tank with the riser of the portion of equipment supplied from that tank and in this connecting line in a horizontal run there shall be placed an approved swing check valve opening downward, and two O. S. & Y. gate valves, one at each side of the check valve. Each tank section shall be directly connected to the tank section above by means of piping of the same diameter as that of the largest riser and in a horizontal connecting line shall be provided an approved swing check valve opening upward, with an O. S. & Y. gate valve, at each side of the check valve, in order that water pumped into the siamese connection may enter the entire equipment of the building, and that each tank will supply only its portion of the system.

Rule 31. VALVES. All valves controlling standpipe water supply except valves at hose outlets shall be iron body brass mounted, or cast steel designed in accordance with specifications of the American Society of Mechanical Engineers, gate valves shall be of Outside Stem & Yoke type and shall be located in an accessible position. All emergency control valves 6 inch and larger shall be of the by-pass type.

Rule 32. PIPING. Materials of Construction. All new piping for standpipe fire lines shall be of genuine full weight wrought iron or steel and properly tested by the manufacturer to withstand the required water working pressures. All pipes shall be lapwelded. Where working pressures are in excess of 150 lbs. to the square inch extra heavy cast iron, malleable iron or cast steel valves, and fittings constructed in accordance with the specifications of the American Society of Mechanical Engineers, able to withstand the required water working pressure shall be provided. The standard weight fittings and valves may be used where the pressure is not more than 150 lbs. per sq. in. Fittings in horizontal runs shall have long turns. All underground piping shall be of extra heavy cast iron as required by Rule 15.

The water working pressure on piping, valves and fittings shall be determined by the total head of water plus 50 pounds at the top floor hose outlet plus a factor of safety of at least 50 per cent. Specifications as to the construction and water working pressure of all piping, valves and fittings shall be marked on plans filed with fire commissioner.

Rule 33. CONSTRUCTION. Each standpipe fire line riser shall be supported at the bottom and at every other (alternate) story, and shall be properly braced. Horizontal lines shall be supported by standard heavy wrought or malleable iron hangers attached to or extending around and over floor beams at intervals of not more than 8 ft., and at more frequent intervals if deemed necessary by the Fire Commissioner and shall be securely braced to withstand vibration. Hangers may be supported by straps or bars extending over and around bars of at least 1 in. in diameter and 12 in. in length embedded in concrete floors parallel to and at least 2 in. from the undersurface or by approved malleable iron concrete inserts. The arrangement of lines must be straight and as direct as practicable. Offsets will be permitted only when unavoidable or where necessary to install horizontal check valves. Except where flange fittings and pipes are permitted elsewhere in this rule, all joints shall be screwed joints made up thoroughly water tight with red lead, litharge and glycerine, or compressed graphite lead and boiled linseed oil, or any joint compound that shall be approved by the Board of Standards and Appeals.

RULES

n horizontal runs of piping of standpipe fire line systems, if larger than 4 in. in diameter, fittings and valves shall be of the flange type, provided flange faces are made true and smooth and do not show rings, sand holes or other imperfections. All joints shall be provided with copper gaskets.

All standpipe (fire line) equipments shall be installed in a workmanlike manner.

Rule 34. PROTECTION OF FIRE LINES. Standpipe lines when not located within a fire protected stair enclosure shall be protected against interior fire damage by means of at least one inch asbestos covering, or a covering of expanded metal lath and three-quarters inch Portland cement plaster or by a 2 in. terra cotta block encasement.

Rule 35. FROST PROTECTION. Standpipe lines shall be properly protected from freezing in the following manner:

One wrapping of tar paper equivalent to Asphalt Saturated Wool Felt paper weighing 12 lbs. per 100 sq. ft.

Three (3) layers of standard 1 in. high grade "long cows' hair" felt interposed and covered with one (1) layer of Builders' paper equivalent to red rosin sized sheathing paper weighing 40 lbs. per 500 sq. ft.

One (1) covering of 8 oz. canvas, painted with two (2) coats of waterproof paint.

All wrappings to be independently applied and securely fastened in place with heavy jute twine. Circumferential and longitudinal joints to have at least a 2 in. lap staggered with adjacent layers and opposing leakage to the hair felt.

In groups of pipes each water pipe is to be wrapped separately with the tar paper, but subsequent layers of felt and paper may be applied collectively if space does not permit of individual wrapping.

Where a heating pipe is one of the group, the wrapping should be applied so that the hot line would serve all pipes in the enclosure. The initial wrapping of tar paper around each water pipe should be applied with laps down and the whole group wrapped with tar paper with laps up. If due to the position of the hot line sufficient air space would not insulate the hair felt, then protection to be effected by suitable separators, or a wrapping of asbestos paper instead of the tar paper around the group.

On vertical pipes particular provision to be made to prevent slipping and tearing of insulation due to its weight.

To prevent slipping away of insulation at point of entrance of pipes into a tank, and to shed leakage from slip joints, a 6 oz. duck to be provided, doubled and securely fastened to bottom of the tank overlapping inside and outside the insulation of the group for a distance of 18 in. below the tank. This duck to be well coated with paint. Loose hair felt to be packed about connection at tank bottom to safeguard against settling.

Rule 36. NUMBER OF RISERS. Each building fronting on more than one street shall have at least one riser for each street front. For the application of this rule a corner building shall not be considered as facing on more than one street when it is on but one corner. In all cases regardless of area or location there shall be a sufficient number of risers, so that any portion of each floor area may be covered by the stream from a standpipe hose not exceeding 100 ft. in length.

Rule 37. FIRE TOWER RISER. Each standpipe riser shall be located within a stair enclosure and one riser must be located in main stairway or fire tower.

Where impracticable to locate a riser within the stair enclosure, the Fire Commissioner may permit it to be located immediately adjacent to a stair enclosure, public corridor or other suitable place.

Rule 38. HOSE STREAM ALLOWANCE. Not more than 10 feet will be allowed for the throw of hose stream, except where the static pressure at the hose outlet is 15 lbs. or more, when 20 ft. will be allowed.

Rule 39. SIZE OF CROSS-CONNECTION. Where there are two or more risers in a standpipe (fire line) equipment, all risers shall be cross-connected by piping of a diameter at least equal to the diameter of the largest riser, but in no case shall the cross-connection be less than five inches.

Rule 40. FIRE PUMPS. Where Required:

(a) In every building hereafter erected exceeding 250 ft. in height, as described in Schedule A, an electric centrifugal fire pump shall be kept in readiness for immediate use of the Fire Department during all hours of the night and day, including Sundays and holidays.

Rule 41. ARRANGEMENT AND SUPPLY OF FIRE PUMPS. Fire pumps shall be connected to the standpipe systems and have a capacity of 750 gallons of water per minute at a pressure of from 50 to 80 lbs. at uppermost hose outlet, fed from such pumps. Fire pumps shall draw from steel or reinforced concrete suction tanks. For the purpose of testing fire pumps a 4 in. diameter branch shall be taken from the discharge line at the pump side of the check valve and run to the suction tank over the side or through the side above the overflow level. From this branch there shall be taken a 4 in. line with an approved type pressure relief valve, extending to the tank in a manner similar to that of the 4 in. test line. In the 4 in. test line between the 4 in. relief branch and the tank there shall be placed an O. S. & Y. gate valve, which shall be kept closed except during a test of the fire pump. In the line from the fire pump to the standpipe risers and beyond the test branch there shall be placed an approved type check valve in a horizontal position and also an O. S. & Y. gate valve, the latter to be open except when the fire pump is undergoing test. A pressure gauge shall be provided and connected to the discharge line of the pump.

The piping connecting discharge from fire pumps shall be of same diameter as the main riser.

Rule 42. NUMBER AND LOCATION OF FIRE PUMPS.

SCHEDULE A

Height from Uppermost Hose Outlet to grade*	Total No. of Pumps Required	Approximate Location of Pumps			
		1st Pump	2nd Pump	3rd Pump	4th Pump
			Above level of First Pump	Above level of First Pump	Above level of First Pump
250' to 400'	1	Below grade level			
401' to 500'	2	Below grade level	200' to 250'		
501' to 600'	2	Below grade level	250' to 300'		
601' to 700'	3	Below grade level	200' to 250'	400' to 500'	
701' to 800'	3	Below grade level	250' to 300'	500' to 600'	
801' to 900'	4	Below grade level	200' to 250'	400' to 500'	600' to 750'
901' to 1000'	4	Below grade level	250'	500'	750'

* The uppermost hose outlet shall not include pent house outlet.

Rule 43. FIRE PUMPS IN BUILDINGS EXCEEDING 1,000 FEET. All buildings exceeding 1,000 feet from grade level to uppermost hose outlet shall be provided with a fire pump for every 250 feet of elevation above the centre line of the lowest pump.

Rule 44. TANK CAPACITIES. Suction tanks supplying the first or lowest pump shall contain not less than 10,000 gallons reserved for fire pump. Intermediate tanks and uppermost supply tanks for buildings between 250 and 400 ft. as described in above schedule shall contain not less than 5,000 gallons reserved for fire pump. Uppermost supply tanks on all other buildings shall contain not less than 3,500 gallons reserve for standpipe fire line. Suction tanks shall be of the open type.

RULES

Rule 45. **TANK STRAINERS.** All supply tanks shall be provided with bronze strainers at pump and riser intake lines.

Rule 46. **CENTRIFUGAL FIRE PUMPS.** Fire pumps installed under these rules shall have a capacity of 750 G. P. M. and shall be of the multi-stage motor driven Centrifugal type designed, constructed and installed to render the highest possible efficient and reliable fire service.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

The pumping equipment shall be adaptable for heavy duty service having all parts of ample strength with liberal water passage and all working parts exposed to corrosion of phosphor bronze.

The pumps shall be fitted with fire fittings consisting of capacity name plate, pressure gauges, relief valves, hose manifold and three (3) approved 2½ in. hose valves with Standard Fire Department male threads. Fire pumps shall take suction supply under a head of water and in no case shall there be less than six (6) feet between water level in tank and centre line of pump.

The pump specifications shall be within the uniform requirements of "The National Standard" as adopted by the following associations:

Associated Factory Mutual Companies,
National Board of Fire Underwriters,

or as approved by the Board of Standards and Appeals.

Fire pumps to be designed to operate at not less than five (5) pre-determined speeds to give five (5) pre-determined pressures which will insure a maximum pressure of 80 lbs. and a minimum pressure of 50 lbs. throughout the building.

Fire pump equipment shall be so designed that it will operate normally at least five (5) speeds to provide a minimum of 50 lbs. pressure, and where more than one pump is required it shall be capable of pumping to the level of the next highest pump station in case of breakdown of intermediate pumping unit.

To provide for this standby service the fire pump shall run at nine (9) pre-determined speeds, namely, five (5) for continuous service and four (4) for standby service.

Rule 47. **GENERAL SPECIFICATIONS.** Pumping equipment shall be free from defects in design, workmanship and material and shall give proper and continuous operation under the conditions of service specified and shall be subject to approval of the Board of Standards and Appeals.

Materials entering into construction of this equipment shall be the best quality of their respective kinds and all parts shall be amply proportioned so as to be adaptable for heavy duty service.

CASING: Casing shall be of close grained cast iron and divided horizontally, and having suction and discharge connections in the lower half, so that the top casing can be removed without breaking water connections. Casing shall have in addition to flange bolts, additional heavy bolts inside of flange to prevent leakage between stages. Casing shall be tested and guaranteed to withstand pressure 50% in excess of working pressure.

SHAFT: Shaft shall be made of best grade nickel steel and shall be ground all over to close limits and a high finish.

IMPELLERS: Impellers shall be of the enclosed type of best grade of phosphor bronze finished all over.

WEARING RINGS: Shall be of phosphor bronze and of renewable labyrinth or other equal type. Impeller wearing rings shall be securely attached to impeller, and casing ring shall be securely locked in the casing.

SHAFT SLEEVES: Shaft sleeves shall be of bronze and extend through stuffing boxes to protect the shaft from corrosion and wear from the packing.

BEARINGS: Bearing brackets shall be of the best grade of close grained cast iron and securely bolted to the lower half of the casing.

Bearing brackets shall contain cast iron bearings lined with high grade babbitt and shall be removable. Each bearing shall be equipped with two oil rings to insure proper lubrication.

COUPLING: Coupling shall be of best grade cast iron finished all over and keyed to shaft. The two halves shall be connected by coupling pins, transmitting power through rubber bushings, vulcanized on steel sleeves.

STUFFING BOXES: Stuffing boxes shall be of sufficient depth to prevent excessive leakage and shall contain water seal rings of bronze.

PACKING: Packing shall be held in place by bronze glands horizontally split and bolted together.

BED PLATE: Bed plate shall be of cast iron of heavy box type and provided with finished pads to which the pump is bolted and doweled. Foundation bolt rings shall be drilled for foundation bolts. Jack-screw pads to be cast with bed and jack-screws furnished to assist in aligning. Bed plate shall be provided with ample drip rims, drilled and tapped for piping connections on both ends.

PAINTING: Pumps shall be painted, filled, rubbed down to an even surface and finished with a drab steel-color machine paint, and the inside of the oil reservoirs in the bearing brackets to be painted white with a special oil-resisting paint.

TESTING: Pumps shall be tested at the plant of manufacturer to prove that they can fulfill requirements of specifications and guarantees made.

Rule 48. **SPECIFICATIONS FOR ELECTRICAL CONTROL AND OPERATION OF FIRE PUMPS.**

MOTOR: (a) Direct-current motors must be of the shunt or cumulative compound wound types. The speed of the motor at no load must not exceed the speed at full load by more than 10%.

Alternating current motors shall be of a slip ring type that will surely start and attain full speed under the current supply conditions where pump is to be installed. Approval of fire pump installations will be contingent on proper attention being given to the features mentioned herein.

(b) With a room temperature not exceeding 40 deg. C., motors shall be designed for a temperature rise not exceeding 40 deg. C. when carrying their rated full load continuously and shall also be able to run continuously with an overload of 15% without stress and without injurious rise in the temperature. Motors shall be able to withstand under the above room temperature an overload of 25% for 2 hours or a momentary overload of 50% without injury. No electrical or mechanical weakness should develop during these tests. The rise in temperature shall be measured in accordance with the Standardization Rules of the American Institute of Electrical Engineers.

Motors shall be of such capacity that at rated voltage 115% of its full load ampere rating will not be exceeded under any conditions of pump load.

(c) Motor and control apparatus must be protected from water coming from possible leakage, or breakage of any connection at the pump or other piping in its vicinity, including hose lines which may be connected to the pump.

(d) Motor windings shall be thoroughly impregnated with an insulating compound suitable for resisting moisture.

(e) Bearing shells and caps for motors shall be of the split type on at least the driving end, to permit removal and replacement without disturbing the motor or shaft after installment.

VARIABLE SPEED CONTROL OF MOTORS shall be provided except for fire pumps in theatres as required under Rule 86. Not less than five stages of speed variation will be permitted.

RULES

AUTOMATIC STARTERS will not be permitted except as provided for under Rule 86 (Theatres, etc.) of Standpipe Fire Line Rules.

CONTROLLING EQUIPMENT: The following specifications cover the construction and installation of controlling equipments of manually operated devices for the control of electric motors driving fire pumps.

In materials, details of construction, test and installation, except as modified or supplemented by these requirements, all parts of the equipment shall comply with Chapter 9 of the Code of Ordinances.

All equipments shall be specifically approved for fire pump controlling purposes.

DESIGN: (a) The design of all parts must be such as to secure simplicity, strength, durability and ease of operation.

(b) All parts must be mounted on one or more panels of slate, marble or other approved material, supported in a substantial manner on an iron frame, and the entire equipment must comply with the requirements for switchboards in Chapter 9 of the Code of Ordinances.

(c) All parts, such as bearings, cams and latches, the operation of which is liable to be interfered with by corrosion, must be made of phosphor bronze or similar metal, except where magnetic qualities are essential. Springs must be of phosphor bronze or similar metal, or protected against corrosion in an approved manner.

OPERATING MECHANISM: (a) The operation shall be such that the motor is directly started by a single lever, which shall be arranged to move in one direction from the initial to the final position.

(b) Electrical actuating devices will not be approved.

(c) Where direct current is used, an auxiliary field resistance shall be provided which can be used to increase the motor speed 10 per cent.

RESISTANCES: Starting resistances must be, unless inside of the motor, of the grid type, and comply with the requirements of starting duty rheostats as given in Chapter 9 of the Code of Ordinances.

OVERLOAD PROTECTION: (a) Each motor lead must be protected by a circuit-breaker. With direct current motors, leads must be protected by a single-pole circuit-breaker in each lead, or by an approved double coil, double pole circuit-breaker so designed that each pole must be closed independently of the other.

(b) Circuit-breakers to be calibrated to 400 per cent. of normal motor current.

(c) No fuses nor other overload release devices except circuit-breakers are permitted, except in instrument and pilot light leads.

WIRING: All wiring shall be installed in rigid iron conduit.

SWITCH: An approved knife switch for independent sources of supply must be provided, having one pole for each supply wire in circuit.

PILOT LAMP AND INSTRUMENTS: (a) A pilot lamp connected on the motor side of the circuit-breaker must be provided to indicate the presence of voltage on the line.

(b) A voltmeter and ammeter must be provided and suitably mounted and connected as a part of the control equipment.

MARKING: (a) A name plate must be provided giving the name of the manufacturer and the rating of the equipment in volts and amperes.

(b) All line and motor terminal connections must be suitably marked so that they can be readily identified.

CONTROL PANEL: The control panel shall be constructed of a high grade of electrical slate or marble or other approved material.

The supporting frame shall be so arranged that the bottom of the panel will not be less than 24 inches above the floor.

INSTALLATION OF APPARATUS: The control panel shall be located close to and within sight of the motor. If a pump room used for no other purpose and containing no other apparatus except the fire pump, its motor and its accessory appliances is provided, the controlling equipment shall be placed in this room.

The control panel shall be so protected that it will not be injured by water escaping from pump or connections.

Except where special permission is granted by the Fire Commissioner the controlling equipment shall be protected from mechanical injury by one of the following methods:

(a) Grille or lattice partitions so placed as to completely enclose the control panel and starter.

(b) The entire equipment of the panel and starter may be enclosed at the sides, front, back and top in a thoroughly substantial, ventilated sheet iron or steel cabinet of not less than No. 12 U. S. metal gauge in thickness with hinged doors with glass panel in front of pilot light. When panel is in a fireproof room and not subject to mechanical injury an enclosing cabinet shall not be required.

TEST OF EQUIPMENT: The entire equipment shall be subject to test and inspection by representatives of the Fire Commissioner.

POWER SUPPLY: Where the power supply can be obtained from two separate street feeders, two separate and distinct services shall be installed.

Where current is taken from an underground Edison three-wire system and the power lines are protected by approved conduit from a point where they enter the building to the control panel in the pump room, it will be considered an acceptable source of power supply.

Isolated Plant: Where the source of supply is an isolated plant located in the building an auxiliary service of sufficient capacity shall be obtained from some outside source.

Transmission Lines: (a) The lines between the power plants and the pump room must be of such number, so arranged and so located that there will be small chance of an interruption of service to the motor, due to accident to the lines. All wiring in the pump room must be in approved conduit.

Where the valves involved are large and the crippling of this pump service would seriously affect the protection of the property, at least two separate lines from the power plant or plants to the pump installation shall be provided. The lines must be run by separate routes or in such manner that a failure of both at the same time will be only a remote possibility.

(b) Each line between the power plant and pump room shall be of such size that its safe carrying capacity as given in Chapter 9 of the Code of Ordinances will not be exceeded by the load carried.

Where direct current motors are used, the voltage at the motors must not drop more than 5 per cent. below the voltage rating of the motors when the pumps are being driven at rated output, pressure and speed, and the lines between motors and power stations are carrying their peak loads.

When alternating current motors are used, the voltage at the motors under these same conditions must not drop more than 8 per cent. below the voltage rating of the motors.

(c) The overload protective devices at the power plants, and where provided at various points on the lines, must be of such rating and so set that they will open the circuit only under short circuit conditions.

Approved fuses may be used, if desired, except for the protection of the pump motor where circuit breakers are required. The fuses, however, must be of such size that an overload or short circuit at the motor or its control apparatus will not cause them to open the circuit, but instead, the circuit breaker protecting the motor.

TRANSFORMERS: Where it is necessary to install transformers they shall be installed in accordance with Chapter 9 of the Code of Ordinances.

RULES

Rule 49. **SIGNALLING DEVICES.** All buildings where variable speed control of fire pump motors is required shall be equipped with an approved coded closed circuit signalling system. The signalling stations shall be located one on each floor at main riser. This system shall be so arranged that a coded signal can be transmitted to the pump rooms. An eight-inch gong shall be provided in all pump rooms and at such other locations as the Fire Commissioner may direct. All apparatus used in connection with the signalling system shall be of an approved type and installed as outlined in rules governing the installation of interior fire alarm systems.

At alternate signal sending stations there shall be provided an approved closed circuit strap key enclosed in a sheet metal box equipped with a paracentric Fire Department lock and approved hinges.

The strap key shall be connected in series with the box circuit of the signal sending station.

A card of instructions shall be placed in the pump room giving code numbers of signalling stations, the pressures obtainable at different speeds of the motor and such other information the Fire Commissioner may direct.

Rule 50. **RELAY STANDPIPE SYSTEM.** All buildings hereafter erected exceeding 400 ft. from grade to highest hose outlet shall be provided with an intermediate combination gravity and suction standpipe supply tank and a fire pump as required under Schedule A.

Each tank shall have at least 5,000 gallons of water reserved for the fire lines and shall be connected to fire line system as described in Rule 30 for intermediate tanks except that in addition to the requirements of Rule 30, there shall be provided a long turn by-pass 8 inches in diameter around the tank check valve and the O. S. & Y. gate valves. An 8-inch O. S. & Y. gate valve SEALED CLOSED shall be provided in the by-pass line.

Each tank shall be provided with overflow and emergency drain lines as required in Rules 19 and 20, except that such lines shall drain to roofs of set backs on building, or into house drain lines providing the house drain line or lines are equal in sum total to the sum total in diameter of the drain lines.

The fire pump shall have a capacity of not less than 750 gallons of water per minute and shall deliver through the standpipe main feed riser at a pressure not less than 50 lbs. to the square inch at the highest hose outlet fed by said pump.

All fire pumps shall be located on a raised base at least 24 inches above the floor and on the floor below the supply tank, with the suction line as direct as practicable.

The pump-discharge line shall be connected to the main feed riser feeding up, and outside the horizontal tank check valve line, and the upward swinging check valve in the main riser. An O. S. & Y. gate valve shall be provided at a point between the pump discharge connection and the upward swinging check valve SEALED OPEN.

The fire pump and motor shall be located in a watertight room as close to fire tower as practicable, properly drained by a 3-inch line to house drain or scuppers in exterior wall. The electric switch controlling the motor shall be marked on panel "FIRE PUMP SWITCH" in 1 inch white letters on a red background.

Rule 51. **NUMBERING ON VALVES.** All gate valves on tanks, fire lines and pumps shall be numbered by 3-inch red metal disc with white numbers 2 inches high secured to wheel of valves.

Rule 52. **PUMP ROOM DIAGRAM.** A white and black print drawn to a scale of one-quarter inch to the foot shall be provided in a glass frame showing the tank, fire pump, all pipe lines and valves. The number of each valve shall be shown in addition to purpose of each water line.

The print shall include instructions as to method of

starting and operating pump, closing main line, gate valve and opening by-pass valve.

Rule 53. **FIRE LINE TELEPHONE.** In all buildings where a variable speed control of fire pump motors is required there shall be provided a multiple telephone system with a master telephone in each pump room, and in the main lobby and individual telephones located on alternate floors near the main fire line riser.

The operation of the system shall be such that any individual telephone may call and converse directly with any master telephone. The master telephones may call and converse directly with each master telephone.

A six-inch vibrating call bell shall be located at the master telephones.

The master telephones in pump room below grade level shall be equipped with a loud speaking receiver so that the voice can be clearly and audibly heard at a distance of not less than fifteen feet from the receiver.

WIRING: The wiring for the telephone system shall not be smaller than No. 18 rubber covered wire installed in rigid iron conduit. The conduit system shall contain no conductor other than fire line telephone conductors.

The fire line telephone system shall be properly maintained and ready for use by the Fire Department at all times.

Rule 54. **MAIN LINE EMERGENCY CONTROL VALVES IN BUILDINGS OVER 400 FEET IN HEIGHT** (per Schedule A). At the base of the main feed riser or below the hose outlet valves on the first story; at each pump room elevation, and at each approximate one third the height above the fire pump elevations and the pump or roof tank next above, there shall be provided O. S. & Y. emergency control valves in the main feed riser properly numbered and shown on the fire pump blue print heretofore described.

Rule 55. **EMERGENCY TOOL BOX.** Where fire pumps are required under these rules there shall be provided in each pump room an emergency fire department tool box, painted a fire department red, with 3-inch white letters reading, "Emergency fire line tool box." The box shall be secured to the wall and be fitted with a fire department lock and contain the following:

- 1—3-foot Stillson wrench.
- 4—2½-inch plugs with pipe threads.
- 4—2½-inch caps with hose threads.
- 2—Spanner wrenches of Fire Department pattern.
- 4—2½-inch double female hose connections, with Fire Department threads.

Rule 56. **EMERGENCY AND TESTING HOSE.** Where fire pumps are required under these rules there shall be provided in each pump room not less than two 50-foot lengths of rubber lined 2½-inch hose, of Fire Department quality, and one 1½-inch nozzle of controlling type. All couplings to be of Fire Department pattern and threads. Hose shall be supported by hooks secured to enclosure wall of pump room.

Rule 57. **LOCATION OF LOWER FIRE PUMP IN RELATION TO HORIZONTAL LINE CONTROL VALVES.** In a single main riser system the fire pump discharge line to riser shall be as short as practicable.

In a two (2) main riser system the pump discharge line to cross connection shall be located between the two risers. An emergency gate valve of the O. S. & Y. type, sealed open, shall be provided in the cross-connection on each side of the discharge line connection.

In a three (3) main riser system the pump discharge line shall be connected to the cross-connection on each side of the central riser. Three (3) emergency gate valves as above shall be provided as follows: One (1) at the base of the central main riser and one (1) on each side of the discharge line connection on the riser side.

In a four (4) main riser system the pump discharge line to the cross-connection shall be centrally located so as to

RULES

Provide two risers on each side of pump connection. An emergency gate valve shall be provided in the cross-connection on each side of the discharge connection.

In a five (5) main riser system the pump discharge line shall be connected on each side of the third, or central riser, and shall be provided with gate valves located as described in a 3 riser system.

In a six (6) main riser system the pump discharge line shall be centrally located so as to provide three risers on each side of pump connection and shall be provided with gate valves located as described in a two and four riser system.

For the purpose of this rule a main riser is any vertical riser other than a branch riser with not more than three (3) hose outlets above the cross-connection.

Rule 58. EMERGENCY SAFEGUARDS. For the purpose of prolonging the use of the standpipe fire lines in case of failure or break, it is necessary to provide and properly locate emergency gate valves of the O. S. & Y. type as follows:

Rule 59. EMERGENCY VERTICAL LINE CONTROL VALVES. All standpipe fire line systems hereafter installed in buildings over four (4) stories or 50 ft. in height, and up to 400 ft., as described in Schedule B, shall be provided for as follows: In each riser an O. S. & Y. gate valve shall be provided below the first story hose outlet. If the interior stairway extends from hallway on first story to cellar the gate valve shall be located within the stairway enclosure below the first story level.

A two-way 2½-inch hose outlet tee with two 2½-inch approved valves, one of which may be capped, shall be provided in all main risers 6 ft. to 7 ft. above floor or stair landing level of first story with the O. S. & Y. control valve below the outlet tee.

Where a single main riser system or a main riser feed system is installed and the uppermost hose outlet exceeds 50 ft. above grade level there shall be provided in each riser O. S. & Y. gate valves, in addition to the gate valve below the first story hose outlet at approximately the level above grade hereafter specified.

SCHEDULE B

Height from Uppermost Hose Outlet to Grade	Total Number of Valves Required	Approximate Location of Valves Above Grade					
		1st Valve	2nd Valve	3rd Valve	4th Valve	5th Valve	6th Valve
150' to 200'	2 to 3	Below the 1st outlet	75'	150'			
200' to 250'	2 to 3	"	75'	150'			
250' to 300'	3 to 4	"	75'	150'	225'		
300' to 400'	4 to 5	"	75'	150'	225'	300'	

Rule 60. UPPER CROSS-CONNECTION EMERGENCY CONTROL VALVES. When a two (2) main riser system is installed there shall be provided O. S. & Y. emergency gate valves between the risers in each cross-connection, located within the stairway enclosure when practicable, or as near the door to main stairway of fire tower as practicable, and where the uppermost hose outlet exceeds 150 ft. above grade, the risers shall be provided with O. S. & Y. gate valves as described in Schedule B.

Where a three (3) main riser system is installed there shall be provided O. S. & Y. gate valves between any two of the risers in each cross-connection and one in the central riser at each cross-connection.

Where a four (4) main riser system is installed there shall be provided O. S. & Y. gate valves in each cross-connection between the 2 central risers, so as to provide 2 risers on each side of control valves.

Where a five (5) main riser system is installed there shall be provided O. S. & Y. gate valves between the second and third central riser in each cross-connection and one in the central riser at each cross-connection as described in a 3 riser system.

Where a six (6) main riser system is installed there shall be provided O. S. & Y. gate valves centrally located in each cross-connection so as to provide 3 risers on each side of gate valve—as described in a two and four riser system.

Rule 61. LOWEST CROSS-CONNECTION CONTROL VALVES. When the building is provided with a fire pump as required by the Rules the gate valves required in the lowest cross-connection shall be located as described under location of Fire Pumps and Horizontal Line control valves.

Rule 62. FIRE TOWER RISER. Where the building is provided with an exterior enclosed fireproof stairway or fire tower the main riser shall be installed in such stairway and properly protected from freezing in accordance with these rules unless stairway is adequately heated.

Rule 63. VALVE SEALED OPEN. All O. S. & Y. gate valves shall be located in an accessible position and be sealed open in an approved manner.

Rule 64. LADDERS TO VALVES. Where the gate valve is more than 7 ft. above any floor or stair landing a single rung iron ladder with ½-inch rungs and not less than 10 inches between strings shall be provided at each gate valve properly secured at top and bottom.

Rule 65. VALVE SIGNS. Where the gate valves on the upper cross-connections are not located in the stair enclosure, a sign with red background and white letters not less than 3 inches high shall be painted on the face of the wall within the stairway enclosure on the story where the gate valve is located, which shall read as follows: "STANDPIPE CONTROL VALVE NO. 0 IN LOFT."

Where a standpipe riser is located in a fire tower a sign with red background and 3-inch letters as above shall be painted on the wall at fire tower exit door, which shall read: "STANDPIPE IN TOWER," except on that story on which the emergency control valve is located, there the sign shall read: "STANDPIPE CONTROL VALVE NO. 0 IN TOWER."

Rule 66. VALVES NUMBERED. All emergency control valves shall be numbered by means of a metal disc not less than 3 inches in diameter painted red with a white number not less than 2 inches high and shall be secured to wheel of valve by chain or metal clamp.

Rule 67. FIRE LINES PAINTED. All standpipe lines not located within a stairway enclosure or public corridor and including the siamese connection street riser wall collars and caps shall be painted a Fire Department red.

Rule 68. SIAMESE CONNECTIONS FOR FIRE DEPARTMENT USE. Each standpipe system shall be provided with one or more approved type 3 inch x 3 inch inlet siamese connections for use by the Fire Department as hereinafter set forth. When a building faces on but one street and has a frontage of less than 250 ft. and requires but one four (4) inch diameter standpipe riser one siamese connection shall be provided; where the street frontage exceeds 200 ft. in length and requires but two four (4) inch diameter standpipe risers two siamese connections shall be provided for each 200 ft. of street frontage or fraction thereof. Buildings exceeding 250 ft. in height shall have not less than two siamese steamer connections for each riser and buildings not more than 250 ft. in height shall have at least one siamese connection for each 6 inch riser. Buildings having frontages on more than one street shall have a siamese connection on each street front when the frontage is not continuous but in all cases where more than one siamese connection is required they shall be properly distributed, and not grouped, as the Fire Commissioner may direct.

Rule 69. SIAMESE HEADERS. Siamese headers shall be independent of each other and lead, as direct as

RULES

practicable, to riser or cross-connection header. There shall be at least 2 siamese for every 8-inch riser and at least 1 siamese for every 4 or 6 inch riser. Where there are more than one riser, the siamese headers shall divide on each side of any emergency control valve in the cross-connection, and such headers shall be equal in sum total to the sum total of all risers on either side of the emergency control valves.

No siamese header shall be larger than 6 inches. Siamese risers, when extending through sidewalk, shall be of bronze or fitted with a brass sleeve, packed with a waterproof compound between sleeve and riser.

Rule 70. SIAMESE OMITTED. Any building, other than theatre with stage, not over 45 feet in height shall not be required to have a siamese connection except when such building is on a water-front or when it is one of a group of buildings and has a cross-connection to the standpipe equipment in one or more of the other buildings.

Rule 71. LOCATION. Each siamese connection placed on the street front of a building shall be located not less than 18 inches and not more than 36 inches above the sidewalk level and shall be set in a horizontal position and shall be readily accessible for Fire Department use. Each siamese shall have cast in the body on top or on wall plate, in letters at least 1 inch in length and not less than $\frac{1}{8}$ inch in depth, the word "STANDPIPE."

The piping connecting the siamese with the standpipe equipment proper shall be not less than 5 in. in diameter where there are two or more 4 in. risers and not less than 6 in. in diameter for risers of 6 and 8 in. diameter. When there is but one 4 in. riser, connection from siamese may be 4 in. in diameter.

Rule 72. SIAMESE CHECK AND DRIP. In each line between the siamese connection and the standpipe system there shall be placed an approved type swing check valve located where practicable within 10 feet from the building wall. Between the siamese and its check valve there shall be placed a $\frac{3}{4}$ -inch automatic ball drip of an approved type which will close under a pressure of not more than 7 lbs. per square inch.

Rule 73. SIAMESE CONNECTIONS FOR FIRE-BOAT USE, EXCEPT WHERE THE SOURCE OF SUPPLY IS FROM THE STREET MAIN DIRECT. Siamese connection on piers or warehouses, etc., intended for fireboat use exclusively shall be $3\frac{1}{2}$ in. x $3\frac{1}{2}$ in. at inlets with Fire Department female thread. Between siamese and the system proper there shall be an approved type swing check valve, and between the check valve and the siamese either a $\frac{1}{2}$ -in. open drip without valve or cock, or a $\frac{3}{4}$ -in. automatic ball drip of approved type closing under a pressure of not more than 7 lbs. per sq. inch. Where systems have both fireboat and shore siamese the shore siamese shall have male connections and shall be without clappers, but shall have on each inlet a 3 in. gate valve with Fire Department male thread for hose connection. Check valve shall not be provided for the land end siamese.

Rule 74. HOSE OUTLETS. When practicable all hose outlets shall be placed within a stair enclosure. They shall be $2\frac{1}{2}$ in. in diameter, set not less than 5 ft. nor more than 6 ft. above the floor or landing as the case may be. Outlets and racks shall be located above the floor or landing and shall not be over a run of stairs or in a stair well. When impracticable to place hose outlets within the stair enclosure, the Fire Commissioner may permit them to be located immediately adjacent to a stair enclosure, in a conspicuous place, in which case there shall be painted upon the stair side of the wall of the stair enclosure a conspicuous sign in letters not less than 8 in. in height indicating the location of the outlet. Where there is a 4-in. riser system its termination above roof shall be a $2\frac{1}{2}$ -in. outlet hose valve properly capped.

Rule 75. MAIN ROOF OUTLETS. All 6 and 8-in. main riser systems which extend to intermediate or highest roof level shall be provided with not less than $2\frac{1}{2}$ -inch hose valve manifolds with male threads. Roof outlets shall be located not less than 24 in. nor more than 36 in. above the roof and each valve shall be provided with regulation $2\frac{1}{2}$ -in. Fire Department caps. Where roof outlets cannot be located within a heated stair enclosure, control valve shall be located below the roof and shall have a long stem extending above the roof with a wrench handle at the upper end. Between the long stem valve and the roof outlet there shall be a $\frac{1}{2}$ in. open drip extending to a sink or a $\frac{3}{4}$ in. automatic ball drip of approved type.

In buildings not exceeding 40 ft. in height hose outlets above roof shall not be required.

Rule 76. SPANNER WRENCH. A spanner wrench may be provided at each hose outlet valve, such wrench shall be of the gooseneck Fire Department pattern.

Rule 77. BRANCH LINE SIZE. No branch line shall be less than 4 in. in diameter, except that any branch line for a riser or cross-connection to but one hose outlet may be $2\frac{1}{2}$ in. if not over four (4) feet in length, and may be 3 in. in diameter if not more than twenty-five (25) feet in length.

Rule 78. NOZZLES. All $2\frac{1}{2}$ -in. fire hose shall be provided with approved smooth bore nozzles 15 in. in length, the outlet at the tip to be not less than 1 in. nor more than $1\frac{1}{8}$ in. in diameter.

Rule 79. HOSE. Each outlet other than the roof outlet shall have attached thereto $2\frac{1}{2}$ in. unlined linen hose except that in buildings or premises that do not contain occupancies storing, handling or using inflammable motor picture films or nitro cellulose products, and which are classified as hazardous, the Fire Commissioner may permit in addition to the $2\frac{1}{2}$ -inch outlet and hose the installation of $1\frac{1}{2}$ in. unlined linen hose and valve. There shall not be more than 100 ft. of hose at any outlet, as required by Section 581, Chapter 5, Code of Ordinances. No single length of hose shall be less than 50 ft.

All hose used in connection with the standpipe fire system shall be at least equal in material and construction to the type of hose bearing the approval label of the National Board of Fire Underwriters.

Rule 80. COUPLINGS. Hose couplings for standpipe shall be equal to hose couplings of the regular Fire Department pattern and thread.

Rule 81. RACKS. All standpipe hose shall be supported from racks of stamped steel, malleable iron or other metal equal thereto, of approved swing type, so designed and constructed that they will permit of ready and easy release of hose for use. The racks shall be supported securely and substantially from standpipe risers or wall, except that where a cast nipple of non-corroding material is screwed into the hose outlet valve the rack may be suspended from such nipple. The minimum thickness of nipple to be $\frac{5}{16}$ in. In no case will automatic racks be permitted.

Racks shall be not more than 7 feet 6 inches above the floor.

Rule 82. HOSE CABINETS. Hose racks may be installed in cabinets, provided the cabinets are conspicuous and located within a stair enclosure, and are of a size sufficient to accommodate the entire equipment and permit of easy handling of hose and operation of valve.

In theatres cabinets may be permitted outside of stair enclosures, provided they are conspicuous, and that during performances the cabinets are illuminated by means of an electric lamp placed inside. Each cabinet shall have a clear

RULES

door (one panel only) without lock and shall have words "FIRE HOSE" painted on the glass in letters less than 2½ inches in height.

Rule 83. REGULATION AND REDUCTION OF PRESSURES. All buildings hereafter erected over 250 ft. in height and which do not exceed 400 ft. in height from grade to highest hose outlet shall be provided with a gravity tank of not less than 5,000 gallons. Where the above described height exceeds 400 feet, fire pump and suction tanks shall be provided as described under Rule A.

Where the pressure on any hose outlet valve exceeds 50 lbs. either approved outlet pressure reducers, set as prescribed by the Chief of the Fire Department, or the Board of Standards and Appeals, shall be provided at such outlets.

Rule 84. BUILDINGS IN COURSE OF ERECTION. In buildings in course of erection standpipe fire lines shall be carried up with each story after the structure reaches the 7th story or a height of 85 ft., and there shall be provided an outside siamese pumper connection in a proper and accessible place. Regulation hose outlets on every story above the 2nd shall be provided as the work progresses. Hose outlets shall be provided with male threads of Fire Department pattern, with hose and nozzle attached, at least every second outlet. The top and bottom of each riser and all cross connections shall be securely capped at all times during the progress of the work except when work on the standpipe fire line is in progress at that point. Temporary standpipe risers used in construction work and not less than 3 inches in diameter for buildings, not exceeding 400 ft. in height, and of larger diameter, in buildings exceeding 400 ft. in height, when maintained to supply water at all times, may be accepted in lieu of the regulation standpipe, provided it is equipped with hose outlets, hose and siamese as required above.

Elevators or hoists shall be provided as required in Rule 6.

Rule 85. PLACES COVERING LARGE AREAS. In ship yards, oil storage plants, amusement or exhibition parks and other enclosures when deemed necessary by the Fire Commissioner shall have one yard hydrant and hose for each 20,000 sq. ft. of area, but in no case shall there be more than 250 ft. distance between hydrants. Hydrants and sufficient approved hose and a smooth bore 1½-inch Underwriters playpipe shall be placed in an approved hose house, painted red, with words "FIRE HOSE" in 6-inch white letters on door. Where the area exceeds 20,000 sq. ft. and not exceeding 40,000 sq. ft. in area, a gravity tank of at least 5,000 gallons capacity, elevated 50 ft. above the yard, or 75 ft. above the highest structure in the yard, or a fire pump of at least 1,000 gallons a minute capacity, with a suction tank of at least 25,000 gallons capacity, or river water supply shall be provided. Plants exceeding 40,000 sq. ft. in area shall be provided with a fire pump of not less than 1,000 gallons per minute capacity, suctioning from a tank or sump of at least 30,000 gallons capacity. The Fire Commissioner may permit suction from a river or well in his opinion the required quantity of reasonably clean water may be obtained thereby, except that where river water is proposed and standpipe primary water supply is taken from street main, approval of the proposition shall be obtained also from the Department of Water Supply, Gas and Electricity. In addition to yard hydrants, the Fire Commissioner may require one Monitor nozzle with remote control for each 40,000 sq. ft. of area or fraction thereof when in his opinion an unusual hazard exists or may exist. Monitor nozzles shall be located as ordered by the Fire Commissioner.

Standpipe risers may be connected to yard hydrant systems when such systems are provided with gravity tanks in accordance with this rule, or when same conforms with Rule A, Subdivision A (city main connection).

Yard hydrant systems connected to city main shall be provided with Post Indicator valve located in an accessible position.

The Post Indicator valve shall be sealed or locked open and be painted a Fire Department red.

Yard hydrant systems with more than one hydrant shall not be connected to City mains outside of the high pressure fire service area, unless approved by the Board of Standards and Appeals.

Provision for steamer connections, fireboat connections, pressure reliefs and general layout of plant standpipe systems shall be made by the Fire Commissioner as his judgment may dictate for each individual case.

Fire extinguishing equipments in addition to the foregoing shall be prescribed by the Fire Commissioner for all oil storage plants, oil refineries, fire work plants and other plants when deemed by the Fire Commissioner as presenting unusual fire hazards.

Rule 86. THEATRES, ETC. In every theatre or opera house or other building used for theatrical or operatic purposes or amusement purposes as per Section 520, Chapter 5, of the Code of Ordinances, the standpipe fire line equipments in addition to the tank shall also be supplied by approved electric pump or pumps having a capacity of at least 250 gals. per minute at 100 lbs. per square inch in buildings without occupancy above the roof and at 125 lbs. per square inch pressure in buildings having any occupancy above the auditorium roof. Power for pumps shall be supplied by electric motors of sufficient horsepower to drive pump without sign of overload. Pumps shall be bypassed to suction tanks, as provided for elsewhere in these rules under FIRE PUMPS. Pumps shall suction from steel or reinforced concrete tanks of not less than 5,000 gallons water capacity. Pumps shall deliver initial supply of water and shall be connected to an approved electric device which, upon a reduction of pressure below the allowable minimum, will automatically start the pump and, upon a restoration of the required pressure, will automatically shut off the pump. The automatic starting device shall be set to cut in at 60 lbs. pressure and to cut out at 80 lbs. pressure. In addition to the automatic starting device there shall be provided a hand starter for emergency use and there shall also be provided a pressure gauge on the panel board.

Rule 87. STREET MAIN CONNECTIONS. Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each standpipe connection to a street main shall be not less than 4 in. in diameter and shall have a conveniently accessible control valve in the line at or near the curb or when practicable in a more remote location. The control valve shall be fitted with a frost and waterproof box not less than 4 ft. nor more than 6 ft. below the curb with a fixed stem extending to a compartment at the level of the sidewalk. The cover shall be bolted to the casing, and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be of an indicating pattern, operating by a special socket wrench approved by the Department of Water Supply, Gas and Electricity. The water meters used in standpipe fire line supplies shall be of approved type allowing free flow of water. Supply through the meter shall be checked against the Fire Department Siamese Supply and against tank supply.

Where, due to the presence of a vault under the sidewalk and extending to within 18 in. of the curb, it is impracticable to install a control valve box at the curb, there shall be placed in the feed line from the main a control valve located not more than two feet from the point of entry.

Rule 88. HIGH AND LOW WATER ELECTRIC ALARMS. The high and low water electric alarm for gravity tanks shall be so constructed and arranged that a decrease in the quantity of water below the required fire line reserve shall cause an alarm to be given in either the pump room or engineer's room. An annunciator shall be provided in connection with the alarm system. The high

RULES

and low tell tale electric devices for gravity tanks shall be so constructed that they will not be affected by moisture and the parts shall be heavy and rugged. The level of the water in the gravity tank shall be indicated by an approved device.

The audible signalling device for high and low water electric alarm shall consist of vibrating gong of at least 6 inches diameter of the enclosed type and arranged for conduit installation, the same to be operated automatically. The control cabinet shall be arranged for conduit installation and shall be located in the engineer's room or pump room where it will be under supervision of the person in charge of the standpipe supply.

All wiring shall be installed in rigid conduits and the installation shall be in accordance with the provisions of Chapter 9 of the Code of Ordinances. Control panels must be approved by the Board of Standards and Appeals.

The following sources of energy may be employed and are given in their order of preference:

1. Public utility electric light and power systems.
2. Independent electric generating plants.
3. Storage batteries in duplicate.
4. Primary batteries of closed circuit type.

When the system is connected to a 110 volt lighting service a suitable cut-out is to be provided and it shall be enclosed in a locked or sealed metal cabinet. The connection to system shall be the first connection on the house side of and as near as practicable to the meter. When batteries are used to operate the system they shall be placed in an approved cabinet provided with a lock and key.

Rule 89. DRY PIPE VALVE. A dry pipe valve shall be taken to mean a valve automatically controlling the water supply of the standpipe system in such a manner that under normal conditions its piping system will be maintained dry, but in the event of a hose valve being opened, the dry pipe valve automatically releases the water into the standpipe system.

In refrigerating plants or in unheated buildings, piers or warehouses where wet lines are impracticable, dry pipe valves may be installed.

Type A, in which the valve is actuated by the release of compressed air in the standpipe system due to the opening of a hose valve; and Type B, in which the valve is actuated by an approved trip under electrical control of an approved non-coded or coded closed circuit system operated from the control station at each hose outlet. Dry pipe valve shall be located as near as practicable to the standpipe system, in an enclosed place, protected from mechanical injury and freezing.

When Type A valve is installed the air pressure in the standpipe system under such dry pipe valve control shall not exceed 40 lbs. per sq. in. nor be permitted to fall below 25 lbs. per sq. in. nor shall it be less than one-sixth of the water pressure in any case. Not more than 16 hose outlets shall be supplied through one dry pipe valve. The air compressor shall have a capacity of not less than 11 cu. ft. per minute, and the air supply for the pump shall be taken, if possible from a room containing dry air, or it shall pass through a drying chamber containing calcium chloride in order to avoid the introduction of moisture into the system.

A closed circuit alarm shall be provided in connection with each dry pipe valve installation; the electrical layout shall be approved by the Fire Commissioner.

Rule 90. MONITOR NOZZLE. Monitor nozzles shall be so constructed and designed that they may be moved in both vertical and horizontal arcs, and shall be so located that streams may be brought to bear on all portions of the plant or building within the effective radius of stream play and such other exposing properties as may be within this radius. They shall be supplied from connections to the standpipe system not less than 4 in. in diameter with remote control.

Rule 90a. ROOF SETBACK HOSE OUTLETS. A

two-way hose outlet tee, with one outlet properly capped shall be provided in the standpipe risers on floor level of a intermediate roof setbacks on all buildings exceeding one hundred feet in height when the following conditions exist:

1. When the building has a frontage of fifty feet or over.
2. And there are adjoining roofs, window openings or other exterior exposures within fifty feet of the roof parapet.
3. And the depth of the setback exceeds ten feet.
4. And the setback exceeds one hundred feet above grade level.

Rule 91. EXISTING STANDPIPES. Standpipe fire line equipments which were approved by the Fire Commissioner as conforming to the rules and regulations then being enforced, shall not be required to be altered to conform to the provisions of these rules, except where substantial additions or extension in height or area is made to the building, when these rules shall apply if deemed advisable or necessary by the Fire Commissioner, and except that all such fire line systems shall have or be provided with the following:

1. Roof gravity tank shall have a reserve of approximately 3,500 gallons of water for fire line.
2. The bottom of the gravity tank shall be not less than 20 feet above the hose outlet in the highest story.
3. A 4-inch emergency drain with gate valve.
4. House lines taken from outside of tank.
5. Tank properly heated and provided with overflow line.
6. Tank shall not be fed through fire line.
7. Tank to be fed at not less than 65 gallons a minute by pump or direct city connection.
8. An iron ladder of substantial construction, properly braced, extending to top of tank.
9. At least one gate valve at the downstream side of tank check unless a gate valve has been installed on either side of check.
10. Hose valves and hose not less than 2½ inches in good serviceable condition. No automatic hose valves permitted.
11. Wheel of hose valve within 6 ft. 6 in. of stair landing or of steps within 2 ft.
12. An open or automatic ball drip between the siamese check and siamese.
13. Approved 3 in. x 3 in. siamese, with approved cap.
14. The words "STANDPIPE" cast in the body of the valve, or on metal plates secured to siamese riser, and secured to face of building behind the siamese.
15. The siamese street riser, wall collars and caps painted a Fire Department red.
16. Outlet pressure reducers on all hose outlet valve where the pressure exceeds 50 lbs. per square inch.
17. In factory or other buildings of hazardous use, where the fire lines are not within a protected stair enclosure and may be subjected to fire exposure because of such location they shall be protected by asbestos covering, wire lath and cement, or terra cotta blocks as described in these rules.
18. Fire lines shall be protected from freezing as specified in these rules.
19. The tank shall be provided with a high and low water electric alarm, except where there is an automatic filling pump installed.
20. The bonnets or caps of all siamese or tank check valves which have been in the fire lines for at least ten years, where practicable, shall be removed and the interior of valve cleaned of all rust or other accumulations. The body of the valve shall then be given a good coat of red lead and linseed oil.

Rule 92. HOSE OUTLET VALVE. Hose outlet valves shall be 2½ in.

A—All hose outlet valves hereafter installed in buildings not exceeding 300 feet in height, or for the uppermost 300 feet in any building, shall conform to the following specifications:

RULES

1. Valves shall have a clear waterway of at least 5 sq. in. area.
2. They shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute.
3. They shall close tightly against 300 lbs. hydraulic pressure under normal working conditions.
4. They shall stand a hydrostatic pressure test of 750 lbs. per sq. in. for 30 minutes and not distort.
5. They shall stand the operation of full opening and closing 300 times under 150 lbs. pressure without leaking at stuffing box or seat.
6. They shall not be of cast or malleable iron.
7. Only angle globe valves shall be permitted.

B—Hose outlet valves hereafter installed in buildings exceeding 300 feet in height, except as provided for in subdivision A, shall show not more than 5 lbs. friction loss for a flow of 300 gallons per minute; they shall close tightly against 500 lbs. hydraulic pressure under normal working conditions; they shall stand a hydrostatic test of 250 lbs. per square inch for 30 minutes and not distort; they shall stand the operation of full opening and closing 300 times under 250 lbs. hydraulic pressure without leaking at stuffing box or seat. They shall be of brass or best grade of valve bronze.

Straight-way gate valves may be submitted for test.

All hose outlet valves hereafter installed shall have cast in the body of the valve:

1. The manufacturer's name or trade-mark.
2. The working pressure of the valve.
3. The approval number of the Board of Standards and Appeals.

Not less than 2 approved hose valves shall be delivered to the office of the Board of Standards and Appeals, the weight and other general matter noted, and valves certified. One of the valves shall then be delivered to the office of the Fire Commissioner, with certified specifications.

Rule 93. SPECIFICATIONS. Siamese Connections. Fire Department siamese connection shall be as herein after stated in this rule.

1. The body of the siamese may be of cast iron, cast steel, brass or any other suitable metals of sufficient strength to comply with Item 8 of this specification. All movable parts, clappers, swivels and all bolts, washers, nuts, screws and pin bearings and all swivel bearings shall be of non-corrodible metal.

2. Clapper valve seats shall be made of non-corrodible metal and shall be machined to insure a tight seat for clapper valves.

3. Each inlet to siamese shall be provided with a clapper valve machined to a true face. Single clapper siamese connections shall not be permitted.

4. The inside diameter of valve seats shall not be less than the inside diameter of the hose couplings. The area of the waterway beyond the valve seats shall not be less than the combined areas of the waterways through the two valve seats. The area of the waterway of each inlet shall not be reduced by the clapper when in a position of maximum opening.

5. Clappers shall be so hung that when siamese connection is placed in a horizontal position the clappers will be seated.

6. Swivels, attached to the body of the siamese by means of a collar expanded cold or screwed into the body of the siamese, or with other bearing surface extending entirely around the opening and exerting uniform shear, will be approved if giving a strength sufficient to meet Item 8.

7. Clapper valves must of such design and area that a pressure of 100 lbs. per sq. in. on the standpipe side will not prevent their opening when the pressure on the steamer side is 150 lbs. They must be so hung that with a discontinuance of flow into the siamese through that inlet the valve will close, and that it will not close where there is an inward flow and the pressure on the inlet is 5 lbs. or more greater than the standpipe pressure.

8. Siamese connections must stand a hydraulic pressure test of 500 lbs. for 30 minutes under normal working conditions.

9. Clapper valves shall be tight for any pressure on standpipe side up to 300 lbs.

10. Approved caps or plugs must be provided to protect the threads of the inlets.

11. The inlet swivels to siamese connection shall be provided with threads to fit the Fire Department hose.

12. The word "STANDPIPE" shall be cast into the top of the body of the siamese or on wall plate, in 1 in. letters not less than $\frac{1}{8}$ of an inch in depth.

13. Where there is a fire boat siamese connection in the same system with a land end siamese connection, clapper valves shall be omitted from the land end siamese.

Saving Clause. All rules and regulations previously adopted and conflicting with these rules are hereby rescinded.

WILLIAM E. WALSH, *Chairman.*

WILLIAM J. O'GORMAN, *Secretary.*

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,
March 16, 1920, Under Cal. No. 549-17-BZ*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, June 19, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, June 26, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

THE RESOLUTION—

(8-28-A)

WHEREAS, Mandel Savetsky, owner, filed, January 5, 1928, an appeal from an order of the fire commissioner, affecting premises 1251 Washington avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated December 6, 1927 (Order No. 40528-LC), reads:

"In reference to your application for a permit to store combustible fibre at the above address, I regret to inform you that your application for such permit is disapproved for the reason that your business is located within fifty feet of a synagogue. Sec. 24-3, Chapter 12, Code of Ordinances.

"You are therefore hereby ordered to

"1. Discontinue the storage of combustible fibre in excess of one ton on these premises.";

and
WHEREAS, the building, located in an unrestricted use district, is non-fireproof, three stories (33 ft.) in height, 22 ft. 9 in. by 140 ft. in area at first story and 22 ft. 9 in. by 60 ft. in area above; OCCUPIED: 1st story, store, junk shop and storage of rags, eight tons; upper stories, dwellings; and

WHEREAS, the premises in question are located within 1 ft. 8 in. of a three-story brick synagogue to the south; and

WHEREAS, appellant contends that the rags to be sorted and machine baled on the premises are wool; that no cotton goods will be stored; that there is no religious school connected with the synagogue; that the synagogue is occupied only on high holidays and on Saturday mornings and that at present the premises in question are operating as a junk shop under a duly authorized permit.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

80-28-A.

APPELLANT—Samuel Rosenblum, for John Reineking, owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—Northeast corner Palo Alto avenue and 188th street, Hollis, Borough of Queens.

APPEARANCES—

For Appellant: Samuel Rosenblum, Miss Miller and Miss Cook.

MINUTES

For Opposition: Webster F. Williah, Arthur Jesser,
J. Herman Lang and William Robinson.

For Administration: Superintendent Bales of Bu-
reau of Buildings, Queens.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative: Commissioners Connell, Holland
and Chief Kenlon..... 3

Negative: Chairman Walsh, Commissioner Guil-
foyle 2

Absent 0

THE RESOLUTION—

(80-28-A)

WHEREAS, Samuel Rosenblum, for John Reineking, owner,
filed, January 28, 1928, an appeal from a decision of the
superintendent of buildings, affecting premises northeast cor-
ner of Palo Alto avenue and 188th street, Hollis, Borough
of Queens; and

WHEREAS, the decision of the superintendent of buildings,
rendered January 9, 1928, reads:

"Your request for Certificate of Occupancy for the
premises located at the northeast corner of Palo Alto
Avenue and 188th Street, Hollis, Long Island, to be
used as a private sanitorium, is hereby denied for
the reason that it does not comply with Sec. 72 of the
Building Code which provides under Sub. Division A
that every public building over 20 feet high, in which
persons are harbored to receive medical, charitable or
other care or treatment, or in which persons are held
or detained under legal restraint, must be fireproof.

"The building in question is about 22 ft. in height.";

and

WHEREAS, the building is of frame construction, two
stories (22 ft.) in height, 72 ft. by 18 ft. in area; OCCU-
PIED as a rest sanitarium, 15 persons on each story; and

WHEREAS, the appellant claims that the exterior walls
have been stuccoed inside and outside on wire lath; all
windows are of steel sash and frames; the roof is con-
structed of cement on wire lath; the interior stairway is
enclosed with wire lath and cement stucco; that the ceiling
of the top story is only 20 ft. above the surrounding grade;
that the building is classed 22 ft. in height only due to
having a pitched roof; furthermore, the appellant contends
that no major operations or regular hospital work will be
performed; that the building will be used for rest or re-
cuperation.

Resolved, that the decision of the superintendent of build-
ings be and it hereby is affirmed, and the appeal be and it
hereby is denied.

103-28-A.

APPELLANT—John J. Gilmartin, for Marian Realty Co.,
owner.

SUBJECT—Appeal from order of the fire commissioner.
PREMISES AFFECTED—3868-3874 Park avenue, The
Bronx.

APPEARANCES—

For Administration: Inspector Maher of fire de-
partment.

For Appellant: John J. Gilmartin.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Chief
Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(103-28-A)

WHEREAS, John J. Gilmartin, for Marian Realty Co.,
filed, February 2, 1928, an appeal from an order of the
fire commissioner, affecting premises 3868-3874 Park avenue,
Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated
November 26, 1927 (Order No. 28952-F), reads:

"1. Provide iron shutters at all openings in the
exterior wall above 1st story which are distant in a
direct line less than 30' from any opening in any
other building and not in the same plane with said
openings and which are not more than 50' above a
neighboring roof at north side of building, or other
approved protection, as per Sec. 375, Art. 18, Ch. 5,
of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, divided into two
sections, and three and five stories in height; the three-
story section being 15 ft. by 25 ft. in area; the five-story
section being 60 ft. by 126 ft. in area; OCCUPIED as a
carpet cleaning establishment: 1st story, 10 persons; 2nd
story, 10 persons; 3rd story, 5 persons; 4th story, 5 per-
sons; 5th story, 5 persons; and

WHEREAS, there are in the north wall of the five-story
section eight windows on each story above the first story
and also in the east wall of the three-story section two
windows on each story above the first story, within 15 ft.
of openings in or within 50 ft. of the roof of a neighboring
three-story building to the north; and

WHEREAS, appellant contends that the building forming
the exposure to the north is a three-story building which
is used for the storage of plumbing supplies, bath tubs,
fixtures, etc., and in view of the existence of the 15-foot
court between the two buildings requests the omission of
the required iron shutters.

Resolved, that the order of the fire commissioner be and
it hereby is modified, and the appeal be and it hereby is
granted, only so far as it affects the windows not on the
course of stairways or shaftways, on condition that the
building shall not be increased in height, area or dimension,
and granted only as long as the adjoining exposures remain
substantially unchanged and the use and occupancy of these
premises remains substantially unchanged.

583-22-A.

APPELLANT—A. Lindsay, for Thomson Meter Company,
owner.

SUBJECT—Application for reopening—amendment of
resolution—re appeal from order of the fire com-
missioner.

PREMISES AFFECTED—100-110 Bridge street, Brook-
lyn.

APPEARANCES—

For Appellant: Frederick L. Greene.

For Administration: Inspector Maher of fire de-
partment.

ACTION OF BOARD—Appeal reopened and resolution
amended.

THE VOTE TO REOPEN AND AMEND RESOLU-
TION—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Chief Kenlon..... 4

Negative: Commissioner Guilfoyle..... 1

Absent 0

THE RESOLUTION—

(583-22-A)

WHEREAS, Thomson Meter Co., owner, filed, April 20,
1922, an appeal, with the board of appeals, from an order
of the fire commissioner, affecting premises 100-110 Bridge
street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner reads:

"You are hereby ordered and required, within 20
days from date of the service of this order, to:

"1. Install a standpipe system with risers 4 in. in
diameter tested to withstand a pressure of 300 lbs. per
square inch, extending from cellar to roof, with neces-
sary check valves and 2½-in. regulation Fire Depart-
ment outlets on each story (including basement, cel-
lars and roofs) placed within main stairway enclosure.
Each outlet to be provided with sufficient feet of 2½-
inch standard hose attached thereto.";

and

MINUTES

WHEREAS, the building is non-fireproof, four stories in height, 120 ft. by 100 ft. in area; OCCUPIED: cellar, boiler room, repairing and storage, 7 persons; 1st story, office, shipping and manufacturing, 27 persons; 2nd, 3rd and 4th stories, manufacture of water meters, 55 persons, 2nd story; 27 persons, 3rd story, and 33 persons, 4th story; and

WHEREAS, the occupancy since the original filing of the appeal has been changed from manufacture of meters to manufacture of Eskimo pies and present occupant requested that as the fire department had reissued the standpipe order the board interpret its resolution as to the new occupancy.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that any openings in the 8-inch brick wall subdividing the cellar be protected in accordance with the rules of the board of standards and appeals, with automatic and self-closing sliding doors; that the doors in the partition between main office and stock room be made self-closing and that the transom sash be made fixed, and that the appeal be granted only so long as conditions as to occupancy and use remain substantially unchanged.

36-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for F. C. Beach Realty Corp., owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—125 East 23rd street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(36-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for F. C. Beach Realty Corp., owner, filed, January 16, 1928, an appeal from an order of the fire commissioner, affecting premises 125 East 23rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 9, 1927 (Order No. 29627-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at east, west and north sides of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5 of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, six stories in height, 28 ft. 6 in. by 93 ft. 9 in. in area at first story and 28 ft. 6 in. by 88 ft. 9 in. in area above; OCCUPIED: cellar, boiler room, 2 persons; 1st story, stores, 2 persons; 2nd story, offices, 6 persons; 3rd story, motion picture repair, 5 persons; 4th story, manufacture of cameras, 9 persons; 5th story, offices, 2 persons; 6th story, manufacture of flowers, 16 persons; and

WHEREAS, the appellant claims that the exposures at east and west are five-story office buildings with rear extensions having tin roofs; the exposure at north are four-story dwellings at a distance of 16 ft. 6 in.; that there are ten windows on the north side, twelve windows on the west side and twenty windows on the east side of the building affected by the order; furthermore, the appellant contends that none of the openings affected by the order are on the course of the stair hall or elevator shaft, and

the present occupancy has been practically the same during the past forty years.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only as far as it affects the four windows on each story from the street in the easterly gable wall and all the windows in the westerly gable wall not on the course of stair halls or shafts, *on condition* that the building shall not be increased in height, area or dimension, and granted only as long as the adjoining exposures remain substantially unchanged and the use and occupancy of these premises remains unchanged.

82-28-A.

APPELLANT—Samuel Rosenblum, for Fromberg-Schafer Investing Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—115 Ocean avenue, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(82-28-A)

WHEREAS, Samuel Rosenblum, for Fromberg-Schafer Investing Co., owner, filed, January 28, 1928, an appeal from an order of the fire commissioner, affecting premises 115 Ocean avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 8, 1928 (Order No. 14507-LC), reads:

"You are hereby notified that an inspection of the above premises, used for the storage of fuel oil, shows that the following must be done before the permit requested by you can be issued:

FORTHWITH:

"1. Install a 4" standpipe, plans and specifications to be filed with and approved by this Department before work is commenced.";

and

WHEREAS, the building is non-fireproof, six stories (60 ft.) in height, irregular, in area, having a frontage of 140 ft. on Ocean avenue and 129 ft. 1 in. on Lincoln road, approximately 12,000 sq. ft. in area; subdivided into eight sub-areas by brick walls with fireproof doors at openings therein; the area of the maximum sub-area being approximately 2,750 sq. ft.; OCCUPIED as an apartment house; and

WHEREAS, appellant, contending that inasmuch as the building is subdivided into small units by brick walls, that it is occupied for dwelling purposes under certificate of occupancy heretofore issued by the superintendent of buildings and the tenement house commissioner, and that the fuel oil rules will be complied with in all respects, requests the omission of the required standpipe system; and

WHEREAS, the building was erected from plans approved by the tenement house department and the bureau of buildings; and

WHEREAS, a certificate of occupancy has been in force since 1925; and

WHEREAS, the order is predicated on the installation of a fuel oil burning equipment on the premises; and

WHEREAS, the building was constructed in accordance with the tenement house law and the building code and is subdivided by walls of approved masonry.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the fuel oil burning equipment shall be installed in accordance with the rules of the

MINUTES

board of standards and appeals, and that the building shall not be increased in height, area or dimension, and granted only as long as the occupancy remains substantially unchanged.

62-28-A.

APPELLANT—William C. McTarnahan, for Petroleum Heat & Power, Inc., of New York, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—East side of Eastchester Creek and northern boundary line, The Bronx.

APPEARANCES—

For Appellant: G. H. Hallock.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(62-28-A)

WHEREAS, William C. McTarnahan, for Petroleum Heat and Power Company of New York, filed, January 23, 1928, an appeal from a decision of the fire commissioner, affecting premises east side of Eastchester Creek and Northern Boundary Line, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered December 20, 1927 (re Plan No. 4269-1927), reads:

"1. All tanks must be buried 2 ft. below ground and encased in 12" P.C. concrete of 1-2½-5 stone mix.";

and

WHEREAS, the property consists of a large plot of ground situated partly in the City of Mount Vernon and about 275 ft. by 84 ft. within the City of New York, upon which it is proposed to erect a fuel oil and gasoline storage plant; and

WHEREAS, the appellant proposes to erect four (4) 210,000-gallon tanks, two (2) 420,000-gallon tanks and four (4) 25,000-gallon horizontal tanks for the storage of fuel oil, also four (4) 52,500-gallon tanks for the storage of gasoline; all tanks to be erected above ground on saddles and mats of proper design and construction, the gasoline tanks to be surrounded by concrete dyke walls enclosing a volume of space greater than the total capacity of tanks; and

WHEREAS, the appellant contends that the soil conditions make it impractical to bury the tanks 2 ft. below grade due to the relative level of tidewater in Eastchester Creek; furthermore, that the material and design of tanks will be in accordance with the rules adopted by the board of standards and appeals.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the gasoline storage on these premises located within the boundary line of New York City shall be limited to four tanks, each unit limited to a capacity not exceeding 1,250 barrels; that the four-tank gasoline storage shall be enclosed by reinforced concrete walls the full height of the tanks, and that these concrete walls shall be backed up by an earth dike on the exterior of this gasoline storage enclosure, the dike to be not less than 3 feet at the top and not less than 10 feet above grade with a 1½ pitch; that this enclosure shall be subdivided into two parts by a concrete wall of the same height as the exterior enclosing wall, with not more than two tanks to the reservoir enclosure equal in capacity to that of the tanks so enclosed; that there shall be installed around each of the cylindrical fuel oil storage tanks a dike wall not less than half the height of the tank, providing a reservoir of the full capacity of the tank so enclosed; that each individual tank shall be equipped with a revolving

nozzle equipped with water supply, the tops of the tank shall be provided with metal scuppers at the edge; each tank shall be equipped with a liquid fire-extinguishing medium acceptable to the fire department, centrally controlled, from a fireproof structure housing the pumps and valves; the storage of oils throughout the premises shall be limited to the quantities stipulated on the plans filed in this appeal; a return of the drawings in accordance with the foregoing resolution shall be submitted to this board for approval before submission to the fire department that all permits required shall be obtained within nine months and any work involved thereby shall be completed within eighteen months from the date of this action.

BUILDING ZONE CASES

44-28-BZ.

APPLICANT—William F. Doyle, for Adamo Ottavino owner.

PREMISES AFFECTED—1976-1990 Stillwell avenue, northwest corner of 85th street, Brooklyn.

APPEARANCES—

For Applicant: John H. McCooley, Jr.
For Opposition: Philip P. Schor, Lloyd G. Kistler and David H. Kistler.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioner Guilfoyle..... 1
Negative: Chairman Walsh, Commissioners
Connell and Holland..... 3
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(27-28-BZ)

WHEREAS, McCooley & Conroy, for Saul I. Heller, owner, filed, January 13, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1976-1990 Stillwell avenue, northwest corner of 85th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 12, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Stillwell avenue is in a business district; 85th street, east of a point 100 ft. west of 25th avenue, is in a business district, and 25th avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 4, 1927 (re App. No. 14324-1927), reads:

"The following objections have been filed by the examiners:

"Proposed gasoline station to be located in a business district is contrary to Art. II, S. 4 (a) of the Zone Resolution.";

and

WHEREAS, the premises consist of a triangular shaped plot of ground having a frontage of 100 ft. on 85th street, 140 ft. 7½ in. on Stillwell avenue and a depth at the rear of 97 ft., upon which it is proposed to install a small one-story office, six gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant failed to substantiate his basis of appeal under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

1167-27-BZ.

APPLICANT—Henry J. Nurick, for David Strahl, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 7e of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(9-28-BZ)

WHEREAS, McCooey & Conroy, for Stersal Holding Corp., owner, filed, January 5, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 8131-8155 New Utrecht avenue, east side, 158 ft. $\frac{1}{4}$ in. north of 84th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 12, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that New Utrecht avenue is in a business district; 84th street, east of a point 100 ft. west of New Utrecht avenue, is in a business district, and 81st street, east of a point 100 ft. east of New Utrecht avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 21, 1927 (re Applic. 23624-1927), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4 a 46.

"The installation of a gasoline service station in a business district."

and
WHEREAS, the premises consist of an irregularly shaped plot of ground having a frontage of 227 ft. $9\frac{1}{4}$ in. on

New Utrecht avenue and a maximum depth of approximately 45 ft., upon which it is proposed to install a small one-story office, three 550-gallon tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the plot is of an irregular, triangular shape, fronting on New Utrecht avenue, and bounded on the rear by a surface street railway private right-of-way; and

WHEREAS, the dimensions of the premises would preclude the erection of a structure for practical operation and use, the board believes that the application is justifiable under section 21.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that a concrete curbing not less than 12 inches in height shall be incorporated on the building line of these premises, other than the two vehicular entrances, each of which shall not exceed 10 feet in width; that the proposed building erected on these premises shall be restricted to dimensions of 12 ft. by 12 ft., one story in height, for the accommodation and shelter of patrons and operators of the premises; that the structure shall be finished in light-colored face brick with two-tone brick trim or architectural terra cotta trimmings, and that all permits shall be obtained within six months and work involved completed within one year from the date of this action.

95-28-BZ.

APPLICANT—A. Berton Reed, for Kings Highway Congregational Church, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in an "E" area and also a residence use district the erection and maintenance of a building less than ten (10) feet from the street line and to occupy (including existing structures) more than 40 per cent of a corner lot at a point 18 feet above the curb level.

PREMISES AFFECTED—1714-1724 Avenue P and 1628 East 18th street, southwest corner, Brooklyn.

APPEARANCES—

For Applicant: A. Berton Reed.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE RESOLUTION—

(95-28-BZ)

WHEREAS, A. Berton Reed, for Kings Highway Congregational Church, owner, filed, February 1, 1928, an application, under the building zone resolution, to permit in an "E" area and also a residence use district the erection and maintenance of a building less than 10 ft. from the street line and to occupy (including existing structures) more than 40 per cent of a corner lot at a point 18 ft. above the curb level; premises 1714-1724 Avenue P and 1628 East 18th street, southwest corner, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 12, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that the area included between east and west lines, located 100 ft. north of Avenue P and 100 ft. south of Avenue P, is in an "E" area and residence use district; the area north and also south of above area is in a "C" area and residence use district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 7, 1927 (re App. No. 18129-27), reads;

MINUTES

"2. Provide 10 ft. setback from each building line to nearest building wall.

"3. Combined area of structures 18 ft. above curb exceeds 40% of the corner lot, contrary to Zoning Law.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one and three stories in height, with a frontage of 43 ft. and a depth of 93 ft. 7 in.; to be occupied as a church; the front wall on both street fronts setting back less than 10 ft. from the building line and the new and existing building on the plot occupying a greater percentage of area than permitted by the building zone resolution; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure erected on these premises shall be restricted as to use as a house of worship by a regularly incorporated religious congregation corporation; that the development of the church shall be restricted to the dimensions and location as indicated on the plans filed in this application and shall set back from the building lines on both street fronts as indicated by figured dimensions on the plan filed in this application, and that all permits required shall be obtained within nine months and any work involved shall be completed within one year from the date of this action.

375-23-BZ.

APPLICANT—William F. Doyle, for William Hagedorn, owner, substituted for previous applicant and owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 7c of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a business building, previously granted for a theatre building.

THE RESOLUTION—

(375-23-BZ)

WHEREAS, William F. Doyle, for William Hagedorn, owner, filed, March 28, 1923, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a business building, previously granted for a theatre building; premises 109 East Fordham road, northeast corner of Morris avenue, Borough of The Bronx; and

WHEREAS, the original application was withdrawn July 15, 1924, reopened October 20, 1925, granted on condition April 6, 1926, reopened and resolution modified as to time limit December 28, 1926, and June 7, 1927, and reopened as to modification of resolution May 8, 1928; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 12, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Fordham road is in a business district, Morris avenue is in a residence district and East 190th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 28, 1928 (re N. B. 244-28), reads:

"1. Erection of proposed business building partly in business district and partly in residence district is contrary to provisions of Building Zone Resolution and of Cal. 375-23-BZ.";

and

WHEREAS, the proposed building is of fireproof construction, two stories and cellar in height, with a frontage of 153.72 ft. on Morris avenue and 185.80 ft. on East Fordham road; to be occupied as stores, offices and apartment; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7c.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed a height of two stories above grade; that there shall be maintained at the northerly end of the plot on Morris avenue frontage an open court not less than 20 ft. in width; that any window openings beyond the 125 ft. point from Fordham road shall be restricted to double-hung type, the sills of which shall be not less than 3 ft. 6 in. above grade; that the business use of the premises within the residence use area of the plot shall be restricted to the conduct of and uses as executive and professional office occupancy; that any advertising exposed on the Morris avenue front, within the residence use area, shall be restricted to flat letters affixed to the plate glass show windows of store fronts; that all permits shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

1079-27-BZ.

APPLICANT—William F. Doyle, for Repp Holding Corp., owner.

SUBJECT—Application for reopening—amendment of resolution—re decision of the fire commissioner, under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

THE RESOLUTION—

(1079-27-BZ)

WHEREAS, William F. Doyle, for Repp Holding Corp., owner, filed, October 5, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southeast corner of Utica avenue and Avenue O, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 28, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Utica avenue is in a business and unrestricted district, Avenue O is in a residence and unrestricted district and East 51st street is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered September 30, 1927 (Plan No. 3074-27), reads:

"A gasoline service station may not be permitted in a

MINUTES

business district. Appeal may be taken to the Board of Standards and Appeals.”;

and

WHEREAS, the premises consist of a plot of ground, 80 ft. by 100 ft., on which it is proposed to erect an office, one story, 20 ft. by 15 ft., bury six 550-gallon gasoline tanks and erect four pumps for the operation of a gasoline service station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 in view of the surrounding conditions; and

WHEREAS, this application was granted by the board at its meeting, February 28, 1928, on certain conditions, and applicant requested a modification of these conditions to permit the proposed structure on the site to be 32 ft. by 40 ft.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that this plot shall be enclosed on the abutting property lines with walls of approved masonry not less than 10 ft. in height, finished with enameled, glazed brick and coped with architectural terra cotta; that there shall be not more than one building erected on the premises not exceeding an area of 32 ft. by 40 ft. for the accommodation of the patrons of the premises; that the exterior of this building shall be finished with light-color enameled brick; that the roof shall be finished with tile of Spanish type or variegated slate; that a concrete curbing not less than 12 in. in height above grade shall be erected along the building line on the street fronts, other than for the driveway accommodations; that there shall be no grease racks or similar mechanical appurtenances erected or operated on these premises, and that all permits required shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

THE RESOLUTION—

(79-28-S)

WHEREAS, Herman Wolff, for Burton Holding Corp., owner, filed, January 27, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 751-753 Fourth avenue and 202 25th street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 17, 1927 (Order No. 30115-LD), reads:

"1. Discontinue the use of the above premises which is occupied for manufacturing purposes in violation of Section 270 of the Labor Law.

"Defects noted as follows:

"(a) Interior stairway is not of incombustible material throughout and does not extend to roof.

"(b) Partitions enclosing stairway does not extend above roof.

"(c) A secondary means of egress conforming to Section 270 of the Labor Law has not been provided.";

and

WHEREAS, the building is non-fireproof, two stories in height, 37 ft. by 69 ft. in area; OCCUPIED: cellar, storage, 1 person; 1st story, stores, 10 persons; 2nd story, manufacture of clothing, 25 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior iron and marble stairway, extending from the first story to top story, enclosed in wire lath on studs, covered both sides with 3/4-inch cement plaster partitions with fireproof doors at openings; an exterior iron stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to yard, with EGRESS from yard direct to street; ROOFS of adjoining buildings are at same level; and

WHEREAS, the petitioner claims that the building was erected in 1926; as to defect b, that the fire-retarding partitions enclosing stairway extend to full height of roof beams; as to defect c, that the secondary means of egress consists of an exterior open iron stairway, 44 in. in width, located on rear of building, extending from roof to the street; furthermore, the petitioner contends that the present exits were approved by the bureau of buildings at time of erection.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION—

(12-28-S)

WHEREAS, Croker National Fire Prevention Engineering

Co., for William H. Wheeler, owner, filed, January 7, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 28-30 West 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 27, 1927 (Order No. 25028-LD), reads:

"1. Arrange the exterior screened stairway in the rear of building and the openings leading thereto so that same are in compliance with the provisions of Section 268 of the Labor Law, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects are the following:

"1. No fireproof passage independent of other exit to the street.";

and

WHEREAS, the building is fireproof, twelve stories in height, 50 ft. by 92 ft. 6 in. in area at first story and 50 ft. by 89 ft. 8 in. in area above; OCCUPIED: 1st story, stores; upper stories, manufacture of millinery; 2nd story, 21 persons; 3rd story, 28 persons; 4th story, 20 persons; 5th story, 18 persons; 6th story, 30 persons; 7th story, 60 persons; 8th story, 28 persons; 9th story, vacant at present only; 10th story, 22 persons; 11th story, 32 persons; 12th story, 26 persons; a total of 285 persons (ninth story vacant) above the first story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in 4-inch terra cotta block partitions with fireproof doors at openings; an exterior screened stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the rear yard of premises at the rear; and

WHEREAS, petitioner contends that on the second, third, fourth, fifth and sixth stories of the premises in question there are party wall fire escape balconies connecting with the premises to the east (26 West 38th street), which is under same ownership; that these party wall fire escape balconies were accepted by the building department as egress from 26 West 38th street; that midway between the first and second stories there is an iron stairway which leads to the yard of the premises at the rear (21-23 West 37th street) from which there is egress up the fire escape on these buildings and requests the acceptance of the existing exterior screened fire escape.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION—

(107-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for 37 West 47th Street Corp., filed, February 8, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, af-

MINUTES

fecting premises 37 West 47th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated June 24, 1927, read:

"Order No. 23518-LD:

"1. Remove all partitions not built of incombustible material as per Section 263 and 270 of the Labor Law.";

and

"Order No. 23519-LD:

"2. Arrange all doors on all stories leading to corridors to open outwardly. Section 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, seventeen stories in height, 68 ft. 6 in. by 100 ft. 5 in. in area at first story and 68 ft. 6 in. by 90 ft. 3 in. in area above; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent manufacturing (jewelry, furs, gowns, etc.), approximately 40 persons per story; several stories being vacant at present; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, on the sixth and on the eleventh stories of the building there are partitions constructed of ornamental wood, some having glass panels; and

WHEREAS, petitioner, as to Order No. 23518-LD, contends that there is no manufacturing done on the eleventh story or on the front portion of the sixth story and that the partitions do not obstruct the egress to the exits; as to Order No. 23519-LD, contends that this order applies only to the sixth, eighth and ninth stories, where there are fireproof partitions subdividing these floors; that these partitions form corridors 5 ft. 6 in. wide, the doors being 3 ft. wide, petitioner contends that they would form a hazard if swung into the corridors, and, inasmuch as the doors leading to the stairways now swing out, in accordance with the labor law, requests that the doors in question be permitted to swing as at present.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 23519-LD, Item 2, only as to the swing of the existing doors leading to the corridor, and denied as to Order No. 23518-LD, Item 1.

THE RESOLUTION—

(13-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for William H. Wheeler, owner, filed, January 7, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 26 West 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 19, 1927 (Order No. 24824-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building, by constructing a fireproof passageway with an unobstructed width of at least 3' throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law.";

and

WHEREAS, the building is fireproof, six stories (72 ft. 10 in.) in height, 25 ft. by 98 ft. 9 in. in area at first story and 25 ft. by 89 ft. in area above; OCCUPIED: 1st story, beauty parlor, 7 persons; 2nd story, salesrooms, 4 persons; 3rd story, offices, 6 persons; 4th story, manufacturing furriers, 9 persons; 5th story, manufacture of millinery, 15 persons; 6th story, manufacturing furriers, 12 persons; 46 persons above the first story; EQUIPPED with a fire alarm signal system; EXITS: an interior steel riser and marble tread stairway, extending from the first story to top story, enclosed in fireproof partitions with fireproof doors at openings; party wall fire escape balconies on second, third, fourth, fifth and sixth stories, connecting with the exterior screened stairway on the rear of 28-30 West 38th street, which building is under the same ownership as the building in question; this exterior screened stairway terminating by means of an iron stairway in the yard of 21-23 West 37th street, with EGRESS from this yard up the fire escape on 21-23 West 37th street; and

WHEREAS, petitioner contends that the existing party wall fire escape balconies in question were accepted as a means of egress from this building at the time of its erection in 1911; and

WHEREAS, the adjoining premises to the west is fireproof and in the same and single ownership.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that existing party wall balconies shall be maintained on the rear of the building, complying with the labor law in all other respects, with egress at the first story level by iron balcony into the adjoining premises to the west with egress through said premises to the street; that the building shall be not increased in height or area, and that the occupancy shall be limited to the legal capacity of the interior stairs.

THE RESOLUTION—

(125-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for The Aeolian Co., filed, February 9, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 780-790 East 138th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated September 19, 1927 (Order No. 26135-LD), reads:

MINUTES

"Remove all partitions not built of incombustible material as per Section 263-270 of the Labor Law.";

and
WHEREAS, the building is fireproof, six stories in height, 125 ft. by 100 ft., irregular, in area; OCCUPIED by one tenant for the manufacture of pianos: 1st story, 20 persons; 2nd story, 25 persons; 3rd story, 30 persons; 4th story, 15 persons; 5th story, 15 persons; 6th story, 15 persons; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions, with fireproof doors at openings; and

WHEREAS, partitions not constructed of incombustible materials have been erected on every floor of the building; and

WHEREAS, petitioner contends that the partitions referred to in the order consist mostly of wood 6 ft. high with plain glass panels to the ceiling and, except for the office on the first story, are used to form enclosures for the tuning and regulating of pianos; that these partitions are located along the walls of the building and do not interfere with egress to the stairways, and in view of the light occupancy and the installation of the sprinkler system requests the acceptance of the existing partitions; and

WHEREAS, this building is a corner structure, in single ownership and operation, as a piano warehouse and assembling room; and

WHEREAS, the building does not exceed 75 ft. in height and is in single tenancy, operation and ownership.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the spaces so divided shall be located on the street front and the piano tuning rooms along the southerly gable walls; that the order shall be complied with in all other respects; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy, use and tenancy remain in single operation.

37-28-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for F. C. Beach Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

THE RESOLUTION—

(37-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for F. C. Beach Realty Corp., owner, filed, January 16, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 125 East 23rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 9, 1927, reads:

"Order No. 29626-LD:

"1. Arrange the fire escape at rear of building serving as a required means of egress so that same will conform to Sec. 274 of the Labor Law and the rules of the Board of Standards and Appeals, adopted Feb. 23, 1927.

"Defects noted as follows:

"1. Stairways and balconies not screened to a height of 4 ft. 6 in.

"2. No safe egress from termination of fire escape to street.";

and

WHEREAS, the building is non-fireproof, six stories in height, 28 ft. 6 in. by 93 ft. 9 in. in area at first story and 28 ft. 6 in. by 88 ft. 9 in. in area above; OCCUPIED: cellar, boiler room, 2 persons; 1st story, stores, 2 persons; 2nd story, offices, 6 persons; 3rd story, machine shop 5 persons; 4th story, manufacture of thermometers, 9 persons; 5th story, offices, 2 persons; 6th story, manufacture of flowers, 16 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in metal lath on studs, covered both sides with cement mortar partitions with fireproof doors at openings; a fire escape on the rear thereof, extending from the roof to yard level, with no legal means of egress to street; ROOFS of adjoining buildings: two stories lower at east and west; and

WHEREAS, the petitioner claims that the building was erected forty years ago; as to Defect No. 1, that the balconies of rear fire escape are screened to a height of 5 ft. and the stair rails to a height of 3 ft.; as to Defect No. 2, that egress may be had from foot of rear fire escapes to open yard adjoining at east and to a second yard towards the east through door in fence, where egress may be had through plain glass doors into the adjoining buildings and to the street; furthermore, the petitioner contends that a similar fire department order (No. 62785-LD) was issued in 1917, and on November 14, 1917, the bureau of buildings received a letter from the bureau of fire prevention accepting the present means of egress from rear fire escapes to adjoining yard; and

WHEREAS, under ruling then in force, the fire department in November, 1927, accepted this condition on which approval the bureau of buildings accepted and recognized this existing fire escape.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the railings of the stairs and the well of the fire escape, *on condition* that a fixed iron stairs from the second story balcony shall be provided landing on a balcony at first story level, opening directly to the adjoining yard to the east, with egress through the premises adjoining to the east to open yard of second building to the east, with egress through said building also to the street; that the building shall be not increased in height or area, and this variation is granted so long as conditions as to occupancy and use remain substantially unchanged.

141-28-S.

PETITIONER—J. L. Hernon, for Flintlock Realty Co., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

THE RESOLUTION—

(141-28-S)

WHEREAS, J. L. Hernon, for Flintlock Realty Co., owner, filed, February 14, 1928, a petition for a variation from the

MINUTES

requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 12-16 John street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated January 27, 1928, read:

"Order No. 32080-LD:

"1. Enclose the interior stairway at center of building, 1st story, serving as a required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3 feet above the roof, constructed as per Section 271 of the Labor Law. Among the defects noted are the following:

"(a) Windows and transoms constructed of wood and plain glass.

"(b) Windows within enclosure on elevator shaft are not fireproof.

"2. Provide an exterior screened iron stairway on the south side of building as per Section 271 of the Labor Law, not less than 44" in width, extending from ground to roof, with a balcony on each floor and an independent means of egress from its lowest termination by means of an open court or courts or a fireproof passageway leading to the street, constructed as per Section 268 of the Labor Law, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.";

and

"Order No. 32083-LD:

"An inspection of the premises 12-16 John Street, Borough of Manhattan, shows that a fire drill should be established and maintained therein according to the requirements of Section 279 of the Labor Law. The Labor Law specifically charges the Fire Commissioner with the duty of enforcing the provisions of the law as to fire drills.

"This law also holds the owner of such premises responsible for the proper supervision and maintenance of fire drills. It is therefore your duty to organize and maintain a fire drill in the above premises in accordance with the rules and regulations of the Board of Standards and Appeals.";

and

WHEREAS, the building is fireproof, twelve stories and pent house in height, 48 ft. by 52 ft. in area; OCCUPIED: 1st story, stores; 2nd story, office and tailoring, 7 persons; 3rd story, jewelers, 6 persons; 4th story, watch repair and tailoring, 17 persons; 5th story, offices, 8 persons; 6th story, jewelry and watch repair, 13 persons; 7th story, offices and manufacture of suppositories, 11 persons; 8th story, jewelry and watch repairing, 16 persons; 9th story, watch repairing, 6 persons; 10th story, jewelry and watch repairing, 14 persons; 11th story, jewelry and watch repairing, 9 persons; 12th story, jewelry and watch repairing, 13 persons; 13th story, watch repair, 2 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior iron and marble stairway, extending from the first story to roof, enclosed in fireproof partitions with wood doors and transoms with plain glass at openings; a fire escape on the south side of the building, having non-fireproof openings along the course thereof, extending from the top story to court level; a gooseneck ladder from top story balcony to the roof and egress from foot of fire escapes to open court adjoining at south; ROOFS of adjoining buildings: same level at east; 100 ft. lower at west; and

WHEREAS, the petitioner claims the building was erected in 1898; that the enforcement of the orders would cause a total expense of double the net annual income of the building; that egress from foot of rear fire escape is maintained through open court adjoining at south and through the building, 9-13 Maiden Lane (under the same ownership), to the street; furthermore, the tenants are primarily engaged in the jewelry and diamond trade; that the building does not come under the jurisdiction of the labor law in

that less than 25 per cent of the total floor area is used for factory purposes.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 32080-LD, Item 1, *on condition* that a fireproof partition shall be erected in the public hall on each story enclosing and separating the stair hall from the corridor on a line with the easterly wall of the elevator enclosure, with self-closing, fireproof doors to all openings of same and that the doors within the stair hall enclosure shall remain as now hung; granted, as to Item 2 of Order No. 32080-LD, *on condition* that the existing fire escape in rear court shall be reconstructed in accordance with the fire escape rules of the board of standards and appeals in all respects other than the egress from the termination, which shall be by travel over roof of extension of adjoining premises, 9-13 Maiden Lane, with exit therefrom into two large window openings to public corridor to the street, and *granted*, as to Order No. 32083-LF, only so long as conditions as to occupancy and use remain unchanged.

APPEARANCES—None.

ACTION OF BOARD—Chairman read engineer's report. Report adopted; petition approved.

THE VOTE TO ADOPT REPORT AND APPROVE PETITION—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle and Deputy
Chief Martin 5
Negative 0
Absent 0

THE RESOLUTION—

(1176-27-SA)

WHEREAS, James Kearney, for Arthur H. Ballard, filed, November 2, 1927, a petition with the board of standards and appeals for approval of the device known as the Ballard Jr. Oil Burner, Type C; and

WHEREAS, this device consists of a metal reservoir for the oil with a double action float valve and two pumps operated by motor and controlled by a safety bucket arrangement that shuts off current in case of overflow; and

WHEREAS, a committee of the board inspected this device in operation at premises 230 Hoyt street, Astoria, Borough of Queens, and recommended the approval of the device.

Resolved, that the board of standards and appeals does hereby *approve* the Ballard Jr. Oil Burner, Type C, for use with Grade "A" fuel oil only in commercial installations, when installed in accordance with the fuel oil rules of the board of standards and appeals.

Adjourned 5.35 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, May 8, 1928, as they appeared in Bulletin No. 20, Vol. XIII, are hereby corrected to read as follows:

THE RESOLUTION—

(682-26-BZ)

WHEREAS, William F. Doyle, for William Hagedorn, owner, filed, August 4, 1926; reopened March 27, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles (previously denied); premises southeast corner of Jerome avenue and East 182nd street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 8, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district; East 182nd street, from Jerome avenue to a point 100 ft. east, is in a business district; East 182nd street, east of a point 100 ft. east of Jerome avenue, is in a residence district; Walton avenue is in a residence district; Cameron place, from Jerome avenue to a point 100 ft. east, is in a business district, and Cameron place, east of a point 100 ft. east of Jerome avenue, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered August 4, 1926, in acting on App. No. 1710-1926, reads:

"Garage for more than five cars may not be permitted in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 148

ft. on Jerome avenue and a depth of 100 ft. on East 182nd street; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision e, and was entitled to relief under section 21 of the building zone resolution on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be constructed fireproof throughout and shall not exceed a height of two stories above Jerome avenue grade; that the rear easterly wall shall be unpierced throughout its entire height and length; that there shall be no vehicular entrance of any nature or description on 182nd street front; that any openings on the 182nd street front shall be restricted to window, sashes, subdivided in lights not more than 8 in. by 12 in. in area; that there shall be no signs or advertising of any nature or description erected or permitted on the 182nd street front; that the exterior of the street walls on 182nd street and Jerome avenue shall be finished with face brick and natural stone trimmings, of attractive architectural design; that the color, texture and general design of the elevation on 182nd street shall conform substantially with that of the adjoining apartment house; that the first story street front, other than for the entrance to the garage area of the premises to the rear, shall for a depth of not less than 20 ft. be developed and maintained for store or showroom purposes; that there shall be no portable gasoline tanks maintained or operated on these premises; no roof signs shall be erected; that any gasoline equipment installed shall be located at the extreme southerly end of these premises; that any ascending ramp from Jerome avenue front shall set back from the building line not less than 10 ft., and that all permits shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

*Correction—Line 47 transposed to line 55 killed, and words "182nd street front; that any openings on the 182nd street" substituted for line 47.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held November 15, 1927, as they appeared in Bulletin No. 47, Vol. XII, are hereby corrected to read as follows:

THE RESOLUTION—

(1031-26-S)

WHEREAS, Wearever Wood Products Co., owner, filed, December 20, 1926, a petition for a variation of the labor law, as cited in an order of the fire commissioner, affecting premises 728-738 61st street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 15, 1926 (Order No. 96512-LD), reads:

"1. Discontinue the use of the above premises for factory purposes for the reason that same does not conform to Section 270 of the Labor Law."

and

WHEREAS, the petition has been amended to include Order No. 12617-LD, dated March 1, 1927, for specific defects, reading:

"1. Discontinue the use of the above premises for factory purposes for the reason that same does not conform to Sec. 270 of the Labor Law.

"(a) The interior stairway at front of building is enclosed on 2nd story with 2" x 4" wood studs covered with beaver boards. The door openings are of wood and plain glass. This enclosure should be fireproof and extend to 3 ft. 0 in. above the roof. The doors should be 44" wide, fireproof and self-closing and open outwardly.

"(b) The door to stair hall on 1st story is only 2 ft. 6 in. wide. The street entrance door is only 2 ft. 6 in. wide. These doors should be 44 in. wide and open outwardly.

"(c) The open outside iron stairways on the east and west sides of building are provided with wood, plain doors and window openings to same do not conform to Sec. 270 of the Labor Law. Same must be replaced by either an interior stairway or exterior 44 in. wide stairway, be enclosed in fireproof material with all doors 44 in. wide, fireproof, self-closing with either a fireproof passageway or an open court leading to street. Exits must be remote from each other."

and

WHEREAS, the building is non-fireproof, two stories in height, 50 ft. by 100 ft. in area; OCCUPIED for wood-working: 1st story, 10 persons; 2nd story, 14 persons; EQUIPPED with a sprinkler system; EXITS: an interior stairway, extending from the first story to second story, enclosed at first story in fireproof partitions with non-fireproof doors at openings; two exterior open iron stairways, one at west side and one at southeast corner of the building, having non-fireproof openings along the course thereof, except two windows at first story under the southeast stairway, extending from first story to second story, with EGRESS from the termination of the stairways by means of open space to street; no adjoining buildings; and

WHEREAS, the petitioner claims that the building is provided with an interior iron stairway at the northwest corner, 44 in. in width for the primary means of exit; that the secondary means of exit is provided by an exterior iron stairway, 36 in. in width, at the southeast corner, and there is also an additional exterior iron stairway at west side of the building, 36 in. in width; furthermore, the petitioner contends that a sprinkler system has been voluntarily installed, which was not required by law, and also that the exits are adequate; and

WHEREAS, this petition was denied by the board at its meeting, March 22, 1927, and petitioner requested a reconsideration of the case on the basis of additional facts, which request was granted by vote of the board.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor

law, and that the petition be and it hereby is *granted*, as to subdivision c of Order No. 12617-LD, only so far as it affects the requirement of an additional interior stairs, *on condition* that two exterior iron stairways shall be provided, one on each of the easterly and westerly gable walls, enclosed in corrugated sheet iron; that all openings thereto from each floor shall be equipped with self-closing, fireproof doors, and that the occupancy shall be restricted to the legal capacity of the primary means of exit, namely, the main stairs, and that the order be *denied* in all other respects.

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held April 24, 1928, as they appeared in Bulletin No. 18, Vol. XIII, are hereby corrected to read as follows:

THE RESOLUTION—

(664-26-BZ)

WHEREAS, Rouse & Goldstone, for A. B.-28 East 52nd Street Corporation, owner, filed, July 30, 1926, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed business building; premises 28-36 East 52nd street and 481 Madison avenue (southeast corner), Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Madison avenue is in a business district, East 52nd street is in a residence district and East 51st street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 19, 1926 (re N. B. 341-1926), which reads:

"1. Building encroaches into residence district, contrary to the provisions of Section 2 of Building Zone Resolution."

and

WHEREAS, the proposed building is of fireproof construction, twenty-eight stories in height, with a frontage of 100 ft. 5 in. and a depth of 124 ft. 6 in.; to be occupied as a business building; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7c of the building zone resolution and that it would entail practical difficulties and unnecessary hardship to carry out the strict letter of the zoning requirements; and

WHEREAS, this application was granted by the board September 30, 1926, on certain conditions, and applicant requested a modification of the time limit imposed, which was granted July 12, 1927, and applicant now requests a modification as to the location of business entrances and a further extension of time.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be no advertising display of any nature or description, signs or otherwise, within the residence use area; that the sills of any windows within the residence area shall be not less than 2 ft. 6 in. above grade; that the rear walls where exposed above adjoining and abutting premises shall be finished with light-colored face brick; that the requirements of the building zone resolution shall be complied with in all other respects, as to height, area, rear yard requirements and side courts; that all permits necessary for the prosecution of the work shall be obtained in nine months and the building completed within eighteen months from the date of this action—April 24, 1928.

* Correction—Words "one," "each of" "and westerly" added in line 72 of resolution.

* Correction—Word "area" changed to "use" in line 39 of resolution.

RULES

FACTORY EXIT RULES ADOPTED FEBRUARY 23, 1927.

64-27-SR

STANDARD FACTORY EXITS

Section 1—Fire Escapes.

Rule 1. In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ($\frac{1}{2}$) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grille work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ($1\frac{1}{2}$) inch mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(b) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees.

Rule 2. In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, five stories or less in height, one of the required means of exit under Section 271 of the Labor Law may consist of an outside iron fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, Labor Law.

(b) Existing fire escapes shall comply with all the provisions of Section 274, Labor Law and in addition thereto

(1) The balconies shall be not less than 3 feet in width.

(2) The rails around balconies and well holes and on stairways shall be not less than 3 feet in height.

(3) Passageways on the balconies shall be not less than 14 inches in the clear.

(4) At least one opening to each balcony shall be a single fireproof casement door at least 2 feet wide and at least 6 feet in height, except that where the distance between the sill and lintel will not permit of an opening 6 feet in height, a casement door not less than 4 ft. 6 in. in height will be permitted.

Rule 3. The single fireproof casement doors leading to all fire escape balconies shall open out and shall be self-closing. An easily operated door lock with knobs on both sides of the door shall be provided.

Such fire doors may be at window sill level if fixed iron step at least two feet wide, with risers not exceeding eight (8) inches, and treads not less than eight (8) inches are provided on the inside from floor level to sills properly secured.

Rule 4 (a) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official hav-

ing jurisdiction, shall conform in every respect to the provisions of these rules.

(b) A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

Rule 5. All fire escapes shall be maintained structurally safe, properly painted, and kept clear of all obstructions.

Section 2—Enclosure of Factory Stairways.

Rule 6. Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty-five persons employed above the second story, all interior stairways, serving as required means of exit, and the landings, platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest point of the stairway in accordance with the following schedule:

Number of stories	Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Three	Stairways Enclosed			
Four	Stairways Enclosed	Stairways Enclosed		
Five	Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

The term "contents" as used above means articles, goods wares and merchandise, packed, stored, manufactured or in the process of manufacture.

The term "combustible" as used above means articles goods, wares or merchandise which will burn or support combustion.

The term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

The term "story" as used above means that part of a building between any floor and the floor or roof next above;—the first story is that part of a building which is more than 50 per cent above the floor below and the floor next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding. That portion of the under side of the roof beams within the stair enclosure shall be covered with fire resisting material, except in buildings with roofs of non-combustible material, in which case the partitions may stop at the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof with louvres or ventilators, or exterior windows with ventilating sections at the top floor.

All openings in such partitions shall be provided with approved self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof ma-

RULES

rial at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, will be accepted as a compliance with this rule when both sides of the fire wall or walls are occupied on any factory floor by the same occupant.

Rule 7. Where there are occupancies on any story or part of a story involving the storage or use below the top story of the following materials and exceeding the amount specified, and there are more than 5 persons employed at manufacturing above such occupancy, the interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair offsets, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

Rule 8. Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law, or rule 2 of these rules. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof, except on the front of buildings.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 9. Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 7 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area af-

fording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

Rule 10. Storage of Combustible Material Within Factory Stairway Enclosures.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

Section 3—Safe Egress from Roofs of Factory Buildings.

Rule 11. Interior stairways serving as required means of exit in factory buildings erected after October 1, 1913, and not exceeding five stories in height, and in buildings erected before October 1, 1913, now occupied or to be occupied as a factory, shall not be required to extend to the roof where there is no safe egress from the roof, under Sections 270, 271 and 272, Labor Law.

(a) When the roofs, or the top of the parapet wall of an adjoining building are more than eight feet below or more than five feet above the top of the parapet wall of the building in question, and there is no outside party wall fire escape, party wall exterior screened stairway, party wall balconies or bridges, or where any outside exits do not connect to adjoining buildings at roof level, or where there are no unbarred window openings five feet above the roof or parapet wall of the building in question.

(b) When the roof of the building in question has a pitch exceeding one foot in six feet of horizontal run.

Rule 12. (a) When there is no safe egress from the roof, as above described, there shall be in all cases at least a double-rung ladder at the top of the interior stairway, and within the interior stairway enclosure when stairway is enclosed. Such ladder shall be at least 18 inches in width and shall be properly secured at top and bottom. The ladder shall lead to a scuttle opening not less than 2 feet by 3 feet or be of such additional area as may be required to provide ample head room. The scuttle cover shall be hinged and of light weight construction, or be counter-balanced. An easily operated hook may be provided on scuttle cover.

(b) Where the stair bulkhead door opens within 10 feet from the open edge of the roof, an iron railing properly braced at least 3 feet high and at least 10 feet long shall be provided at the edge of roof.

SUBSTANDARD FACTORY EXITS.

Section 4—Fire Escapes.

Rule 13. When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be maintained structurally safe, properly painted, and with the openings leading thereto, kept in good repair.

In lieu of a counter-balanced stairway, a drop ladder in guides with a back-drop gravity hook may be provided.

The drop ladder shall be of sufficient length to reach from the lowest balcony to the ground or safe landing place, with a passageway opening cut in the balcony rail, which rail shall be properly braced.

When such substandard fire escapes are located in a

RULES

court, side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, to the roof of adjoining extensions, or other means of egress satisfactory to the authorities having jurisdiction.

Substandard fire escapes shall be kept clear of all obstructions, shall not be used for fire drills, and shall not be considered as a basis for increase in occupancy.

Section 5—Stairways and Bridges.

Rule 14.—Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed.

An easily operated panic bolt or other similar device may be installed at street exit door.

Rule 15.—Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided as required for substandard fire escapes in subdivision a.

Rule 16.—Horizontal Bridges.—Horizontal bridges and party wall balconies between buildings shall be maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

Rule 17. No sign of any character shall be placed at openings leading to these sub-standard exits.

RULES

EXIT RULES—REVOLVING DOORS

Adopted, under Cal. No. 842-17-S, Sept. 6, 1917; amended, under Cal. No. 41-19-S, Feb. 11, 1919; under Cal. No. 412-20-S, July 8, 1920, and under Cal. No. 41-19-S, Jan. 8, 1924.

Rule 1. Classification of Revolving Doors. For the purpose of these rules revolving doors shall be classified as follows:

(a) **Type A.** "Automatic Collapsible" in which the individual wings are maintained in the normal revolving position, but which doors are so designed and constructed that in the event of excessive pressure being exerted on the wings, the braces or other devices which hold the wings in their normal position shall be disconnected, thereby permitting easy egress through the vestibule at least equivalent to that provided by a pair of swinging doors having the same width as the vestibule opening.

No revolving doors shall be included in this classification if the pressure necessary to collapse any wing exceeds one hundred and fifty (150) pounds when exerted at a point three (3) inches from the outer edge of the wing, and three (3) feet six (6) inches above the floor, but shall be classified under type B.

(b) **Type B.** "Rigid Brace" in which the individual wings are maintained in the normal revolving position by rigid braces or similar devices, but which doors are so designed and constructed that the braces or other devices which hold the wings in their normal position may be manually released by simple mechanical means, thereby permitting the individual wings to be manually collapsed and so arranged as to permit free egress through the vestibule.

Rule 2. Revolving Doors. Prohibitions. Revolving doors shall be prohibited in exit doorways from assembly halls, asylums, auditoriums, churches, dance halls, hospitals, motion picture theatres, schools, theatres, or from any room or space within a building where more than three hundred (300) persons congregate for purposes of amusement, instruction or worship; except that the main entrance doorway to a hospital or sanitarium may be equipped with either type A or B revolving doors when supplemented by swinging doors not less than three (3) feet eight (8) inches wide at this or other paths of egress.

Rule 3. Revolving Doors—Department Stores. Type A revolving doors hereafter installed shall be accepted in exit doorways from department stores provided doorways aggregating at least fifty (50) per cent of the legal re-

quired width, equipped with swinging doors, are installed, and one or more such outwardly swinging doors are located immediately adjacent to each revolving door. Such swinging doors need not be equipped with handles on the outside, and shall have a minimum clear width of three (3) feet.

Rule 4. Existing Revolving Doors. Except where otherwise prohibited existing Type A revolving doors may be retained as required means of exit in doorways from buildings.

Except where otherwise prohibited existing Type B revolving doors may also be retained as required means of exit in buildings, when, in the opinion of the administrative official having jurisdiction, no dangerous exit condition exists. If, however, such dangerous exit condition is deemed by him to exist, they shall be either replaced by Type A revolving doors, or supplemented by at least one swinging door not less than three (3) feet wide located adjacent to the revolving door, as the administrative official may direct.

Rule 5. New Revolving Doors. In buildings other than assembly halls, asylums, auditoriums, churches, dance halls, department stores, hospitals, motion picture theatres, schools and theatres, coming under the exit provisions of the building code, doorways serving as required exits may hereafter be equipped with Type A revolving doors or with Type B revolving doors, provided such revolving doors, not exceeding three in a unit, shall have an outwardly swinging door at least three (3) feet wide located immediately adjacent thereto.

Rule 6. Revolving Doors—Subway Entrances. Required exit doorways from buildings which serve in addition as a means of subway entrance and exit may be equipped with type A revolving doors, provided doorways of the legal required width equipped with swinging doors are also installed and one or more such outwardly swinging doors are located adjacent to each revolving door.

Rule 7. Saving Clause. But nothing in these rules shall prevent the installation on the exit doors from a bank, trust company, jewelry store, or any store devoted to a single similar use, of a locking device which may be operated by electricity or other means from the interior of the building, to be used only in an emergency.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, June 19, 1928, 10 a. m.

Minutes of Regular Meeting, June 19, 1928, 2 p. m.

"Standpipe"—"Fireline" Rules.

Progress Report.

Correction.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, June 26, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, July 3, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

THE RESOLUTION—

(59-28-A)

WHEREAS, W. R. Evans, for Carbondale New York Co., Inc., owner, filed, January 20, 1928, an appeal from an order of the fire commissioner, affecting premises 175 Christopher street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 14, 1927 (Order No. 40556-LC), reads:

"You are hereby notified that an inspection of premises 175 Christopher Street, Manhattan, used as a non-

MINUTES

storage garage, shows that the following must be done before permit requested by you can be issued:

"1. Protect the ceiling construction by a covering of approved fire retarding material as prescribed by the Rules of the Board of Standards and Appeals.

"2. Separate boiler from remainder of building by unpierced wall of solid masonry at least 8 inches in thickness. Entrance to boiler room to be from exterior of building only. Chapter 10, Section 159-1, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, two stories (35 ft. 6 in.) in height, 44 ft. by 94 ft. in area; OCCUPIED by one concern for the manufacture and storage of ice and refrigerating machinery: cellar, boiler room and storage, 2 persons; 1st story, receiving and shipping, 8 persons; 2nd story, shop and offices, 12 persons; and

WHEREAS, appellant contends, as to Item 1, that the floor above the cellar is constructed fireproof of concrete arches and 10-inch I beams with flanges protected with concrete on wire mesh, and, as to Item 2, proposes to provide an 8-inch brick wall with fireproof door at the opening therein, forming an enclosure around the boiler and proposes to provide also an opening in the easterly wall of the cellar; stock room provided with a fireproof door leading into adjoining stock room which has stair to first story.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

THE RESOLUTION—

(67-28-A)

WHEREAS, James W. Byrnes, for Watermeade Realty Corp., Inc., owner, filed, January 25, 1928, an appeal from an order of the fire commissioner, affecting premises 23-33 Meadow street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 27, 1927, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, two stories (32 ft. 6 in.) in height, 150 ft. by 100 ft. (15,000 sq. ft.) in area; OCCUPIED: 1st story, garage for four commercial type automobiles and also shipping and storage of paper boxes, 5 persons; 2nd story, manufacture of paper boxes, 52 persons; and

WHEREAS, appellant contends that the building is equipped with a sprinkler system fed from the 8-inch city main in Meadow street, which is fed two ways and has a pressure of 45 pounds; that the structure is low in height, accessible at the rear by means of an open area leading to Bogart

street and that the garage is separated from the remainder of the building by 8-inch walls with the openings therein protected with fire doors and that the ceiling of the garage is covered with ½-inch plaster boards and 26 gauge metal.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the building shall be not increased in height or area; that the premises shall be equipped throughout with an approved sprinkler system, and only so long as the occupancy and use remain substantially unchanged, in single tenancy and operation, and that all necessary permits required by the fire department shall be obtained and the certificate of occupancy of the superintendent of buildings be filed in the fire department.

43-28-A.

APPELLANT—George A. Boehm, for Botan Realty Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—132-136 Greene street, Manhattan.

APPEARANCES—

For Appellant: Clarence J. McManus and George A. Boehm.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION—

(43-28-A)

WHEREAS, George A. Boehm, for Botan Realty Co., Inc., owner, filed, January 17, 1928, an appeal from an order of the fire commissioner, affecting premises 132-136 Greene street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 28, 1927 (Order No. 83979-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, six stories (91 ft. 6 in.) in height, 75 ft. by 95 ft. in area at first story and 75 ft. by 85 ft. in area above; OCCUPIED: cellar, storage and manufacture of paper boxes, 3 persons; 1st story, manufacture of paper boxes, 32 persons; 2nd story, vacant, normal occupancy 10 persons; 3rd story, manufacture of loud speakers, 16 persons; 4th story, manufacture of sample cards, 32 persons; 5th story, manufacture of hat and die blocks, 15 persons; 6th story, manufacture of celluloid articles, 17 persons; and

WHEREAS, the appellant claims that the building is equipped with an adequate sprinkler system; that the building is divided by a fire wall into two sections, the larger section is not more than 3,622 sq. ft. in area; that the height of the building is only 6 ft. 6 in. above the height in which standpipes are not required; furthermore, the appellant contends that the building is equipped with two 3-inch standpipe lines which, under section 581, subdivision 1(a) of the building code must be accepted by the fire commissioner as sufficient.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the existing substandard standpipe equipment shall be discontinued and that the existing 4-inch siamese connection thereto shall be removed and

MINUTES

capped; that all legal exits as required by the labor law shall be provided and maintained; that the building shall be not increased in height or area; that the building shall be equipped throughout with an approved wet sprinkler system, so long as conditions as to occupancy and use remain substantially unchanged.

449-28-A.

APPELLANT—McKim, Mead & White, for Bellevue and Allied Hospitals, owner.

SUBJECT—Appeal from decision of the fire commissioner. PREMISES AFFECTED—East 26th street, to East 29th street, from First avenue to East River, Manhattan.

APPEARANCES—

For Appellant: E. P. Rubillo, George Harvey, Frederick G. Lemke, supervising engineer.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

THE RESOLUTION—

(449-28-A)

WHEREAS, McKim, Mead & White, for Bellevue and Allied Hospitals, owner, filed, May 16, 1928, an appeal from a decision of the fire commissioner affecting premises bounded by 26th to 29th streets, First avenue to East River, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated December 15, 1927 (Applic. No. 2285-26), reads:

"1. Garage for more than five cars may not be permitted within 200' radius or on same street between same intersecting streets of a hospital.

"3. Garage building cannot be used for dormitory or dwelling purposes.

"8. Show protection of stairway and ramp so that the two connecting floors are completely separated.

"17. Oil separator pit may not be located in repair shop."

and

WHEREAS, the premises consist of a large plot, 712 ft. 6 in. by 714 ft. 7¾ in., with a number of buildings; OCCUPIED and known as Bellevue Hospital; it is proposed to erect a two-story fireproof garage, 120 ft. 8 in. by 54 ft. in area, located on the premises along the north side of 26th street, 168 ft. 9½ in. east of First avenue; and

WHEREAS, the appellant claims, as to Item 1, that the garage is for the storage of ambulances in connection with the hospital; that it is an indispensable accessory and, therefore, is not a violation of the zone resolution; as to Item 3, that the dormitory is provided only for the chauffeurs, for emergency calls; as to Item 8, that the floors are designed so the supervisor on the ground floor has full supervision of all cars passing up the ramp to second story, also that this construction has been approved by the superintendent of buildings; as to Item 17, that the separator pit is protected by a substantial metal cover and is located in a remote place; furthermore, that there is no specific law prohibiting a separator pit in a machine shop; and

WHEREAS, the use, occupancy and operation of the garage is a necessary adjunct and indispensable in the conduct of this plant, the Bellevue Hospital of The City of New York.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted for a non-storage garage limited in the occupancy of motor vehicles to operate in the City of New York under the jurisdiction and for the operation exclusively of the Bellevue and Allied Hospitals plant at this site on condition that the building shall be erected fireproof and shall be under the constant surveillance and supervision of day and night

patrol, and that this structure shall be equipped with an approved standpipe system and an approved electric fire alarm system; all permits required to be procured before occupancy.

THE RESOLUTION—

(207-28-BZ)

WHEREAS, Hulbert & Heermance, for John J. Hefferman, owner, filed, March 7, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 329 Washington avenue, northeast corner of Harbor road, Mariner's Harbor, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 19, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Washington avenue is in a business and unrestricted district, Harbor road is in a business district and Summerfield place is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 31, 1928, reads:

"Application New Building No. 156 of 1928 for a gasoline selling station at the above premises is hereby disapproved, being contrary to the Zone Resolution. The premises are located in a business zone."

and

WHEREAS, it is proposed to erect an office, bury three 550-gallon tanks and erect six pumps for the purpose of

conducting a gasoline service station within a business district; and

WHEREAS, the applicant has predicated his application under the principle of section 7, subdivision g, of the rules of exception, which requires 80 per cent consents of owners within the area affected, having filed 87.6 per cent consents; and

WHEREAS, the applicant has sustained his appeal under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be erected on the side and rear property lines a wall of approved masonry not less than 8 ft. in height, lined on the interior with light-colored face brick or enameled brick, coped with terra cotta or natural stone coping; that there shall be installed along the building line of the property on both streets a concrete curbing not less than 12 in. in height, except at the driveways, which shall be not more than 10 ft. in width; that the operation of the gasoline service business shall be confined within the property itself; that the pumps shall be arranged and installed for use only within the property lines; that any building erected on the premises shall be limited to a one-story structure finished with face brick, the roof to be of hip or gable type, finished with variegated slate or vitrified Spanish tile; that any advertising display shall be limited to the illuminated lamps of the pumps and a flat wall sign on the structure, indicating the name and use of the premises; that there shall be no portable gasoline tanks operated outside the building line; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action.

THE RESOLUTION—

(46-28-BZ)

WHEREAS, John J. Dunnigan, for John Bahrenburg, owner, filed, January 18, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles and also the omission of the rear yard at the second story as required by the building zone resolution; premises west side of Bainbridge avenue, 295.31 ft. north of East 213th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 19, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that Bainbridge avenue, west side, is

MINUTES

in a business use district; Bainbridge avenue, east side, is in a residence use district; Jerome avenue, east side, is in a business use district; Jerome avenue, west side, is in a residence use district, and East 213th street is in a business use district, and the premises is in a "C" area district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 29, 1927 (re App. N. B. 2762-27), reads:

"1. Erection of public garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.

"2. Rear yard on second story must be provided as required by Building Zone Resolution."

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 150 ft. and a depth of 100 ft., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board granted a variation of the zoning resolution brought under section 7, subdivision e, in a former case on property abutting this site on the same street front in this block.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed in height a two-story structure above grade; that there shall be no cellar other than that required for the accommodation of the heating apparatus, approximately 20 sq. ft. at the front of the building on Bainbridge avenue; that the building shall be constructed fireproof throughout with a rear yard at level of second story of not less than 10 ft. in depth for the entire width of the premises; that the space forming the rear yard at second story level shall be glazed throughout with wire glass in metal frames; that an automatic louver ventilator shall be installed along the entire width of building fixed to the rear wall at the second story level; that there shall be no signs displayed on front of building other than one projecting electric sign, indicating the name and title of the garage; that the gable walls shall be unpierced throughout their entire height and length; that any skylights installed in the roof of the second story shall be glazed with plain glass, protected with wire guards above and below; that any gasoline storage equipment installed shall be located at the southerly end of the premises on the street front; that the front elevation shall be finished with light-colored face brick, with two-toned brick trim on all openings or architectural terra cotta or natural stone trim; that the coping of front wall shall be not less than 16 in. in girth; that the start of any ramp runway shall be set back from the street front not less than 10 ft.; that all permits required shall be obtained within nine months and all work involved completed within eighteen months from the date of this action; that the architect shall make a return of the drawings in accordance with the foregoing stipulations before the submission of same to the superintendent of buildings for acceptance.

CASES DISMISSED.

Appeals from Administrative Orders.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(1122-27-A)

Filed October 19, 1927—Premises 203-213 Fulton street, Borough of Brooklyn. Appeal for revocation of permit issued by superintendent of buildings. Appellant: Alfred J. Giordano. Dismissed for lack of prosecution.

(1273-27-A)

Filed December 5, 1927—Premises 911-921 Liberty avenue, Borough of Brooklyn. Appeal from decision of superintendent of buildings. Appellant: Talmud Torah Atereth Israel of Cypress Hills. Dismissed for lack of prosecution.

(1302-27-A)

Filed December 16, 1927—Premises 37 West 10th street, Borough of Manhattan. Appeal from decision of fire commissioner. Appellant: Cornell Utilities Co., Inc. Dismissed for lack of prosecution.

(1335-27-A)

Filed December 23, 1927—Premises 163 Bowery, Borough of Manhattan. Appeal from order of fire commissioner. Appellant: United Real Estate Owners Association. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

WHEREAS, the foregoing appellants have filed appeals with the board of standards and appeals from orders and decisions of administrative officials affecting the premises in question; and

WHEREAS, the appellants have failed to complete their papers, though duly notified to do so.

Resolved, that the foregoing appeals be and they hereby are *dismissed* for lack of prosecution.

Under the Building Zone Resolution.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(1175-27-BZ)

Filed November 2, 1927—Premises 110 Park avenue, Port Richmond, Borough of Richmond. Decision of superintendent of buildings. Applicant: Port Richmond Lodge No. 135 Loyal Order of Moose. Dismissed for lack of prosecution.

(1357-27-BZ)

Filed December 31, 1927—Premises 4467 Broadway and 700 West 192nd street, Borough of Manhattan. Decision of superintendent of buildings. Applicant: Philip J. Sinnott. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

WHEREAS, the foregoing applicants have filed with the board of standards and appeals applications under the building zone resolution affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the applications be and they hereby are *dismissed* for lack of prosecution.

AREA FIXED.

(66-28-BZ)

The chairman read a communication from James Kearney,

MINUTES

requesting the board to fix the area deemed affected and within which to obtain consents to permit, partly in a business district and partly in a residence district, the erection and maintenance of a gasoline service station; premises 205-43 Hollis avenue and 109-42 Cross Island boulevard, Hollis, Borough of Queens.

The following area was approved by the board:

Both sides of Cross Island boulevard from a point 100 ft. south of Hollis avenue to a point 400 ft. north of

premises in question; both sides of Hollis avenue from a point 100 ft. west of 205th (Thomas street) place to a point 400 ft. east of premises in question; also the east side of 205th (Thomas street) place from Hollis avenue to a point 155 ft. north of Hollis avenue.

Adjourned 1:30 p. m.

* WILLIAM J. O'GORMAN, *Secretary*.

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY AFTERNOON, JUNE 19, 1928

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin.

APPEALS FROM ADMINISTRATIVE ORDERS

1202-27-A.

APPELLANT—Fox Film Corporation, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—343-345 West 44th street, Manhattan.

APPEARANCES—

For Appellant: Louis M. Weber.

ACTION OF BOARD—Appeal withdrawn.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent	0

1127-27-A.

APPELLANT—Alan M. E. Johnstone, for Happiness Candy Stores, Inc., lessee.

SUBJECT—Application for reopening—correction of resolution—re appeal from order of the fire commissioner.

PREMISES AFFECTED—135 West 42nd street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Chairman read communication; appeal reopened and resolution corrected.

THE VOTE TO REOPEN AND CORRECT RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin	5
Negative	0
Absent	0

THE RESOLUTION—

(1127-27-A)

WHEREAS, Alan M. E. Johnstone, for Acker, Merrill & Condit, owner, filed, October 20, 1927, an appeal from an order of the fire commissioner, affecting premises 135 West 42nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 3, 1927 (Order No. 29859-LC), reads:

"Inspection of your premises shows you are storing and using liquefied chlorine contrary to the provisions of Section 214-A, Chapter 10, Code of Ordinances. The building is within 50 feet of the Henry Miller Theatre and has no sprinkler system. The chlorine is not in a fireproof room on the ground floor.

"You are therefore, hereby, ordered to

"1. Remove all liquefied chlorine from the premises."

and

WHEREAS, the building is non-fireproof, four stories in height, 60 ft. by 94 ft. 5 in. in area at first story; OCCUPIED: cellar, storage; 1st story, stores, 14 persons; 2nd story, offices, 10 persons; 3rd story, offices, 9 persons; 4th story, offices, 5 persons; and

WHEREAS, the appellant claims that not more than ten pounds of chlorine is maintained on the second story of the premises at any time; that the chlorine gas is used in minute quantities for the treatment of diseases; that the chlorine cylinders are maintained in a metal container filled with water; furthermore, the appellant contends that the chlorine equipment is safely installed so as to reduce all hazard; and

WHEREAS, this appeal was granted by the board at its meeting, March 13, 1928, but a typographical error was made as to the fourth story, the second story being the story in question, and the board corrected this error.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that there shall be but one five-pound cylinder of liquefied chlorine maintained on these premises at any one time, located on the second story, as indicated in plans filed with the appeal, for use in medical practice under the supervision and direction of properly licensed medical doctors; that the five-pound cylinder of liquefied chlorine shall be maintained immersed in water in a metal drum of not less than 55 gallons capacity, and that a metal duct ventilator shall be provided from the room in which the cylinder is maintained to the outer air, equipped with a mechanical blower.

THE RESOLUTION—

(190-27-BZ)

WHEREAS, William F. Doyle, for Nathan Jarashaw, owner, filed, February 23, 1927, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed business building (stores and dance hall); premises 1401-1405 Kings Highway, northeast corner of East 14th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 31, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kings Highway is in a business district, East 14th street is in a residence district and East 15th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 26, 1927 (Applic. No. 1265-27), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of stores and dance hall extending into a residence district.";

and
WHEREAS, the proposed building is to be of non-fireproof construction, three stories in height, with a frontage of 63 ft. 11½ in. on Kings Highway, 163 ft. 5⅞ in. on East 14th street and irregular in depth; to be occupied as a business building (stores and dance hall); and

WHEREAS, the board considered that applicant established a basis of appeal under sections 7b and 7c of the building zone resolution and that denial of relief would work practical difficulty and unnecessary hardship; and

WHEREAS, under date of May 31, 1927, the board adopted the following resolution:

"Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that no portion of the structure erected in the residence use district shall exceed a height of two stories above grade; that the building as reconstructed may be of 'ordinary' construction, unless required to be fireproof by the code of ordinances; that a public dance hall shall be prohibited on the premises; that no portion of the premises within the residence use area of the plot shall be maintained as a meat store, fish store or delicatessen store; that there shall be no signs or advertising display within the residence use area of the premises on the East 14th street front other than fixed letters on the plate glass show windows of the store fronts; that the elevation throughout the East 14th street front, other than the show window store fronts, shall be finished with face brick and architectural terra cotta or stone trimmings; that all permits required shall be obtained within nine months and the work completed within eighteen months from the date of this action.";

and

WHEREAS, the bureau of buildings has taken the view that dancing was excluded from the premises by the action of the board in its adoption of the resolution, granting a variation for that portion of the structure that extended into the residence use area of 14th street; and

WHEREAS, the applicant asks for an interpretation as to dance privilege as incidental to the conduct of a public restaurant; and

WHEREAS, the restaurant is located wholly within the business use area of the premises and is a conforming use, the board's intention in the adoption of the original resolution was to deny the dance hall use which was sought for the entire second story; and

WHEREAS, the board at no time proposed the inhibition of any legal use within the business use area.

Resolved, that it is the determination of the board that any use incidental and common in practice to the conduct of a restaurant was included within the intent of the original resolution as adopted on May 31, 1927, on condition that no portion of these premises shall be rented out for hire or charge in the conduct of a public dance hall.

APPROVAL OF PLANS

1000-27-BZ.

APPLICANT—Edward L. Kelly, for Patrick B. Noone, owner.

SUBJECT—Application for certification of plans as to compliance with resolution adopted by the board on March 6, 1928.

PREMISES AFFECTED—Northwest corner Woodhaven boulevard and 158th avenue, Aqueduct, Queens.

(Continued on page 707)

RULES

"STANDPIPE"- "FIRELINE" RULES ADOPTED JUNE 27, 1922

AMENDED MAY 18, 1928

[281-22-SR]

Rule 1. PLANS. A preliminary set of paper plans and cross sections, drawn clearly and distinctly, to a scale of $\frac{1}{4}$ -inch or, by permission of the Fire Commissioner, $\frac{1}{8}$ -inch to the foot, for each proposed standpipe (fire line) installation or alteration, shall be submitted to and approved by the Fire Commissioner before the work in connection with the installation is started. Such preliminary plans shall show the size and location of the standpipe (fire line) risers, size and location of siamese and cross-connections, valves, tanks and connections, pumps, hose stations, lengths of hose, etc., and the location of stairways and enclosing partitions in relation to the standpipe risers and hose stations. From these approved preliminary plans, three sets of plans on cloth, in clean and clear detail, shall be filed for final approval by the Fire Commissioner. A certified copy of approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If an automatic sprinkler system is provided throughout the building or in any portion of the building, the plans shall include a note to that effect.

Rule 2. APPROVAL. Before acceptance all standpipe (fire lines) shall be tested, for at least one hour, under a hydrostatic pressure of not less than 300 pounds per square inch at the street siamese, and at each pump supply level, or such additional pressures as may be required to give 100 pounds at the highest hose outlet supplied by such pump, except that when a change is made in a source of supply, or minor changes are made in an existing equipment previously approved, the system shall be tested to a pressure sufficient to give 50 lbs. per sq. in. at the highest story hose outlet. These tests to be made in the presence of a representative of the Fire Prevention Bureau.

No valves, risers, or other material portions of any standpipe (fire lines) equipment shall be covered or permanently concealed until tested and approved, in writing, by the Bureau of Fire Prevention.

When entirely completed in accordance with the approved plans, and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the standpipe equipment is approved, the applicant will be so advised, in writing, by the Bureau of Fire Prevention.

When deemed necessary by the Fire Commissioner, sectional diagrams of the standpipe (fire line) equipment in buildings of large area or height, not more than three in number and printed on cloth in size not less than $8\frac{1}{2}$ x 11 in., shall be filed by the applicant for the use of fire companies in the district in which the premises are located.

Rule 3. STANDPIPE-FIRE LINE CERTIFICATE. The engineer, superintendent or persons in charge of the standpipe-fire line system in all buildings exceeding eighty-five feet in height shall be registered, and submit to an examination in the Fire Department. Upon evidence of fitness to properly operate and maintain the standpipe system he shall be granted a Certificate to that effect. The certificate shall contain the full name and a small photograph of the holder.

Day and night service shall be maintained in all buildings exceeding 250 ft. in height in which there is a fire pump.

Theatre buildings provided with fire pumps shall have at least one certified operator on duty during every performance. Buildings of large areas, industrial plants, amuse-

ment parks, etc., shall have at least one certified operator on duty when deemed necessary by the fire commissioner.

Rule 4. MONTHLY INSPECTION. All valves, hose tools and other auxiliary fire appliances shall be kept in perfect working order, and at least once a month the person holding certificate of fitness shall make a thorough inspection of all the fire appliances to see that they are in perfect working order and ready for immediate use by the Fire Department. Fire pumps shall be tested every 30 days by the person holding the certificate of fitness.

He shall also instruct all employees under his charge in the use and practice of all auxiliary fire appliances. A detailed record of each inspection shall be kept on the premises for examination by a representative of the Fire Department.

All standpipe equipment in buildings exceeding 85 ft. in height shall be subject to a flow test with a pressure of not less than 50 lbs. at the top floor outlet, at least once in every two years, test to be conducted in the presence of a representative of the Fire Department.

Rule 5. APPROVED DEVICES. All devices approved for use in new standpipe fire line equipments shall bear the manufacturer's name and the date of and the number of the approval. Certified copies of the approval, working drawings and photographs of the device approved, shall be submitted to the administrative authority having jurisdiction for preservation as records and reference data.

Rule 6. ELEVATOR IN READINESS. In every building exceeding 150 feet in height at least one passenger elevator and in buildings in course of construction a hoist or elevator shall be kept in readiness for immediate use by the Fire Department during all hours of the night and day, including holidays and Sundays, and a man competent to operate the elevator shall be present at all times.

Rule 7. AREA OF BUILDINGS. For the application of Section 581 of Chapter 5 of the Code of Ordinances the area of a building shall be taken as the area within the exterior walls, or the area between fire walls.

When the fire walls are constructed in accordance with Section 371, Chapter 5 of the Code of Ordinances, and all openings are protected on both sides of fire wall or walls with automatic fireproof self-closing doors, the area within such fire walls or exterior walls and a fire wall, shall be considered a separate building.

Rule 8. HEIGHT. The term "height" as applied to a building or structure, as described in Chapter 5, Code of Ordinances, means the vertical distance measured in a straight line from the curb level, to the highest point of the roof beams in the case of flat roofs, and to the average height of gable in case of roofs having a pitch of more than 20 degrees with a horizontal plane.

Rule 9. STANDPIPE EQUIPMENT shall consist of a system of piping connected to one or more approved sources of water supply and provided with sufficient number of hose outlets and hose located as hereinafter set forth, to make possible the covering of every portion of each floor area with a standpipe hose stream, except that where the 1st story or basement or both are occupied as stores without connection or communication with the entrance hall or stair enclosure to upper stories, the Fire Commissioner may permit the omission of standpipe protection in such stores and, if so omitted, may prescribe such portable protection as he may deem necessary. Cellars, sub-cellars, basements, etc., shall be protected in the same manner as the stories above.

RULES

Every standpipe (fire line) equipment shall be a Standard Wet System, except as hereinafter provided for:

(a) In any building not exceeding 40 feet in height, and 20,000 sq. ft. in area, a four-inch street supply system having one four (4) inch direct connection to a street main fed two ways or having one 4-in. direct connection to each of the two street mains on two street fronts, each main so fed that the shutting off of one main will not interfere with the supply of the other main, may be installed, provided there is a sufficient pressure in the street main or mains to maintain a minimum of twenty-five (25) pounds per square inch static pressure at the highest hose outlet.

Evidence establishing the fact that water main conditions and pressures are as required shall be submitted to the Fire Department.

Rule 10. CLASSIFICATION OF STANDPIPE-FIRE LINE EQUIPMENTS. For the purpose of these rules standpipe equipments shall be classified as:

(a) Standard Wet System in which the pipes are of sizes as specified in Section 581 of the Building Code, and in which the system is at all times filled with water from at least one standard source of supply.

(b) Four-inch street connection system, in which the pipes are of sizes as specified in Section 581 of the Building Code and the system is at all times filled with water from one or more 4-in. diameter direct connections to public water mains in the street.

(c) Automatic dry systems, in which the pipes are of sizes as specified in Section 581 of the Building Code, and are normally dry, the system being connected to a source of water supply controlled by an automatic dry pipe valve as defined elsewhere in these rules.

Rule 11. TANKS ABOVE ROOF. Construction shall be as per Section 428 of the Building Code and tank structure and supports shall be approved by the Superintendent of Buildings. The covers of all unenclosed standpipe tanks shall be conical in shape and protected with a type of roofing approved by the Superintendent of Buildings.

Rule 12. RESERVE FOR STANDPIPE. Gravity roof tanks, except as otherwise required by Rule 83, shall contain not less than 3,500 gallons of water at all times, reserved solely for standpipe fire line purposes.

When a gravity tank is to be used for both standpipe and house supply, the connection for the latter shall be made through the side of the tank above the level of the required standpipe reserve. This type of house and standpipe supply tank is preferred and recommended.

When two gravity tanks are used, one for standpipe fire line service and the other for the house supply, the house supply tank may be so arranged that it can only be filled by an overflow from the tank used for standpipe fire line purposes.

Rule 13. STANDPIPE AND SPRINKLER SUPPLIES. Standpipe and sprinkler supply shall not be taken from one tank unless there is available 5,000 gallons of water for the standpipe system which shall be in excess of the amount of water required for the sprinkler system. Standpipe supply shall be taken from the uppermost portion, and through the side of the tank, or through the bottom, provided that portion of the pipe within the tank is of brass or other non-corroding material.

Rule 14. BUILDINGS IN GROUP UNDER THE SAME OWNERSHIP AND OPERATION:

One gravity tank of at least 5,000 gallons water capacity to supply the largest unit of a group of separate and distinct buildings operating under one ownership, and located at such elevation that the bottom of the tank will be at least 20 feet above the roof of the highest building of the group, will be accepted as an adequate tank supply for the entire standpipe equipment, provided a dead riser is carried down from the bottom of the tank to an underground header system having a Post Indicator control valve for each building

unit, the P. I. valves to be located as the Fire Commissioner may direct.

Rule 15. UNDERGROUND PIPING. All underground piping shall be extra heavy cast iron installed in accordance with the standard specifications of the American Water Works Association: for 4-inch lines Class C requirements shall be used, 6-inch Class D, 8-inch Class E.

Rule 16. ADDITIONAL TANKS. When, in his opinion, the area covered is excessive or the occupancy is such that an unusual fire hazard is introduced, the Fire Commissioner may require additional protection in the nature of additional tank or tanks located remote from any other standpipe tank, or additional water supply in the main gravity tank, or a fire pump and suction tank of size and capacity to be determined by the Fire Commissioner or the Board of Standards and Appeals, or a combination of any of the foregoing supplies.

Rule 17. STANDARD SOURCE OF SUPPLY. Gravity tank located so that the bottom of same will be not less than 20 feet above the roof level and of a capacity as stated elsewhere in these rules and directly connected with the standpipe equipment by pipes of the same diameter as that of the largest riser.

Rule 18. TANK FEED. Tanks shall not be fed through the standpipe fire line, but shall be fed through a separate line at least 2 inches in diameter, discharging into the top of each tank above the overflow level through the side or through the bottom, that portion of the pipe within the tank to be of brass or bronze. An electric or steam pump of sufficient capacity to deliver at least 65 gallons of water per minute at the tank shall be provided, or if the pressure in the service line is sufficient and the plumbing is such that a minimum of 65 gallons of water per minute may be delivered to the tank, connection to the house water service main in the basement, cellar or lowest story may be used instead of pump.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, when a ball (float) valve is provided for each tank. Floats shall be of copper.

Rule 19. OVERFLOW. An overflow of diameter at least as large as that of the fill line shall be provided for each roof standpipe tank. The overflow line from all intermediate tanks shall be at least 6 inches in diameter. It may be run through the bottom of the tank, provided it is of brass or bronze and has no joint inside of the tank, otherwise it must be brought through the side of the tank, 3 inches below the top (of sides). Overflows shall terminate in a 90 degree elbow not more than 24 inches above the roof.

Rule 20. EMERGENCY DRAIN. There shall be provided for each tank an emergency drain not less than 4 inches in diameter connected directly to the bottom of the tank or to the standpipe supply line above the tank check, and terminating not less than 30 inches nor more than 4 feet above the roof in a horizontal run. Emergency drain shall be provided with a 4-inch O. S. & Y. gate valve located in a readily accessible position not more than 4 feet above the roof.

Rule 21. ELEVATION OF TANK. The bottom of each gravity tank used for standpipe fire line supply shall be at least 20 feet above the level of the roof. When the area of a pent house exceeds 50% of the roof area or when it exceeds an area of 2,500 sq. ft., the bottom of the tank shall be required to be not less than 20 ft. above the level of the pent house roof. In existing standpipe equipment the bottom of the gravity standpipe tank shall not be required to be more than 20 feet above the outlet in the highest story.

Rule 22. PYRAMID OR TOWER ROOFS. Where the roof of the building is designed so as to finish in a

RULES

pyramid or tower form, the gravity tank shall be elevated as high as practicable, within the pyramid or tower. Provided, however, that in all cases, the gravity tank is not less than twenty (20) feet above the hose outlet in any room or space occupied other than for tank houses, elevator machinery or machine shop for repairing elevator machinery. Fire appliances, as may be required by the Fire Commissioner, shall be provided in such tank houses, elevator machine rooms, etc.

Rule 23. ACCESS TO TANK. Access to the top of each standpipe tank shall be provided by means of an iron gooseneck ladder of substantial construction and rigidly braced. Access to the tanks on theatre building shall be from the stage level to the roof by means of double-rung ladders set at an angle of not more than 70°, with intermediate landings every 12 ft. or less.

Rule 24. HIGH AND LOW WATER ALARM. Every gravity tank hereafter installed for standpipe fire line purposes shall be equipped with an electric closed circuit high and low alarm as provided under Rule 88, in order that it may be determined at any time whether or not the required standpipe reserve is in the tank, except when the house supply is taken from the tank, or where the house supply tank can only be filled from an overflow of the standpipe fire line reserve tank, a high and low alarm need not be provided when an automatic tank filling pump is installed.

Rule 25. CHECK VALVE. There shall be provided in a horizontal run of pipe in the top story stair enclosure or in a heated enclosure on the main roof, in the line connecting the standpipe tank with the standpipe riser, an approved type swing check valve opening downstream toward riser, except that where a siamese connection has been omitted, under these rules, no check valve shall be required. An O. S. & Y. gate valve shall be provided on each side of the check valve and shall be sealed open in an approved manner.

Rule 26. HEATING OF TANKS. All tanks used for standpipe supply purposes shall be heated by means of steam supplied through a brass coil with brass fittings and of a type and radiating surface as prescribed by the Board of Standards and Appeals. The heater shall be fed through a 1¼-inch steam line with a 1-inch return, separately trapped. The water in the tank shall be maintained at a temperature above 40° F.

Tanks in hotels, hospitals, institutes or similar buildings using the tank supply seven days a week supplying both standpipe and house service lines shall not require heating. If in an adequately heated enclosure, interior heating of tanks shall not be required.

Rule 27. LOWEST SUCTION TANKS. Tanks shall have at least 10,000 gallon effective water capacity as specified in Schedule A, reserved for the lowest fire pump use exclusively and shall be constructed of steel or reinforced concrete, located below the grade, or lowest story, if there is no cellar under the building. The Fire Commissioner may permit suction tanks to be located in a separate enclosure or building provided they are accessible and when, in his judgment, such location will be more practicable. House supply tanks may be connected to the fire pump suction line, provided an O. S. & Y. gate valve, sealed closed, shall be provided on such house supply lines.

Rule 28. LOWEST TANK SUPPLY. The lowest suction tanks shall be fed by a connection at least 4 inches in diameter taken directly and independently from the public street main. The supply shall be not less than 750 gallons a minute, and shall enter the suction tank above the top or through the side near the top of the tank and shall be controlled by suitable bronze ball cock and copper float.

Rule 29. SUPPORT FOR TANKS. Tanks of more than 500 gallons capacity hereafter placed in or on any building shall be supported on masonry, reinforced concrete or steel construction of sufficient strength and carried to a proper foundation as provided for in section 428, Chapter 5 of the Code of Ordinances.

Rule 30. INTERMEDIATE TANKS. The location of intermediate tanks hereafter installed shall be determined

and directed by the Fire Commissioner and as prescribed in Schedule A. Each such tank shall have at least 5,000 gallons of water reserved exclusively for fire line and pump purposes. The bottom of each tank shall be at least 20 feet above the highest outlet supplied therefrom. The method of water supply to tanks, the overflow, the high and low water alarm, the emergency drain, etc., shall be as prescribed for tanks above the roof except that the overflow and emergency drain shall be connected to the drainage system of the building or discharge on intermediate levels.

The connection of the tank to the system shall be as hereinafter set forth:

Piping of the same diameter as the riser shall connect the tank with the riser of the portion of equipment supplied from that tank and in this connecting line in a horizontal run there shall be placed an approved swing check valve opening downward, and two O. S. & Y. gate valves, one at each side of the check valve. Each tank section shall be directly connected to the tank section above by means of piping of the same diameter as that of the largest riser and in a horizontal connecting line shall be provided an approved swing check valve opening upward, with an O. S. & Y. gate valve, at each side of the check valve, in order that water pumped into the siamese connection may enter the entire equipment of the building, and that each tank will supply only its portion of the system.

Rule 31. VALVES. All valves controlling standpipe water supply except valves at hose outlets shall be iron body brass mounted, or cast steel designed in accordance with specifications of the American Society of Mechanical Engineers, gate valves shall be of Outside Stem & Yoke type, and shall be located in an accessible position. All emergency control valves 6 inch and larger shall be of the by-pass type.

Rule 32. PIPING. Materials of Construction. All new piping for standpipe fire lines shall be of genuine full weight wrought iron or steel and properly tested by the manufacturer to withstand the required water working pressures. All pipes shall be lapwelded. Where working pressures are in excess of 150 lbs. to the square inch extra heavy cast iron, malleable iron or cast steel valves, and fittings constructed in accordance with the specifications of the American Society of Mechanical Engineers, able to withstand the required water working pressure shall be provided. The standard weight fittings and valves may be used where the pressure is not more than 150 lbs. per sq. in. Fittings in horizontal runs shall have long turns. All underground piping shall be of extra heavy cast iron as required by Rule 15.

The water working pressure on piping, valves and fittings shall be determined by the total head of water plus 50 pounds at the top floor hose outlet plus a factor of safety of at least 50 per cent. Specifications as to the construction and water working pressure of all piping, valves and fittings shall be marked on plans filed with fire commissioner.

Rule 33. CONSTRUCTION. Each standpipe fire line riser shall be supported at the bottom and at every other (alternate) story, and shall be properly braced. Horizontal lines shall be supported by standard heavy wrought or malleable iron hangers attached to or extending around and over floor beams at intervals of not more than 8 ft., and at more frequent intervals if deemed necessary by the Fire Commissioner and shall be securely braced to withstand vibration. Hangers may be supported by straps or bars extending over and around bars of at least 1 in. in diameter and 12 in. in length embedded in concrete floors parallel to and at least 2 in. from the undersurface or by approved malleable iron concrete inserts. The arrangement of lines must be straight and as direct as practicable. Offsets will be permitted only when unavoidable or where necessary to install horizontal check valves. Except where flange fittings and pipes are permitted elsewhere in this rule, all joints shall be screwed joints made up thoroughly water tight with red lead, litharge and glycerine, or compressed graphite lead and boiled linseed oil, or any joint compound that shall be approved by the Board of Standards and Appeals.

RULES

In horizontal runs of piping of standpipe fire line systems, if larger than 4 in. in diameter, fittings and valves may be of the flange type, provided flange faces are machined true and smooth and do not show rings, sand holes or other imperfections. All joints shall be provided with proper copper gaskets.

All standpipe (fire line) equipments shall be installed in a workmanlike manner.

Rule 34. PROTECTION OF FIRE LINES. Standpipe lines when not located within a fire protected stair enclosure shall be protected against interior fire damage by means of at least one inch asbestos covering, or a covering of expanded metal lath and three-quarters inch Portland cement plaster or by a 2 in. terra cotta block encasement.

Rule 35. FROST PROTECTION. Standpipe lines shall be properly protected from freezing in the following manner:

One wrapping of tar paper equivalent to Asphalt Saturated Wool Felt paper weighing 12 lbs. per 100 sq. ft.

Three (3) layers of standard 1 in. high grade "long cows' hair" felt interposed and covered with one (1) layer of builders' paper equivalent to red rosin sized sheathing paper weighing 40 lbs. per 500 sq. ft.

One (1) covering of 8 oz. canvas, painted with two (2) coats of waterproof paint.

All wrappings to be independently applied and securely fastened in place with heavy jute twine. Circumferential and longitudinal joints to have at least a 2 in. lap staggered with adjacent layers and opposing leakage to the hair felt.

In groups of pipes each water pipe is to be wrapped separately with the tar paper, but subsequent layers of felt and paper may be applied collectively if space does not permit of individual wrapping.

Where a heating pipe is one of the group, the wrapping should be applied so that the hot line would serve all pipes in the enclosure. The initial wrapping of tar paper around each water pipe should be applied with laps down and the whole group wrapped with tar paper with laps up. If due to the position of the hot line sufficient air space would not insulate the hair felt, then protection to be effected by suitable separators, or a wrapping of asbestos paper instead of the tar paper around the group.

On vertical pipes particular provision to be made to prevent slipping and tearing of insulation due to its weight.

To prevent slipping away of insulation at point of entrance of pipes into a tank, and to shed leakage from slip joints, a 16 oz. duck to be provided, doubled and securely fastened to bottom of the tank overlapping inside and outside the insulation of the group for a distance of 18 in. below the tank. This duck to be well coated with paint. Loose hair felt to be packed about connection at tank bottom to safeguard against settling.

Rule 36. NUMBER OF RISERS. Each building fronting on more than one street shall have at least one riser for each street front. For the application of this rule a corner building shall not be considered as facing on more than one street when it is on but one corner. In all cases regardless of area or location there shall be a sufficient number of risers, so that any portion of each floor area may be covered by the stream from a standpipe hose not exceeding 100 ft. in length.

Rule 37. FIRE TOWER RISER. Each standpipe riser shall be located within a stair enclosure and one riser must be located in main stairway or fire tower.

Where impracticable to locate a riser within the stair enclosure, the Fire Commissioner may permit it to be located immediately adjacent to a stair enclosure, public corridor or other suitable place.

Rule 38. HOSE STREAM ALLOWANCE. Not more than 10 feet will be allowed for the throw of hose stream, except where the static pressure at the hose outlet is 15 lbs. or more, when 20 ft. will be allowed.

Rule 39. SIZE OF CROSS-CONNECTION. Where there are two or more risers in a standpipe (fire line) equipment, all risers shall be cross-connected by piping of a diameter at least equal to the diameter of the largest riser, but in no case shall the cross-connection be less than five inches.

Rule 40. FIRE PUMPS. Where Required:

(a) In every building hereafter erected exceeding 250 ft. in height, as described in Schedule A, an electric centrifugal fire pump shall be kept in readiness for immediate use of the Fire Department during all hours of the night and day, including Sundays and holidays.

Rule 41. ARRANGEMENT AND SUPPLY OF FIRE PUMPS. Fire pumps shall be connected to the standpipe systems and have a capacity of 750 gallons of water per minute at a pressure of from 50 to 80 lbs. at uppermost hose outlet, fed from such pumps. Fire pumps shall draw from steel or reinforced concrete suction tanks. For the purpose of testing fire pumps a 4 in. diameter branch shall be taken from the discharge line at the pump side of the check valve and run to the suction tank over the side or through the side above the overflow level. From this branch there shall be taken a 4 in. line with an approved type pressure relief valve, extending to the tank in a manner similar to that of the 4 in. test line. In the 4 in. test line between the 4 in. relief branch and the tank there shall be placed an O. S. & Y. gate valve, which shall be kept closed except during a test of the fire pump. In the line from the fire pump to the standpipe risers and beyond the test branch there shall be placed an approved type check valve in a horizontal position and also an O. S. & Y. gate valve, the latter to be open except when the fire pump is undergoing test. A pressure gauge shall be provided and connected to the discharge line of the pump.

The piping connecting discharge from fire pumps shall be of same diameter as the main riser.

Rule 42. NUMBER AND LOCATION OF FIRE PUMPS.

SCHEDULE A

Height from Uppermost Hose Outlet to grade*	Total No. of Pumps Required	Approximate Location of Pumps			
		1st Pump	2nd Pump	3rd Pump	4th Pump
250' to 400'	1	Below grade level			
401' to 500'	2	Below grade level	200' to 250'		
501' to 600'	2	Below grade level	250' to 300'		
601' to 700'	3	Below grade level	200' to 250'	400' to 500'	
701' to 800'	3	Below grade level	250' to 300'	500' to 600'	
801' to 900'	4	Below grade level	200' to 250'	400' to 500'	600' to 750'
901' to 1000'	4	Below grade level	250'	500'	750'

* The uppermost hose outlet shall not include pent house outlet.

Rule 43. FIRE PUMPS IN BUILDINGS EXCEEDING 1,000 FEET. All buildings exceeding 1,000 feet from grade level to uppermost hose outlet shall be provided with a fire pump for every 250 feet of elevation above the centre line of the lowest pump.

Rule 44. TANK CAPACITIES. Suction tanks supplying the first or lowest pump shall contain not less than 10,000 gallons reserved for fire pump. Intermediate tanks and uppermost supply tanks for buildings between 250 and 400 ft. as described in above schedule shall contain not less than 5,000 gallons reserved for fire pump. Uppermost supply tanks on all other buildings shall contain not less than 3,500 gallons reserve for standpipe fire line. Suction tanks shall be of the open type.

RULES

Rule 45. TANK STRAINERS. All supply tanks shall be provided with bronze strainers at pump and riser intake lines.

Rule 46. CENTRIFUGAL FIRE PUMPS. Fire pumps installed under these rules shall have a capacity of 750 G. P. M. and shall be of the multi-stage motor driven Centrifugal type designed, constructed and installed to render the highest possible efficient and reliable fire service.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

The pumping equipment shall be adaptable for heavy duty service having all parts of ample strength with liberal water passage and all working parts exposed to corrosion of phosphor bronze.

The pumps shall be fitted with fire fittings consisting of capacity name plate, pressure gauges, relief valves, hose manifold and three (3) approved $2\frac{1}{2}$ in. hose valves with Standard Fire Department male threads. Fire pumps shall take suction supply under a head of water and in no case shall there be less than six (6) feet between water level in tank and centre line of pump.

The pump specifications shall be within the uniform requirements of "The National Standard" as adopted by the following associations:

Associated Factory Mutual Companies,
National Board of Fire Underwriters,

or as approved by the Board of Standards and Appeals.

Fire pumps to be designed to operate at not less than five (5) pre-determined speeds to give five (5) pre-determined pressures which will insure a maximum pressure of 80 lbs. and a minimum pressure of 50 lbs. throughout the building.

Fire pump equipment shall be so designed that it will operate normally at least five (5) speeds to provide a minimum of 50 lbs. pressure, and where more than one pump is required it shall be capable of pumping to the level of the next highest pump station in case of breakdown of intermediate pumping unit.

To provide for this standby service the fire pump shall run at nine (9) pre-determined speeds, namely, five (5) for continuous service and four (4) for standby service.

Rule 47. GENERAL SPECIFICATIONS. Pumping equipment shall be free from defects in design, workmanship and material and shall give proper and continuous operation under the conditions of service specified and shall be subject to approval of the Board of Standards and Appeals.

Materials entering into construction of this equipment shall be the best quality of their respective kinds and all parts shall be amply proportioned so as to be adaptable for heavy duty service.

CASING: Casing shall be of close grained cast iron and divided horizontally, and having suction and discharge connections in the lower half, so that the top casing can be removed without breaking water connections. Casing shall have in addition to flange bolts, additional heavy bolts inside of flange to prevent leakage between stages. Casing shall be tested and guaranteed to withstand pressure 50% in excess of working pressure.

SHAFT: Shaft shall be made of best grade nickel steel and shall be ground all over to close limits and a high finish.

IMPELLERS: Impellers shall be of the enclosed type of best grade of phosphor bronze finished all over.

WEARING RINGS: Shall be of phosphor bronze and of renewable labyrinth or other equal type. Impeller wearing rings shall be securely attached to impeller, and casing ring shall be securely locked in the casing.

SHAFT SLEEVES: Shaft sleeves shall be of bronze and extend through stuffing boxes to protect the shaft from corrosion and wear from the packing.

BEARINGS: Bearing brackets shall be of the best grade of close grained cast iron and securely bolted to the lower half of the casing.

Bearing brackets shall contain cast iron bearings lined with high grade babbitt and shall be removable. Each bearing shall be equipped with two oil rings to insure proper lubrication.

COUPLING: Coupling shall be of best grade cast iron finished all over and keyed to shaft. The two halves shall be connected by coupling pins, transmitting power through rubber bushings, vulcanized on steel sleeves.

STUFFING BOXES: Stuffing boxes shall be of sufficient depth to prevent excessive leakage and shall contain water seal rings of bronze.

PACKING: Packing shall be held in place by bronze glands horizontally split and bolted together.

BED PLATE: Bed plate shall be of cast iron of heavy box type and provided with finished pads to which the pump is bolted and doweled. Foundation bolt rings shall be drilled for foundation bolts. Jack-screw pads to be cast with bed and jack-screws furnished to assist in aligning. Bed plate shall be provided with ample drip rims, drilled and tapped for piping connections on both ends.

PAINTING: Pumps shall be painted, filled, rubbed down to an even surface and finished with a drab steel-color machine paint, and the inside of the oil reservoirs in the bearing brackets to be painted white with a special oil-resisting paint.

TESTING: Pumps shall be tested at the plant of manufacturer to prove that they can fulfill requirements of specifications and guarantees made.

Rule 48. SPECIFICATIONS FOR ELECTRICAL CONTROL AND OPERATION OF FIRE PUMPS.

MOTOR: (a) Direct-current motors must be of the shunt or cumulative compound wound types. The speed of the motor at no load must not exceed the speed at full load by more than 10%.

Alternating current motors shall be of a slip ring type that will surely start and attain full speed under the current supply conditions where pump is to be installed. Approval of fire pump installations will be contingent on proper attention being given to the features mentioned herein.

(b) With a room temperature not exceeding 40 deg. C., motors shall be designed for a temperature rise not exceeding 40 deg. C. when carrying their rated full load continuously and shall also be able to run continuously with an overload of 15% without stress and without injurious rise in the temperature. Motors shall be able to withstand under the above room temperature an overload of 25% for 2 hours or a momentary overload of 50% without injury. No electrical or mechanical weakness should develop during these tests. The rise in temperature shall be measured in accordance with the Standardization Rules of the American Institute of Electrical Engineers.

Motors shall be of such capacity that at rated voltage 115% of its full load ampere rating will not be exceeded under any conditions of pump load.

(c) Motor and control apparatus must be protected from water coming from possible leakage, or breakage of any connection at the pump or other piping in its vicinity, including hose lines which may be connected to the pump.

(d) Motor windings shall be thoroughly impregnated with an insulating compound suitable for resisting moisture.

(e) Bearing shells and caps for motors shall be of the split type on at least the driving end, to permit removal and replacement without disturbing the motor or shaft after installment.

VARIABLE SPEED CONTROL OF MOTORS shall be provided except for fire pumps in theatres as required under Rule 86. Not less than five stages of speed variation will be permitted.

RULES

AUTOMATIC STARTERS will not be permitted except as provided for under Rule 86 (Theatres, etc.) of Standpipe Fire Line Rules.

CONTROLLING EQUIPMENT: The following specifications cover the construction and installation of controlling equipments of manually operated devices for the control of electric motors driving fire pumps.

In materials, details of construction, test and installation, except as modified or supplemented by these requirements, all parts of the equipment shall comply with Chapter 9 of the Code of Ordinances.

All equipments shall be specifically approved for fire pump controlling purposes.

DESIGN: (a) The design of all parts must be such as to secure simplicity, strength, durability and ease of operation.

(b) All parts must be mounted on one or more panels of slate, marble or other approved material, supported in a substantial manner on an iron frame, and the entire equipment must comply with the requirements for switchboards in Chapter 9 of the Code of Ordinances.

(c) All parts, such as bearings, cams and latches, the operation of which is liable to be interfered with by corrosion, must be made of phosphor bronze or similar metal, except where magnetic qualities are essential. Springs must be of phosphor bronze or similar metal, or protected against corrosion in an approved manner.

OPERATING MECHANISM: (a) The operation shall be such that the motor is directly started by a single lever, which shall be arranged to move in one direction from the initial to the final position.

(b) Electrical actuating devices will not be approved.

(c) Where direct current is used, an auxiliary field resistance shall be provided which can be used to increase the motor speed 10 per cent.

RESISTANCES: Starting resistances must be, unless inside of the motor, of the grid type, and comply with the requirements of starting duty rheostats as given in Chapter 9 of the Code of Ordinances.

OVERLOAD PROTECTION: (a) Each motor lead must be protected by a circuit-breaker. With direct current motors, leads must be protected by a single-pole circuit-breaker in each lead, or by an approved double coil, double pole circuit-breaker so designed that each pole must be closed independently of the other.

(b) Circuit-breakers to be calibrated to 400 per cent. of normal motor current.

(c) No fuses nor other overload release devices except circuit-breakers are permitted, except in instrument and pilot light leads.

WIRING: All wiring shall be installed in rigid iron conduit.

SWITCH: An approved knife switch for independent sources of supply must be provided, having one pole for each supply wire in circuit.

PILOT LAMP AND INSTRUMENTS: (a) A pilot lamp connected on the motor side of the circuit-breaker must be provided to indicate the presence of voltage on the line.

(b) A voltmeter and ammeter must be provided and suitably mounted and connected as a part of the control equipment.

MARKING: (a) A name plate must be provided giving the name of the manufacturer and the rating of the equipment in volts and amperes.

(b) All line and motor terminal connections must be suitably marked so that they can be readily identified.

CONTROL PANEL: The control panel shall be constructed of a high grade of electrical slate or marble or other approved material.

The supporting frame shall be so arranged that the bottom of the panel will not be less than 24 inches above the floor.

INSTALLATION OF APPARATUS: The control panel shall be located close to and within sight of the motor. If a pump room used for no other purpose and containing no other apparatus except the fire pump, its motor and its accessory appliances is provided, the controlling equipment shall be placed in this room.

The control panel shall be so protected that it will not be injured by water escaping from pump or connections.

Except where special permission is granted by the Fire Commissioner the controlling equipment shall be protected from mechanical injury by one of the following methods:

(a) Grille or lattice partitions so placed as to completely enclose the control panel and starter.

(b) The entire equipment of the panel and starter may be enclosed at the sides, front, back and top in a thoroughly substantial, ventilated sheet iron or steel cabinet of not less than No. 12 U. S. metal gauge in thickness with hinged doors with glass panel in front of pilot light. When panel is in a fireproof room and not subject to mechanical injury an enclosing cabinet shall not be required.

TEST OF EQUIPMENT: The entire equipment shall be subject to test and inspection by representatives of the Fire Commissioner.

POWER SUPPLY: Where the power supply can be obtained from two separate street feeders, two separate and distinct services shall be installed.

Where current is taken from an underground Edison three-wire system and the power lines are protected by approved conduit from a point where they enter the building to the control panel in the pump room, it will be considered an acceptable source of power supply.

Isolated Plant: Where the source of supply is an isolated plant located in the building an auxiliary service of sufficient capacity shall be obtained from some outside source.

Transmission Lines: (a) The lines between the power plants and the pump room must be of such number, so arranged and so located that there will be small chance of an interruption of service to the motor, due to accident to the lines. All wiring in the pump room must be in approved conduit.

Where the valves involved are large and the crippling of this pump service would seriously affect the protection of the property, at least two separate lines from the power plant or plants to the pump installation shall be provided. The lines must be run by separate routes or in such manner that a failure of both at the same time will be only a remote possibility.

(b) Each line between the power plant and pump room shall be of such size that its safe carrying capacity as given in Chapter 9 of the Code of Ordinances will not be exceeded by the load carried.

Where direct current motors are used, the voltage at the motors must not drop more than 5 per cent. below the voltage rating of the motors when the pumps are being driven at rated output, pressure and speed, and the lines between motors and power stations are carrying their peak loads.

When alternating current motors are used, the voltage at the motors under these same conditions must not drop more than 8 per cent. below the voltage rating of the motors.

(c) The overload protective devices at the power plants, and where provided at various points on the lines, must be of such rating and so set that they will open the circuit only under short circuit conditions.

Approved fuses may be used, if desired, except for the protection of the pump motor where circuit breakers are required. The fuses, however, must be of such size that an overload or short circuit at the motor or its control apparatus will not cause them to open the circuit, but instead, the circuit breaker protecting the motor.

TRANSFORMERS: Where it is necessary to install transformers they shall be installed in accordance with Chapter 9 of the Code of Ordinances.

RULES

Rule 49. **SIGNALLING DEVICES.** All buildings where variable speed control of fire pump motors is required shall be equipped with an approved coded closed circuit signalling system. The signalling stations shall be located one on each floor at main riser. This system shall be so arranged that a coded signal can be transmitted to the pump rooms. An eight-inch gong shall be provided in all pump rooms and at such other locations as the Fire Commissioner may direct. All apparatus used in connection with the signalling system shall be of an approved type and installed as outlined in rules governing the installation of interior fire alarm systems.

At alternate signal sending stations there shall be provided an approved closed circuit strap key enclosed in a sheet metal box equipped with a paracentric Fire Department lock and approved hinges.

The strap key shall be connected in series with the box circuit of the signal sending station.

A card of instructions shall be placed in the pump room giving code numbers of signalling stations, the pressures obtainable at different speeds of the motor and such other information the Fire Commissioner may direct.

Rule 50. **RELAY STANDPIPE SYSTEM.** All buildings hereafter erected exceeding 400 ft. from grade to highest hose outlet shall be provided with an intermediate combination gravity and suction standpipe supply tank and a fire pump as required under Schedule A.

Each tank shall have at least 5,000 gallons of water reserved for the fire lines and shall be connected to fire line system as described in Rule 30 for intermediate tanks except that in addition to the requirements of Rule 30, there shall be provided a long turn by-pass 8 inches in diameter around the tank check valve and the O. S. & Y. gate valves. An 8-inch O. S. & Y. gate valve SEALED CLOSED shall be provided in the by-pass line.

Each tank shall be provided with overflow and emergency drain lines as required in Rules 19 and 20, except that such lines shall drain to roofs of set backs on building, or into house drain lines providing the house drain line or lines are equal in sum total to the sum total in diameter of the drain lines.

The fire pump shall have a capacity of not less than 750 gallons of water per minute and shall deliver through the standpipe main feed riser at a pressure not less than 50 lbs. to the square inch at the highest hose outlet fed by said pump.

All fire pumps shall be located on a raised base at least 24 inches above the floor and on the floor below the supply tank, with the suction line as direct as practicable.

The pump discharge line shall be connected to the main feed riser feeding up, and outside the horizontal tank check valve line, and the upward swinging check valve in the main riser. An O. S. & Y. gate valve shall be provided at a point between the pump discharge connection and the upward swinging check valve SEALED OPEN.

The fire pump and motor shall be located in a watertight room as close to fire tower as practicable, properly drained by a 3-inch line to house drain or scuppers in exterior wall. The electric switch controlling the motor shall be marked on panel "FIRE PUMP SWITCH" in 1 inch white letters on a red background.

Rule 51. **NUMBERING ON VALVES.** All gate valves on tanks, fire lines and pumps shall be numbered by 3-inch red metal disc with white numbers 2 inches high secured to wheel of valves.

Rule 52. **PUMP ROOM DIAGRAM.** A white and black print drawn to a scale of one-quarter inch to the foot shall be provided in a glass frame showing the tank, fire pump, all pipe lines and valves. The number of each valve shall be shown in addition to purpose of each water line.

The print shall include instructions as to method of

starting and operating pump, closing main line, gate valve and opening by-pass valve.

Rule 53. **FIRE LINE TELEPHONE.** In all buildings where a variable speed control of fire pump motors is required there shall be provided a multiple telephone system with a master telephone in each pump room, and in the main lobby and individual telephones located on alternate floors near the main fire line riser.

The operation of the system shall be such that any individual telephone may call and converse directly with any master telephone. The master telephones may call and converse directly with each master telephone.

A six-inch vibrating call bell shall be located at the master telephones.

The master telephones in pump room below grade level shall be equipped with a loud speaking receiver so that the voice can be clearly and audibly heard at a distance of not less than fifteen feet from the receiver.

WIRING: The wiring for the telephone system shall not be smaller than No. 18 rubber covered wire installed in rigid iron conduit. The conduit system shall contain no conductors other than fire line telephone conductors.

The fire line telephone system shall be properly maintained and ready for use by the Fire Department at all times.

Rule 54. **MAIN LINE EMERGENCY CONTROL VALVES IN BUILDINGS OVER 400 FEET IN HEIGHT** (per Schedule A). At the base of the main feed riser or below the hose outlet valves on the first story; at each pump room elevation, and at each approximate one-third the height above the fire pump elevations and the pump or roof tank next above, there shall be provided O. S. & Y. emergency control valves in the main feed riser properly numbered and shown on the fire pump blue print heretofore described.

Rule 55. **EMERGENCY TOOL BOX.** Where fire pumps are required under these rules there shall be provided in each pump room an emergency fire department tool box, painted a fire department red, with 3-inch white letters reading, "Emergency fire line tool box." The box shall be secured to the wall and be fitted with a fire department lock and contain the following:

- 1—3-foot Stillson wrench.
- 4—2½-inch plugs with pipe threads.
- 4—2½-inch caps with hose threads.
- 2—Spanner wrenches of Fire Department pattern.
- 4—2½-inch double female hose connections, with Fire Department threads.

Rule 56. **EMERGENCY AND TESTING HOSE.** Where fire pumps are required under these rules there shall be provided in each pump room not less than two 50-foot lengths of rubber lined 2½-inch hose, of Fire Department quality, and one 1½-inch nozzle of controlling type. All couplings to be of Fire Department pattern and threads. Hose shall be supported by hooks secured to enclosure walls of pump room.

Rule 57. **LOCATION OF LOWER FIRE PUMP IN RELATION TO HORIZONTAL LINE CONTROL VALVES.** In a single main riser system the fire pump discharge line to riser shall be as short as practicable.

In a two (2) main riser system the pump discharge line to cross connection shall be located between the two risers. An emergency gate valve of the O. S. & Y. type, sealed open, shall be provided in the cross-connection on each side of the discharge line connection.

In a three (3) main riser system the pump discharge line shall be connected to the cross-connection on each side of the central riser. Three (3) emergency gate valves as above shall be provided as follows: One (1) at the base of the central main riser and one (1) on each side of the discharge line connection on the riser side.

In a four (4) main riser system the pump discharge line to the cross-connection shall be centrally located so as to

RULES

provide two risers on each side of pump connection. An emergency gate valve shall be provided in the cross-connection on each side of the discharge connection.

In a five (5) main riser system the pump discharge line shall be connected on each side of the third, or central riser, and shall be provided with gate valves located as described in a 3 riser system.

In a six (6) main riser system the pump discharge line shall be centrally located so as to provide three risers on each side of pump connection and shall be provided with gate valves located as described in a two and four riser system.

For the purpose of this rule a main riser is any vertical riser other than a branch riser with not more than three (3) hose outlets above the cross-connection.

Rule 58. EMERGENCY SAFEGUARDS. For the purpose of prolonging the use of the standpipe fire lines in case of failure or break, it is necessary to provide and properly locate emergency gate valves of the O. S. & Y. type as follows:

Rule 59. EMERGENCY VERTICAL LINE CONTROL VALVES. All standpipe fire line systems hereafter installed in buildings over four (4) stories or 50 ft. in height, and up to 400 ft., as described in Schedule B, shall be provided for as follows: In each riser an O. S. & Y. gate valve shall be provided below the first story hose outlet. If the interior stairway extends from hallway on first story to cellar the gate valve shall be located within the stairway enclosure below the first story level.

A two-way 2½-inch hose outlet tee with two 2½-inch approved valves, one of which may be capped, shall be provided in all main risers 6 ft. to 7 ft. above floor or stair landing level of first story with the O. S. & Y. control valve below the outlet tee.

Where a single main riser system or a main riser feed system is installed and the uppermost hose outlet exceeds 150 ft. above grade level there shall be provided in each riser O. S. & Y. gate valves, in addition to the gate valve below the first story hose outlet at approximately the level above grade hereafter specified.

SCHEDULE B

Height from Uppermost Hose Outlet to Grade	Total Number of Valves Required	Approximate Location of Valves Above Grade					
		1st Valve	2nd Valve	3rd Valve	4th Valve	5th Valve	6th Valve
150' to 200'	2 to 3	Below the 1 sty. outlet	75'	150'			
200' to 250'	2 to 3	"	75'	150'			
250' to 300'	3 to 4	"	75'	150'	225'		
300' to 400'	4 to 5	"	75'	150'	225'	300'	

Rule 60. UPPER CROSS-CONNECTION EMERGENCY CONTROL VALVES. When a two (2) main riser system is installed there shall be provided O. S. & Y. emergency gate valves between the risers in each cross-connection, located within the stairway enclosure when practicable, or as near the door to main stairway of fire tower as practicable, and where the uppermost hose outlet exceeds 150 ft. above grade, the risers shall be provided with O. S. & Y. gate valves as described in Schedule B.

Where a three (3) main riser system is installed there shall be provided O. S. & Y. gate valves between any two of the risers in each cross-connection and one in the central riser at each cross-connection.

Where a four (4) main riser system is installed there shall be provided O. S. & Y. gate valves in each cross-connection between the 2 central risers, so as to provide 2 risers on each side of control valves.

Where a five (5) main riser system is installed there shall be provided O. S. & Y. gate valves between the second and third central riser in each cross-connection and one in the central riser at each cross-connection as described in a 3 riser system.

Where a six (6) main riser system is installed there shall be provided O. S. & Y. gate valves centrally located in each cross-connection so as to provide 3 risers on each side of gate valve—as described in a two and four riser system.

Rule 61. LOWEST CROSS-CONNECTION CONTROL VALVES. When the building is provided with a fire pump as required by the Rules the gate valves required in the lowest cross-connection shall be located as described under location of Fire Pumps and Horizontal Line control valves.

Rule 62. FIRE TOWER RISER. Where the building is provided with an exterior enclosed fireproof stairway or fire tower the main riser shall be installed in such stairway and properly protected from freezing in accordance with these rules unless stairway is adequately heated.

Rule 63. VALVE SEALED OPEN. All O. S. & Y. gate valves shall be located in an accessible position and be sealed open in an approved manner.

Rule 64. LADDERS TO VALVES. Where the gate valve is more than 7 ft. above any floor or stair landing a single rung iron ladder with ½-inch rungs and not less than 10 inches between strings shall be provided at each gate valve properly secured at top and bottom.

Rule 65. VALVE SIGNS. Where the gate valves on the upper cross-connections are not located in the stair enclosure, a sign with red background and white letters not less than 3 inches high shall be painted on the face of the wall within the stairway enclosure on the story where the gate valve is located, which shall read as follows: "STANDPIPE CONTROL VALVE NO. 0 IN LOFT."

Where a standpipe riser is located in a fire tower a sign with red background and 3-inch letters as above shall be painted on the wall at fire tower exit door, which shall read: "STANDPIPE IN TOWER," except on that story on which the emergency control valve is located, there the sign shall read: "STANDPIPE CONTROL VALVE NO. 0 IN TOWER."

Rule 66. VALVES NUMBERED. All emergency control valves shall be numbered by means of a metal disc not less than 3 inches in diameter painted red with a white number not less than 2 inches high and shall be secured to wheel of valve by chain or metal clamp.

Rule 67. FIRE LINES PAINTED. All standpipe lines not located within a stairway enclosure or public corridor and including the siamese connection street riser wall collars and caps shall be painted a Fire Department red.

Rule 68. SIAMESE CONNECTIONS FOR FIRE DEPARTMENT USE. Each standpipe system shall be provided with one or more approved type 3 inch x 3 inch inlet siamese connections for use by the Fire Department as hereinafter set forth. When a building faces on but one street and has a frontage of less than 250 ft. and requires but one four (4) inch diameter standpipe riser one siamese connection shall be provided; where the street frontage exceeds 200 ft. in length and requires but two four (4) inch diameter standpipe risers two siamese connections shall be provided for each 200 ft. of street frontage or fraction thereof. Buildings exceeding 250 ft. in height shall have not less than two siamese steamer connections for each riser and buildings not more than 250 ft. in height shall have at least one siamese connection for each 6 inch riser. Buildings having frontages on more than one street shall have a siamese connection on each street front when the frontage is not continuous but in all cases where more than one siamese connection is required they shall be properly distributed, and not grouped, as the Fire Commissioner may direct.

Rule 69. SIAMESE HEADERS. Siamese headers shall be independent of each other and lead, as direct as

RULES

practicable, to riser or cross-connection header. There shall be at least 2 siamese for every 8-inch riser and at least 1 siamese for every 4 or 6 inch riser. Where there are more than one riser, the siamese headers shall divide on each side of any emergency control valve in the cross-connection, and such headers shall be equal in sum total to the sum total of all risers on either side of the emergency control valves.

No siamese header shall be larger than 6 inches. Siamese risers, when extending through sidewalk, shall be of bronze or fitted with a brass sleeve, packed with a waterproof compound between sleeve and riser.

Rule 70. SIAMESE OMITTED. Any building, other than theatre with stage, not over 45 feet in height shall not be required to have a siamese connection except when such building is on a water-front or when it is one of a group of buildings and has a cross-connection to the standpipe equipment in one or more of the other buildings.

Rule 71. LOCATION. Each siamese connection placed on the street front of a building shall be located not less than 18 inches and not more than 36 inches above the sidewalk level and shall be set in a horizontal position and shall be readily accessible for Fire Department use. Each siamese shall have cast in the body on top or on wall plate, in letters at least 1 inch in length and not less than $\frac{1}{8}$ inch in depth, the word "STANDPIPE."

The piping connecting the siamese with the standpipe equipment proper shall be not less than 5 in. in diameter where there are two or more 4 in. risers and not less than 6 in. in diameter for risers of 6 and 8 in. diameter. When there is but one 4 in. riser, connection from siamese may be 4 in. in diameter.

Rule 72. SIAMESE CHECK AND DRIP. In each line between the siamese connection and the standpipe system there shall be placed an approved type swing check valve located where practicable within 10 feet from the building wall. Between the siamese and its check valve there shall be placed a $\frac{3}{4}$ -inch automatic ball drip of an approved type which will close under a pressure of not more than 7 lbs. per square inch.

Rule 73. SIAMESE CONNECTIONS FOR FIRE-BOAT USE, EXCEPT WHERE THE SOURCE OF SUPPLY IS FROM THE STREET MAIN DIRECT. Siamese connection on piers or warehouses, etc., intended for fireboat use exclusively shall be $3\frac{1}{2}$ in. x $3\frac{1}{2}$ in. at inlets with Fire Department female thread. Between siamese and the system proper there shall be an approved type swing check valve, and between the check valve and the siamese either a $\frac{1}{2}$ -in. open drip without valve or cock, or a $\frac{3}{4}$ -in. automatic ball drip of approved type closing under a pressure of not more than 7 lbs. per sq. inch. Where systems have both fireboat and shore siamese the shore siamese shall have male connections and shall be without clappers, but shall have on each inlet a 3 in. gate valve with Fire Department male thread for hose connection. Check valve shall not be provided for the land end siamese.

Rule 74. HOSE OUTLETS. When practicable all hose outlets shall be placed within a stair enclosure. They shall be $2\frac{1}{2}$ in. in diameter, set not less than 5 ft. nor more than 6 ft. above the floor or landing as the case may be. Outlets and racks shall be located above the floor or landing and shall not be over a run of stairs or in a stair well. When impracticable to place hose outlets within the stair enclosure, the Fire Commissioner may permit them to be located immediately adjacent to a stair enclosure, in a conspicuous place, in which case there shall be painted upon the stair side of the wall of the stair enclosure a conspicuous sign in letters not less than 8 in. in height indicating the location of the outlet. Where there is a 4-in. riser system its termination above roof shall be a $2\frac{1}{2}$ -in. outlet hose valve properly capped.

Rule 75. MAIN ROOF OUTLETS. All 6 and 8-inch main riser systems which extend to intermediate or the highest roof level shall be provided with not less than three $2\frac{1}{2}$ -inch hose valve manifolds with male threads. Roof outlets shall be located not less than 24 in. nor more than 5 ft. above the roof and each valve shall be provided with regulation $2\frac{1}{2}$ -in. Fire Department caps. Where roof outlets cannot be located within a heated stair enclosure, the control valve shall be located below the roof and shall have a long stem extending above the roof with a wheel handle at the upper end. Between the long stem valve and the roof outlet there shall be a $\frac{1}{2}$ in. open drip extending to a sink or a $\frac{3}{4}$ in. automatic ball drip of approved type.

In buildings not exceeding 40 ft. in height hose outlets above roof shall not be required.

Rule 76. SPANNER WRENCH. A spanner wrench may be provided at each hose outlet valve, such wrench shall be of the gooseneck Fire Department pattern.

Rule 77. BRANCH LINE SIZE. No branch line may be less than 4 in. in diameter, except that any branch from a riser or cross-connection to but one hose outlet may be $2\frac{1}{2}$ in. if not over four (4) feet in length, and may be 3 in. in diameter if not more than twenty-five (25) feet in length.

Rule 78. NOZZLES. All $2\frac{1}{2}$ -in. fire hose shall be provided with approved smooth bore nozzles 15 in. in length, the outlet at the tip to be not less than 1 in. nor more than $1\frac{1}{8}$ in. in diameter.

Rule 79. HOSE. Each outlet other than the roof outlet shall have attached thereto $2\frac{1}{2}$ in. unlined linen hose, except that in buildings or premises that do not contain occupancies storing, handling or using inflammable motion picture films or nitro cellulose products, and which are not classified as hazardous, the Fire Commissioner may permit in addition to the $2\frac{1}{2}$ -inch outlet and hose the installation of $1\frac{1}{2}$ in. unlined linen hose and valve. There shall not be more than 100 ft. of hose at any outlet, as required by Section 581, Chapter 5, Code of Ordinances. No single length of hose shall be less than 50 ft.

All hose used in connection with the standpipe fire line system shall be at least equal in material and construction to the type of hose bearing the approval label of the National Board of Fire Underwriters.

Rule 80. COUPLINGS. Hose couplings for standpipe shall be equal to hose couplings of the regular Fire Department pattern and thread.

Rule 81. RACKS. All standpipe hose shall be suspended from racks of stamped steel, malleable iron or other metal equal thereto, of approved swing type, so designed and constructed that they will permit of ready and easy release of hose for use. The racks shall be supported securely and substantially from standpipe risers or wall, except that where a cast nipple of non-corroding material is screwed into the hose outlet valve the rack may be suspended from said nipple. The minimum thickness of nipple to be $\frac{5}{16}$ in. In no case will automatic racks be permitted.

Racks shall be not more than 7 feet 6 inches above the floor.

Rule 82. HOSE CABINETS. Hose racks may be installed in cabinets, provided the cabinets are conspicuously located within a stair enclosure, and are of a size sufficient to accommodate the entire equipment and permit of easy handling of hose and operation of valve.

In theatres cabinets may be permitted outside of stair enclosures, provided they are conspicuous, and that during performances the cabinets are illuminated by means of an electric lamp placed inside. Each cabinet shall have a clear

RULES

glass door (one panel only) without lock and shall have the words "FIRE HOSE" painted on the glass in letters not less than 2½ inches in height.

Rule 83. REGULATION AND REDUCTION OF PRESSURES. All buildings hereafter erected over 250 ft. in height and which do not exceed 400 ft. in height from the grade to highest hose outlet shall be provided with a roof gravity tank of not less than 5,000 gallons.

Where the above described height exceeds 400 feet, fire pump and suction tanks shall be provided as described under Schedule A.

Where the pressure on any hose outlet valve exceeds 50 lbs. either approved outlet pressure reducers, set as prescribed by the Chief of the Fire Department, or the Board of Standards and Appeals, shall be provided at such outlets.

Rule 84. BUILDINGS IN COURSE OF ERECTION. In buildings in course of erection standpipe fire lines shall be carried up with each story after the structure reaches the 7th story or a height of 85 ft., and there shall be provided an outside siamese pumper connection in a proper and accessible place. Regulation hose outlets on each story above the 2nd shall be provided as the work progresses. Hose outlets shall be provided with male threads of Fire Department pattern, with hose and nozzle attached, to at least every second outlet. The top and bottom of each riser and all cross connections shall be securely capped at all times during the progress of the work except when work on the standpipe fire line is in progress at that point. Temporary standpipe risers used in construction work and not less than 3 inches in diameter for buildings, not exceeding 400 ft. in height, and of larger diameter, in buildings exceeding 400 ft. in height, when maintained to supply water at all times, may be accepted in lieu of the regulation standpipe, provided it is equipped with hose outlets, hose and siamese as required above.

Elevators or hoists shall be provided as required in Rule 6.

Rule 85. PLACES COVERING LARGE AREAS. Ship yards, oil storage plants, amusement or exhibition parks or other enclosures when deemed necessary by the Fire Commissioner shall have one yard hydrant and hose for each 20,000 sq. ft. of area, but in no case shall there be more than 250 ft. distance between hydrants. Hydrants and sufficient approved hose and a smooth bore 1½-inch Underwriters playpipe shall be placed in an approved hose house, painted red, with words "FIRE HOSE" in 6-inch white letters on door. Where the area exceeds 20,000 sq. ft. and not exceeding 40,000 sq. ft. in area, a gravity tank of at least 20,000 gallons capacity, elevated 50 ft. above the yard, or 25 ft. above the highest structure in the yard, or a fire pump of at least 1,000 gallons a minute capacity, with a suction tank of at least 25,000 gallons capacity, or river supply shall be provided. Plants exceeding 40,000 sq. ft. in area shall be provided with a fire pump of not less than 1,000 gallons per minute capacity, suctioning from a tank or sump of at least 30,000 gallons capacity. The Fire Commissioner may permit suction from a river or well if in his opinion the required quantity of reasonably clean water may be obtained thereby, except that where river suction is proposed and standpipe primary water supply is taken from street main, approval of the proposition shall be obtained also from the Department of Water Supply, Gas and Electricity. In addition to yard hydrants, the Fire Commissioner may require one Monitor nozzle with remote control for each 40,000 sq. ft. of area or fraction thereof when in his opinion an unusual hazard exists or may exist. Monitor nozzles shall be located as ordered by the Fire Commissioner.

Standpipe risers may be connected to yard hydrant systems when such systems are provided with gravity tanks in accordance with this rule, or when same conforms with Rule 9, Subdivision A (city main connection).

Yard hydrant systems connected to city main shall be provided with Post Indicator valve located in an accessible posi-

tion. The Post Indicator valve shall be sealed or locked open and be painted a Fire Department red.

Yard hydrant systems with more than one hydrant shall not be connected to City mains outside of the high pressure fire service area, unless approved by the Board of Standards and Appeals.

Provision for steamer connections, fireboat connections, pressure reliefs and general layout of plant standpipe systems shall be made by the Fire Commissioner as his judgment may dictate for each individual case.

Fire extinguishing equipments in addition to the foregoing shall be prescribed by the Fire Commissioner for all oil storage plants, oil refineries, fire work plants and other plants when deemed by the Fire Commissioner as presenting unusual fire hazards.

Rule 86. THEATRES, ETC. In every theatre or opera house or other building used for theatrical or operatic purposes or amusement purposes as per Section 520, Chapter 5, of the Code of Ordinances, the standpipe fire line equipments in addition to the tank shall also be supplied by approved electric pump or pumps having a capacity of at least 250 gals. per minute at 100 lbs. per square inch in buildings without occupancy above the roof and at 125 lbs. per square inch pressure in buildings having any occupancy above the auditorium roof. Power for pumps shall be supplied by electric motors of sufficient horsepower to drive pump without sign of overload. Pumps shall be bypassed to suction tanks, as provided for elsewhere in these rules under FIRE PUMPS. Pumps shall suction from steel or reinforced concrete tanks of not less than 5,000 gallons water capacity. Pumps shall deliver initial supply of water and shall be connected to an approved electric device which, upon a reduction of pressure below the allowable minimum, will automatically start the pump and, upon a restoration of the required pressure, will automatically shut off the pump. The automatic starting device shall be set to cut in at 60 lbs. pressure and to cut out at 80 lbs. pressure. In addition to the automatic starting device there shall be provided a hand starter for emergency use and there shall also be provided a pressure gauge on the panel board.

Rule 87. STREET MAIN CONNECTIONS. Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each standpipe connection to a street main shall be not less than 4 in. in diameter and shall have a conveniently accessible control valve in the line at or near the curb or when practicable in a more remote location. The control valve shall be fitted with a frost and waterproof box not less than 4 ft. nor more than 6 ft. below the curb with a fixed stem extending to a compartment at the level of the sidewalk. The cover shall be bolted to the casing, and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be of an indicating pattern, operating by a special socket wrench approved by the Department of Water Supply, Gas and Electricity. The water meters used in standpipe fire line supplies shall be of approved type allowing free flow of water. Supply through the meter shall be checked against the Fire Department Siamese Supply and against tank supply.

Where, due to the presence of a vault under the sidewalk and extending to within 18 in. of the curb, it is impracticable to install a control valve box at the curb, there shall be placed in the feed line from the main a control valve located not more than two feet from the point of entry.

Rule 88. HIGH AND LOW WATER ELECTRIC ALARMS. The high and low water electric alarm for gravity tanks shall be so constructed and arranged that a decrease in the quantity of water below the required fire line reserve shall cause an alarm to be given in either the pump room or engineer's room. An annunciator shall be provided in connection with the alarm system. The high

RULES

and low tell tale electric devices for gravity tanks shall be so constructed that they will not be affected by moisture and the parts shall be heavy and rugged. The level of the water in the gravity tank shall be indicated by an approved device.

The audible signalling device for high and low water electric alarm shall consist of vibrating gong of at least 6 inches diameter of the enclosed type and arranged for conduit installation, the same to be operated automatically. The control cabinet shall be arranged for conduit installation and shall be located in the engineer's room or pump room where it will be under supervision of the person in charge of the standpipe supply.

All wiring shall be installed in rigid conduits and the installation shall be in accordance with the provisions of Chapter 9 of the Code of Ordinances. Control panels must be approved by the Board of Standards and Appeals.

The following sources of energy may be employed and are given in their order of preference:

1. Public utility electric light and power systems.
2. Independent electric generating plants.
3. Storage batteries in duplicate.
4. Primary batteries of closed circuit type.

When the system is connected to a 110 volt lighting service a suitable cut-out is to be provided and it shall be enclosed in a locked or sealed metal cabinet. The connection to system shall be the first connection on the house side of and as near as practicable to the meter. When batteries are used to operate the system they shall be placed in an approved cabinet provided with a lock and key.

Rule 89. DRY PIPE VALVE. A dry pipe valve shall be taken to mean a valve automatically controlling the water supply of the standpipe system in such a manner that under normal conditions its piping system will be maintained dry, but in the event of a hose valve being opened, the dry pipe valve automatically releases the water into the standpipe system.

In refrigerating plants or in unheated buildings, piers or warehouses where wet lines are impracticable, dry pipe valves may be installed.

Type A, in which the valve is actuated by the release of compressed air in the standpipe system due to the opening of a hose valve; and Type B, in which the valve is actuated by an approved trip under electrical control of an approved non-coded or coded closed circuit system operated from the control station at each hose outlet. Dry pipe valve shall be located as near as practicable to the standpipe system, in an enclosed place, protected from mechanical injury and freezing.

When Type A valve is installed the air pressure in the standpipe system under such dry pipe valve control shall not exceed 40 lbs. per sq. in. nor be permitted to fall below 25 lbs. per sq. in. nor shall it be less than one-sixth of the water pressure in any case. Not more than 16 hose outlets shall be supplied through one dry pipe valve. The air compressor shall have a capacity of not less than 11 cu. ft. per minute, and the air supply for the pump shall be taken, if possible from a room containing dry air, or it shall pass through a drying chamber containing calcium chloride in order to avoid the introduction of moisture into the system.

A closed circuit alarm shall be provided in connection with each dry pipe valve installation; the electrical layout shall be approved by the Fire Commissioner.

Rule 90. MONITOR NOZZLE. Monitor nozzles shall be so constructed and designed that they may be moved in both vertical and horizontal arcs, and shall be so located that streams may be brought to bear on all portions of the plant or building within the effective radius of stream play and such other exposing properties as may be within this radius. They shall be supplied from connections to the standpipe system not less than 4 in. in diameter with remote control.

Rule 90a. ROOF SETBACK HOSE OUTLETS. A

two-way hose outlet tee, with one outlet properly capped, shall be provided in the standpipe risers on floor level of any intermediate roof setbacks on all buildings exceeding one hundred feet in height when the following conditions exist:

1. When the building has a frontage of fifty feet or over.
2. And there are adjoining roofs, window openings or other exterior exposures within fifty feet of the roof parapet.
3. And the depth of the setback exceeds ten feet.
4. And the setback exceeds one hundred feet above grade level.

Rule 91. EXISTING STANDPIPES. Standpipe fire line equipments which were approved by the Fire Commissioner as conforming to the rules and regulations then being enforced, shall not be required to be altered to conform to the provisions of these rules, except where substantial additions or extension in height or area is made to the building, when these rules shall apply if deemed advisable or necessary by the Fire Commissioner, and except that all such fire line systems shall have or be provided with the following:

1. Roof gravity tank shall have a reserve of approximately 3,500 gallons of water for fire line.
2. The bottom of the gravity tank shall be not less than 20 feet above the hose outlet in the highest story.
3. A 4-inch emergency drain with gate valve.
4. House lines taken from outside of tank.
5. Tank properly heated and provided with overflow line.
6. Tank shall not be fed through fire line.
7. Tank to be fed at not less than 65 gallons a minute by pump or direct city connection.
8. An iron ladder of substantial construction, properly braced, extending to top of tank.
9. At least one gate valve at the downstream side of tank check unless a gate valve has been installed on either side of check.
10. Hose valves and hose not less than 2½ inches in good serviceable condition. No automatic hose valves permitted.
